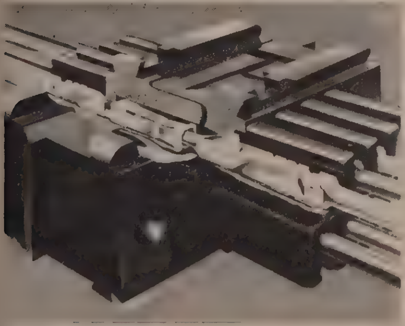
Cinch Super D* Connector System

Exclusive new plastic D-Subminiature connector. Available in 9, 15, 25 and 37 contact sizes. Connectors available with plain mounting holes, with threaded bushings, with latch blocks, and with latch blocks and threaded bushings.

Connectors are captivated in two-piece, snap-on grey hoods. Hoods are available with latches or with filler ends.

Contact material: Copper base alloy.
Contact plating: gold in contact mating area and gold on contact terminating area, with copper underplate.
Termination: Insulation displacement with one of three TRW Cinch terminating tools. Stranded wire 22-26 AWG with .052" diameter max. PVC insulation is displaced and wire is driven into termination to form four positive contacts on each conductor. See tooling section.
Metal stay band/strain relief: .036" (9.14mm) steel.
Polarization: D or keystone shape insures one way mating.
Hoods: Molded phenylene oxide.
Wire strain relief: One required for 9 contact size. Two required for other sizes.
Withstanding voltage rating: 1000 volts RMS AC—sea level. 1400 volts DC.
Current rating: 3 AMPS.
EIA standards: Surpasses EIA STD. RS449 for 9 and 37 contacts interface for DTE and DCE equipment. Also meets RS232 for 25 contact size.
MIL-C-24308: Super D is designed to meet applicable performance requirements of MIL-C-24308.
UL Registered, File No. 18071



Insulation displacement termination
Fast 4-point insulation displacement termination with TRW Cinch tooling.

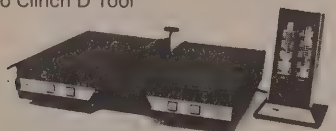
Super D and Super Shielded D Terminating Equipment

Auto Clinch D Tool



Certi Clinch D Tool

Uni Clinch Hand Insertion Tool

Super D Manual Tool

Auto Clinch D Semi-Automatic Termination Tool
Auto Clinch D is a semi-automatic, pneumatically powered and electrically controlled termination machine that can terminate Cinch Super D 25 contact connectors in less than one minute. It employs selective programmer and a common nest for all four sizes and can be optionally equipped with Remote Visual Color Code display for training operators or for reading special wire sequences. It has provision for omission of wires.
Part No. 999-599-11-11-432

Certi Clinch D Field Termination Tool
***For 24-26 AWG Wire**
Certi Clinch D is designed for mass termination of individual wires, eliminating wire stripping, soldering and crimping. It handles all four connector sizes, is readily portable and requires no set-up time and little operator time. Rugged, all metal construction affords trouble-free long life.
*For 22 AWG consult factory.
Part No. SD-CC for Super D
Part No. SD-CCWN for Super Shielded D
Conversion Nest for SD-CC
Part No. SD-CCN

Uni Clinch D Single Wire Hand Insertion Tool
Designed to insert one 22-26 AWG wire at a time, Uni Clinch D is used as a field repair tool by field service engineers.
Part No. SD-UC.

Super D Manual Stay Band Tool
Designed for applying the steel stay band/strain relief to the cable before termination of wires to the connector, the manual Stay Band tool applies both Stay Band sizes to the full range of cable sizes.
Part No. SD-MSBT

Super D Metal Shell Connectors

I.D.C. Connector

D-Subminiature connectors in 9, 15, 25 and 37 contact sizes in standard D-sub. metal shell or with bright tin finish on shell. Termination is insulation desplacement for cost saving. Connector uses same black hoods, add-on latching blocks, hood and mounting screws as in the super D adaptor system. It may be used for grounding in applications using shielded cable.

Insulator: Molded glass filled polyester UL 94V-O.
Contact material: Copper base alloy.
Contact plating: Gold on contact mating area and gold on contact terminating area, with copper underplate.
Termination: Insulation displacement with same tools as the Super D Connector system except an additional nest is required. Stranded wire 24-26 AWG with .045″ diameter max. PVC insulation is displaced and wire is driven into termination to form four positive contacts on each conductor.
Withstanding voltage rating: 1000 volts RMS AC—sea level
1400 volts DC
Current rating: 3 AMPS

Cinch Super D Adapter System

For D-Subminiature Connectors

Specially designed black two-piece snap-on plastic hoods, with and without latches, captivate metal shell D-Subminiature connectors. Add-on metal latching blocks are screw mounted on two connector mounting flanges to accept the latch locks.

For cable to panel screw mount, the mating metal shell D-Subminiature connector is captivated in a filler end hood with screws. Screws are screwed into screw lock assembly for semi-permanent locking.

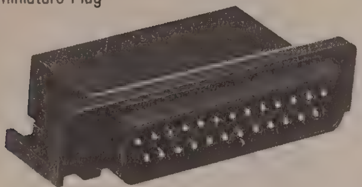
Cinch All Plastic D-Subminiature Connectors

With Straight Or Right Angle P.C. Tails

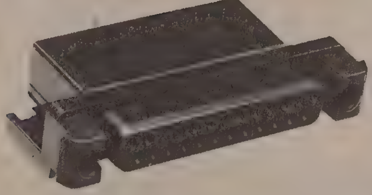
All Plastic D-Subminiature Socket

All Plastic D-Subminiature Plug With Latching Blocks And Threaded Bushing

All Plastic D-Subminiature Plug



All Plastic Socket With Latching-Blocks



Plug or socket connectors mount on a P.C. board and are intermateable with all D-Subminiature connectors, including insulation displacement, solder or crimp termination designs. Available in 9, 15, 25 and 37 contact sizes.

Connectors available:
1) With plain flanges with either plain mounting holes or with 4-40 threaded bushings.
2) With flanges with latching blocks with plain mounting holes or with 4-40 threaded bushings.

The RS 449 integral latch block option on flanges offers the interface for the quick release Super D latching system. Use gray plastic Super D system hoods or black plastic Super D adaptor hoods.

The combination of insulation displacement Super D connectors, hoods and hardware with all plastic D-Subminiature P.C. board connectors provides an extremely cost effective, yet highly reliable interconnect system.

TRW Cinch ruggedized mounting flange has an increase material cross section to minimize flange fracturing or damage. The extra cross section also provides more bearing length for the threaded bushing to inhibit its being over torqued during assembly.

The threaded bushing option in the mounting flange simplifies the connector attachment to the equipment panel or to a P.C. board. Eliminates the need for a separate nut and the handling of a loose part.

Connector contacts are positively retained in the insulator to prevent loosening during wave soldering.

Dual mount flange on straight P.C. connector combines the panel mounting flange function with the P.C. board stand-off to eliminate the need for separate bushings and added assembly costs.

Insulator: Black polyester, UL rated 94V-O.

Contact Material: Copper base alloy.

Contact Plating: Selective gold over nickel. Gold flash on tail. Other plating options available. Consult factory.

Termination: Straight and right angle DIP solder tails for 1/16" P.C. boards. Other tail lengths available. Consult factory.

Polarization: D or keystone shape insures one way mating.

Withstanding Voltage: 1000 volts RMS.

Current Rating: 3 AMPS.

Operating Temperature Range: -55 C to +125C.

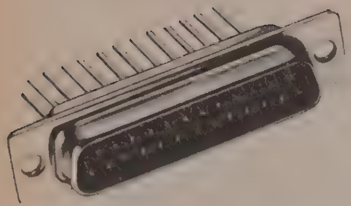
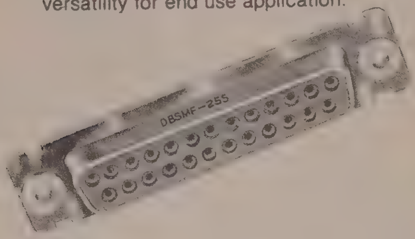
Cinch D-Subminiature Connectors

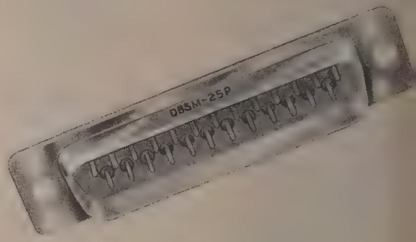
These high density connectors are designed for applications where space and weight are prime considerations. The variety of materials, contact layouts and contact termination options available in the major D-subminiature lines, along with the available accessory hardware, provides versatility for end use application.

All D-subminiature connectors will intermate if insert arrangements correspond.

Connectors are individually packaged in heat-sealed containers to assure extended shelf life.







Materials, specifications and ratings

Name Pt. No. Designate	Insulator Material	Operating Temp. Range	Contact Material		Plating	Contact Termination	Maximum Voltage	Maximum Current
			Pin	Socket				
Basic D D*	Two-piece nylon	−65°F to +250°F	Brass	Phosphor Bronze	Gold over Nickel	Non-Removable: 1. Solder Pot 2. .025″ (.635 mm) sq. x .375″ (9.525 mm) Two level wire wrap 3. .040″ (1.016 mm) dia. printed circuit terminal for 1/16″ (1.588 mm) P.C. boards	1250 Volts AC RMS sea level	5 Amps
Basic D Basic D II D*	Two-piece Diallyl Phthalate Per MIL-M-14 Type GDI-30	−65°F to +275°F	Brass	Phosphor Bronze	Gold over Copper	Non-Removable Solder Pot	1250 Volts AC RMS sea level	5 Amps

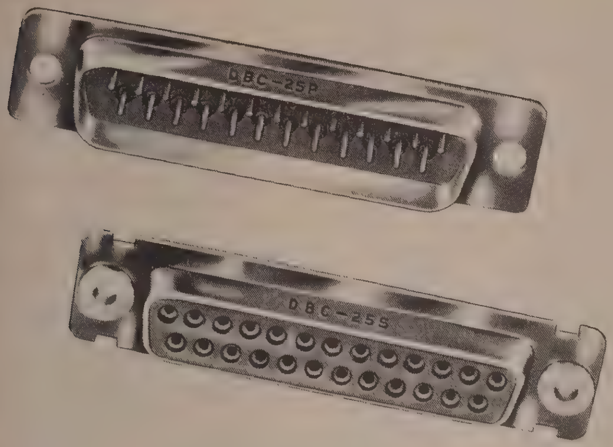
Non-Removable: 1. Right Angle P.C. terminal w/.024″ dia. for up to 3/32″ board. 2. Straight P.C. terminal w/.024″ dia. for up to 3/32″ board.	1000 Volts AC RMS sea level	5 Amps
D*A	Two piece Glass Filled Thermoplastic	−65°F to +250°F	Stamped: Copper Alloy	Stamped: Copper Alloy	Gold over Nickel in contact area with gold flash overall or Gold flash overall	Crimp, Insulation grip	1000 Volts AC RMS sea level	5 Amps
Super Solder D	Diallyl Phthalate	−65°F to +125°F	Phosphor Bronze	Phosphor Bronze	Gold/ Copper	Solder	1100 Volts AC RMS	5 Amps

Cinch D-Subminiature Connectors

Econo D



The TRW Cinch Econo D* subminiature connector is designed for commercial applications where space, weight, and economy are important considerations.

It is especially suited to plug-in module, cable to panel and cable to cable installations, in computers and peripherals, test equipment, communications equipment and a wide range of other applications.

The Econo D Series utilizes rear-release crimp snap-in contacts, that are readily inserted and removed by means of a simple, expandable insertion/extraction tool.

It offers these important features:

- Mates with existing Basic D and Series 1, Series 3 and Econo D connectors.
- Operates at temperatures to 250°F (120°C).
- Size 20 contacts accommodate wire size #18 through #30 AWG stranded wire. (Screw Machine) and, size #20 through #28 AWG stranded wire (Stamped).
- Closed-entry sockets automatically corrects misaligned pins.
- Rated at 5 amperes for #20 wire.
- Available in 9, 15, 25, 37, and 50 contact arrangements.
- Variety of contacts for hand and machine assembly and PC board insertion.

A Complete Line of Hardware and accessories including junction shells, hoods, dust caps and lock assemblies is available and listed in TRW Cinch Catalogs CD-12, and C-46.

For Immediate Delivery from stock, contact your TRW Cinch D-subminiature industrial distributor.

Condensed Data

Standard Materials & Finishes

Shell: Steel, yellow chromate over zinc plate or electroless tin.

Insulator: D*C and D*U molded glass filled polyester UL94V-0.

Contacts:
- Machined — Copper alloy.
- Stamped — Cadmium copper.

Contact Plating:
- Selective Stamped — gold over nickel at contacting area, with gold flash overall.
- Gold Flash Stamped — gold over nickel.
- Machined — gold over nickel.

Rivets and Washers: Stainless steel (float mounting).

Mechanical Features

Coupling: Friction and lock accessories.

Polarization: Keystone-shaped shells.

Contact Type: Crimp snap-in.

Electrical Data

Contact Termination: Crimp.

Wire Size:
- Size 20 Contacts — #20, #22, and #24 AWG stranded wire.
- Size 20-18 Contacts — One #18 or two #22 AWG stranded wires.
- Size 20 Stamped — #20 through #28 AWG stranded wire.

Current Rating: Size 20 Contacts — 5 amps.

Voltage Rating

	Sea Level	20,000 ft.	70,000 ft.	120,000 ft.
Average Flashover:	1500VAC	1000VAC	500VAC	255VAC
Test:	1000VAC	650VAC	325VAC	175VAC

Voltage Drop: Size 20 Contacts — 2.67 millivolts max. per amp when tested in accordance with MIL-STD-202, Method 307.

Cinch D-Subminiature Connectors

Rear Release Contact Retention

TRW

The Econo D connector features a rear insulator with integral, molded contact retaining tines. These plastic tines permit the insertion and extraction of contacts from the rear of the connector with a simple, expendable plastic insertion/extraction tool.

During contact insertion, the retaining tines expand as the contact passes thru. These rugged tines snap into place behind the contact shoulder when the contact is fully inserted. The tool is inserted to expand the tines, allowing easy extraction of the wired contact.

The retention system and the integral contact retaining tines guarantee functional reliability in many environments.

- Mates with existing D types.
- Operates in temperatures to +250°F.
- Crimp snap-in contacts.
- Highly reliable socket contacts.
- Insertion/extraction with expendable tool.
- Corrects misaligned contacts.

Stamped Contacts

Stamped contacts are supplied loose for use with hand crimp tools, or on reels for use with the semiautomatic machines, selectively gold plated or with gold plate overall. These contacts will accommodate wire sizes #20 through #28 AWG by adjusting or changing the crimp die set. (For other wire sizes consult factory.)

How to Order

Types D*MA, D*M & D Connectors

D B MA M R 15 P A * FO

Series Prefix

Shell Sizes
A, B, C, D, E

No designator — 2 piece nylon
Insulator — solder type
Contacts — Basic D series
M: Monobloc insert — solder type contacts
Series 1 series
MA: Monobloc insert — crimp type contacts
Series 3 series

M: For connectors having .00005 gold plate over .0001 min. copper plate on contacts — omit for standard Series 1 and Series 3 only

No designator — standard .120 diameter hole
E — 4-40 clinch nut for rear panel mounting
F — float mounts for rear panel mounting
R — reverse float mount for front panel mounting

Contact Arrangement, See pages **2•1629**, **2•1637**

P — Pin
S — Socket

Printed Circuit Terminal Modifier — Applicable to the Series 1 series (monobloc, solder type).

A — Right-angle printed circuit connector with .040 diameter terminals; with bracket assembly and accommodates printed circuit boards up to 1⁄16 maximum thickness. (Plug only.)

B — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 3⁄32 maximum thickness.

H — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 1⁄8 maximum thickness.

L — Right-angle printed circuit connector with .030 diameter terminals; with bracket assembly and accommodates printed circuit boards up to 3⁄32 maximum thickness. (Plug only.)

Printed Circuit Terminal Modifier — Applicable to the Basic D series.

V — Straight printed circuit connector with .040 diameter terminals; accommodates printed circuit boards up to 1⁄16 maximum thickness.

Modification — consult factory

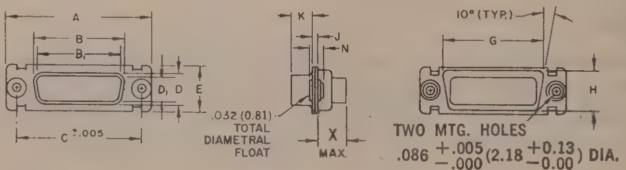
Connector less contacts (FO not stamped on connector)

Standard Dimensions

STANDARD SHELL

	Dim. X	mm
Basic D	.312	7.92
Series 1	.390	9.91
Series 3	.375	9.50

SHELL WITH FLOAT MOUNTS



It is recommended that only one assembly, either pin or socket, be float counted. For front panel mounting use reverse float mount.

* Not applicable due to variable rotation.

Current Ratings

TRW Cinch vs. Military.

The TRW Cinch rating for #20 contacts in 5 amps, which means 5 amps for all contacts simultaneously. MIL-W-5088 rates #20 contacts at 7.5 amps maximum. The expansion is as follows:

MIL-W-5088B, Paragraph 3-9-2-1-2 specifies:

"Table I current ratings for cables in bundles are based upon 15 or more cables carrying no more than 20% of the total carrying capacity of the bundle."

Table I specifies a current rating of 7.5 amps maximum for single wires in bundles of 15 or more wires. NOTE: Wires and contacts are both considered to be in the category of conductors.

Explanation

If 15 wires (normally rated at 7.5 amps per wire maximum, or at a total bundle current of 112.5 amps) are not to carry more than 20% of the total 112.5 amps, the **average** current rating per wire is 20% of 112.5 amps (total bundle capacity) divided by 15 (number of wires).

Conclusion

The Military rating of #20 contacts or wires is 1.5 amps average (based on 15 wires per bundle or 15 contacts per connector) vs. a TRW Cinch rating of 5 amps.

NOTES:

1. Free air condition. Connectors not shielded from ambient condition in any manner.
2. Confined condition. Connectors placed in insulated box (1 x 2 x 3.5) during test, with no moving air.
3. Average maximum temperature stabilization: 1 hour or less in all cases.
4. All contacts in each mated pair tested were wired in series with specified current flowing.
5. Ambient condition 77°F, 50% RH.

Cinch D-Subminiature Connectors

Basic D*

General Information

The TRW Cinch Basic D Plug utilizes a two-piece nylon insulator housed in a variety of five basic shell sizes E, A, B, C, and D. These shell sizes contain 9, 15, 25, 37, and 50 #20 solder pot contacts respectively. Standard contact terminations accommodate up to #20 AWG stranded wire. Current rating is 5 amperes.*

The keystone shape of the shell assures proper polarization. Coupling is by means of friction; locking accessories are available. Also available are shells with float mounts. Connectors with #4-40 or #2-56 clinch nut mounts may be provided.

With standard nylon insulators, operating temperatures range from −65°F to +250°F (the limiting factor being the insulator material). When diallyl phthalate insulator is substituted, the operating temperature range is from −65°F to +275°F.

* Military rating of #20 contacts on wires is 1.5 amps average, and 7.5 amps maximum. See explanation on page 2•1629.

Materials and Finishes

Shells: Steel, cadmium plated with yellow chromate supplementary coating.

Pin Contacts: Brass, gold plated over nickel plate.

Socket Contacts: Phosphor bronze, gold plated over nickel plate.

Insulators: Nylon, two-piece.

Float Mounting Rivets and Washers: Stainless steel.

For listing of applicable specifications, see page 2•1629.

Performance Data

Voltage Rating: See tabulation on page 2•1629 .

Insulation Resistance: Greater than 5,000 megohms, determined in accordance with MIL-STD-202D, Method 302, Condition B.

Contact Resistance: 2.7 milliohms maximum @ 7.5 amps.

Individual Contact Separation Force: 1 to 8 ounces.

Moisture Resistance: Exceeds test requirements of MIL-STD-202D, Method 106.†

Vibration: Exceeds test requirements of MIL-STD-202D, Method 204, Condition B.†

Shock: Exceeds test requirements of MIL-STD-202D, Method 213, Condition G.†

Corrosion Resistance: Exceeds requirements of 48 hr. exposure to salt spray in accordance with MIL-STD-202D, Method 101C, Condition B.†

† As referenced in MIL-C-24308.

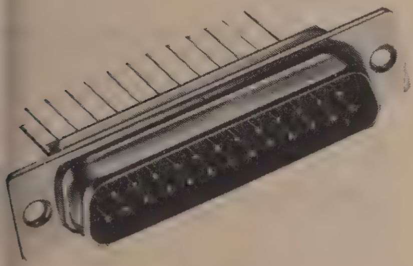
Wire Wrap Terminals

Rack and Panel Connectors with 0.025″ Square Wire Wrap* Tails



TRW Cinch D-Subminiature Connectors are designed for applications where space and weight considerations are prime considerations. These high contact density connectors are especially well-suited for aircraft, missile and ground support installations. They are designed to meet or exceed most of the requirements of MIL-C-24308.

These wire-wrap versions are available in 9, 15, 25, 37 and 50 contact sizes in both plug and socket types. Three tail lengths are available: 3⁄8″ long to accommodate two wires, 1⁄2″ and 37⁄64″ long to accommodate three wires. Socket contacts and plug pins are copper alloy gold plated over nickel. Insulators are two-piece nylon, and the outer shells are yellow chromate finished, cadmium-plated steel.

These D-Subminiature Connectors will intermate with any other D-Subminiature Connector of the same insert configuration. Mating connectors with standard termination may be adapted for cable attachment by means of accessory junction shells with integral clamps.

Immediate Delivery from TRW Cinch Distributors can be provided on the 3⁄8″ long termination types.

Cinch D-Subminiature Connectors

Series 1*

TRW

General Information

TRW Cinch D*M Connectors feature solder pot contacts in a monobloc insulator for improved temperature characteristics and increased moisture resistance. Two insulator types are available: (a) combination layouts with coaxial and/or high voltage contacts plus standard AWG wire contacts, and (b) layouts with standard AWG wire contacts only. The five amp* solder pot contacts accommodate wire sizes up to #20 AWG stranded wire. Socket contacts are of the closed entry type. Operating temperatures range from −65°F to +300°F.

Combination layouts are supplied with unfilled coaxial and/or HV contact cavities. Coaxial and HV contacts must be ordered separately, and may be used interchangeably in any of the layouts listed. HV contacts accommodate wire sizes up to #20. In both, coaxial and HV contacts, the center contacts have solder type termination. Braid, on coaxial contacts, may be soldered or crimped to the outer conductor. Both of the above contacts are snap-in, removable type.

Standard coaxial and HV plugs contain female center contacts; receptacles contain male center contacts. Special reversed versions are available. Pin connector assemblies accommodate coaxial and HV plugs only; socket assemblies accommodate receptacles. Connector assemblies and contact inserts are matched and color coded to ease assembly. Pins and plugs are coded red, sockets and receptacles are coded blue. N insertion tool is required. Coaxial and H inserts may be removed with TRW Cinc Tool CET-C6B.

Five basic shell sizes are available Polarization is by means of the keyston cornered shell. Coupling is by friction locking accessories are available. Shell with float mounts are also available.

Printed circuit plugs are listed on page **2•1633**, **2•1634** with other popular modifications. For additional modification and special plugs, consult factory. Accessories such as junction shells are shown on pages **2•1640-2•1642**.

* Military rating of #20 contacts on wires is 1.5 amps average, and 7.5 amps maximum. See explanation o page **2•1629**.

Materials, Finishes and Types

Shells: Steel, zinc plated with yellow chromate supplementary coating.

Insulators: Diallyl phthalate, glass fibre filled, medium green color, monobloc construction.

#20 Contacts (Standard): Pins and sockets: brass, gold plated over nickel.

Coaxial Contacts (Standard):

Outer contact:

Plugs: brass, gold over nickel

Receptacle: Beryllium copper, gold over nickel.

Center female contact: Phosphor bronze, gold over nickel.

Center male contact: Brass, gold over nickel.

Insulator: Teflon

High Voltage Contacts (Standard):

Socket Contact — Phosphor bronze, gold plated over silver plate.

Pin Contact — Brass, gold plated over silver plate.

Insulator — Nylon (temperature range: −65°F to +250°F).

For listing of applicable specifications see page **2•1629**.

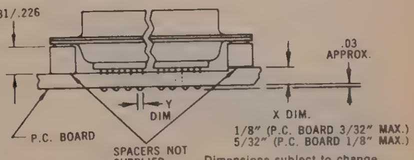
PC Connectors

Straight PC Contacts



Dimensions subject to change

These compact, high contact density connectors are designed for direct, above board mounting to printed circuit boards up to ⅛″ thick. They provide a highly reliable means for direct inline interconnection of printed circuitry with motherboard mounted sockets.

Part No. Printed Circuit Terminal Modifier	X	Y ±.003
B	3/32	.040
H	⅛	.040

For additional dimensions see table on page 2•1628.

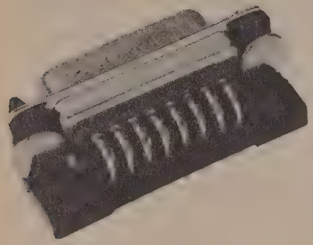
Cinch D-Subminiature Connectors

Series 1*

TRW

PC Connectors

Right Angle PC Contacts



These right-angle plugs are available in 9, 15, 25, and 37 contact configurations. The standard units listed herein are supplied with 0.040″ or 0.030″ nominal diameter pins that extend 0.093″ below the 90° bracket for 1/16″ boards and .135 for 3/32″ boards, other pin diameters and lengths may be obtained on special order.

Design and construction of these connectors meets or exceeds many of the requirement of MIL-C-24308.

These right-angle D-Subminiature connectors will mate with any other D-Subminiature connector of the same insert configuration. Mating connectors may be adapted for cable attachment by means of accessory junction shells.

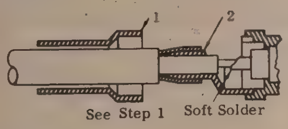
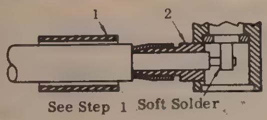
Coaxial Cable Installation Instructions

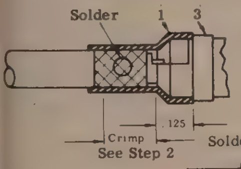
Straight Coaxial

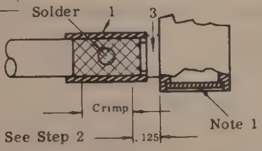


90° Coaxial



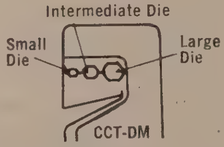
STEP 1. Slide outer ring (1) over cable jacket. Trim cable. Insert cable dielectric and center conductor into inside diameter of inner sleeve (2) solder center conductor to coaxial center contact.





STEP 2. Slide outer ring (1) forward until flush with coaxial shell, (3) confining braid between outer ring and inner sleeve. For solder type coaxials, soft solder outer ring to assembly through cross-drilled solder hole. For crimp type coaxials, crimp with tool indicated being sure to crimp in area defined.

NOTES



CRIMP TOOL JAW

1. Soft solder or stake access cap into shell after cable assembly on 90° type coaxials.
2. Crimp tool description — Cannon CCT-DM (to crimp outer sleeve only).
   - A. Use small die.
   - B. Use intermediate die.
   - C. Use large die.
3. Pin assemblies will accommodate high voltage and coaxial plugs only. Socket assemblies will accommodate high voltage and coaxial receptacles only.

Cinch D-Subminiature Connectors

Series 3*

TRW

General Information

The D*MA connector is a D-Subminiature Connector that utilizes the "Little Caesar" rear release contact assembly. This contact assembly allows rear insertion, release and extraction of crimp snap-in contacts. The simplified contact design with no undercuts offers greater bend resistance and a hard, closed entry socket insulator insures positive contact alignment. Crimp terminations accommodate #20, #22 and #24 AWG stranded wire and rated for 5 amps. Series 3 connectors are intermateable and interchangeable with all other D-Subminiature Connectors having compatible contact arrangement. Polarizaztion is by keystone shape of shell; coupling is by friction. Accessories are shown on pages **2•1640, 2•1642.** An extraction tool is supplied with Series 3 connectors. Extra contacts may be ordered for replacement purposes. See page **2•1640** for ordering information.

Materials and Finishes

Shell: Steel, zinc plated with yellow chromate supplementary coating.

Insulator: Diallyl phthalate, glass fibre filled, per MIL-M-14 Type SDGF, dark green monobloc construction.

Contacts: Pin — leaded copper, gold plate over nickel plate, Socket — copper alloy, gold plate over nickel plate with stainless steel sleeves.

Current Rating: (#20 Contacts) 5 amps.

Contact Termination: Crimp, accommodating #20, #22 or #24 AWG stranded wire. The 20-18 contacts accommodate one #18 or two #22 AWG stranded wires.

Contact Type: Snap-in, removable, crimp, with rear release assembly. Contacts not interchangeable with other D Series.

Socket Type: Closed entry.

Float Mounting Rivets & Washers: Stainless steel.

For listing of applicable specifications see page 2•1629.

* Military rating of #20 contacts on wires is 1.5 amps average, and 7.5 amps maximum. See explanation on page 2•1630.

Performance Data

VOLTAGE RATING:

Insulation Resistance (Ref. MIL-C-24308): Greater than 5000 megohms in accordance with MIL-STD-202D, Method 302, Condition B.

Contact Resistance (Exceeds Requirements of MIL-C-24308): (#20 contacts) 20 milliohms max. in accordance with Para 3.5.8.

Contact Engagement Force (Ref. MIL-C-24308): .7 to 12 oz. when tested with MS3197 test pin.

Contact Separation Force (Ref. MIL-C-24308): .7 to 8 oz. when tested with MS3197 test pin.

Moisture Resistance (Ref. MIL-C-24308): Exceeds test requirements of MIL-STD-202D, Method 106.

Vibration (Ref. MIL-C-24308): Meets test requirements of MIL-STD-202D, Method 204, Condition B.

Shock (Ref. MIL-C-24308): Meets test requirements of MIL-STD-202D, Method 213, Condition G.

Corrosion Resistance (Ref. MIL-C-24308): Exceeds requirements of 48-hour exposure to salt spray in accordance with MIL-STD-202D, Method 101A, Condition B.

High Potential Test Voltage (Ref. MIL-C-24308): MIL-STD-202D, Method 301.

Temperature Cycling (Ref. MIL-C-24308): MIL-STD-202D, Method 102A, Condition B. See tabulation on page 2•1629.

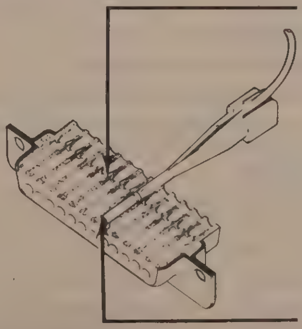
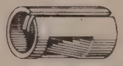
Rear Release Contact Assembly

The rear release contact assembly permits contacts to be inserted by hand and to be released and extracted from the rear of the connector with a simple, expendable plastic tool.

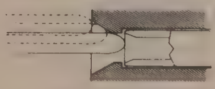
The contact is inserted from the rear of the connector thru a cylindrical clip in the insulator until the indented tines of the clip snap securely behind the contact shoulder. The contact is released as the plastic tool is inserted into the rear of the connector, expanding the tines beyond the contact shoulder and permitting contact extraction. The simplified contact design improves bend resistance through a single holding shoulder with no undercuts.

The contact assembly was selected by the National Aerospace Standards Committee for use in a major industry connector specification for vital programs demanding great operational reliability.

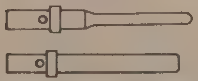




Contact retaining clip.



Hard dielectric, closed-entry socket inserts realigns bent or misaligned pin contacts.



Simple stronger contact without undercuts for greater bend resistance.

Cinch D-Subminiature Connectors

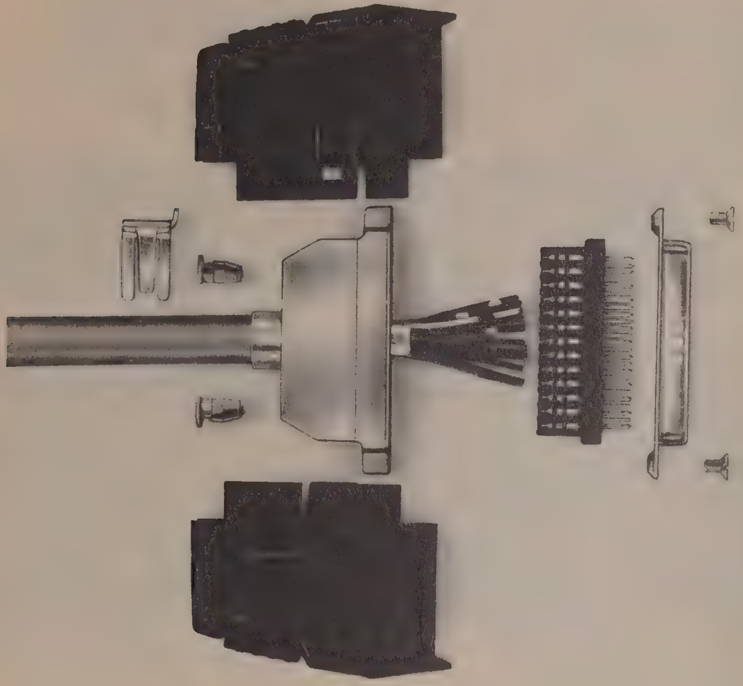
Shielded Super D* Connector System

TRW

for Fast Reliable RFI/EMI Shielding



Features

- Full 360° RFI/EMI shielding, with one-piece seamless die-cast shell
- Solderless insulation displacement contact (IDC) termination for 26-28 AWG solid or stranded wire
- Fast field termination using TRW Certi-Clinch SSD* Tool
- Terminates either braided shield or metal-coated mylar shielded cables
- Mating shells equipped with grounding detents, for ground continuity between mated connectors
- Plastic Super D hoods for positive strain relief and elimination of shock hazard
- Available with Super D Latch-N-Lock System or with 4-40 jack screws
- Meets FCC Part 15, Class B requirements

Description

The TRW Shielded Super D Connector offers all of the time- and labor-saving features of the Super D Connector System, plus the added benefit of RFI/EMI shielding. Shielding is provided by a 360° seamless die-cast hood. This is theoretically the best method of RFI/EMI shielding, since there are no seams or breaks in the shield to permit leakage.

The Shielded Super D Connector consists of a metal-shelled Super D Connector, a seamless die-cast shielding hood, necessary collets and plastic Super D hood assembly.

The Shielded Super D Connector has solderless insulation displacement contacts (IDC) for fast reliable termination without pre-stripping or cutting and is available in 25-contact size straight plug or socket, with top opening for cable. Consult factory for availability of other sizes and styles.

Termination is accomplished using the TRW Auto-Clinch D* tool for high-volume applications or the Certi-Clinch SSD tool for field applications. A Uni-Clinch D* tool is also available for field repair or retrofit applications.

The plastic hood assembly is the same as that used in the Super D Connector System. The two-piece all-plastic construction allows fast self-latching captivation of the terminated shielded connector and also eliminates shock hazards.

The hoods are available with the exclusive Super D Latch-N-Lock System providing fast audible mating of the connector and quick release disconnect or with 4-40 jack screws for applications requiring protection against accidental removal of the connector.

The TRW Shielded Super D Connector is designed to meet all of the applicable requirements of FCC Docket No. 20780, Part 15, Sub Part J, for Class B devices.

*Trademark of TRW Inc

Shielded Super D* Connector System

TRW

Specifications

- Insulator Material: Molded glass-filled polyester
- Contact Material/Finish: Contacts are copper base alloy; standard finish is gold over copper
- Shield Material: Seamless die-cast metal
- Hood Material: Molded modified phenylene oxide
- Metal Stay Band/Strain Relief: 0.036″ (0.914mm) steel
- Termination: Solderless insulation displacement type; wire insulation is displaced when wire is driven into termination to form four positive contacts on each conductor
- Polarization: Keystone shape, preventing ''wrong way'' mating
- Panel Mounting: Terminating connectors which pass through panel opening from rear and mount with screws to front of panel
- FCC Requirements: Meets all applicable requirements of FCC Docket No. 20780, Part 15, Sub Part J for Class B devices

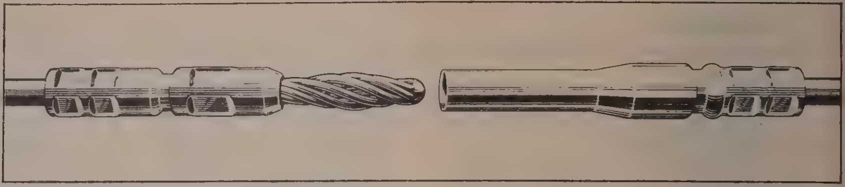
Cinch Dura-Con Connectors

The Dura-Con* Connector System



Here are the connectors designed to give rugged, durable high performance. Dura-Con is the ideal connector for applications where weight and space must be kept at a minimum while maintaining maximum reliability. Miniaturized airborne electronics and data processing equipment where shorter signal paths are needed represent typical applications for this unique connector.

The heart of the Dura-Con system is the Dura-Con contact, a contact that provides electrical continuity under extremes of shock and vibration.

This is accomplished by making the pin the spring member. Available in three sizes, the TRW Cinch Dura-Con is made from a precision miniature spring cable with a welded tip. The expanded cable provides seven spring members peripherally around the pin so that no matter what radial forces are applied, contact is maintained with the mating socket wall. Furthermore, this flexible spring can be bent many times without evidencing any metal fatique. By protecting this pin in a recessed tolerance cavity, reliable mating is assured. Thus, despite its small size, Dura-Con provides superior performance.

The Dura-Con Connector is available in six tough highly adaptable styles for your systems. When critical shock, vibration, and RF interference requirements for military and commercial applications must be met, specify metal shell microminiature or Double-D subminiature Dura-Con connectors.

Dura-Con also comes in proven plastic microminiature, microedge metal shell, strip, and terminal block connectors.

The Dura-Con Double Density connector is available off-the-shelf for customer termination. Special configurations and custom assemblies can be ordered from the factory.

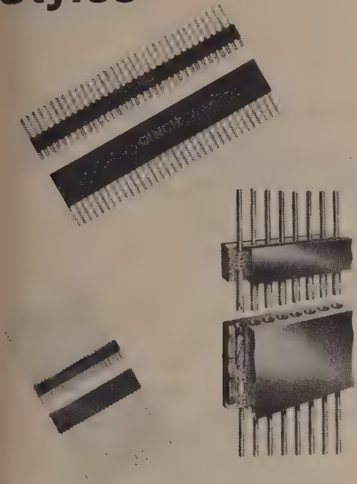
Cinch Dura-Con Connectors

TRW

Specify from six standard Cinch Dura-Con Connector Styles

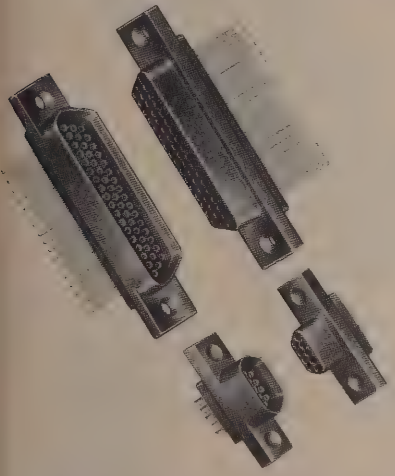


TRW Cinch Dura-Con Strip Connectors

. . . offer application flexibility for high density contacts in minimum profile package.

- Many configurations and combinations of wire terminations possible.
- 22 gauge thru 34 gauge wire combinations.
- .025″, .050″, .075″ or .100″ centers.
- Up to 60 contact positions.
- Can be assembled to P.C. boards or card mounting frames.
- Glass filled thermoplastic insulators.
- Available for right angle P.C. applications (Consult Factory).

See pages 6-7, Cinch Dura-Con Connectors Catalog No. C-50 for complete specifications.



Cinch Plastic Shell D-Microminiature Connectors

. . . for general use applications where weight reduction is important.

- Tough polyester thermoplastic shells, 94 V-O.
- High performance.
- Lightweight space savers for miniaturized electronics.
- Corrosion resistant.
- 7 arrangements: 9, 15, 21, 25, 31, 37, 51 in 24 GA. size contacts.
- Current Rating: 3 amps max.
- Meets MIL-C-83513 requirements.
- Provides shorter signal paths in EDP equipment.

For all the facts about Cinch Plastic Shell Dura-Con Micro-Miniature Connectors, See pages 8-11, Cinch Catalog No. C-50.

Cinch Metal Shell D Microminiature Environmental Connectors

. . . designed to meet stringent requirements in aircraft, data processing equipment, spacecraft and other critical applications.

- Lightweight; high contact density.
- Rugged, reliable contacts.
- Shock and vibration resistant.
- Rugged aluminum alloy shell.
- 8 sizes: 9, 15, 21, 25, 31, 37, 51, 100 contacts.
- 24 size contacts on .050″ center.
- Special power arrangements/custom terminations available.
- Provides EMI/RFI shielding.
- Meets MIL-C-83513 requirements.

Complete Metal-Shell Dura-Con D-Subminiature Connector Specifications are in Cinch Catalog C-50, pages 12-15.

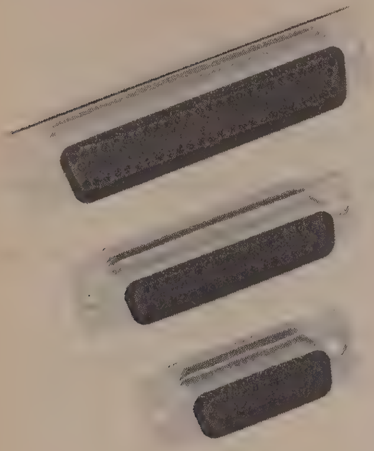
Cinch Dura-Con Connectors



Cinch Dura-Con Double-D Subminiature Connectors

. . . provides twice the number of contacts in a D-Subminiature shell for computer, aircraft, instrumentation, calculators, electronic audio equipment.

- Lightweight.
- High contact density.
- Rugged, reliable contacts.
- 22 gauge snap-in contacts permit customer assembly and easy contact replacement.
- Shock and vibration resistant steel shells; "D" (keystone) shape assures polarization.
- 5 sizes: 19, 31, 52, 79, 100 contacts.
- Current Rating: 5 amps max.
- Can be modified to meet your specific requirements or applications.

See pages 16-20, Cinch Catalog No. C-50, for complete Double-D Connector performance characteristics.

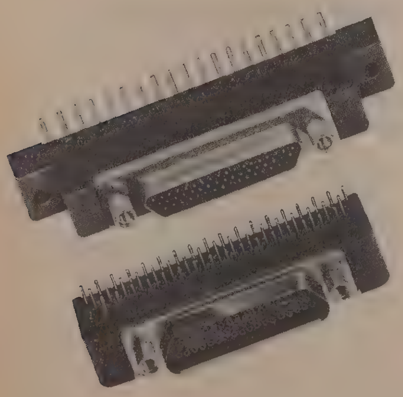
TRW CINCH CONNECTORS
TRW CINCH CONNECTORS
TRW CINCH CONNECTORS

Cinch 128 and 184 Contact Microedge Metal Shell Connectors

. . . rugged, reliable high density connectors with 128 or 184 Twist-Pin contacts.

- High reliability.
- Space/weight savers for aircraft, space, computer, controls applications.
- High contact density.
- Aluminum shell.
- Shock and vibration resistant.
- 2 sizes: 128 and 184 contacts.
- Meets MIL-C-55302 requirements.
- 90° variations available for multi-layer boards.
- Current Rating: 3 amps max.
- Can be modified to meet your specific requirements or applications.

Cinch Microedge Metal Shell Connectors are fully described in Cinch Catalog No. C-50, pages 21-24.



Cinch Terminal Block Dura-Con Connectors

. . . PC series connectors for use with flat cable, flex circuitry, printed circuit and multi-layer boards.

- 3 styles: straight termination, 90° termination, 90° narrow profile.
- Standard aluminum shell.
- Uniquely offers ease of soldering and mounting with all hardware or standard metal shell series.
- 8 sizes: 9, 15, 21, 25, 31, 37, 51, 100 contacts.
- Can be modified to your specific requirements or applications.
- Current Rating: 3 amps max.

Check Cinch Catalog No. C-50, pages 25-28, for PC Terminal Block Connector Specifications.

Cinch Dura-Con Connectors

TRW

Custom Harnessing Application Capability

Standard Cinch Dura-Con connectors satisfy a wide variety of applications. There are over 50,000 possible combinations of shapes, sizes, metal/plastic bodies, hardware, PC tails, solder cups, etc.

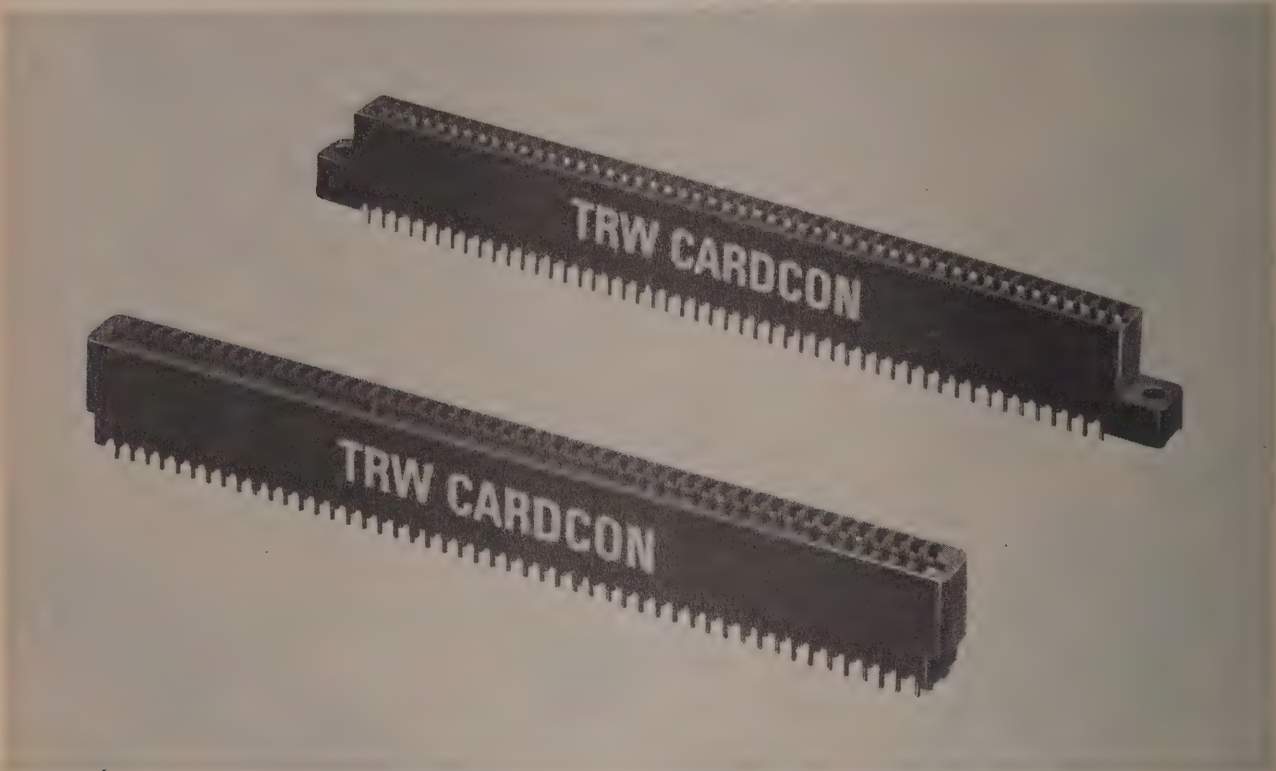
When special application requirements arise, the TRW Connector Division Design Group and research facilities are ready to go to work. Whether your specific needs entail new variations of simple end-to-end connector assemblies or more complex and intricate harness assemblies, Cinch engineers are ready to provide the application know-how to customize Dura-Con for your requirements.

For complete information regarding the total capabilities of the Dura-Con connector series, or for engineering assistance, contact your nearest TRW sales office or the address listed below.

Cardcon* Edge Connectors

.100″ (2.54) Center Spacing for 1/16″ (1.588) Boards

TRW



CARDCON Connectors with .100″ (2.54) center spacing for 1/16″ (1.588) boards

Dip Solder Tails

.200 Row Centers
Double Readout
(Contact factory for added PC board retention feature**)

- Bifurcated semi-bellows contacts for added contact reliability.
- 18 Dual Contact Sizes — 12/24, 15/30, 18/36, 20/40, 22/44, 25/50, 28/56, 30/60, 31/62, 36/72, 37/74, 40/80, 43/86, 44/88, 49/98, 50/100, 52/104, 60/120, 70/140.
- Ideal for applications involving vibration or board irregularities.
- Available less mounting ears, or with .128 mounting holes or 4-40 threaded holes.
- Accepts 1/16″ thick p.c. boards.
- Meets applicable performance criteria of MIL-C-21097. (Contact factory)

** The TRW Cinch board retention feature holds the connector firmly on the board during the wave soldering operation.

Prevents the connector from rising above the board and eliminates the need for mounting flanges and mounting hardware. Plated-thru holes are not damaged if the connector is removed.

Materials

Insulator Material: 94V-0 rated glass filled polyester. Color — Blue.

Contact Material/Plating: Contacts are available in alloy 260 spring brass or phosphor bronze. Standard finish gold over nickel in contacting area. Gold flash on tails. Copper overall underplate. Contact factory for other contact material and plating options.

Polarizing Key Materials: Two types of polarizing keys are available, and must be ordered separately: P/N 474-11-76-229 (for between-contact polarization) is made of glassy epoxy; P/N 474-11-70-960 (for in-contact polarization) is made of Valox 420-SEO.

Environmental Specifications

Shock: Per MIL-STD-202E method 213B, condition "C."

Temperature Cycling: 5 continuous cycles (−65°C to +125°C) per MIL-STD-202E method 107D, condition "B."

Vibration: Per MIL-STD-202E method 204C, condition "B."

Humidity: Per MIL-STD-202E, method 103, condition "B."

Electrical Specifications

650 at sea level.
275 at 3.4 Hg — 50,000 ft.
275 at 1.3 Hg — 70,000 ft.

Current Rating: 3.0 Amperes.

Contact Resistance at Rated Current: 0.010 Ohms Max.

Insulation Resistance: 1000 Megohms Min.

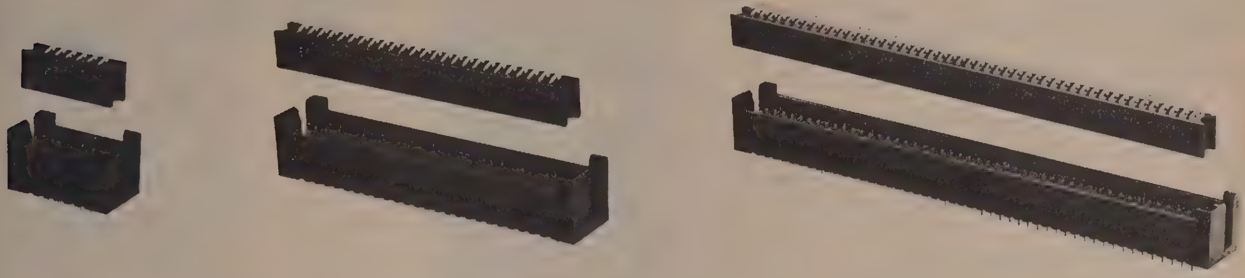
Cinch Two Piece PC Board Connector System



- 4 Tyne Box Socket Contact* provides 4 discrete points of contact per pin

TRW has designed, and now has in production, a high reliability two-piece PC board connector system. Primarily for applications involving today's sophisticated instrumentation, this system meets the performance criteria of MIL-C-55302. Gold has been eliminated from non-functioning surfaces for significant cost savings without sacrificing performance quality. Insertion force is a maximum of 4 ounces, and withdrawal force is 0.75 ounces minimum.

Here is the ideal replacement system for traditional mother/daughter connectors. It is a more dependable, less costly method of interconnecting PC boards with electronic equipment applications.

Features

- 4 Tyne Box Socket Contacts*
- .025 in square post plug contacts
- Pin tails available in straight or 90° Solder Type, compliant pin
- 10 to 200 contact sizes
- Double readout, .100 inch x .100 inch centers
- Meets performance criteria of MIL-C-55302
- Insertion force of 4 ounces maximum per contact
- Withdrawal force of 0.75 ounces minimum per contact

Materials

Insulator Material: Glass filled thermoplastic UL-94V-0 rated

Color: Black

Contact Material/Plating:
Pin: Phosphor Bronze
Socket: Phosphor Bronze

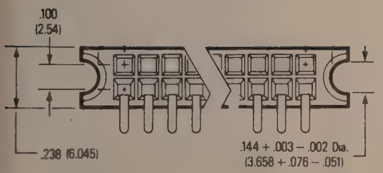
Plating: Standard, gold over nickel in contact area—Tails, gold flash or tin lead. Custom plating available, consult factory.

Electrical Specifications

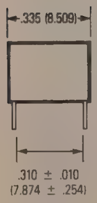
Current rating per contact: 3A

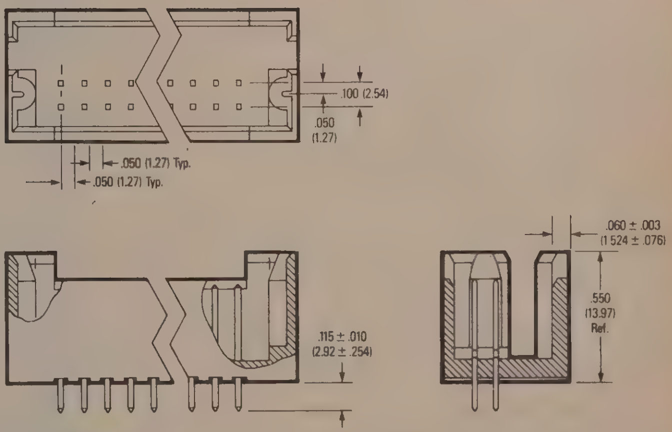
Contact resistance: 12mΩ max at 100MV

Dielectric withstanding voltage:
750 Vrms at sea level
300 Vrms at 50,000 feet



Socket





Plug—Straight

*Patent Pending

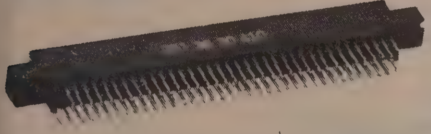
Cinch PC Board Connectors

With Terminals On .100″ (2.54) Center Spacing



Features and Specifications

Current Rating: 5 amperes.

Rated Voltage (Sea Level): 600 VDC.

Insulation Resistance: 5000 megohms min.

Contact Resistance: 10 milliohms max.

Terminal Styles: Dip Solder, Wire Wrap or Solder Tab.

Total Insertion Force: A maximum of one lb. times the number of contact pairs when measured with a .070 in. thick steel blade in accordance with MIL-C-21097.

Individual Separation Force: A minimum of one oz. per pair of contacts when measured with a .054 in. thick blade in accordance with MIL-C-21097.

Insulator Material: Diallyl phthalate, type SDG-F per MIL-M-14 Color Green.

Polarizing Key Material: Nylon.

Card Guide Material: Polypropylene, Color Green.

Contact Material: Alloy 688 high tensile brass.

Contact Plating Material: gold over nickel on contacting area gold on remainder of contact.

- Bifurcated semi-bellows contacts for added contact reliability.
- Ideal for applications involving vibration or board irregularities.
- 6, 10, 12, 15, 18, 22, 24 and 25-contact sizes.
- Available less mounting ears, or with .128 mounting hole, .142 mounting hole, 4-40 threaded hole or floating bushing.
- Accepts single or double sided, 1/16″ thick p.c. boards.
- Meets applicable performance criteria of MIL-C-21097. (Contact factory)

TRW CARDCON
TRW CARDCON

**The TRW Cinch board retention feature holds the connector firmly on the board during the wave soldering operation. Prevents the connector from rising above the board and eliminates the need for mounting flanges and mounting hardware. Plated-thru holes are not damaged if the connector is removed.

Materials

Insulator Material:
94V-O rated glass filled polyester. Color – Blue.

Contact Material/Plating:
Contacts are available in alloy 260 spring brass or phosphor bronze. Standard finish gold in contacting area. Gold flash on tail. Copper under gold. Contact factory for other contact material and plating options.

Polarizing Key Materials:
Two types of polarizing keys are available, and must be ordered separately: P/N 456-07-35-003 (for between-contact polarization) is made of glass epoxy; P/N 474-11-70-787 (for in-contact polarization) is made of Valox 420-SEO.

Environmental Specifications

Shock:
Per MIL-STD-202E method 213B, condition "C".

Temperature Cycling:
5 continuous cycles (-65°C to 125°C) per MIL-STD-202E method 107D, condition "B."

Vibration:
Per MIL-STD-202E method 204C, condition "B."

Humidity:
Per MIL-STD-202E, method 103, condition "B."

Cinch Commerical And Military Edge Connectors

.156″ (3.962) Center Spacing For 1/16″ (1.588) Boards

Double and Single Readout

Insulator: Glass fiber filled diallyl phthalate per MIL-M-14 Type SGD-F.
Contact style: Bifurcated bellows.
Contact material:
1) Commercial type: Phosphor bronze.
2) Military type: Beryllium copper.
Contact plating:
1) Commercial type: Stripe plated with gold in contact area and gold on tails with copper underplate. No plating on edges.
2) Military type: gold over copper.
Termination: Solder eyelet terminals with .200″ (5.08 mm) between row spacing on double readout. Dip solder tails with either .140″ (3.56 mm) or .200″ (5.08 mm) between row spacing on double readout.

Test voltage: 1800 volts RMS AC at sea level. Rated current: 5 amps.
Polarizing keys: Between contact type Part no. 50-PK-2 or in contact type Part no. 50-PK-1. Order separately.
Card guide: Part no. 50-GP-1. Order separately.

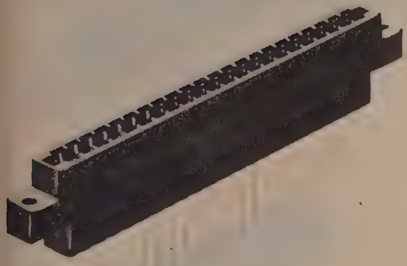
Cinch Wire Wrap Edge Connectors

.156″ (3.962) Center Spacing For 1/16″ (1.588) Boards

TRW

.031″ (.787mm) x .062″ (1.57mm) Wire Wrap Tail Double Readout



Insulator: General purpose phenolic, black.
Contact style: Bifurcated cantilevered.
Contact material: Copper alloy #688.
Contact plating: gold over copper in contacting area, and gold on remainder of contact. (22 position connectors have an additional plate of gold over nickel on the contacting area.)
Termination: .031″ (.787 mm) x .062″ (1.57 mm) wire wrap tail, available with three tail lengths. .188″ (4.78 mm) between row spacing. 22 contact positon connector also available with terminals twisted 90° below insulator. See 50-44X-10 series below.
Electrical ratings: 990 volts AC RMS at sea level. 3 amps.
Polarizing key: Between contact type. Part no. 50-PK-3. Order separately.
Card guide: Part no. 50-GP-1. Order separately.

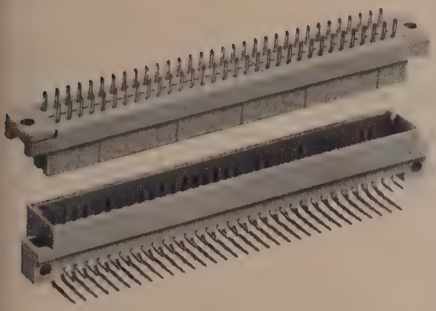
DIN High Density Connectors



Style B:

Available in standard configuration of 64 contacts. High density spacing is .100". Contacts are right angle or straight and designed for wire wrap, crimp, or solder termination.

Style C:

The DIN Connector is a high density connector available with straight or 90° contacts in standard configurations of 64 and 96 pins. DIN was designed to fit your special requirements. Contact spacing is .100".

Style D

Available in 16, 32, and 48 contact sizes. 2-pin terminations for wire wrap, solder hook or snap-on connectors. Good for industrial applications.

Style E

3-pin termination style in 16, 32, and 48 contact sizes. Snap-on, solder hook or wire wrap terminations.

Style H

Designed for power supply applications. This heavy current (20A) connector with 11 poles, mounts directly to PC boards. Meets fixing and mounting requirements for DIN 41612 form C.

Style R:

Inverse DIN is available in straight or 90° contacts in standard configurations of 64 and 96 pins with complaint pin headers.

Cinch Superfast* Flat Cable Connector System

The TRW Cinch Superfast Flat Cable Connector System

Here is the flat cable mass termination interconnect system specifically designed to combine low cost with compact size and reliability. It features the exclusive TRW Cinch one-step insulation displacement termination system, (Fig. A) which accepts 28 AWG stranded or 30 AWG solid ribbon cable with .050 center spacing. Basic to the system are the nine standard termination sizes of 10, 14, 16, 20, 26, 34, 40, 50, and 60 contacts.

Headers, available in nine sizes, mechanically and electrically interconnect the sockets to printed circuit boards. Pin headers are available in straight or right angle configurations, three or four wall versions, with or without ejector latches, and in a low profile version.

Socket Connectors with very compact .100″ x .100″ grids, permit a narrow board spacing of only .250″ between connectors. Wire strain is controlled by a unique, one-piece strain relief design. An exceptional feature is contact probability, which permits contact testing without disturbing connector function. The cover/strain relief is pre-assembled as an intrical part of the connector assembly. As shown here, (Fig. B) the cover/strain relief is placed in position with one simple, snap-action operation.

Edge Connectors in this system are available in eight sizes. They also are available with or without mounting ears. A unique cover design provides a preload on the contacts which prevents relaxation.

DIP Plugs for this system come in seven sizes. They can be permanently soldered to the PC board, or used to plug into standard sockets.

PCB Connectors are available in nine sizes, which provide a wide range of design flexibility in flat cable applications.

Flat Cable is available in 100 foot spools of 28 AWG stranded or 30 AWG solid wire.

D-Subminiature Connectors are available in four sizes with conductive tin-plated or yellow chromate metal body shells.

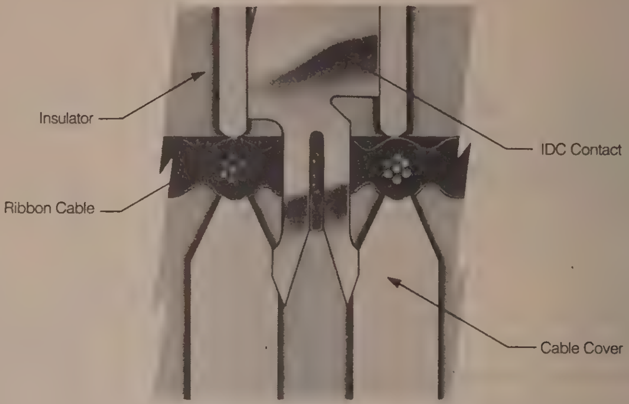

Fig. A—TRW Cinch Insulation Displacement Contact (IDC) system reduces assembly time, increases reliability. Unique "U" shaped design of IDC contact establishes stable interface between contact and cable.

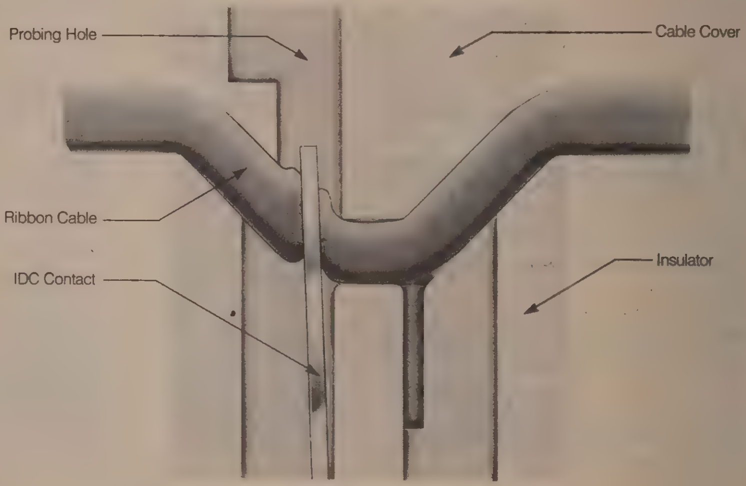

TRW Cinch Insulation Displacement Contact System

The TRW Cinch IDC System eliminates the necessity of individually stripping, positioning, and terminating wires. The flat cable used in this system provides predictable transmission characteristics and greatly reduces the chances of wiring errors. The compactness of both cable and connectors means greater weight and space savings.

Because a long-term and stable interface is needed between contact and cable, TRW Cinch has developed a unique "U" shaped design for the contact. In conjunction with the cover, this provides continual pressure on the cable and prevents relaxation at the interface points. The Superfast Connector System also has a probing hole so that contacts can be tested without interfering with connector function.

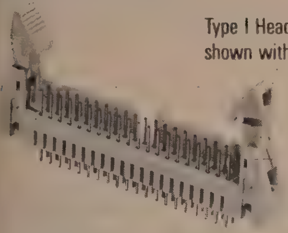
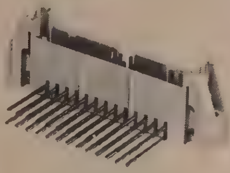
Cinch Superfast Flat Cable Connector System

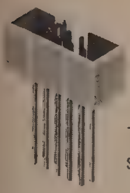
Header Assembly



Type I Header, shown with Latches



Type II Header, shown with Right Angle tails



Type III Header—Low Profile, shown with wire-wrap tails

- Intermate with other competitive systems
- Wide variety of optional configurations, wire wrap and solder tail, straight and right angle
- 9 sizes: 10, 14, 16, 20, 26, 34, 40, 50 and 60
- Controlled press fit between pins and insulator
- One-piece snap-in ejector latch (short or long) provides positive overbite interface to socket
- Positive and audible mating

Performance Data

Electrical

- Current rating: 1 amp per contact
- Withstanding voltage: 500 VRMS (at sea level)
- Insulation resistance: >1 x 10^9 OHMS at 500 VDC

Environmental

- Temperature rating: −55°C to +105°C

Mechanical

- Durability: 500 mating cycles
- Color: standard grey
- Plating: Gold over nickel.
- Contact material: phosphor bronze
- Insulation material: glass filled polyester, UL-94V-O rated

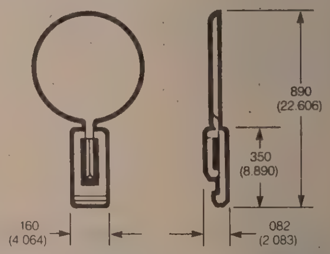
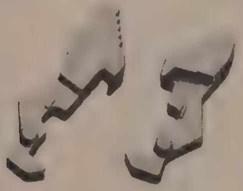
Polarizing Key

The polarizing key permits fast, foolproof keying of header and socket. It assures proper alignment of headers to prevent equipment damage and pin or signal loss.
100 pieces per package.
Part No. 474-11-88-886
Dist. Part No. FCPK-886



Ejector Latches



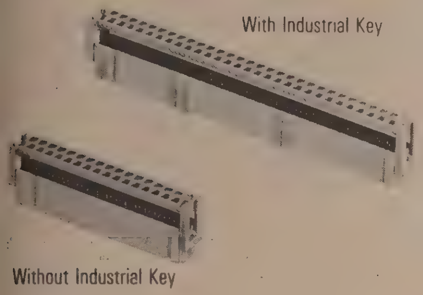
For use with Type I and Type II only.

Type	Part No.	Dist. Part No.
Long Ejector Latch	474-11-88-885	LL-885
Short Ejector Latch	474-11-88-884	SL-884

Cinch Superfast Flat Cable Connector System

TRW

Socket Connector Assembly



- Intermate with other competitive systems
- Pre-assembly with secure cable alignment
- Integral, one-piece strain relief
- Unique cover design provides preload on contacts to prevent relaxation
- 9 sizes: 10, 14, 16, 20, 26, 34, 40, 50 and 60

Performance Data

Electrical

- Current rating: 1 amp per contact
- Insulation resistance: >1 x 10^9 OHMS at 500 VDC
- Withstanding voltage: 500 VRMS (at sea level)

Environmental

- Temperature rating: −55°C to +105°C

Mechanical

- Insulation material: glass filled polyester, UL-94V-O rated
- Contact material: Beryllium copper
- Contact plating: Gold over nickel.
- Wire accommodation: 28 AWG stranded, 30 AWG solid
- Color: Grey

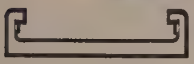
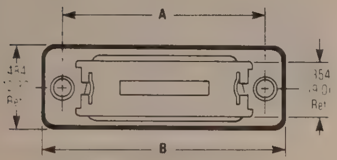
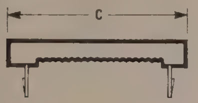
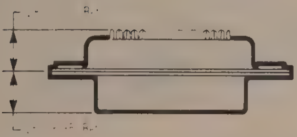
Flat Cable D-Subminiature Connectors









Flat Cable D-Sub connectors, available in four sizes to provide electrical shielding. They feature durable metal body shells, minimum front-to-back depth and positive snap-lock cable restraints. Compatible with 0.050″ standard pitch conductors and standard D-sub plan forms; interchangeable in most standard applications.

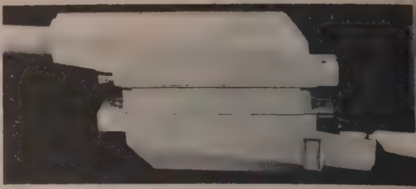
Cinch Superibbon Connector System

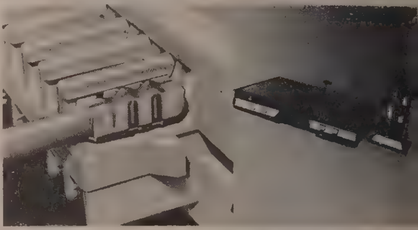
TRW

The Compatible System



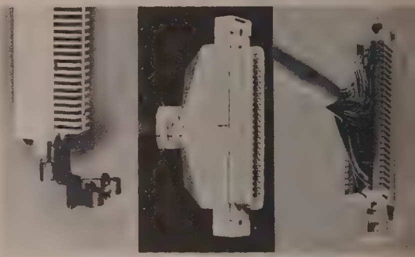
Designed to significantly lower termination and installation costs, Superibbon connectors are intermateable and compatible with most Ribbon type connectors now in use. Molded of self-extinguishing glass-filled Polyester, they are available in Solderless, Solder-tail, Wire-wrap and PC Board types; and in five standard sizes: 14, 24, 36, 50 and 64 wires. The Superibbon six-color circuit-coding system, designed to match contemporary interiors, is unique in the industry.

Instant Contact/Termination



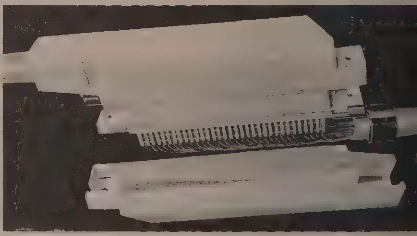
Factory loaded with market-proven, 4-point contact/terminals used in all TRW Cinch solderless ribbon connectors, Superibbon will terminate round, solid (24-26 AWG) or stranded (26-27 AWG) wire and hold it securely with effective wire strain-relief built into the contact/terminal. A 50-wire Superibbon can be terminated in less than 1½ minutes with TRW Cinch Auto-Clinch or in less than five minutes with TRW Cinch Certi-Clinch. Multiple replacement of individual wires can be accomplished with TRW Cinch hand tools without affecting performance.

Three Types of Strain-Relief



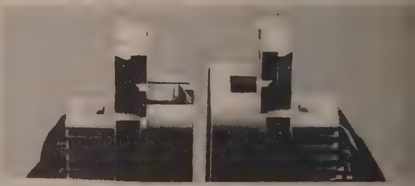
Cable-to-cable Superibbon connectors for end-entry termination have metal strain-relief/cable clamps securely attached to the connector body, freeing the cable entirely from the hood. Top-entry connectors have strain-relief/cable-clamp built into the two piece hood assembly molded with attached filler tab for insertion into clamping neck. Both cable-clamp types accommodate a wide range of cable diameters. Panel mounted connectors, without hoods, have accessory molded plastic strain-relief inserts which bear upon each wire at the four contact points of termination.

Plastic Hoods Snap into Place



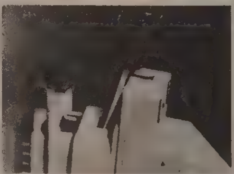
Made in top entry and end entry configurations, Superibbon connectors satisfy numerous special installation conditions as well as most normal applications. End entry hoods are one piece and separate from the cable clamp. Top entry hoods are two piece construction and upon snap-together assembly, after termination, provide a very positive and secure cable clamp. Both types of hoods accommodate a wide variety of cable diameters. Hoods are easily removed with screw-driver for top entry and TRW Cinch Versa-Clinch hand tool for end entry.

Insta-Latch Mating, Without Hardware



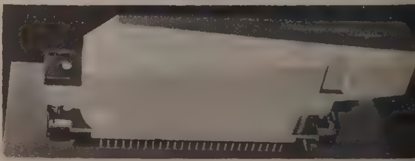
The receptacle is equipped with patented spring-clips at each end that engage windows in the plug. When the plug and receptacle are pressed together, an audible "click" tells you the connectors are fully mated and secured. There is no need for additional locking hardware, though locking screws and threaded mounting holes are available for special applications.

Rapid Unmating of Connectors



Any pointed object, such as a ball-point pen or a small screwdriver can be inserted into the window at either end of the mated connectors to depress the clip. The plug and receptacle are then disengaged by slight hand pressure. The semi-hidden location of the clip window reduces the possibility of tampering or inadvertent disconnection.

Quick Panel-Mounting with Clips



Preformed mounting-clips, inserted into each end of the pre-punched panel opening provides instantaneous snap-in mounting of connectors. No nuts, bolts or tapped holes are required and difficult back-of-panel manipulations are eliminated. No special tools are needed for connector mounting or removal.

Superibbon's Field-Proven Contact

Terminal contacts of TRW Cinch Superibbon and Ribbon connectors are stamped and formed of copper alloy with a gold finish per MIL-G-45204 type II over copper per MIL-C-14550. Selectively gold plated in contact mating area and in contact terminating area.

The field-proven insulation-displacement contact design illustrated above creates four positive, gas-tight connections on each conductor. Each contact has built-in wire strain-relief, preventing inadvertent removal of wires. The strain-relief/retention device prevents strain on the four electrical contact joints when the wire is moved.

Wire insulation, both standard PVC and irradiated PVC, is pierced sufficiently to facilitate a positive electrical connection at four points, thus, the contact is formed with four indents designed to, first, peel the insulation off the wire, then to deform the conductor as the wire is driven deep into the contact channel, trapped by two opening spring flanges and prevented from backing out, creating four positive, gas-tight connections on each conductor.

Superibbon Test Program

Comprehensive testing on the Superibbon Connector system has been performed, both fully assembled and in part. A variety of Mechanical, Environmental and Electrical tests upon the whole Superibbon Connector, as well as on the Terminated Contacts, have been completed. For complete information on the broad Superibbon Testing Program, please contact TRW Cinch at the factory.

Mechanical Requirements

- **Mating/Unmating Force**

No. of Contacts	Max. Mating Force With Latches in Lbs.	Min. Unmating Force Without Latches in Lbs.
14	12	2
24	17	4
36	23	6
50	32	7
64	37	8

- **Wire Grip Strength**

Wire Size	Min. Force in Lbs.
24 AWG Solid	7
26 AWG Solid	5
26 AWG Stranded	5

Electrical Requirements

- **Dielectric Withstanding Voltage per EIA Standard RS 364, TP 20.**

Altitude	Test Voltage
Sea Level	1200V. AC RMS 1700V. DC
70,000 ft.	300V. AC RMS 420V. DC

Altitude	Rated Voltage
Sea Level	500V. AC RMS 700V. DC
70,000 ft.	125V. AC RMS 200V. DC

- **Insulation Resistance per EIA Standard RS 364, TP 21.**

Initial	5000 Megohms Min.
After Moisture	1000 Megohms Min.

Contact Current Rating
5 Amperes

- **Contact Resistance per EIA Standard RS 364, TP 6.**
- **Low Level Contact Resistance per EIA Standard RS 364, TP 23.**

Millivolt Drop
30 Millivolts (6 Milliohms) Max.

- **Termination Resistance Change during Life Conditioning per TRW Cinch Test Plan.**

Wire Size	Resistance Change (Milliohms)
26 AWG Solid	0.5
24 AWG Solid	0.5
26 AWG Stranded	2.0

Environmental

- **Vibration per EIA Standard RS 364, TP 28, Condition A.**
- **Shock per EIA Standard RS 364, TP 7, Condition A (50 g. peak).**
- **Thermal Shock per EIA Standard RS 364, TP 32, Condition B.**
- **Moisture Resistance per EIA Standard RS 364, TP 31, Test Condition B with following details and exceptions:**
  - **a. Step 7b — not required.**
  - **b. No drip loops in the wires.**
- **Impact Test per EIA Standard RS 364, TP 42.**

Superibbon Basic Plug & Receptacle

Superibbon connectors are molded of standard Buff Gold color, self extinguishing, glass-filled polyester for high impact and dielectric strength. Designed with keystone polarized mating faces, Superibbon (Basic plug and receptacle) are offered pre-loaded with contacts on .085" centers in dual position and with contact commoning capability. Available in 14, 24, 36, 50 and 64 positions, Superibbon terminates unstripped 24-26 AWG round solid wire and 26-27 AWG stranded wire, multiconductor cable and some ribbon and molded cable. (Max. diameter of wire and PVC insulation is .040"). Consult factory for additional sizes. Contacts can be reused. Rib design assures accurate termination. Superibbon's unique, patented Insta-Latch mates with a positive audible "click" when plug and receptacle are pressed together.

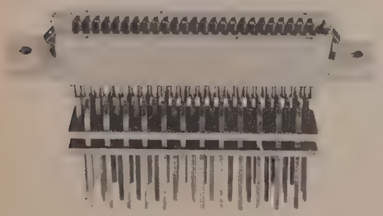
Wire-Wrap Connectors



Superibbon Wire-Wrap connectors for panel mounting are molded of diallyl phthalate in Basic Receptacle only, with either .025" or .045" square Cupro Nickel Alloy 725 tails spaced on .085" centers. Connectors are mountable to panels thru standard Superibbon Cutout, using standard mounting clips. Wire-Wrap Receptacle is available in 14, 24, 36, 50 and 64 contact sizes.

Superibbon Basic receptacle for Printed Circuit Board mounting with Dip Soldering tails is molded of diallyl phthalate with tail lengths for three different Board thicknesses as indicated in the table. Connector is available in 14, 24, 36, 50 and 64 contact sizes.
Also available in Valox; consult factory.

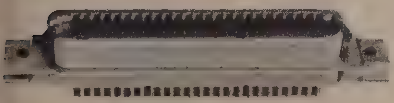
Solder Tail Receptacle



Superibbon Basic receptacle, molded of diallyl phthalate, is available with the field-proven Solder Tail Ribbon Contact for Rack and Panel Mounting. Top Entry Color Hoods are available in 14, 24, 36, 50 and 64 contact sizes. A, B, C and D dimensions are the same as those in the table above.

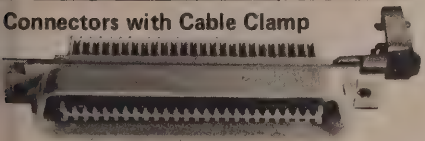
Connectors with Cable Clamp



Superibbon heavy gauge (.049") fully annealed low-carbon steel Cable Clamp is available, factory mounted, on either end of the basic connector (on the square end only of the tapered model) as desired for Cable-to Cable or Cable-to-Panel installation. The Cable Clamp is normally mounted to the standard end of the Plug and the Receptacle. The standard end of the Plug is at No. 1 position, while the standard end of the Receptacle is at the end with the highest contact number. The Superibbon Cable Clamp is specially designed to securely clamp and reliably hold a broad variety of cable sizes.

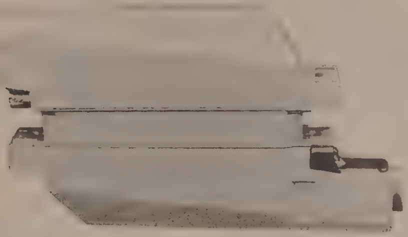
Plug & Receptacle with End Entry Hood



Beautifully styled protective Hoods, molded of Resin rated UL 94V-0, encase the Basic Connector with Cable Clamp. The simplified Hood hooks over the Connector end opposite the Cable Clamp, then with finger pressure downward on the top of the Hood, directly above the Cable Clamp the Hood snaps securely onto the Connector. Superibbon Hoods are easily removed with a screwdriver or TRW Cinch Versa-Clinch hand tool.

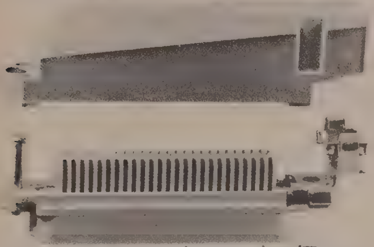
Tapered End Connector w/Cable Clamp & Hood



To satisfy certain critical space requirements in telephone applications, a special connector in slightly shorter overall length with one end tapered is offered in 50 position only. This connector is available as a slate gray assembly only, without latch, with cable clamp and tapered end hood and with captive mounting screw. For other variations of this connector consult factory.

Basic Plug & Receptacle w/2 piece Top Entry Hood

The Two-Piece Hood assembly for enclosing Basic Superibbon Connectors terminated for Top Entry, incorporates specially designed secure closing latches and built-in Cable Clamp using attached removable tabs for adjustment to a broad range of cable sizes. The table below indicates the correct tab combinations to use for effectively clamping different cable sizes. The table and drawings below indicate dimensions for all contact sizes including 14, 24, 36, 50 and 64. Top Entry Hoods are available in the same six colors: standard Buff Gold, Blue, Orange, Green, Brown and Slate as the End Entry Hoods.

Color Hoods for Circuit Identification

Superibbon's specially designed and color coordinated color Hoods provide a positive circuit identification system of sufficient breadth to color-code the most complex wiring systems. Available in six colors, Blue, Orange, Green, Brown, Slate and standard Buff Gold, they are made in configurations for both End Entry (one piece) and Top Entry (two piece assembly). Installed, they make circuit tracing simple and easy.

End Entry Color Hoods	14 Contacts	24 Contacts	36 Contacts	50 Contacts	64 Contacts
Buff Gold	474-11-88-530	474-11-88-531	474-11-88-532	474-11-88-533	474-11-88-534

Wire Restraint for Panel Mounted Superibbon

Two-piece molded phenylene oxide Wire Restraint is available for use on panel mounting applications, tap-ins, cable-runs and other conditions where extra security is desired at the point of termination. Molded in gray color to identify them against the basic Buff Gold of Superibbon connectors, they are made in two types, one for plug and the other for receptacle mounting and snap into place over the terminal side of Superibbon.

Wire Restraints (2 req.)	14 Contacts	24 Contacts	36 Contacts	50 Contacts	64 Contacts

TRW Cinch Auto-Clinch Model 200S Termination Tool and Options

Auto-Clinch is a semi-automatic, pneumatically powered and electrically controlled Connector Termination Machine that can terminate TRW Cinch Solderless Ribbon and Superibbon 25-pair connectors in approximately 1½ min. With accessory nests it will terminate 14, 24, 36, 50 and 64 contact connectors with relative speed.

A conversion kit will allow the Auto-Clinch to terminate connectors of the Ribbon type made by other manufacturers. Auto-Clinch may be optionally equipped with Remote Visual Color Code Display for training operators or for reading special wire sequences. A second option is a Selective Programmer which will allow the operator to set the machine to automatically skip contact positions not to be terminated. A third optional accessory called Auto-Test, automatically tests terminated 25-pair cable assemblies. It tests the quality of the termination by checking for continuity, shorts and 700 Volt DC Hi-Pots. A fourth optional accessory will automatically close End Entry Superibbon Cable Clamp during the normal sequence of machine operation. A fifth option will terminate the 25-pair Superibbon Connector in Top Entry Mode. Auto-Clinch cannot be equipped simultaneously with both Cable Clamp Closer and Top Entry Adapter. Auto-Clinch requires 60 p.s.i.g. Air Supply, 110 Volt, 60 Cycle, Single Phase, 5 Amp. Electrical Supply. Auto-Clinch weighs 120 lbs. and measures 25½" wide x 20" deep x 9" overall height. Weight and dimensions may vary with options.

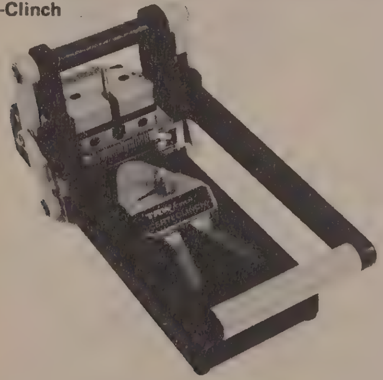
Certi-Clinch



TRW Cinch Certi-Clinch Portable Field Termination Tool

Certi-Clinch is a portable, manually operated field termination tool which terminates 50-contact TRW Cinch Solderless Ribbon and Superibbon Connectors in less than 5 min. Designed for field assembly and low production installations, it is readily portable, weighing only 10.5 lbs. and requires no set-up time. The universal Certi-Clinch models will terminate up to 64 contacts made by TRW Cinch and other manufacturers. Certi-Clinch is compact in its protective simulated leather carrying case and measures only 6" wide × 13" long × 6½" high overall.

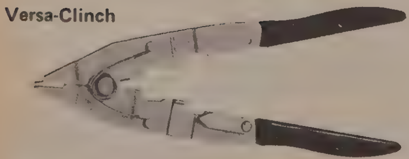
Versa-Clinch



Plier Repair Tool

Description	TRW Cinch Part No.
Versa-Clinch Term. Tool	999-599-11-11-361
Repair Tool (Ribbon & Superibbon)	999-599-11-11-345
Repair Tool (Universal-Cinch & others)	999-599-11-11-358

TRW Cinch Versa-Clinch Multi-Function Termination Tool

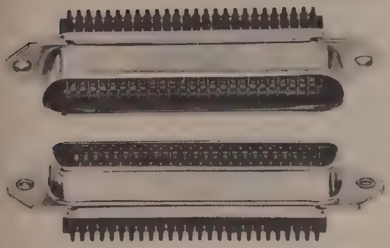
Versa-Clinch is a truly versatile hand operated tool used to perform four basic functions in application to TRW Cinch Ribbon and Superibbon Connectors. Versa-Clinch can be used to: 1. Cut off and terminate one wire to TRW Cinch Solderless Ribbon, Superibbon and some connectors manufactured by others. 2. Unlatch the Superibbon End Entry Hood for removal. 3. Open and Close Superibbon Metal Cable Clamp. 4. Unlock mated Superibbon connectors, Versa-Clinch is used to cut, patch, remove, repair, open, close, latch, unlatch, tap and terminate.

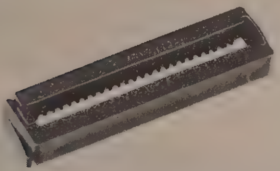
TRW Cinch Plier Type Termination Repair Tool

TRW Cinch hand operated plier type termination repair tool is a valuable device for the field service engineer. The Repair Tool is designed to cut wires and terminate one wire at a time to replace any damage termination in the field. The Tool is made of heat treated carbon steel with tips of heat treated and hardened high carbon steel. It is finished in black oxide with red vinyl dip handles. Two models of the repair tool are available.

Solderless Cinch Ribbon Connector System

TRW





Accessory Wire Restraint for 50-position only. Part Number: 474-11-70-484

TRW Cinch Solderless Ribbon Connector—Plug & Receptacle

This Connector has the same electrical characteristics as Superibbon plus providing for shielding/grounding by the metal shell enclosing the mating contacts. It has the same fine quality as both Superibbon and the Solder Type Connectors and is intermateable with both as well as other manufacturers' Ribbon Connectors. Both TRW Cinch Solderless Ribbon and TRW Cinch Solder Ribbon 50-position plugs have windows in the metal shell to accept the exclusive mating latch of the Superibbon receptacle. TRW Cinch Solderless Ribbon Series can be terminated with automatic, semi-automatic and field hand tools. Each contact provides four gas-tight connections for both 24 and 26 gauge solid wire (.040" max. insulation dia.). Available in 14, 24, 36 and 50 contacts, Solderless Ribbon Connectors are terminated at speeds far in excees of soldering techniques. They have built-in wire restraint in each contact to prevent any inadvertent removal of wires; however, contacts can be reused without physical damage or electrical degradation. Smooth, easy mating/unmating action plus the double-sided, self-cleaning flexing action of both mated contact members provide added reliability. Shell polarization and float mounted receptacle assure proper alignment. Insulation material is 30% glass-filled polyester. Plug and receptacle contacts are of Copper Alloy with a finish of Gold per MIL-G-45204 Type II over copper flash. Shells are steel with a finish of zinc with clear chromate.

TRW Cinch Solder Ribbon Connector — Plug & Receptacle

TRW Cinch Solder Ribbon Connectors for Wire Wrap Termination and Panel Mounting are made in Plug and Receptacle with either .025″ or .045″ square Cupro Nickel Alloy 725 tails spaced on .085″ centers. 50-Position plug shell has window for latching to Superibbon. Connectors listed below are only a few of the many available from TRW Connector Division with a variety of mounting hardware. For more information concerning your specific mounting needs for these Universal Wire Wrap Adapters, please consult the factory.

TRW Cinch Solder Ribbon Connector—Plug & Receptacle

Miniaturized Rack and Panel Connectors, utilizing Ribbon contact feature, are intermateable with both Superibbon and TRW Cinch Solderless Ribbon as well as other Ribbon Connectors. Solder Ribbon 50-position Plug has window for accepting patented Superibbon latch in mating with it. Insulation material is diallyl phthalate, type MDG per MIL-M-14F. Other characteristics are the same as Solderless Ribbon connectors shown on previous page.

Cinch Solder Ribbon Connectors

TRW

TRW Cinch Solder Ribbon Connector—Plug & Receptacle

Miniaturized connectors for Cable-to-Chassis installation, with same basic features as those shown on the previous page except no window for Superibbon latch in 50-position plug shell. Plug is equipped with hood and cable clamp while receptacle has sturdy spring-type latches which are guided and held by cutouts in plug hood flanges. Insulator body is molded of diallyl phthalate, type MDG per MIL-M-14 F. 14, 24, 36 and 50-contact sizes are available.

Cinch Compliant Super Ribbon Connectors For PC Board Applications

TRW

Combines no-solder press fit cost savings with ribbon contact reliability!

- Pre-loaded contacts require no end-user soldering
- No special tooling needed
- Available in both plug and socket styles in 14, 24, 36, 50, and 64 contact sizes
- 3 different socket connector latch designs to choose from
- Mount on PC boards from .062″ to .125″ thick

Insta-Latch Mating (without hardware)

The receptacle is equipped with patented spring-clips that make an audible "click" telling you the connectors are fully mated. Locking screws and threaded mounting holes are available for special applications.

Rapid Unmating of Connectors

Any pointed object, can be used on the mated connectors to depress the clip. The plug and receptacle are then disengaged by slight hand pressure.

TRW Cinch Compliant Press Fit Superibbon Connectors are provided with pre-loaded ribbon contacts captivated in the insulator body. Individual contacts can be replaced using a special tool without removing the connector from the PC board.

The connectors can be mounted on PC boards ranging from .062″ to .125″ thick. The compliant C section provides electrical interface to the plated-through hole for a length of .065″.

Performance Data

Electrical

- Dielectric Withstanding Voltage per EIA Standard RS 364, TP 20.

Altitude	Test Voltage
Sea Level	1200V AC RMS 1700V DC
70,000 ft.	300V AC RMS 420V DC

Altitude	Rated Voltage
Sea Level	500V AC RMS 700V DC
70,000 ft.	125V AC RMS 200V DC

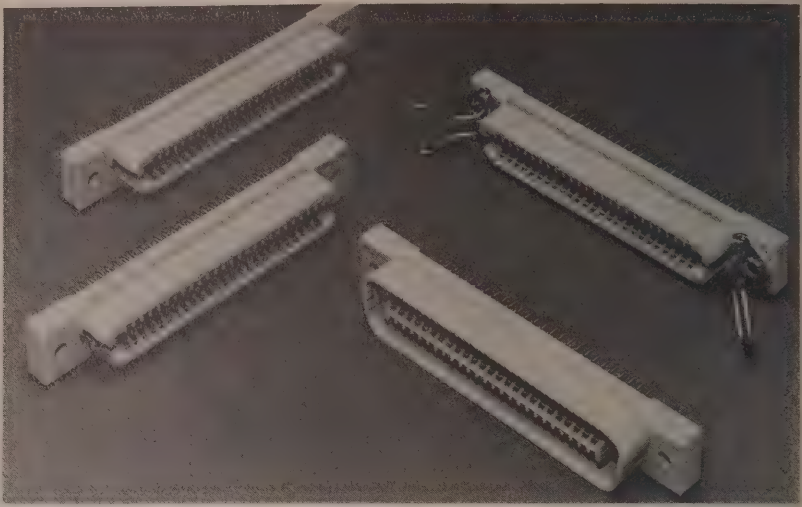
- Insulation Resistance per EIA Standard RS 364, TP 21.

Initial	5000 Megohms Min.
After Moisture	1000 Megohms Min.

Contact Current Rating
5 Amperes

- Contact Resistance per EIA Standard RS 364, TP 6.
- Low Level Contact Resistance per EIA Standard RS 364, TP 23.

Millivolt Drop
30 Millivolts (6 Milliohms) Max.



(A) Insta-Latch mating features patented spring clips that make an audible "click" to signal that plug and receptacle are fully mated and secure. No additional hardware required. (B) "No Latch" mating offers a precision, reliable connection without locking. (C) Spring Bail Latch uses two spring bail wire clips to lock the two halves together.

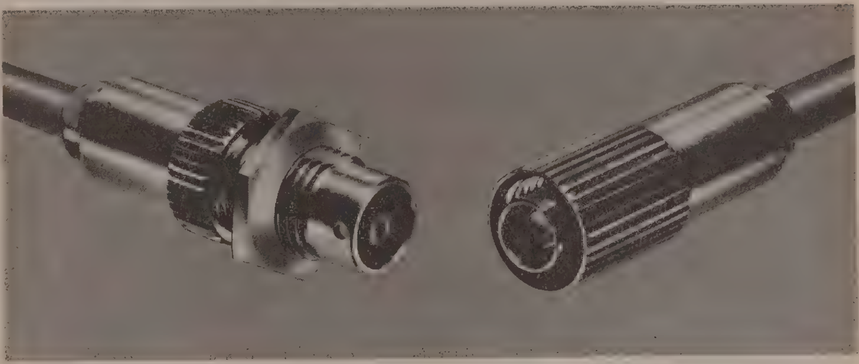
Optalign* Metal Shell Fiber Optic Connectors

Model MM (Multi Mode) and Model SM (Single Mode)

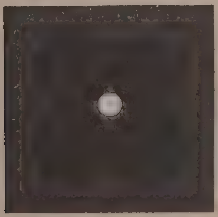


Directly applicable to computers, telecommunications, cable television, medical, instrumentation and military requirements, TRW Connectors for single fiber cable are state-of-the-art advances in reliable coupling of very fine fibers.

Optalign Metal Shell Fiber Optic Connectors can be manufactured to suit your cable and fiber requirements.

- Precise, stable, repeatable, rapid connections made by hand with insertion loss of 0.5 db or less.
- Scribe-cleaved fiber requires no epoxies or polishing of ends.
- Only two tools required: fiber jacket/fiber preparation tool and fiber scribe and cleave tool.
- Zero gap compressive—fiber mating assured even under vibration and shock (Mil. Std. 202 test).
- Fibers fully protected by sliding piston and deep recess when unmated.
- Internal scissor clamp secures both fiber and strength member and accommodates a range of fiber cable constructions.
- Unique four rod glass alignment element guides mating fibers into precise alignment under compression.
- Glass alignment element is stable, inert, strong, clean and compatible with both silica and plastic fibers.
- Relative low cost for performance.
- Compact: Both plug and receptacle each measure .625″ (15,9 mm) diam. x 1.5″ (38,1 mm) long.
- Cable to cable or cable to panel mounting. Panel mounted receptacle extends .810 (21 mm) behind panel.
- Strain relief to fit most cables.

*Trademark TRW Inc



Cross Section of Four Rod Glass Alignment Element

The unique fiber alignment element invented by TRW employs an all-glass four rod array. This element, integrally fused and slightly curved, is fitted into a plastic slug. The bore of this multi-rod array in its curved state permits entering fibers to meet deep within and common to one of the Vee shaped interstices. The inherent self-aligning characteristics permit close lateral and angular matching enhanced by self retained index matching fluid. No epoxies are required. In fact, the fibers are loaded in compression and self limit. This feature yields excellent shock and vibration immunity. An important feature of the all-glass array is its inherent cleanliness, chemical inertness, protective enclosure and ability to accept fiber diameters which might be at opposite tolerance limits. Most importantly the glass array does not in any way demand precision tolerances and dimensions of its connector envelope to achieve low losses. A result is lower connection cost.

Materials and Finishes:

Outer Shell: Aluminum—machined and anodized.
Internal Scissor Clamp: Molded Plastic.
Fiber Alignment Element: Four-glass-rod array, fused and slightly curved, and fitted to plastic slug.
Strain Relief: Molded rubber.
Preliminary Operational Data:
Mechanical Coupling: Threaded ring.
Zero Gap Compressive: Fiber mating assured, even under vibration and shock (mil. std. 202 test).
Insertion Loss: Single Mode: Less than 1.0 db. Multi Mode: 0.2 db typical.
Behind Panel Distance: .810″ (21 mm) for mounted receptacle.

Model MM (Multi Mode)
Plug Part No. 296-62-01-001
Receptacle Part No. 296-62-02-001

Model SM (Single Mode)
Plug Part No. 296-63-01-001
Receptacle Part No. 296-63-02-001

Accessories:

1. Fiber Clamp Alignment Guide: Part No. 599-11-11-410 (Order one for use in positioning fiber to clamp per instruction sheet - is reusable and will service any number of connector halves.)
2. Cable Stripping Tool: Part No. 599-11-11-409 for stripping Siecor cable.
3. Strength Member Trim Scissors: Part No. 599-11-11-407.
4. Fiber Scribe and Cleave Tool: Part No. 599-11-11-408 (Provides proper tension, length and square, optical face to Silica fibers.)

Everything needed for making fast low-cost, low-loss, optical fiber splices in the field.

- Precision fiber alignment.
- Typical insertion losses are less than 0.3dB for multi mode and less than 0.8dB for single mode fiber.
- Rapid, easy assembly; 3 min. excluding cure time.
- Strain relief on fiber buffer can be easily sealed.
- Designed for use in hazardous or high vibration areas.
- Requires no expensive equipment.
- Compact low profile package.
- Stainless steel sleeve mechanically crimped for structural integrity.

Optasplice

Each kit contains ten (10) Optasplice Splice Modules featuring the unique TRW Optaguide* Glass Alignment Guide which permits fast, accurate, low-loss splices of single or multi-mode optical fiber. The fiber junction in the alignment guide is bonded with a UV curable adhesive and protected by a mechanically crimped stainless steel sleeve. The splice can be installed in the field in less than three minutes, plus UV curing time using the tools provided.

Modules are available for 70μm, 125μm, 140μm diameter fibers.

Three kit models are available: Model SK-3 (shown above) contains 10 Optasplice modules, splice assembly tool, crimp tool, tweezers, 30X hand-held microscope, UV curable optical index matching adhesive, Optascribe* fiber cleaving tool and portable UV light source.

Optasplice Kit Model SK-2 contains the same components less the UV light source; Model SK-1 comes without UV light source or the Optascribe fiber cleaving tool. Refill splice modules are available for most commonly used optical fiber sizes. See back page for more details and specifications on the Optasplice Kits and Splice Modules.

Optasplice Low-Loss Splice Modules

Optasplice Splice Modules use the unique Optaguide fiber alignment element patented by TRW. This element is a four-rod, glass array, integrally fused with slight bends at both ends. The bore of this multi-rod array with its bent geometry permits entering fibers to meet in the center of the alignment element and common to one of the vee-shaped interstices. This inherent self-aligning characteristic permits close lateral and angular matching, and provides excellent shock and vibration immunity.

The glass guides are mounted to a copper alloy substrate for structural support. Silicone strain reliefs are provided to protect the optical fiber from mechanical stress. A stainless steel sleeve is crimped on the silicone sleeves to provide protection and mechanical support for the completed splice module. The result is a fast, simple field installable splice at significantly lower connection cost.

TRW Optasplice Optical Fiber Splice Module

Optasplice* Optical Fiber Splice Kits

TRW

Model SK1 (P/N 296-31-XX-XXX)**

Basic Splice Kit includes:

- Ten (10) individually packaged Optasplice splice modules.
- Splice assembly tool.
- 30X inspection microscope.
- Crimp tool.
- Tweezers.
- UV optical adhesive.
- Compact, portable, carrying case; 13"(330.2mm)L × 9"(228.6mm)W × 3"(76.2mm)H.
- Weight 2.9 lbs.
- Case material; high-impact molded ABS plastic.
- Specify fiber diameter and strain relief to handle buffer jacket diameters of Optasplice modules.

Model SK2 (P/N 296-32-XX-XXX)**

Same as Model SK1 with the addition of:

- Low cost, Optascribe fiber cleaving tool.
- Same carrying case as Model SK1.
- Weight 3.5 lbs.
- Specify fiber diameters and strain relief of Optasplice modules.

Model SK3 (P/N 296-33-XX-XXX)**

Same as Model SK1 with the addition of:

- Low cost, Optascribe cleaving tool.
- Portable, rechargeable UV light source.
- Compact, portable carrying case; 15"(381.0mm)L × 13"(330.2mm)W × 3"(76.2mm)H.
- Weight 5.6 lbs.
- Specify fiber diameter and strain relief of Optasplice modules.

**The last five digits refer to fiber and strain relief diameters. (Use same size designation as indicated in "How To Order" information below.)

Optasplice Splice Module Specifications

Mechanical:
Fiber diameters: 70μm, 125μm, 140μm.
Sleeve dimensions: 2.125"(53.795mm) long × 0.125"(3.175mm) dia.

Materials:
Outer sleeve—stainless steel.
Strain relief—molded silicone rubber.
Optaguide fiber alignment element—four-rod, glass array, mounted on a reinforced copper substrate.

Insertion Loss:
Multi mode fiber: less than 0.3dB typical.
Single mode fiber: less than 0.8dB typical.

Temperature range:
−55°C to +85°C.

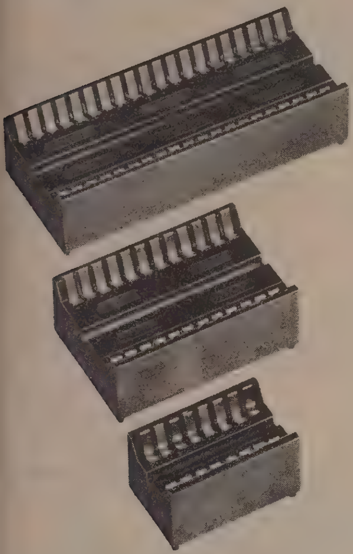
Cinch I.C. Sockets

Burn-In-Sockets



Cinch burn-in-sockets guarantee high reliability in static and dynamic burn-in applications with constant or varying temperatures.

The unique contact design with a large target area for easy insertion and an additional stainless steel tension spring guarantee high reliability and constant contact force. The features of the socket eliminate solder or flux wicking problems.

- for components in DIL package
- temperature resistant up to +200°C
- center slot for easy unloading
- large target area for easy insertion
- contacts of corrosion proof alloy, gold plated
- suitable as high quality test socket

Electrical Specifications

Contact resistance: 10 megohm
Current rating: 1 amp
Voltage rating: 125 volts
Test voltage: 500 volts
Insulation resistance: 5 G ohm
Contact capacity: 2 pF

Environmental And Mechanical Specifications

Plug in cycles: 1000
Contact pressure: 0.5 N
Insertion force per contact: 1.0 N
Extraction force per contact: 0.2 N
Temperature limits: −55 to +220°C
Inflammability: UL-94 V O
Number of contacts: 16, 18, 20, 24, 28, 40

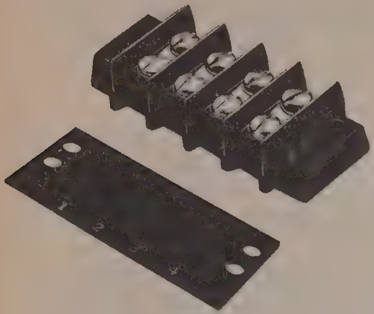
"Jones" Barrier Terminal Blocks And Accessories

TRW



Interposing barriers between each terminal position yields substantially higher electrical ratings and provides an additional safeguard against shorting from frayed wires.

The wide size range of "Jones" barrier terminal blocks, the several termination options and the available accessories permit flexibility of end use application.

Marker strips identify terminal positions on barrier terminal blocks and insulate exposed portions of terminals from a conductive mounting surface. Marker strips for Series 140 thru 164 are 1/32 inch thick flame retardent material and mount under the terminal strip.
One-eighth inch white numerals standard.

"Y"

Insulator: Monoblock, general purpose black phenolic.
Operating temperature range: -55°F to +300°F.
Eyelets: Nickel plated brass.
Binder head screws: Steel with .0002″ nickel over copper flash. Undercut head firmly grips wire. Binder head screws are referred to as standard screws.
Solder terminals: Brass, electrotinned. "3/4 W" terminals for solder connection of wires to one side of the barrier terminal block. "W" terminals for solder connection to both sides. "Y" terminals for solder connection of wires underneath the barrier terminal block.

Printed Circuit Barrier Terminal Blocks UL Recognized

These barrier terminal blocks have molded-in terminals that cannot break loose when terminal screw (#5/40 Binder Head) is tightened. They are designed for flow solder termination to the P.C. board conductor paths.

"Jones" Barrier Terminal Blocks And Accessories

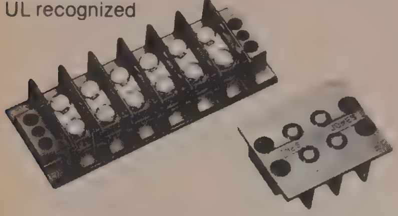
Series 540/541/542

UL recognized



The 500 Series Jones barrier terminal blocks have high barriers and are designed for applications where electrical and mechanical performance requirements are especially critical. Bottoms are closed so insulating strips are not required. Knockouts are molded into the base so Y terminals can be accommodated if desired. A top-mounted marker strip can be furnished.

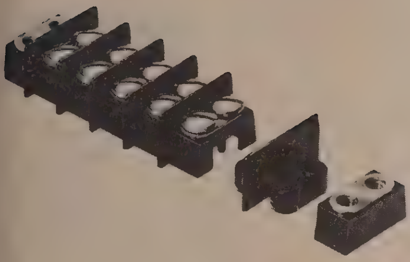
Cinch Modular Barrier Blocks

TRW



Easy-to-assemble Cinch modular barrier block concept lets you snap together terminations to provide permanent circuit configurations. Simply fit two or three modules together. Add barrier junction and end caps. Position between jaws of hand pliers and apply pressure for a permanent installation. Rugged, flame retardant barrier blocks are interchangeable with Cinch standard series and can be used with standard accessories.

Insulation: Black glass filled polyester
Rating: 15 amps—750v D.C. or A.C. peak
Operating Temperature Range: -55°C to +100°C
Terminal Plates: Nickel plated brass
Terminal Tags: Solder coated brass
Screws: No. 4 BA, binder head, nickel plated brass

"Jones" Barrier Terminal Blocks And Accessories

Fanning Strips

Fanning Strips

Fanning strips facilitate cable or harness wiring and minimize the possibility of subsequent wiring errors. Both straight and angle type fanning strips are available. Terminals are made of .032 (.81 mm) brass cadmium-plated. XP black phenolic mounts are .078″ (1.98 mm) thick, .500″ (12.70 mm) wide furnished with a hole in either the right or left side, for securing the cable with lacing twine. A cable clamp is recommended for larger sizes.

"Jones" Barrier Terminal Blocks And Accessories

Solder terminals: "W", "¾ W" & "Y"

"W"

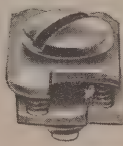
"3/4 W"

"Y"

Optional terminals for use with 140, 141 and 142 series barrier blocks as indicated in the chart below. "W" terminals are also available for use with 150, 151 and 152 series barrier blocks. Part numbers for ordering separate terminals are listed in the chart. For 164 series order solder terminals same as 140 series.

	Dist. Part No.		
	W-Type	¾W-Type	Y-Type
For 140 series	W-140	¾W-140	Y-140
For 141 series	W-141	¾W-141	Y-141
For 142 series	W-142	¾W-142	Y-142
For 150 series	W-150	–	–
For 151 series	W-151	–	–
For 152 series	W-152	–	–

Quick-Clamp* terminals



Simplifies engaging of wires to barrier blocks. Wire is inserted into flared opening and screw is tightened. Screws are nickel-plated brass, binder head type. Terminals are electro-tinned brass. Set includes two mating clamps and one screw.

Barrier Block Series	Dist. Part No.	Wire Gauge Accommodated	Screw Size
141, 541	QC-1	12 thru 22	6-32x5/16"
142, 542	QC-2	10 thru 16	8-32x3/8"

*Patent pending

"Jones" Plugs And Sockets

300 Series

TRW

General Description: A rugged, economical and highly reliable rack and panel type connector for cable connection and for inter-connecting power and/or signal carrying circuits of from two to as many as 33 wires. Available in four basic series: 300, 400, 2400 and 500, each series differing in mechanical and electrical characteristics.
Insulator: Molded monoblock, general purpose black phenolic.

Contact style: Plug has projecting flat blades. 300, 400 and 500 series sockets have recessed twin bellows. 2400 series socket has recessed bifurcated twin bellows.
Contact material: Plug—cadmium-plated brass. Socket—cadmium-plated phosphor bronze.
Hoods: The 300 series black plastic contemporary styled hoods are made of G.E. Noryl-N190. They are light weight, yet rugged, and provide protection from electric shock hazard. No dielectric liner is required. The 400, 2400 and 500 series hoods are formed metal, painted to a black wrinkle finish. There is a dielectric liner in the hood to prevent shorting.
Cable clamps: Zinc and clear irridite-plated steel. Used for strain relief.
Polarization: All "Jones" plugs and sockets are polarized to prevent wrong-way insertion.
Intermateability: The 400 and 2400 series are intermateable.
Operating temperature: Up to 105° centigrade.

300 series

(UL recognized)

For CSA approved part numbers—consult factory.

Designed for light and medium duty. Plug prongs are $5/32''$ (3.97 mm) wide and $3/64''$ (1.19 mm) thick. Monoblock construction with contacts "locked in" to withstand wiring stress. Solder lug terminals have .093" x .062" wiring holes. The two contact "Jones" connectors are round. All others are rectangular.

Electrical specifications

All connector ratings are based on a continuously mated condition.

Rated voltage: 730 volts rms
Contact resistance: .016 ohms max.
Rated current: Under most normal operating conditions where not all contacts are carrying substantially full rated current, maximum current per contact is 10 amperes. Under those conditions whereby all contacts are carrying "rated" current simultaneously, the current is as follows:

2-12 contacts . . . 7.5 amperes
15-33 contacts . . . 4.5 amperes

"Jones" Plugs And Sockets

400 Series

400 series

Designed for medium duty. Plug prongs are .250″ (6.35mm) wide x .055″ (1.40 mm) thick. Plug terminals have solder lugs. Socket terminals have solder eyelets. Intermates with 2400 series.

Electrical specifications
All connector ratings are based on a continuously mated condition.
Series 400: Rated voltage: 1100, **Contact resistance** (Average) .001 ohm, **Rated current:** 15 amps.

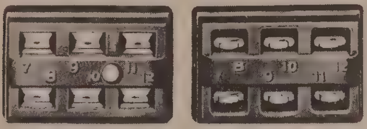
"Jones" Plugs And Sockets

2400 Series

2400 series

UL recognized



Designed for medium duty. The bifurcated bellows socket contact provides four individual flexing surfaces for maximum contact with the blade. Plug prongs are .250" (6.35 mm) wide x .055" (1.40 mm) thick. Plug terminals are solder lug. Socket terminals are solder eyelet. Intermateable with 400 series.

Series 2400 plugs and sockets have recessed pockets with barriers around the contacts, both on the mating side and the solder connecting side. A shoulder extends around the face (mating) side of both plug and socket presenting a finished appearance when mounted in bracket or cap. Angle brackets can be ordered as specials for the 2400 series.

Electrical specifications

All connector ratings are based on a continuously mated condition.

Series 2400—Rated voltage 1700; contact resistance (average): 001 ohm; rated current: *10 amps.

*Standard commercial service.

Dimensions for 2400 series

Except for the additional dielectric material in the barrier, as explained above, dimensions for the 2400 series are the same as for the 400 series. We have not included dimensional data for the 2400 series. It is available from Catalog C-1. Polarizing position data and mounting specifications are the same for both 400 and 2400 series. These are shown below.

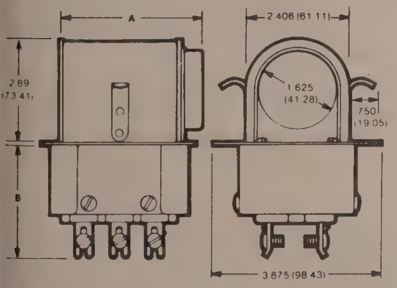
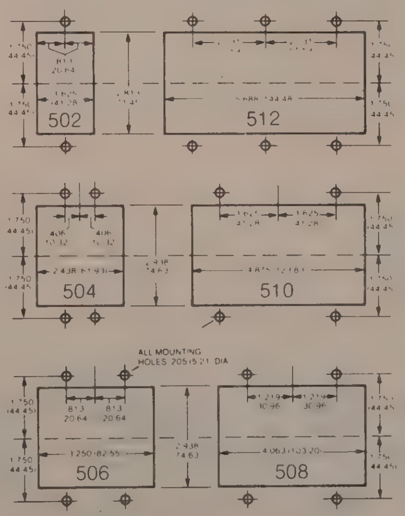
Dimensions



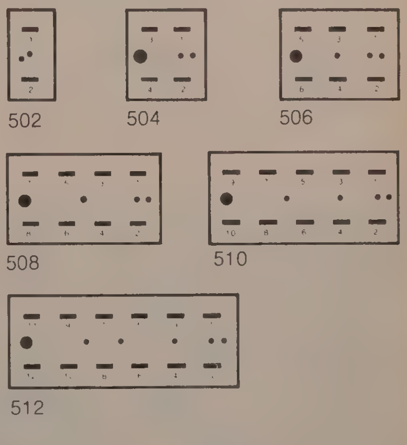
NOTE: Hoods are provided with a removable end cover that can be modified to provide cable access. After end cover is removed (unlock slotted head screws), a hole can be punched or cut for proper cable size and a standard BX, Romex or other suitable clamp can be installed to provide strain relief. Clamps are not provided with connectors.

Mounting specifications

For deep or shallow brackets



Polarizing position data



Vibra-Lok IV*
Mil-C 38999 Series IV Connectors

General Description

Vibra-Lok IV Connectors

Vibra-Lok IV coupling is a new, patented innovation. It provides a rugged, fool-proof, quick-disconnect operation in a miniature electrical connector. The Vibra-Lok mechanism distributes the coupling load over solid metal lands, while internal drive threads provide the mechanical advantage required to engage contacts and interfacial seals.

Positive Mate

Vibra-Lok IV connectors cannot be coupled (or partially coupled) until key/keyway alignment has been achieved—keys drop into keyways with a positive "feel" before coupling can begin. 90° coupling ring rotation brings the plug to the fully mated position. Three full-mate indicators are provided:

- A red band at the rear of the plug disappears.
- A detent mechanism provides an audible click and a distinct tactile indication of locking.
- An indicator line on the receptacle aligns with the main keyway indicator on the coupling ring, for positive visual inspection.

Increased Mechanical Performance

The Vibra-Lok IV connector meets requirements for shock, vibration, and heavy rear accessory loads which exceed those specified for most thread-coupled devices.

Increased Shielding Effectiveness

Excellent EMI/EMP shielding is provided by grounding fingers which operate on an uninterrupted cylindrical surface, and by careful selection of conductive finishes. Grounding occurs prior to contact engagement.

Sealing

Interfacial seals are fully compressed in the mated condition, preventing water intrusion. A dynamic O-ring provides a redundant peripheral seal, without reducing the effectiveness of the interface seal.

System Compatibility

Common features of the MIL-C-38999 family have been retained.

- Size and weight are similar to Series I.
- Common mounting cut-outs are used.
- Standard insert arrangements and wire sealing ranges are provided. Contacts, crimp tools, insertion/removal tools, sealing plugs and assembly techniques are standard for all MIL-C-38999 connectors.

Specifications

High Impact Shock

Mated connectors, wired with MIL-C-915/60 or /63 cable and equipped with straight environmentally sealed backshells, withstand high impact shock per MIL-S-901.

Vibration With Rear Accessory Loads

Mated connectors, with weights attached to simulate heavy rear accessories, withstand the following vibration levels:

- Sine vibration per MIL-STD-202, Method 204, Condition G.
- Random vibration per MIL-STD-202, Method 214, Condition II, Letter J.

Shielding Effectiveness (CNG6, Class F Only)

- EMI leakage attenuation greater than 90 dB at 100 MHz and greater than 65 dB through 10 GHz.
- Dynamic EMP protection greater than 90 dB from 1 to 100 MHz while subjected to 3G²/Hz random vibration.
- Shell-to-shell conductivity—1.0 millivolts maximum. (Class F and N).

Grounding Before Contact Engagement (CNG6 Only)

Grounding fingers engage .050 in. minimum prior to engagement of contacts, pro-

- **N.** Fluid Resistant Grommet Method 1016, MIL-STD-1344

viding full radiation hazard and HERO protection.

Temperature Range
Class C, F, Y and N: —65°C (—85°F) to +200°C (+392°F)
Class W: —65°C (—85°F) to +175°C (+347°F)

Corrosion Resistance
Class C and W withstand 500 hour salt spray.
Class F, Y and N withstand 48 hour salt spray.

Fluid Resistance
Connectors withstand specified immersions in MIL-L-7808, MIL-L-23699, MIL-H-5606, Chevron M2-V, Coolanol 25, Gasoline, Ethylene Glycol, Freon TMC, and other solvents and cleaning agents.

Rear Accessory Threads
Metric rear accessory threads provide increased strength and accept standard rear hardware. An uninterrupted cylindrical surface is provided for environmentally sealed accessories.

Scoop-Proof Design
Pin contacts are recessed to prevent damage due to scooping by the mating connector shell.

Pin-to-Pin Mating Protection
Plug and receptacle cannot mate when both contain the same contact type. This prevents the failures possible with many other connectors which permit pin to mate with pins, resulting in either lack of continuity, or short circuits and severe mechanical damage.

Coupling Durability
Meets specifications requirements of 500 cycles. Vibra-Lok IV is rated for over 750 cycles of mate/unmate cycles.

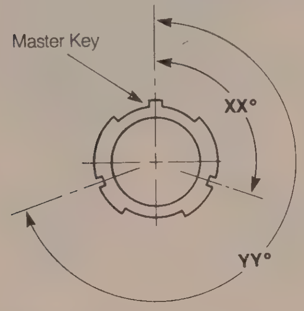
Vibra-Lok IV Polarization



Face of Receptacle Shown
Angle for the plug is opposite.

A plug with a given polarization letter will mate with a receptacle with the same polarization letter and opposite type of contacts. Inserts are not rotated. Shells with the same type contacts will not mate.

Key and Keyway Position	XX°	YY°
N	110°	250°
A	100°	260°
B	90°	270°
C	80°	280°
D	70°	290°

Consult Factory for Additional Polarization Positions.

How To Order Examples

CN02F25-35PN-000 = D38999/42FJ35PN
Receptacle, Aluminum, Box Mount, Conductive Nickel Plate, Shell Size 25 with 128 Crimp Style Pin Contacts (Size 22D), "N" Polarization, packaged without cable supports.

CNH7N19-11PB-000 = D38999/43NF11PB
Receptacle, Stainless Steel, Jam-Nut Mount, Conductive Nickel Plate Shell Size 19 with 11 Hermetic Solder Cup Pins (Size 16), "B" Polarization, packaged without cable supports.

C-48 Series Connectors
Mil-C 26500

TRW

More Contacts in Less Space
When it becomes necessary to provide connections for a large number of circuits in a limited space, a NULINE C 48 Series High Environmental Circular Connector is your best choice. TRW offers a wide selection of these miniature connectors that meet and exceed the requirements of MIL-C-26500. They are available in a variety of constructions, including those which can be potted. Most connectors feature MIL-C-39029 Crim-Lok contacts. Many others are available also with coaxial or shielded contacts.

Significant Advance in State-Of-The-Art
On the ground or in space, wherever there is a requirement for superior environmental protection, high reliability and minimum weight and bulk, TRW NULINE Connectors are the answer. To produce this series requires the satisfaction of many exacting requirements on reliability, logistics and present and anticipated environmental conditions. To meet these requirements, it was necessary to develop advanced design concepts, formulate materials for specific connector usage and work out new production techniques. The resulting connectors exceed the stringent requirements of MIL-C-26500 (USAF) for performance and reliability.

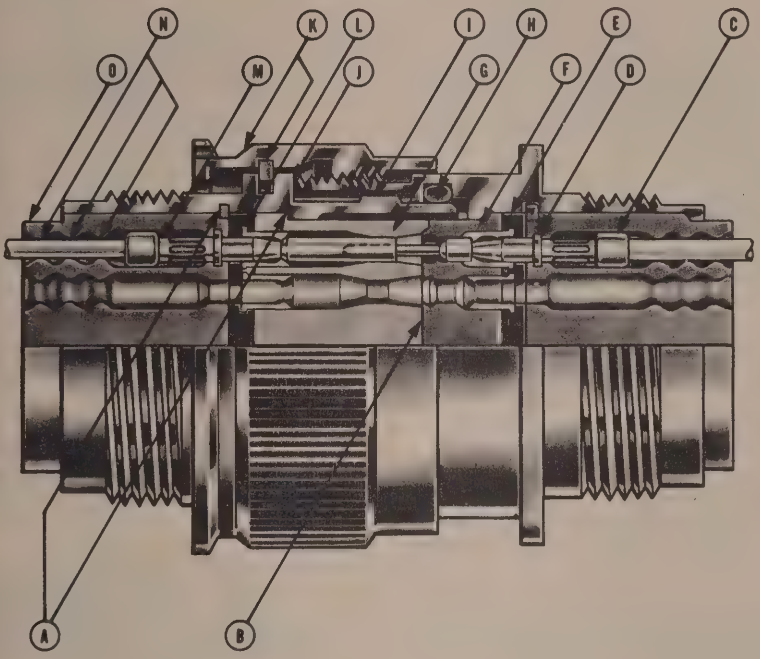
Full Performance In Extreme Environments
Advance materials technology and complete environmental sealing enable these remarkable connectors to:

- Operate continuously at 200°C (392°F)
- Take short exposures at up to 800°C (1472°F)
- Withstand thermal shock cycling from -55°C (-67°F) to 260°C (500°F)
- Support 1500 V RMS from sea level to 350,000 Ft.
- Maintain environmental and electrical integrity during and after 0 to 2000 CPS vibration, 15 G's during exposure to 200°C (392°F) and -55°C (-67°F)
- Resist corrosion, ozone, sand and dust.

Wide Variety of Configurations
Detailed information on configurations available, shell sizes, dimensions and data on how to order are given on pages **2•1732** - **2•1733**.

C-48 Series Connectors
Mil-C 26500

Design Features



- **A.** Positive Location Captivated Insert (Mechanical Interlock)
- **B.** Insert Static Face Seal
- **C.** Pin Contact, MIL-C-39029
- **D.** Contact Pressuring Seal
- **E.** Anti-Deflection Disc
- **F.** Resilient Pin Insert
- **G.** Insert Rim Seal
- **H.** Dynamic "O" Ring Shell Seal
- **I.** Five Key Shell Polarization
- **J.** Metal to Metal Shoulder
- **K.** Bayonet or Threaded Coupling, Permanent Captivation
- **L.** Contact Retention Clip
- **M.** Socket Contact, MIL-C-39029
- **N.** Wire Sealing Risers
- **O.** Grommet

Complete Environmental Sealing

NULINE C 48 Series Connectors are fully sealed against extreme environmental conditions. Silicone rubber dielectric provides resiliance and unsurpassed resistance to tear, compression set, fluids and high temperatures.

When the connectors are mated, insert faces compress to form a resilient dielectric seal around each individual contact. A continuous barrier on the periphery of the socket insert mates with a recess around the pin insert to form an additional compression seal. A dynamic "O" ring seal between mated shells constitutes still another barrier to dirt and moisture, and protects the integrity of the face seals. Together with monoblock construction, this puts void-free, continuous dielectric around each contact through the entire connector length.

Monoblock construction, with bonded interfaces between the dielectric components (insert, anti-deflection disc, and grommet) eliminates air voids and protects connectors from degrading moisture and altitude conditions. A pressurizing seal around each contact at the major O.D. prevents the passage of air or moisture through the contact hole, and triple sealing riser design at each wire hole in the grommet seals each individual wire.

Light Weight and High Contact Density

Connector shells are machined from bar stock aluminum to minimize stresses with a high strength-to-weight ratio. The insert arrangement is designed for the maximum number of contacts within the area available.

Crim-Lok Contacts

Crim-Lok contacts (front release, rear insertable) provide for easy servicing of connector circuits without disassembling the connector from its mounting, or disturbing adjacent contacts. MIL-C-39029 contacts are crimped quickly, consistently, and reliably with either hand or power tools. They have high electrical conductivity, present a smooth configuration, and completely protect electrical contact pressure-members from environmental and handling damage. The contacts come in sizes, 20, 16, 12 and shielded coaxial, with gold-over-nickel plating. (Other platings such as rhodium-over-silver are available; write factory for details.)

C-48 Series Connectors Mil-C 26500

TRW

Test Description	Test Requirement	Test Result
Maintenance Aging	Connectors shall be coupled and uncoupled 10 times. Minimum of 10 contacts removed and reinserted 10 times. Connectors shall meet requirement of all succeeding tests.	There was no observable damage. Connectors met or exceeded requirements of all succeeding tests.
Contact Retention	Axial loads (20 lbs.—size 20; 25 lbs.—size 16; 30 lbs.—size 12) shall be applied to the front and rear of individual contacts in unmated connectors. The rate of application shall be approximately 1 pound per second. Axial displacement shall be 0.012 inch maximum when the pressure is applied from the front side.	Maintains load after 10 cycles. Axial displacement is within requirements.
Dielectric Withstanding Voltage Altitude and Sea Level	Mated connectors shall be subjected to 1000 volts rms at altitudes up to 110,000 feet and 1500 volts rms at sea level. Unmated connectors shall be subjected to 250 volts rms at altitudes up to 110,000 feet and 1500 volts rms at sea level. There shall be no evidence of breakdown or flashover.	There was no evidence of breakdown or flashover.
Thermal Shock	Mated connectors shall be exposed for 30 minutes to each temperature from -55° to +260°C. Transfers between temperatures begin at -55°C and are made within two minutes. There shall be no damage detrimental to connector operation.	After five cycles, there was no evidence of cracking, fracture, or other damage detrimental to connector operation.
Vibration	Completely wired and mated connectors shall be mounted on an appropriate fixture on a vibration table. All contacts shall be wired in series. Current level shall be 100 milliamperes. There shall be no continuity interruption longer than 1 microsecond, contact chatter, or physical damage to the connectors.	There was no intermittency or evidence of physical damage to the connector.
Durability	Connectors shall be mated and unmated 200 times (NULINE C-48 Series, threaded), or 500 times (NULINE C-48 Series, bayonet), without producing physical or electrical defects detrimental to operation. They shall meet requirements of Dielectric Withstanding Voltage test.	There was no damage detrimental to connector operation. Dielectric Withstanding Voltage test was passed.
Corrosion	Unmated connectors shall be exposed to a salt spray for 48 hours without exposing base metal.	There was no exposure of base metal. Connectors mated satisfactorily three times.
Air Leakage	30 psi shall be separately applied against rear grommet and insert face of connector exposed to 25°C and 55°C temperatures. There shall be no measurable air leakage.	There was no measurable air leakage.
Ozone Exposure	Unmated connectors shall be exposed at room temperature to air containing a minimum ozone concentration of 0.01 to 0.015 percent by volume. There shall be no evidence of deterioration.	No damage occurred to connector dielectric.
Insulation Resistance	As measured between five pairs of adjacent contacts and three contacts closest to the shell and the shell itself, insulation resistance shall be 5000 megohms minimum, measured after Maintenance Aging.	Insulation resistance was in excess of 5000 megohms.
Altitude Immersion	Mated connectors shall support 1500 V RMS submerged in salt water for 30 minutes while pressure is alternated between sea level and 75,000 feet altitude equivalents.	There was no flashover or breakdown. Insulation resistance requirement was checked and met or exceeded..
Temperature Life	Connectors shall carry specified current for 1000 hours.	Connectors carried specified current for 1000 hours.
Moisture Resistance	Per MIL-STD-202, method 106. Connectors shall maintain insulation resistance of 1000 megohms minimum.	Insulation resistance was greater than 1000 megohms.
Fluid Immersion	Unmated connectors shall be immersed in fluid (MIL-H-5606 hydraulic fluid or MIL-L-9236 lubrication oil) for 20 hours. They shall couple properly and support 1500 volts ac (rms.)	Immersed connectors mated and unmated properly and withstood 1500 volts ac (rms) applied with no flashover or leakage breakdown.

Military Standard Part Numbers

You can use MS* as well as NULINE C48 Series part numbers in ordering C48 Series connectors. The MS part numbers for MIL-C-26500 connectors are worked out on the basis shown in the table below. Whether you order by the MS or the C48 Series number, all qualified connectors are shipped with the MS marking unless specified otherwise.

*MS part numbers are normally supplied less cable support. If cable support is desired, it must be specified.

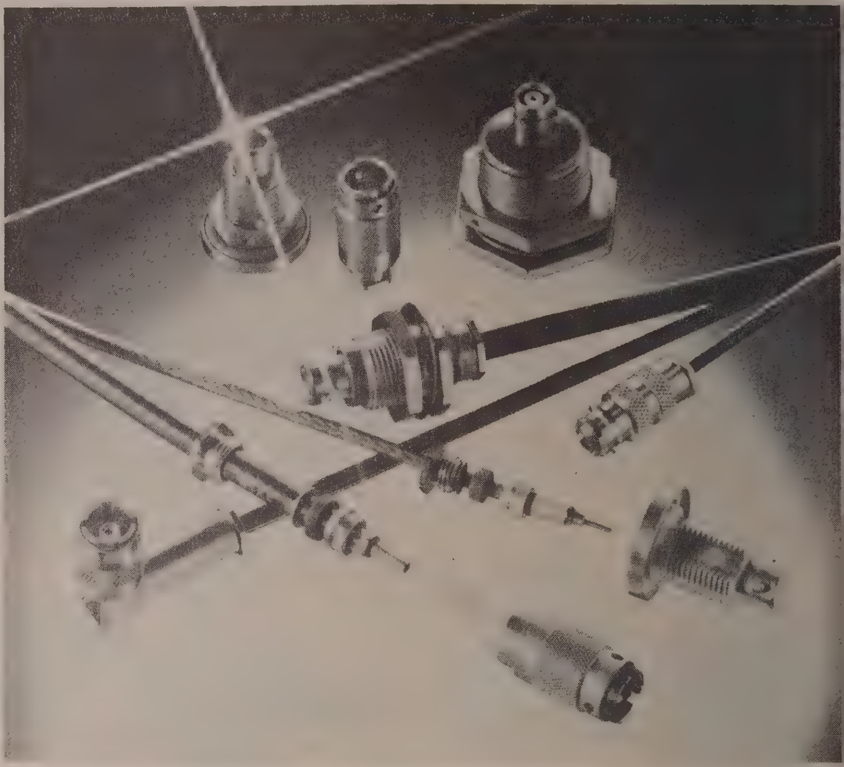
1200 Series Nu-Lok Connectors

TRW

Eliminate the weak link in your measurement systems with QP2 approved Nu-Lok 1200 Series coaxial connectors

Studies show 90 percent of electromechanical system malfunctions stem from the interconnecting cable/connectors. Now you can eliminate this weak link by specifying Nuline 1200 Series Nu-Lok connectors. Nu-Lok connectors deliver repeatable integrity of connections, assuring consistently accurate readings in your system. Plus, Nu-Lok connectors include:

- Environment resistance.
- Corrosion resistance (i.e., against hydro carbon fuels, lubricants, sea water, etc.).
- Built to MIL-C-25516 requirements.
- Solder pot or crimp contact designs.
- Accommodate conductor sizes 18 AWG or smaller, either coaxial or unshielded single conductor types.
- Crimp design provides termination for cable braid.
- Bulkhead-mounted types available in conventional pressure-sealed construction of true hermetic seal design with fused glass-to-metal seals.
- Easy installation/maintenance with common tools.
- Center contacts are double-plated gold over nickel and "captive," providing electrical continuity completely independent of cable stability.
- Socket contacts chamfered to facilitate insertion/separation with minimal damage.
- Impedance match — insensitive at frequencies up to 1 GHz.



Specify 1200 Series Nu-Lok Connectors*

- Cable Connectors/Gold Plated
  - Jacks, Straight
  - Plugs, isolated shield
  - Plugs, Straight and Right Angle
  - Tee Adapters, Plug to Jacks, Jack to Jacks
  - Cable Splice (Shielded Cable)
- Bulkhead Mounted Connectors
  - Feedthru, Cable to Jack, Threaded Mounting
  - Feedthru, Jack to Jack, Threaded Mounting
  - Feedthru, Jack to Tee Jacks, Threaded Mounting
  - Feedthru, Jack to Jack, Solder Mounting
  - Feedthru, Jack to Lug, Solder Mounting
  - Feedthru, cable to cable junction, threaded mounting (Shielded Cable, Isolated Ground)
  - Junction Box, common or isolated ground
- Protective Receptacle Covers (gold plated)
  - Protective Jack with/without metal chain
  - Protective Plug, standard with/without metal/nylon chain

Performance Characteristics

The high performance characteristics of the Nuline 1200 Series Nu-Lok connectors include:

- Withstand 1500 volts RMS without evidence of breakdown or leakage in excess of 0.3 ma, either mated or unmated at sea level. 750 volts RMS in altitude tests.
- Center contacts in hermetic connectors do not exceed 0.4 mv drop @ 10 ma.
- No detrimental effects on physical/electrical performance from endurance cycling.
- Maintain electrical continuity under 30-lb. cable retention load with no detrimental effects.
- Connectors maintain electrical seal integrity and remain fully operational following shock and vibration tests. Circuit continuity remains intact with no interruption greater than 10 micro-seconds.
- Maintain electrical integrity after salt spray test per MIL-STD 1344.
- Perform to rated criteria during thermal shock, high temperature, fluid immersion, altitude humidity and ozone tests.

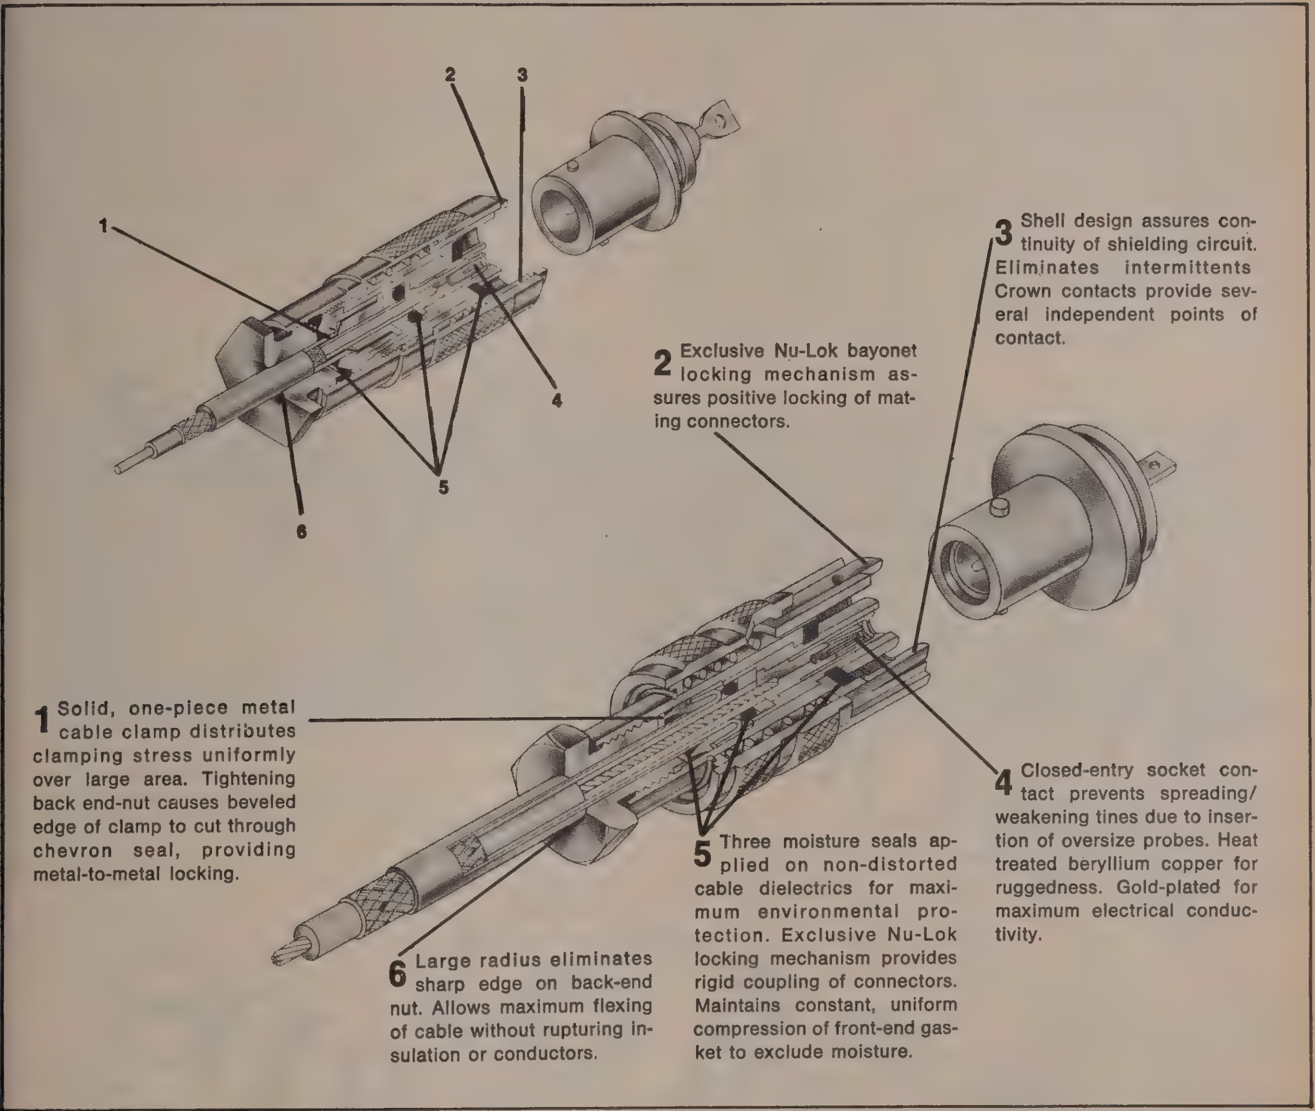
For complete test performance and specification data, consult Catalog Number CN-1.

CYLINDRICAL CONNECTOR DIVISION, TRW ELECTRONIC COMPONENTS GROUP, 8821 SCIENCE CENTER DRIVE, MINNEAPOLIS, MN 55428 • (612) 537-1010

1200 Series Nu-Lok Connectors

MIL-C-25516

TRW



3 Shell design assures continuity of shielding circuit. Eliminates intermittents Crown contacts provide several independent points of contact.

2 Exclusive Nu-Lok bayonet locking mechanism assures positive locking of mating connectors.

1 Solid, one-piece metal cable clamp distributes clamping stress uniformly over large area. Tightening back end-nut causes beveled edge of clamp to cut through chevron seal, providing metal-to-metal locking.

4 Closed-entry socket contact prevents spreading/weakening tines due to insertion of oversize probes. Heat treated beryllium copper for ruggedness. Gold-plated for maximum electrical conductivity.

5 Three moisture seals applied on non-distorted cable dielectrics for maximum environmental protection. Exclusive Nu-Lok locking mechanism provides rigid coupling of connectors. Maintains constant, uniform compression of front-end gasket to exclude moisture.

6 Large radius eliminates sharp edge on back-end nut. Allows maximum flexing of cable without rupturing insulation or conductors.

Proven integrity and reliability in critical low/high impedance circuits

Crimp Type
Solder Type

Nuline 1200 Series Nu-Lok Connectors are especially suited for use in both capacitance and radiation-monitoring fluid measurement systems because they help deliver constant, critically accurate readings. These connectors are completely unaffected by a wide range of fluids, from petroleum products to liquefied gases. Plus, they are designed to withstand high vibration levels and adverse environments.

Nu-Lok 1200 Series Connectors have applications in:

- RF circuits.
- Capacitance/pulse type circuits.
- High G environmental conditions.
- Rocket propulsion systems.
- Fuel measuring systems for aircraft.

And there's more. In fact, while standard designs anticipate most connector requirements, the Nu-Lok 1200 Series can be varied and specially adapted in plating, dimensions and configurations to meet any unique application needs. For complete information and/or technical assistance to solve your system interconnection problems, contact the Cylindrical Connector Division.

VIKING PC CONNECTORS

Viking Connectors Co. offers a high quality, versatile and affordable line of PC Connectors.

The standard products, shown here, can be modified to meet a variety of needs.

The one-piece PC Connector gives high reliability at low cost and is available with either bifurcated, semi-bellows or bellows contacts in selective or full gold plating with various insulator options.

Viking recently expanded their product line with an all plastic Right Angle D-Subminiature and the VSBX Series two-piece PC Connector system. The VSBX Connector system was initially developed by Viking as a unique solution to a need for a low cost method of stacking two PC boards. Now the product line has been expanded and is suitable for both parallel as well as perpendicular applications. Both the D-Subminiature and the VSBX Connectors are ideal for computer, peripheral, telecommunications, instrumentation and industrial control usage.

WALL-ABLE MANUFACTURING CORPORATION

1800 NORTH CLYBOURN AVENUE • CHICAGO, ILLINOIS 60614 • (312) 440-1000

For over 30 years, Wall-Able has been an innovator in the design and manufacture of low-cost connectors. Our ability to provide extraordinarily fast response to major OEM special requirements has earned us a reputation we've grown with. If you have requirements for custom components and critical deadlines, use our years of experience and know-how to economically fill your needs.

We're proud of our diverse selection of quality connectors, both standard and special designs. Listed on these pages are a variety of available Wall-Able products which may help you in your connector requirements. Try us to solve your next connector problem.

F Style Connectors

J75-59-7

J75-59-0

J75-59-6

J75-59-13

J75-59

J75-59-3

J75-59-4

J75-59-5

Widely used in CATV-STV and related applications, Wall-Able's connectors feature custom contact designs and solid reliability. Our F to phono adaptors offer flexibility for many cost-effective connection combinations. The double isolation adaptor J75-59-5 incorporates the ⅟₁₆″ minimum spacing required by UL in TV antenna applications.

Wall-Able provides high-quality cost-effective F style connectors, which are always state of the art.

Phono Jacks

J75-1021

J75-1001

J75-1183-1

J75-2183

J75-1007

J75-2190

Still the industry's most economical 2-conductor connectors, Wall-Able's variety of phono jacks is second to none. Panel mount, solder, and printed circuit styles, with or without solder stopping shoulders, are available with your choice of a variety of center conductor contacts. Jacks with special grooved shells to mate with our PSL spring plugs are also available for extra reliability.

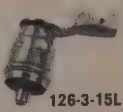
333-22-1



126-3-15L

Wall-Able's patented spring lock plugs offer the ultimate in phono connector reliability. Virtually indestructible in use, the mechanical and electrical advantages of this product have been proven by every major OEM. Available with a variety of wire entry sizes and center pin lengths.

Phono Jacks — Saddle Style

J75-2111S

J75-2118

J75-2028-1

WA-549

J75-1163S

J75-2029S

J75-1177S

J75-2077S

Wall-Able's large assortment of phono jacks can all be supplied ready for PC or solder assembly with a variety of tooled saddles. Specially assembled to avoid saddle-jack intermittency, these components offer cost-effective assembly methods.

Phono Plugs — Tulip Style

P75-2231

P75-1004

P75-1002

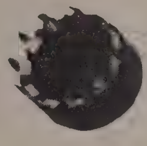
Wall-Able offers a variety of phono plugs for low-cost applications, utilizing low loss XXXP-FR insulators and standard pin lengths from ⅜″ to ¹¹⁄₁₆″. Right angle or straight cable strain relief variations are also available.

WALL-ABLE MANUFACTURING CORPORATION

1800 NORTH CLYBOURN AVENUE • CHICAGO, ILLINOIS 60614 • (312) 440-1000

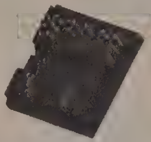
Relay Sockets

WA-928

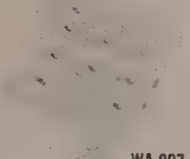


WA-922

WA-937



WA-961



WA-907

WA-909

General-purpose KU, Miniature KH, 8 & 11 pin round, and telephone type relay sockets are all available as standard products. Efficient multi-cavity molds, highest quality, UL-approved, flame retardant molding compounds and close tolerance spring brass and phospher bronze contacts assure long-life reliability.

Contacts/Contact Housings

WA-814

WA-339-2

WA-382

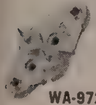
WA-302-140

WA-812

WA-813

Unique custom contacts and housings designed to solve specific customer requirements have long been a Wall-Able specialty. Single and multiple wire terminations for .093 pins, locking female terminals for .205 jewel disconnect tabs, PC edgeboard connectors and other parts have been cost-effectively and quickly engineered. Use our experience to reduce your connector costs and increase their reliability.

Power Transistor Bases



WA-972

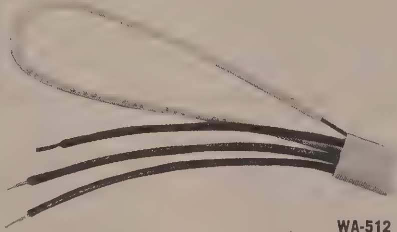
WA-923

WA-920

WA-943

Heavy duty, flame retardant molded transistor bases are manufactured with PC, 6-32, or 4-40 threaded saddles. A wide variety of contacts can be supplied in whatever plating best suits the individual requirements.

Harness Assemblies



WA-512

UL and CSA approved standard 18GA, 4-contact lamp socket assembly is assembled with durable urea housings. Special wire assemblies can be designed and produced.

Phono Jack Boards

WA-546-1

WA-544

WA-543

Phono jacks can be mounted independently or grouped on flame retardant phenolic boards or metal plates for use in audio and other phono base plate applications. Special common grounding links are also available.

Screw Terminals & Assemblies

WAJ-332

WAK-116

WAU-332

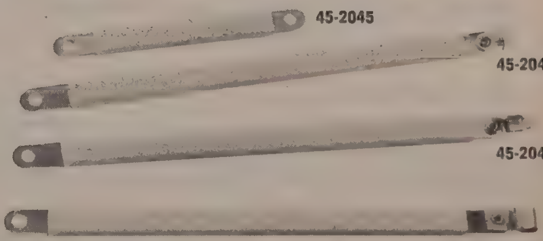
HU-375

WA-2120

WA-21-510

Wall-Able's patented screw/nut snap-in terminal is available individually or in board mounted multiple assemblies. Chances of breaking the wire connection are minimized with this style assembly. Standard 6-32 screw terminal assemblies are also available.

Ground Straps



As a major supplier of flat strap ground assemblies, Wall-Able manufactures a variety of straps for all electronic products where a low-cost, highly effective ground is desired. Snap-on, anti-rotation rivet type, and special grip style clips are available to speed the assembly operation.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

"Tiered Terminal": Two rows of type 970 DS are offset by half of the pitch. Produces an effective pitch of 2.5 mm/0.098 in.

*: Terminal strips can be butted side by side to form any requested pole configuration without losing center-to-center spacing.
Length measurement indicated refers to strip with maximal available number of circuits: 95 GDS-27 has 27 circuits and a length of 135mm/5.32in.
†: Each circuit is equipped with a test hole.

Terminal body accommodating 10-16 AWG: available for types: 970 DS, 972 DS, 960 DS, 962 DS, 97 EDS, 977 DS, 977 OPDS. It allows the connection of several conductors.

Extra features: Screen print labelling, labelling strips. Blocks can be supplied without wireguards (DS). Most types can be supplied with solder pins exceeding their standard length and up to 70mm/2.75in.

Moulding: Glass fibre reinforced Polyamide 6.6
Permissible temperature loading: short-time 200°C/392°F
continuous 100-120°C/212-248°F
Cold resistant down to: −50°C/−58°F

Terminal Body: Tin-plated Brass

Soldering Pin: Tin-plated copper, suitable for soldering

Wire Guard: Bright tin bronze

Screw: Zinc-plated steel, yellow chromated

HOW TO ORDER: Indicate Type and No. of Circuits, e.g.: 95 GDS-12 is type 95 GDS with 12 circuits.

°: soldered onto PC-board, the counterpart is removable.

*: terminal block can be butted side by side to form any requested pole configuration without losing center-to-center spacing.

Based on the standard program of screw-connectors for printed circuits a line of more than 20 different Plug and Socket Systems are available. A stainless steel spring provides the contact pressure to ensure a reliable connection not only to the male terminal, but also to other components. All systems offered provide for a quick connect and disconnect of wiring to PCB.

There are many advantages and benefits to using these components:

- Subassemblies manufactured at different places are equipped with either the male or female terminal of the selected WECO plug and socket screw-connector system. At the time the final assembly is to be finished one has only to plug the male into the female connector. No more wiring is necessary.
- Peripheral appliances can be connected to the main PC-board avoiding any risk of changing wires by mistake.
- For service purposes a PC-board can easily be disconnected. The plug-connector may then be used for testing the PC-board.
- The plug-connector also connects onto the PC-board, when direct wiring into a screw-connector is difficult because of limited space.
- Service-ability.

Spacing other than 5mm/0.197in: 5.08mm/0.200in available for types: 95 SVDS, 95 FB, 95 SGFB, 97 SVDS, 97 FB, 971 FB.
7.5mm/0.295in available for types:
97 SVDS/97 FB and 97 SVDS/971 FB
10mm/0.394in available for all listed types.

P.O. Box 84, Ste. Anne de Bellevue, P.Q.
Canada H9X 3L4
Phone: (514) 457-3648
Telex: 05-821840 WECO CDA BDRF

Moulding: Glassfibre reinforced Polyamide 6.6
Permissible temperature loading: short time: 200°C/392°F
continuous: 100-120°C/212-248°F
Cold resistant down to: −50°C/−58°F

Terminal Body: Nickel-plated brass

Spring: Stainless steel strip

Plug: Tin-plated brass

Soldering Pin: Tin-plated copper, suitable for soldering

Single soldering pin LST 1.3 × 6.5: Silver-plated brass

Wire guard: Bright tin bronze

Screw: Zinc-plated steel, yellow chromated.

Extra features: Screen print labelling; labelling strips; Blocks can be supplied without wire guard (DS); some types are available with projecting ribs at wire entrance to increase air gaps and creepage distance. Carrying plates are available to additionally interlock each assembly, to increase creepage distance to panel and provide absolute sure connection in vibration treated environment.

How to order: Please indicate type and no. of circuits, e.g.: 95 SVDS-05 and 95 FB-05. This is the pluggable arrangement of type 95 SVDS and 95 FB, with each 5 circuits per strip.

*600V with insulating base

Where service-ability is a must.
Plug and Socket Connectors are particularly suitable for installations where simple circuit closing and opening is required.
By pre-wiring various equipment sections, it is possible to use Plug and Socket Connectors to provide a quick and reliable connection during final assembly. Therefore wire confusion is avoided.
Blocks can be coded (color coding, labelling, etc.) to ensure proper connection. For greater safety the male block can be equipped with an extra long grounding plug.
Some of these assemblies are available for printed circuit application.
Standard strip has 12 circuits and can easily be cut to required number of poles or ordered as required. A mounting hole is provided between each circuit. The terminal screws are backed up and ready for wiring. The dead front design is for safety and avoids short circuitry.

Moulding: Flexible natural Polyamide
Terminal body: Nickel-plated brass
Spring: Stainless steel strip
Wire guard: Bright tin bronze
Screw: Zinc-plated steel, yellow chromated

Permissible temperature loading:
short-time: 140-160°C/284-320°F
continuous: 80-100°C/176-212°F
cold resistant down to: −40°C/−40°F

Extra features: Screw connections can be equipped with wire guard (DS) on request, to protect the conductors against damage through the screw. Marking strips; labels; mouldings can be supplied made of PVC or Polyethylene.
How to order: Please indicate type and no. of circuits, e.g.: 302 SV-05 and 302 FB-05. These are the types 302 SV and 302 FB ea. with 5 circuits.

Moulding: Flexible natural Polyamide
Permissible temperature loading:
short-time: 140-160°C/284-320°F
continuous: 80-100°C/176-212°F
Cold resistant down to −40°C/−40°F
Terminal body: Nickel-plated brass
Wire guard (HDS): stainless steel strip
Screw: zinc-plated steel, yellow chromated.

The terminal strips are used for connecting standard or solid wire directly to each contact. Standard strip has 12 circuits and can easily be cut to required number of poles or ordered as required. A mounting hole is provided between each circuit. The terminal screws are backed up and ready for wiring. The dead-front design is for safety and avoids short circuits. Each circuit has a wire guard (HDS), a thin memorizing steel plate placed between screw and wire. This avoids any wire damage. The screws are protected against working lose and cannot be lost.

Extra features: Marking strips, labels, strips can be supplied without wireguards. Strips can be made of PVC or Polyethylene. Several blocks can be supplied where each circuit is equipped with a screw/solder lug connection.

HOW TO ORDER: Please indicate Type and No. of circuits, e.g. 302 HDS-12 is terminal block type 302 HDS with 12 circuits.

Weidmüller TERMINALS FOR ELECTRONIC APPLICATIONS

Printed Circuit Blocks, Diode-Fitted Blocks and Component Holders

Weidmuller offers a wide range of small dimension modular blocks and multi-way strips which use a screw clamp for external connection. In addition, we also provide a wide selection of rail-mounted blocks fitted with diodes, and component holders which may be complemented with circuit conditioning components. These diode terminal blocks and holders can be assembled on STANDARD TS32 ASSEMBLY RAIL along with feed-through test, and fuse terminal blocks.

UL Recognized/CSA Certified

GSE Series for Printed Circuit Blocks

The single GSE modular block is interlocked with adjacent blocks by 5 spigots so that assemblies of up to 24 ways can be made with centers of 0.20 in (5.08 mm). Depending on the preferred mounting to the printed circuit GSE terminal blocks are supplied in three versions, horizontal, vertical or 45° angle. All Polyamid 6.6.

Diode Terminals For use with standard TS32 assembly rail

The DK4D Series offers a wide range of fittlings: Diode fitted; LED and Series Resistor fitted; LED, Series Resistor and Diode fitted, and with Neon Indicator and Series Resistor. Polyamid.

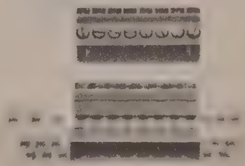
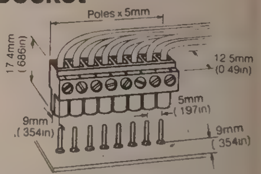
BL2...15/SL2...15 Series 2 to 15 Way Printed Circuit Plug and Socket





This plug and socket series is available in 5 mm and 5.08 mm centers that are mounted horizontal or vertical to the P.C. board. For an alternative connection, the BL socket can be connected to the P.C. board by means of a 0.63 in. (1.6 mm) round pin. Pins are suited to P.C. board up to 2 mm (0.78 in.) thick. The catalog numbers for this series reflect the 5.08 mm centers.

Polyamid 6.6

Component Holders For use with standard TS32 assembly rail

These component holders consist of a molded housing which can be fitted with a variety of screw clamps and solder lugs or quick-connect tabs.

EG 32/1

The EG 32/1 series provides for inclusion of components such as diodes, surge supressors, and resistor/capacitor networks which can be soldered into position. The molding also has a provision for mounting an indicator lamp, toggle, or potentionmeter. Polyamid 6.6.

EG 32/2

The EG 32/2 is similar in design to the EG 32/1 but also has provision for mounting a small printed circuit board. This series provides an extensive choice of quick-connect/solder lug connection positions. Polyamid 6.6.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire guage

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction code
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct curent
DIL dual in-line
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

WELCON PRODUCTION SOCKETS

SERIES 801 SINGLE BEAM

FEATURES

- Single face-wipe contacts providing low contact resistance with high retention force.
- Wide target area and chamfered cavity for easy insertion of IC devices.
- Overstress barrier to protect against contact damage.
- Very low profile . . . . 175″ off the p.c. board.
- Anti-float feature to hold the socket in place during the soldering process.
- Corner standoffs and open frame construction for easy removal of flux residue.
- Tin plating on phosphor bronze contacts.

TEST SPECIFICATIONS

Contact Insertion Force: 250 grams max. per pin.
Contact Extraction Force: 30 grams min. per pin before and after conditioning.
Contact Resistance: 30 Milliohms max. initial; 50 Milliohms max. after 10 insertions or 100 hrs at 105°C.
Rating: 250 VAC
Dielectric Withstanding Voltage: 1000 VRMS minimum.
Insulation Resistance: 5000 Megohms minimum.
Capacitance: 1 Picofarad maximum.

MATERIALS

Socket Body: Nylon, UL 94V-0 rated material
Contacts: Phosphor bronze
Contact Plating: 50 microinches of tin

PHOSPHOR BRONZE CONTACTS PLATED WITH A MINIMUM OF 50 MICROINCHES OF TIN

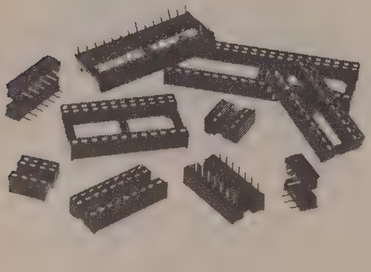
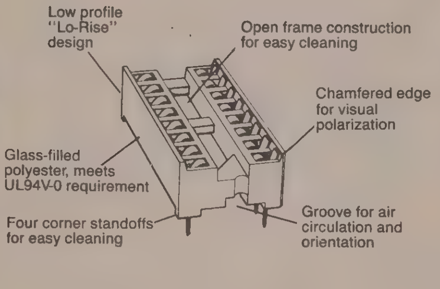
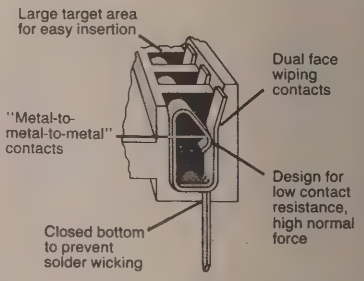
SERIES 802 "LO-RISE®"





Low profile "Lo-Rise" design
Open frame construction for easy cleaning
Chamfered edge for visual polarization
Glass-filled polyester, meets UL94V-0 requirement
Four corner standoffs for easy cleaning
Groove for air circulation and orientation



Large target area for easy insertion
Dual face wiping contacts
"Metal-to-metal-to-metal" contacts
Design for low contact resistance, high normal force
Closed bottom to prevent solder wicking

WELCON PRODUCTION SOCKETS

SERIES 630 "PRO-ZIF®"

FEATURES

- Easy to operate . . . Lever controls opening and closing of contacts.
- Light lead wiping action while contacts close.
- Designed for use in many production applications.
- Very compact, standing less than ¼″ off the p.c. board.
- Single face-wipe contacts on .600″ and .900″ pin row centers.
- Operating range of −40°C. to +105°C.
- Available in 24-, 28-, 40- and 64-leads.
- Beryllium copper contacts plated with 50 microinches of tin or 30 microinches of select gold.

Operating Temperature: Continuous −40°C. to +105°C.
Insulation Resistance (At 500 V.D.C.): 5,000 Megohms minimum.
Dielectric Withstanding Voltage: 600 Volts A.C. RMS minimum.
Durability: 100 Cycles—No electrical degradation.
Thermal Shock: MIL-STD-1344, Method 1003. No physical or electrical degradation.
Moisture Resistance: MIL-STD-202. Method 106; except omit steps 6B and 7A. 300 Megohms minimum.
Vibration: MIL-STD-1344. Method 2005. Condition 111. No electrical interruption greater than 1 microsecond.
Mechanical Shock: MIL-STD-202. Method 213. Condition 1. No electrical interruption greater than 1 microsecond.

TEST SPECIFICATIONS

Contact Insertion Force: Zero force with device leads at specified centers.
Contact Resistance: 20 Milliohms max. initial; 25 Milliohms max. after 100 insertions or 100 hrs. at 105°C.
Test Current: 1 Ampere.

SERIES 101 "VIP®" SCREW MACHINE

FEATURES

- Two-piece contact consisting of a machined outer sleeve and a four-leaf inner clip.
- Large, tapered entry providing easy insertion of the device leads and multiple points of contact.
- Gold-plated, beryllium copper inner clip to assure high reliability.
- Contact designed to meet MIL Specifications.
- Brass outer sleeve plated with 200 microinches of tin or 10 microinches of gold.
- Low profile . . . only .180″ above the p.c. board.
- Closed bottom to eliminate solder wicking.
- Three versions available . . . solid or open frame with solder pins and open frame with 2-level wire wrap tails.
- Open frame construction to allow maximum air circulation under the IC.
- Entry area designed to accept flat lead DIP ICs or .016″ to .021″ diameter round leads, maintaining a high retention.

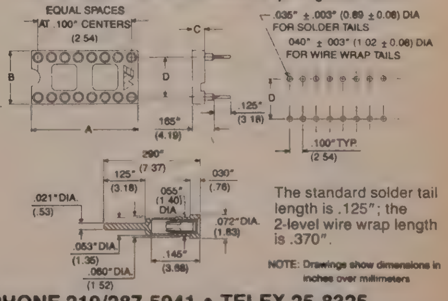
CONTACT PLATING

"28" denotes contact plating; Specifications are as follows:

"28":	Min. 10 microinches gold over min. 50 microinches nickel on the inner clip; min. 200 microinches tin on the outer sleeve.
"18" in place of "28":	Min 30 microinches gold over min. 50 microinches nickel on the inner clip; min. 200 microinches tin on the outer sleeve.
"06" in place of "28":	Min. 30 microinches gold over min. 50 microinches nickel on the inner clip; min. 10 microinches gold over min. 50 microinches nickel on the outer sleeve.

TEST SPECIFICATIONS

Contact Insertion Force: 340 grams maximum per pin. .008″x.015″ test blade, after conditioning.
Contact Extraction Force: 30 grams minimum per pin.. .008″x.015″ test blade, after conditioning.
Contact Resistance: 20 Milliohms maximum initial; 30 Milliohms maximum after 10 insertions or 100 hrs. at 105°C.
Vibration: 10 to 2000 Hz @ 20 g's per MIL-STD-202, test condition D. Method 204 (monitored for one microsecond opening).
Shock: 150 g's per MIL-STD-202, Method 213 (monitored for one microsecond opening).
Capacitance: Between adjacent terminals @ 1KHz per MIL-STD-202, Method 305. .4 pf maximum.
Capacitance: Between opposite terminals @ 1KHz per MIL-STD-202, Method 305. .02 pf maximum.
Terminal Anchoring Retention: Pull against barb locking action. 12 lbs. minimum.
Thermal Shock: −65°C. to +105°C. per MIL-STD-202, test condition F, Method 107. No failures.
Low Voltage Conductivity: Measured at an open circuit voltage of 10 microvolts. .1 milliamp minimum.
Salt Spray: Per MIL-STD-202, Method 101, condition B (48 hours). 20 Milliohms maximum.
Moisture Resistance: Per MIL-STD-202, Method 106, minus steps 7A and 7B. No damage.
Endurance and Exposure to Ammonium Sulfide Atmosphere (Contact): Exposure after 10 insertions of a DIP IC. Contact resistance: 30 Milliohms maximum.
Insulation Resistance (At 500 V.D.C.): Per MIL-S-83734. 500 Megohms minimum.
Dielectric Withstanding Voltage (At 1000 Volts AC): MIL-STD-202. Method 301 between adjoining conductors.



The standard solder tail length is .125″; the 2-level wire wrap length is .370″.

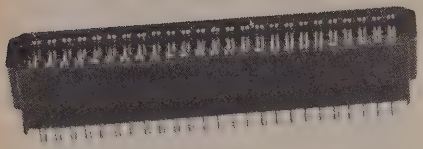
WELCON CONNECTORS

SERIES 400-401 CARD EDGE ON .100″ x .200″ SPACING



DESIGN FEATURES
- CDA 764 copper alloy contacts plated with low cost select gold.
- 10 Milliohms maximum contact resistance.
- Designed for easy board insertion.
- Available in 13 sizes with solder or wire wrap tails.
- Multiple mounting styles.
- Connector body molded of UL 94V-0 rated black polyester.

DESIGN FEATURES

- Standard footprint
- Right angle receptacle for p.c. board mounting.
- CDA 521 copper alloy contacts selectively plated with 10, 15, 20 or 30 microinches of gold.
- Connector body molded of a UL 94V-O insulator.
- Large circuit cavity lead-in.
- RS 232 and RS 449 compatible
- Tin lead plating on the contact tails.

BURN-IN TEST SOCKETS

GENERAL FEATURES

- Low cost select gold plating on beryllium copper or stainless steel contacts.
- Dual, face-wipe contacts for long,dependable life.
- For burn-in applications up to 200°C.
- Large target area for fast, easy insertion of IC devices.
- Also available with 50 microinches of electro nickel plating on stainless steel contacts.
- Tin plate on the solder tails.

Beryllium Copper Contacts Plated With 30 Microinches of Select Gold

TEST DATA

Contact Insertion Force: 680 grams max. per contact pair.

Contact Withdrawl Force: 30 grams min. per contact pair.

Contact Resistance: 20 Millohms max.

Test Current: 1 Ampere

Insulation Resistance [At 500 V.A.C. (RMS)]: Per MIL-STD-1344, Method 3003. Result: 5000 Megohms minimum.

Dielectric Withstanding Voltage: Per MIL-STD-1344, Method 3001. Result: 600 V.A.C. (RMS) minimum.

Moisture Resistance: 24 hrs. at 85°C., 85% RH. Result: 1000 Megohms minimum.

Temperature Cycling: 168 hrs. at 200°C. Result: No electrical or mechanical degradation.

Durability: 10,000 insertion/withdrawl cyles. Result: No electrical or mechanical degradation.

CONTACTORS & CARRIERS

FLATPACK CONTACTORS

FEATURES

- Improved performance with new extra-low-force ("ELF") contacts.
- Improved insertion of IC devices . . . no lead damage.
- Side air slots to allow maximum air circulation.
- For burn-in applications up to 200°C.
- No carrier distortion under high temperature burn-in.
- Tin plating on the solder tails.
- One-piece, non-corrosive stainless steel latch.

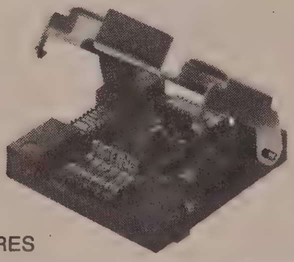
QUAD PACK CONTACTORS



FEATURES

- 24-and 68-lead quad pack contactors with .050" spacing between contacts.
- 32-, 44-and 72-lead quad pack contactors with .040" spacing between contacts.
- New extra-low-force ("ELF") contacts.
- Longlasting metal hinge pins.
- Contactor body molded of a high temperature material for burn-in applications up to 200°C.
- No carrier distortion.
- Easy insertion of IC leads.

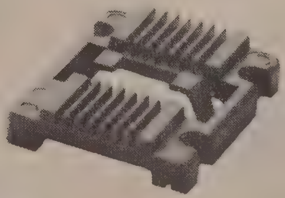
ONE-PIECE CARRIERS



FEATURES

- Specially designed for automatic loading and unloading.
- Can be molded from ESP materials.
- Increased retention . . . IC device will not drop out.
- Allows for large marking area.

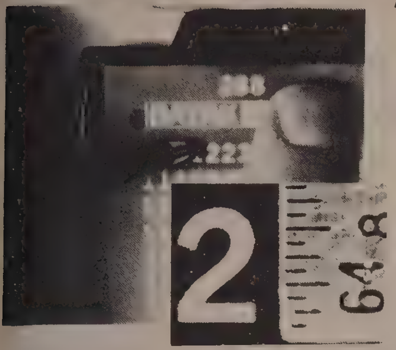
DATAK dry TRANSFERS and COATINGS



HOW THEY WORK . . . These amazing letters, words and art patterns transfer to any clean surface. Just rub down with a ballpoint pen! Heat-resistant adhesive is safe for diazo copies.

MASTER ART QUALITY . . . Razor sharp edge definition makes DATAK transfers superb for original artwork or prototypes.

TAILOR-MADE COATINGS . . . Any old protective spray won't work over dry transfers. Our formulas flow evenly over the transfer and protect it perfectly on all classes of surfaces: glass, paper, wood, metal, plastics or paint.

TITLES and COMPONENT DESIGNATION SETS for ELECTRONIC EQUIPMENT

Newest **professional titles** have thousands of ⅛"(12 pt.) and 0.105"(10 pt.) words for both standard and micro-sized equipment control panels. Sets have 24 sheets, 3½"x 5". 12 point sets use bold face type, have one letter and one number sheet; 10 point sets are bold face titles and include 4 each, light and bold number and letter sheets. Letter and number sets have 12 indentical sheets.

Component designation sets (TERMINAL and CHASSIS MARKING sets) include 24 sheets, 3½" x 5" of sequential numbers, letters and letter combinations conforming to ANSI Y32.16 and IEEE STD 200. This series is ⅛" size only. See JotDraft #JD192-JD251 for .085" through .250" designation numbers. Coat transfers for protection. See coatings section.

METER DIAL and SWITCH MARKING SET

Crisp meter graduations let you modify dial scales fast. Saves time and money compared to a "mod center" job. Tap switch marks are preset to 7.5° and 15° detents but will transfer to any angle. The smallest switch pattern will match knob skirts down to 0.5" diameter. Type style matches 10 point professional title and letter sets described above. Complete set includes 12 sheets, 5"x 7" in black, white and red. Refill sheets available separately in uncut sets of 4 identical sheets. *K19/1 available in white as a refill only. Protect panels with DATAKOAT or HARDKOAT. Do not coat dialplates.

DATAKOAT™ PROTECTIVE COATINGS

DATAKOAT is a 100% acrylic high-solids water-clear coating for metals and plastics. It encapsulates dry transfers in a tough film. Its solvents will not attack most plastics, lacquers or cured enamels. The dry film has a high dielectric strength, is very flexible, moderately hard and extremely resistant to weathering and UV exposure. DATAKOAT is not recommended for transfers on paper

Item	Price
04176 DATAKOAT Brushcoat and Thinner Kit (1 oz. ea.)	$3.00
04177 DATAKOAT Gloss Spray (12 oz. net wt.)	4.50
04178 DATAKOAT Matte Spray (12 oz. net wt.)	4.50

HARDKOAT™ PROTECTIVE COATINGS

HARDKOAT is a clear, very high-solids quality cellulosic resin for paper, wood and other porous surfaces. Its solvents fuse the dry transfer into the surface while its resins bond to the surface with an extremely hard, flexible film. HARDKOAT may be used on metals and many painted surfaces where it gives superior protection against abrasion and scratching. Its solvents temporarily soften many plastic materials, so it should be used with caution. Multiple heavy coats may have a very faint yellowish tint. Use DATAKOAT if an absolutely water-clear coating is essential

Item	Price
04170 HARDKOAT Gloss Spray (12 oz. net wt.)	$4.50
04171 HARDKOAT Matte Spray (12 oz. net wt.)	4.50

See Sections 1700 and 6000 for DATAK Printed Circuit Kits and Wire Markers

EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

Safety Collet Knobs

INTERLOK
ONE OF THE **PURDY** GROUP OF COMPANIES

770 AIRPORT BOULEVARD, BURLINGAME, CALIFORNIA 94010 • TEL (415) 348-5625 • TWX 910-374-2353

Modular Design

The modular design and the wide assortment of INTERLOK collet knobs offer countless possible combinations. The standard and wing knobs are of contemporary design, available in 7 sizes and various colors. A broad selection of accessory components is also available, including knobs caps and pointers in no less than 7 colors, various printed dials, stators, sockets and nut covers.

Material

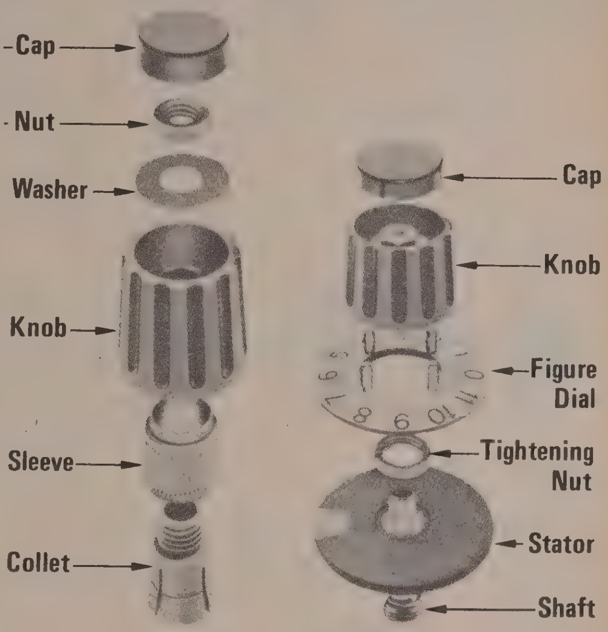
With the exception of the transparent figure dials all of the INTERLOK collet knbos and accessoires are made of Polyamide.

Safety

With the knob installed and the cap in place there is no possibility of shock hazard as there are no exposed metal parts, thus satisfying both O.S.H.A. and U.L. requirements.

Colors

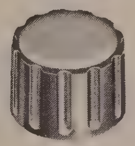
INTERLOK collet knobs offer a very wide coice of standard colors and color combinations in both glossy and matte finish. Collet knobs are available in light gray, black and red. Caps and pointers are available in light gray, black, red, blue, yellow, and green. In addition INTERLOK offers custom colors to meet your exacting requirements.



Collet Knobs Series A

This series offers a full range of sizes and colors. They have attractive and modern styling.

A Series



Collet Knob Sizes

INTERLOK collet knobs are available in diameters of 9 mm, 10 mm, 14.5 mm, 21 mm, 28 mm, 36 mm and 45 mm.

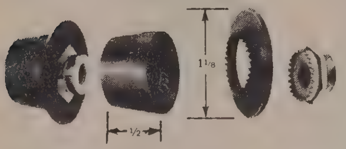
All Ratios are ±10%.

Employ precision ball bearings. For rotary control of components. Smooth motion. Ruggedly built, permanently sealed and lubricated.

Input and output shafts operate in SAME DIRECTION. Type "RDL" provides "in-line" input-output shafts. Type "RDLC" is supplied with **concentric** shafts whereby the output envelopes the input shaft. An added feature of Type "RDLCC" is the output shaft in the rear.

KNOB RATIO DRIVE



9 to 1 ratio (to dial skirt).
1:1 to potentiometer.

Cat. No. KRD-11 (Plain Gripping Surface)
Cat. No. KRD-12 (Knurled Gripping Surface)

Other ratios designed to specifications. Engineered miniature gear system, permits precise, fine tuning of controls.

Brass gears; black anodized aluminum knob and dial. Available with knurled or non-knurled outside knob. Available for 1/8″ shafts. 1/4″ on special order.

IN-LINE RATIO DRIVE — 6.3:1

For smooth rotary control of components requiring Vernier adjustments. Suitable for use where panel space is at a premium. Durable, ruggedized ball bearing mechanism.

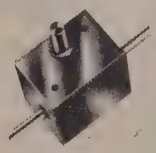
RIGHT ANGLE RATIO DRIVES — Versatile, Miniaturized, Right Angle Rotary Controls



RAWG ( )
RABG ( )

Dual output stainless steel shafts at right angles to input, provide ideal type instrument control. With matched bevel, worm gears cover wide range of ratios.

Especially useful for handling spring or gravity-loaded components. Output shaft automatically locks in any desired position yet remains free for smooth adjustment by input shaft. Assembled in dust-proof housings, gears are permanently pinned in place mounted in oilite bearings, and held under constant pressure.

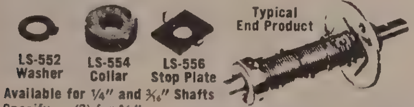
LIMIT STOP COMPONENTS

Limit stop as a component to design with, potentiometers, capacitors, or other similar units. Added washers enables an increase in stop range (with precision). Dual locking screws maintain settings under all conditions of shock and vibration.



Typical End Product

LS-552 Washer **LS-554** Collar **LS-556** Stop Plate

Available for 1/4″ and 3/16″ Shafts

Specify — (3) for 3/16″
— (4) for 1/4″

Can be designed internally into JANSET knobs.

MINIATURIZED SLIP CLUTCH

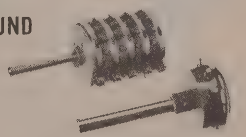
Couples 1/8″, 3/16″ or 1/4″ input-output (2 set screws). Also 'D' shafts (with or without set screws). Torques: 2 to 50 oz./in. All metal components. 5/8″ dia. x 5/8″ long.

APS-1723

Shaft sizes (—2=1/8″) (—3=3/16″) (—4=1/4″) min. & max. torque in oz./inches

Example: Part #APS-1723-34-8-16
To fit 3/16″ dia. shaft to 1/4″ dia. shaft, and torque 8 to 16 oz./inches.

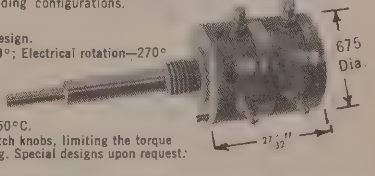
POTENTIOMETERS / PRECISION WIRE WOUND



- LINEAR AND NON-LINEAR • SINGLE AND MULTI-TURN
- PENDULUM OPERATED • SECTORS AND GYRO PICKOFFS • SWITCHES

Reliable, competitively priced wire-wound potentiometers for commercial, industrial and military electronic equipment manufacturers.

- **EXCELLENT LINEARITY:** 0.03% available in single turn 5″ diameter unit.
- **LONG LIFE:** Over two million revolutions with base metal windings.
- **WIDE TEMPERATURE RANGE:** Available for operation from −55°C to +125°C.
- **MAXIMUM STORAGE LIFE:** Platinum alloy winding also insures low noise level.
- **RELIABILITY:** Welded taps for better mechanical and electrical connections.
- **HIGH RESOLUTION:** Wire as fine as 0.0003″ diameter can be used.
- **CUSTOM DESIGNS:** Fast prototype delivery on special linear or non-linear units.
- **PRECISION CONSTRUCTION:** Anodized aluminum housings and polished steel shafts.
- **ACCURATE FUNCTIONS:** Welded taps to a single turn of wire eliminates shorted sections of winding at intermediate taps
- **RUGGEDNESS:** Meets all applicable MIL Specs.
- **LOW NOISE** Maintained over long life and extreme environments by unique wiper designs compatible with winding configurations.



.675 Dia.
27/32"

RESISTOR, VARIABLE. Single and Dual gang.
Conforms to MIL-R-12934. Resistance values as required. Linear design.
Power: 1 watt continuously, up to 70°C.; Mechanical rotation—300°; Electrical rotation—270°
Noise level less than 1% of total resistance.
Operating torque: 4.0 to 6.0 oz. in., detent where specified.
Detent torque: 5 oz. in. above operating torque, or 6.0 to 14.0 oz. in. including unit operating torque.
Min. rotational life: 25,000 cycles. Operating Temp.: −65°C to 150°C.
Clutch Knobs: These potentiometers must be adjusted solely by clutch knobs, limiting the torque exerted on shafts beyond their rotational limits. See Jan catalog. Special designs upon request.

HI-VOLTAGE INSULATED COUPLINGS U.S. PATENT NO. 2,681,387

MEETS MILITARY SPECIFICATIONS — TEMPERATURE · HUMIDITY · SHOCK · VIBRATION · FUNGUS

HI-VOLTAGE INSULATED COUPLINGS

15 KV Breakdown—10 lb/in. torque
Series No. AK-5079 and No. AK-5164

Stainless steel shaft and screwdriver tip molded-integrally with Diallyl Phthalate per Mil Specs. Shock ,vibration and fungus proof, they operate with ease over an ambient temperature range of −75°C to +175°C. Supplied with mounting hardware.

Screwdriver tip fits standard slotted shafts (potentiometer, etc.) without further machining. Suited to adjust high voltage controls protecting operating personnel. Also used to reduce ground capacitance on other types of instrument controls.

For Commercial Instrument Applications . . . Available in general purpose Bakelite.

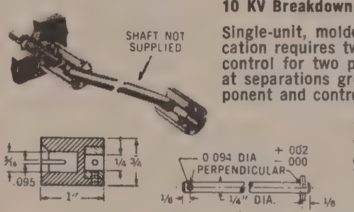
AP-1538-3	3/16	½	27/64	1 7/64 ± 1/32
AP-1538-4	¼	½	27/64	1 7/64 ± 1/32

Accommodates either similar or dissimilar ⅛″, 3/16″ or ¼″ shafts. Permits misalignment to 1/16″ and 5° angle. Operates free of backlash. Plastic insulator between cast aluminum hubs. Each hub has 2 set screws. Alodine finish. Also available with self-extinguishing low water absorption characteristic plastic insulator on special order.

Typical Part No.'s

AP-1530-34	accommodates a 3/16″ shaft one side, ¼″ shaft on other.
AP-1538-22	accommodates two ⅛″ shafts.



OFFSET-SHAFT (INSULATED) COUPLINGS

10 KV Breakdown ±30° Offset AP-15299

Single-unit, molded Nylon-to-metal insert. Application requires two couplings — permits smooth control for two parallel shafts offset up to 30° at separations greater than 3″. Secured to component and control shafts by 2 set screws.

Note: Coupling is accomplished with a ¼″ shaft of any length (not furnished). Coupling shaft keyed to coupler by steel drive pins supplied. See P. 9 for shafting.

VOLTAGE: 6000VDC INSULATED COUPLINGS FOR ⅛″ SHAFTS

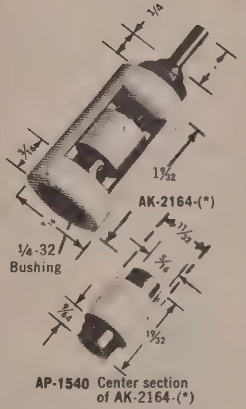
Material: Cycalac, Brass, Nickel Plated.

*Insert letter "S" or "N" followed by first two numbers of decimal equivalent, for fractional length of shaft beyond bushing.
"S" = with slot. "N" = no slot.

Typical Part Number: AK-2164-N31 =
5/16″ long shaft beyond bushing (standard), no slot. If length is 1″ use "X".

AK-2164-SX =
1″ long shaft beyond bushing, slotted.
If length exceeds 1″, use "X" and decimal equivalent for balance of number.

AK-2164-NX31 =
1 5/16″ long shaft beyond bushing, no slot.

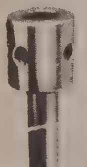


AP-1540 Center section of AK-2164-(*)

¼″ SHAFT COUPLING EXTENDER

AP-1010
Nickel plated brass with 2 set screws. ½″ O.D.; 1¾″ overall length.

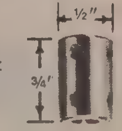
AP-1321
Same as above, except extends ¼″ shaft to ⅛″, overall length 2½″. Aluminum clear iridite.



SHAFT COUPLING

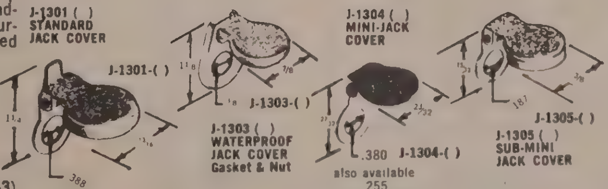
AP-15150
Nickel plated brass coupling for joining two ¼″ shafts. 4 set screws.

Cat. No. AP-15151
Same as above, 2 set screws.



JACK COVERS (TRIMMER COVERS)

Fit jack or panel bushings used to keep out dust and moisture and prevent inadvertent disturbance of control. Outer surfaces finished in standard colors of baked enamel.

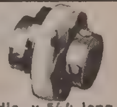


*Overall height in closed position when mounted on panel.

To Order Colors Specify:
(-1) Black Texture; (-2) Smooth Gray; (-3) Smooth Olive; (-4) Smooth Black; (-5) Bright Nickel Plate; (-6) Red (Top section only); (-7) White (Top section only).

Example: Jack cover, color black texture, order as **J-1301 (-1)**

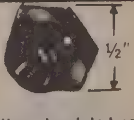
AK5610 INSULATED COUPLING



For ¼″ shaft. ¾″ dia. x ⅝″ long. Permits linear and angular misalignment up to .005″ and/or 10°. Breakdown voltage 3 KV.

AK771 REDUCER INSERT BUSHING

½″ Hex — 1/16″ thick. Overall length 5/32″



Adapter with high voltage insulated couplings to accommodate ⅛″ shaft potentiometers. ⅜ x 32 O.D., ¼ x 32 I.D.

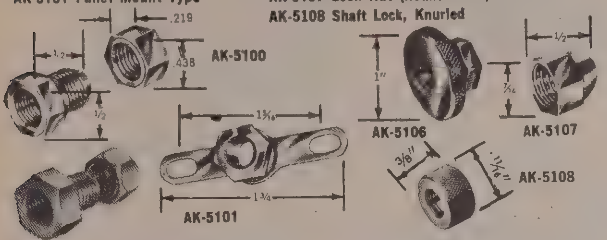
SHAFT LOCKS Split-Bushing, Collet Type

Securely holds shaft in position. Brass, nickel plated body and lock nut.

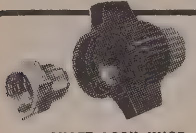
— **For 1/4" Shafts** 3/8-32 bushing

AK-5100 Standard Lock Nut
AK-5101 Panel Mount Type
AK-5106 Knurled Shaft Lock (1" O.D. Knurl)
AK-5107 Lock Nut (Round Head)
AK-5108 Shaft Lock, Knurled



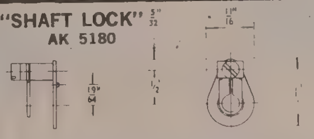
AK-103 — For 1/8" shaft — 1/4-32 bushing 3/8" Hex Dia., assembled length 1/2.

AK-5109 — For 1/8" shaft. 1/4-28 bushing (7/32" long x 5/16" dia.)



SHAFT LOCK KNOB
(with locking collet)

"SHAFT LOCK"
AK 5180



FITS 3/8" BUSHING, 1/4" SHAFT

SHAFT LOCKS One-piece; fits standard 1/4" and 3/8"-32 thread of shaft bushing. Friction grip holds shaft to prevent accidental or vibrational disturbance of control settings. Adjustment for semi-permanent locking, provided. Note: Part No's. 1047, 1048, 1049 maximum tightening torque — 5 lb.-in.

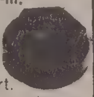
AK-1046 5/16" Hex OD. Metal w/plastic insert.

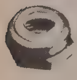
AK-1048 7/16" Hex OD. Metal w/plastic insert.

AK-1047 5/16" Hex OD. All Plastic

AK-1049 7/16" Hex OD. All Plastic

AK-1050 Plastic w/metal insert.





Ordering Data:	-(1) Nominal Shaft Dia.	-(2) Bushing Thd. Size
	2 = 1/8"	4 = 1/4-32
	4 = 1/4"	6 = 3/8-32

Typical P/N: AK1049-2-4 = for 1/8" shaft, 1/4-32 bushing.
AK1048-4-6 = for 1/4" shaft, 3/8-32 bushing.

SHAFT KNOB LOCK

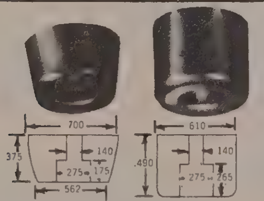
AK-1061-4 (*) (1/4" shaft)
(Used with 121 Series Knob)
*Specify "M" or "G" for matte or glossy finish.

Prevents movement of controls due to shock, vibration, or accidental contact. Available matte or glossy finish.

Typical Part Numbers: AK-1057-2MA = For 1/8" Shaft/matte finish/Black
AK-1059-4GA = For 1/4" Shaft/glossy finish/Black



CHASSIS AND CABINET BUMPERS

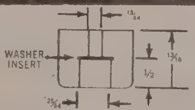
Low-friction polyethylene. Guards against scuffing. Supplied in either black or russet brown, with recessed hole for screw or bolt usage.

To Order Colors: Black, specify (4); Brown, specify (7). Other colors on request.

AK-574 also available in white nylon; thru hole .187 dia., C bore 3/8". Specify No. AK-577-8

NO. AK-576-4 HEAVY DUTY CHASSIS AND CABINET BUMPER (WITH STEEL WASHER INSERT)

Molded neoprene. 1" diameter, 13/16" high. Configuration similar to AK-574 above. Color: Black. Other colors on request.



No. AK-162610-4 New, improved non-marring, high tear strength, neoprene.

STUD, GROUND Multi-termination ground lugs.
Electrically Sound • Easily Installed • Space Saving

- Provides equipotential chassis termination for ground leads.
- Minimizes resistance between circuit contacts and ground point.
- Diminishes noise, pick-up and regenerative feedback.
- Eliminates the need for buss bars or stacks of lugs.
- Can be use as "Floating Ground" with proper insulation.

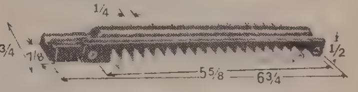
"FEED THROUGH" TERMINAL BOARDS

No. T-746. Molded of wood-filled melamine per MIL-M-14E.

Avoid expensive tooling. Design around this integrally-molded 20 feed-through terminal board. Equally-spaced terminals can be used for wrap around and/or solder connections. Voltage Breakdown 4000 Volts.



JOLTA SHOCK TEST MACHINES

For Reproducible Impact-Shock Test Pulses

Engineered to reproduce the entire spectrum of all significant impact shock waves.

Designed for laboratory and production testing of light to medium weight components. Produced to meet practically all requirements of common Mil. Spec. qualification tests (JAN-S-44, Mil-Std. 202A, Mil-T-12679A). Each JOLTA is electronically calibrated to certify compliance with test specifications.

JOLTA — Floor Model Nos. F-3003-C1, C2, C3 — Precision-machined magnesium casting utilized for higher shock amplitudes. Typical tests with these units 50 to 5000 G at .2 to 11.0 millisecs. For high impact testing, accessory springs and twin anvil combinations yield impulses of 0.2 millisecs to 5000 G.

SPECIFICATIONS — JOLTA SHOCK TESTERS

Model No.	Carriage Volume	Test Weight	"G" Ranges
F-3003-C-1	5″ cube	0-12 lbs.	50-1500
F-3003-C-2	5″ cube	0-4.0 lbs.	350-5000

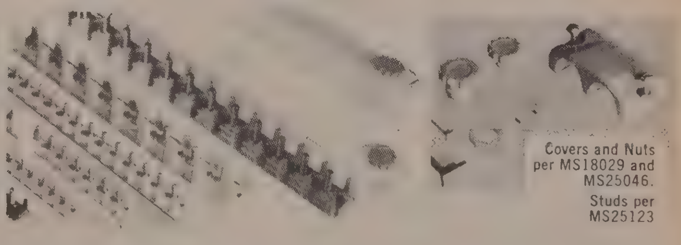
FEATURES
- **Economical**
- **Simple to Operate**
- **Rugged**
- **Uniformly Accurate**

For Production Testing, Can Be Automated for Continuous Operation

Note:
New design allows for quick changecvers of accessories.

Cat. No. X-3
INSULATED TERMINALS — plastic
For wire termination in metal and plastic cases (glue to case).
Contacts can be brass or brass plated.

TERMINAL BLOCKS A complete line of Terminal Blocks per MS27212, MS25123 and NAS 191.



Covers and Nuts per MS18029 and MS25046.
Studs per MS25123

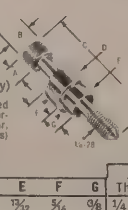
CAPTIVE SCREW AND NUT ASSEMBLY

No. CS-711-(1)
No. CS-711-(2) (screw only)

Consists of slotted, knurled thumb screws made of corrosion resistant steel bar, and nickel-plated (on brass) panel inserts.



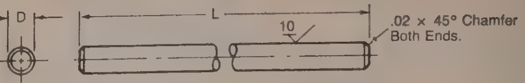
Cat. No. AP-1040
Screw, Captive
Cat. No. AP-1039
Insert, Captive

	A	B	C	D	E	F	G	J Thd.
—1	1/4	3/8	1 5/16	9/16	13/32	5/16	3/8	1/4-28
—2	1/4	29/64	1 7/16	9/16	13/32	5/16	3/8	8-32

Cat. No. AP-1197
Screw, Captive
1/16″ slotted knurled head (7/16″ O.D.)
1¼″ overall length; 8-32 thread.

PRECISION GROUND SHAFTS

.303 Stainless Steel



Tolerance

Shaft Dia. (D) PGS1 = $^{+.0000}_{-.0001}$

PGS2 = $^{+.0000}_{-.0002}$

PGS3 = $^{+.0000}_{-.0003}$

Standard Diameters — 1/16″ Increments

2 = .1247
3 = .1872
4 = .2497
5 = .3125
6 = .3747

To specify: add (D) dia. × (L) length to prefix above.

IE. PGS1 — 2 × 6.375 = .1247 $^{+.0000}_{-.0001}$ Dia. × 6.375 Long.

PGS2 — 3 × 3.250 = .1872 $^{+.0000}_{-.0002}$ Dia. × 3.250 Long.

PGS3 — 4 × 8.625 = .2497 $^{+.0000}_{-.0003}$ Dia. × 8.625 Long.

SHIELDS, MAGNETIC

High nickel alloy, hydrogen annealed to insure optimum magnetic shielding. JAN's Magnetic Shields prevent distortion and intensify modulation of the electron beam due to stray magnetic fields. Shields protect personnel against the dangers of accidental tube breakage. Mounting holes are tapped for No. 6-32 screws. Designed to fit JAN's standard bezels as listed below. See following page for specifications on Jan's Bezel Assemblies.

*To Order Specify: (1) frame only; (2) frame with clear window, (3) frame with clear window scribed with a center line.

Molded, black plastic escutcheons. Available in variety of different types and sizes. They provide a pleasing window frame.

Available frame only; frame w/clear windows; frame w/clear window scribed w/a center line.

For large working areas, stamped aluminum escutcheons, finished in dull black are available. −65°C to +80°C. NON INFLAMMABLE.

BEZELS

JAN's Bezels enhance appearance. Functionally designed to provide OPTIMUM UTILIZATION OF THE C.R.T. SCREEN, as well as safety against tube breakage and danger to operating personnel.

Bezel Assemblies supplied with a **bezel, calibrated graticule,** (where applicable) **light filter** and **C.R.T. cushion.** Finished in smooth dull black. Units mate with JAN Mu-Metal Shields.

Edge-lit Bezels (E.L.B.A.)**
Designed to provide edge lighting of engraved scale-calibrated graticule by means of pilot lights.

Camera Mount Bezel
Provide an integral cast mounting flange that fits all standard 3", 5" and 7" C.R.T. cameras and viewing hoods.

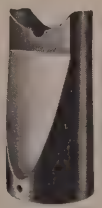
DISTINCTIVE FEATURES

- Engineered for 2", 3", 4", 5", 7", 8", 10" C R T
- Maximum display area
- Precision engraved, scale-calibrated graticules; standard or to customer's specifications
- Materials and finish to "Mil Spec
- Heavy buna-S shock cushion
- Models for edge-lighting
- Phosphor matched light filters
- Non-reflecting matte surfaces
- Rugged camera mounts
- Models for curved and flat-faced C R T

VIEWING HOODS

Black neoprene rubber, contour-molded, fits the shape of face. Keeps out ambient light when viewing scope.

Cat. No. H-465
Can be used as viewing hood, on 2 3/4" dia. bezels. (#1427; 1428; 1429). Also serves as adapter to permit use of face fitting neoprene rubber viewing hoods. All aluminum. Dull black enamel finish.



Cat. No. H-1361
(5 25/32" I.D.)

Cat. No. H-1063 (12" I.D.)
Flanges provided for hand access to PPI settings.

Cat. No. H-1008
TO FIT RECTANGULAR BEZELS
Can be adapted for smaller I.D.'s.
Can be used with JAN Bezel CP-1328P.
Can be adapted for #1533-P.

Cat. No. H-1713

Cat. No. H-689-1 (5 5/8" I.D.)
Used with following Jan Bezels:
19636; 19495; 13584; 1465
No. H-689-2 (4 7/8" I.D.)
Used with JAN Bezel #545

GRATICULES/FILTERS CUSHIONS
Assorted Sizes and Shapes

New! Non-reflective filter material.
Matte 1 side. Grey or Blue

Typical Part No. K1697-(4)MA
(1/4″ shaft, Matte Finish, Black)

SLIP-CLUTCH KNOB with Spinners

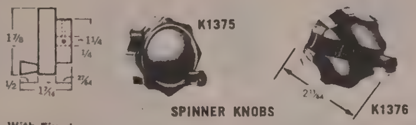
KS-1375-(4) & KS-1376-(4)

For driving devices such as variable capacitors, inductors, potentiometers, etc., the "slip-clutch"* automatically disengages and slips when pre-determined torque has been exceeded. Knobs are fluted, and equipped with either fixed or retractable spinner for fast turning. Backlash-free units safeguard against cranking beyond normal stops.

*Normally set for 3-6″ lbs./in. Can be modified for other requirements.

Model K-1376-(4) is identical with K-1375 with additional feature retractable spinner. Spring loading provides positive, toggle-type action to lock spinner in open or closed position. K-1376 for use where economy of space is essential.

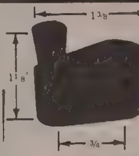
Cat. Nos. K-1275-(4) & 1276-(4)
In appearance, these knobs are identical with K-1375 and K-1376 but without Slip-Clutch. Molded Bakelite-to-metal-insert construction, two set screws for attachment to shafts.



SPINNER KNOBS

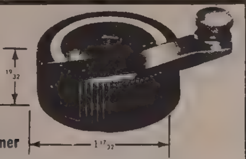
With Fixed or Retractable Spinners

Standard: Glossy finish. (Matte finish avail. on special order)



K-1125-(4) SPINNER KNOB

SK-1125 SLIP CLUTCH KNOB



MS-91522-1-(4)
Retractable Spinner CRANK KNOB
Aluminum Olive Drab. Other colors and shaft dia. on request. 2 5/8″ min. clearance required with handle in open position.

K1622
Retractable Spinner CRANK KNOB
Modified version to replace MS91522. Incorporates brake mechanism to lock control in position.

K1358-(2)
MINIATURE SPINNER KNOB
Nylon. 19/32″ H. x 3/4″ W. Spinner section dia. 3/8″. Accepts 1/8″ shaft or smaller.

K1357-(4) SLIP CLUTCH KNOB
Knurl aluminum. Twin set screws. 1 3/8″ dia. skirt, tapers to 1″ at top. Height, 1″ Std. Torque 1 to 3 lbs./in. Avail. from 1/2 oz./in. to 48 oz./in.

For additional slip clutch knobs, see JANSET KNOBS

TRANSILLUMINATED (BACK-LIT) MOLDED PLASTIC KNOBS WITH METAL INSERTS

2 Set Screws (unless otherwise specified).

Precision molded of JAN's transparent plastic material to military specs, with dull finish. Transilluminated pointers permit easy reading under subdued lighting conditions. For use on instrument panels, switchboards, electrical and electronic apparatus.

Can be supplied without transillumination, for other size shafts, and in other colors.

SLIP CLUTCH KNOBS

Aluminum.
⅜" dia. × ½" high.

JANSET® FUNCTIONAL KNOBS

"PUSH-TO-SET" OR "PUSH-TO-TURN"

DISTINCTIVE FEATURES:

- **Dimensions (see chart above).**
- **Installation: Same as a standard knob.**
- **Locks shaft automatically, upon release.**
- **Release Brake when depressed: settings can be altered.**
- **Resolution: Infinite, with zero backlash.**
- **Shaft Registration: to indicators, ie.: arrows, dots, cut-outs, etc.**
- **Shock or vibration settings are guarded against accidental change.**
- **Integral Assembly: Mechanism completely enclosed in knob body.**
- **Old designs: Janset® Knobs require no modificatioq to existing panels.**
- **Shaft sizes: ⅛ thru ¼ dia. (except ½ dia. knob, 5/32" shaft dia. max.).**
- **Panel Bushings: Fits with all ¼ and ⅜ standard.**
- **Space: No space required behind panel; all functions within knob body.**

PUSH TO TURN

PREFIX	
S (Slip Clutch)	**SLIP CLUTCH:** Prevents over torquing delicate mechanisms. Functions as standard knob between limit stops. When limit is reached and knob rotation continues, clutch overrides the stop without applying torque in excess of specifications. Driving torque in detented position .5-6 LB./IN, (depending on knob diameter).
PT (Push-To-Turn)	**BRAKE KNOB:** Prevents control setting from movement due to shock or vibration.
PSC (Push-To-Set)	**Brake Knob W/ OVERRIDING CLUTCH:** Same as "PT" with added feature of "S" (slip clutch) combined. Knob can be rotated without changing setting (if not pushed in).
PSCE (Push-To-Set /w Limit Stop)	**Brake Knob W/ Overriding Clutch & LIMIT STOP:** Same as "PT" & "PSC" with added feature of limit stop (320° MAX) built in.
LSC*** (Pull-To-Turn)	**Brake Knob W/ Overriding Clutch — PULL-TO-TURN:** Same as "PSC" except pull-to-turn. For use in extremely hostile environment, i.e.: Life Support Equipment.
PTN (Spin Free Push-To-Turn)	**SPIN FREE PUSH-TO-ENGAGE:** Prevents shaft from inadvertent turning — Knob spins free unless depressed and rotated until full internal engagement is accomplished for use where SHAFT TORQUE EXCEEDS 4 oz. in.
PTCN (Spin Free Push-To-Turn)	**Spin Free PUSH-TO-ENGAGE:** Same as "PTN" except for use where SHAFT TORQUE is LESS THAN 4 oz. in.
PTNN (Spin Free Press-To-Turn)	**Spin Free PRESS-TO-TURN:** (Friction) Prevents inadvertent change of setting. Use only where intent to turn is required. Must be pressed in while turning, for low torque applications.
LTN (Spin Free Lift-To-Turn)	**Spin Free LIFT-TO-TURN:** Same at "PTN" except pull-to-turn. For use where SHAFT TORQUE EXCEEDS 4 oz. in.
TC (Torque)	**TORQUE KNOB:** (Friction) For use where positive feel is desired and/or where minor excursions of shock and vibration are anticipated.
LEPR (Limit Stop & Release)	**LIMIT STOP W/ QUICK RELEASE:** For use where limited travel (0-? degrees) is required. Push-To-Release stop and continue to the next function.
LELR (Limit Stop & Release)	**Same as LEPR except PULL-TO-RELEASE:** For use in extremely hostile environment, i.e.: Life Support Equipment.

INCREMENTAL KNOBS

Repositions to the exact point, with zero backlash. Easily provides precise setting to pre-determined positions. Can be repeated with finite exactness to as many as 32 or as few as a single position.

STANDARD AND CUSTOM DIGITAL DISPLAY BEZELS

DIE CAST SERIES

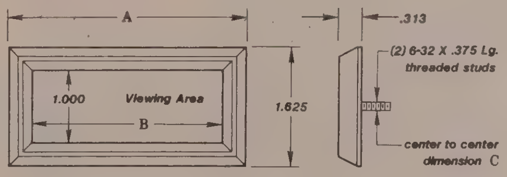
FEATURES

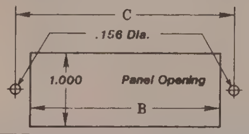
DIE CAST METAL FRAME

- Nonreflective black finish
- Durable — heat resistant
- Integral 6-32 mounting studs
- No exposed hardware
- Mounts in panels up to 3/16" thick
- Includes mounting hardware
- Available in three sizes
- Filters available in 10 colors and clear

DESCRIPTION

The DIE CAST SERIES of bezels consist of a special plastic screen and a die cast metal frame. Mounting is accomplished by two 6-32 studs which can also be used to mount PC boards or other components behind the panel. The high quality of the screen and frame, combined with the universal sizes and mounting flexibility, make the bezels usable for a wide range of applications.





PN	A	B	C
1-258	3.250	2.625	3.000
1-358	4.250	3.625	4.000
1-458	5.250	4.625	5.000

PLASTIC SERIES

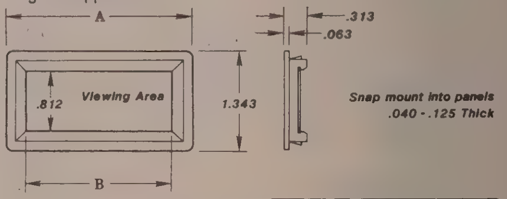
FEATURES

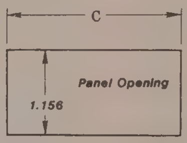
INJECTION MOLDED PLASTIC FRAME

- Nonreflective black finish
- Impact resistant ABS
- Snaps into front panels
- No exposed hardware
- Mounts in panels up to .125" thick
- Available in four sizes
- Filters available in 10 colors and clear

DESCRIPTION

The PLASTIC SERIES of bezels consist of a special plastic screen and an injection molded ABS frame. Mounting is accomplished by a snap-fit into rectangular cut-outs from the outside. The combination of a high quality filter and an inexpensive, easy to mount bezel make this series ideal for a wide range of applications.





PN	A	B	C
1316-138	1.906	1.375	1.750
1316-2	2.531	2.000	2.375

1316-4	4.531	4.000	4.375

LOW COST CUSTOM BEZELS

Our new fabricating facility is totally dedicated to the production of non-standard bezels. Using specially designed machines, we can now offer made-to-order sizes in proto-type or production quantities, without costly tooling or extended lead times.

TYPICAL BEZEL MATERIALS

- Aluminum
- Stainless Steel
- Plastic

VARIETY OF FILTER MATERIALS

- Anti-Reflective Coatings
- Polycarbonate
- EMI Shielding
- Large Selection of Colors
- High Scratch Resistance

DESIGN FLEXIBILITY

- Panel Seals
- Welded Studs
- Any Size Viewing Area
- Multi-Opening Bezels

VARIETY OF FINISHING PROCESSES

- Anodizing
- Painting
- Screening
- Plating

MICROTOUCH KNOBS

MICROTOUCH™ RUBBER COLLAR KNOBS

The components division of Microavionics, Inc., offers to avionics, instrumentation and systems designers a line of custom grade component hardware.

The new MICROTOUCH™ series of instrumentation knobs feature a **diamond knurled rubber collar** which gives the knob a distinctive high quality feel and appearance, and provides a sure grip for precise settings. The silicone rubber boot lasts indefinitely, without deterioration. The knob base is plastic, molded on a heavy brass insert to provide strength and positive set screw grip.

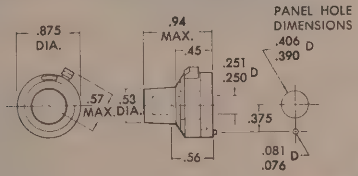
DIGITAL DIALS

MICRO-SET/MODEL DN-22 TURNS COUNTING DIAL

FEATURES

- counts up to 15 turns, and divides each turn into 50 divisions with easy interpolation of 1/2 division for additional resolution
- distinctive satin chrome appearance
- locking lever prevents accidental movement
- rugged construction for high reliability



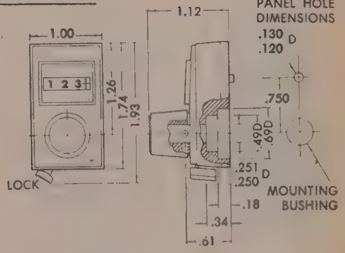
SPECIFICATIONS

Counting Capacity:	15 turns
Graduation:	1/50 turns
Torque:	1.5 in.oz.
Finish:	satin chrome
Weight:	0.35 oz.
Life:	10^6 cycles, min.
Temperature Range:	−55 deg.C to +85 deg.C

DIGIT-DIAL/MODEL TD-80 DIGITAL DIAL

FEATURES

- 10 turns provide 0 to 1000 counts – easy interpolation of 2/10 counts for additional resolution
- distinctive appearance and reliable performance
- locking lever prevents accidental movement
- clear, contrasting numerals for easy readability
- rugged construction for long operating life



SPECIFICATIONS

Counting Capacity:	ten turns
Graduation:	2/10,000
Torque:	1.5 in.oz.
Dial:	hot stamped white numeral on black wheel
Cover:	black; matte finish silver also available
Weight:	1.5 oz.
Locking torque:	14 in.oz.
Life:	10^6 cycles, min.
Temperature Range:	−55 deg.C to +85 deg.C

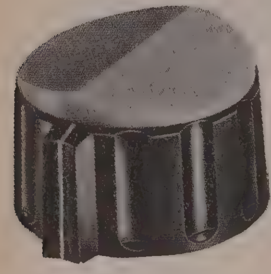
VISE-GRIP COLLET KNOBS INDUSTRY'S BEST "OFF-THE-SHELF" DELIVERY

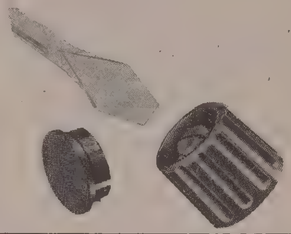
Knobs available in 10mm (0.40), 15mm (0.59), 21mm (0.82), 28mm (1.10) and 36mm (1.42) dia.



PDI knobs are distinguished by their styling, elegance, easy handling, long service life, excellent fit on the shaft as a result of "VISE GRIP" mounting and by their comprehensive accessories program in 24 different colors.

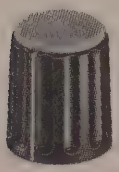
NO FLATS • NO SET SCREW • NO SLIPPAGE

1. REMOVE CAP
2. TIGHTEN COLLET SCREW WITH SCREWDRIVER
3. REPLACE CAP

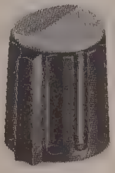


Our exclusive "VISE-GRIP" collet knobs offer distinguished styling, beauty and ease of mounting, as well as long life in the field. The exclusive "VISE-GRIP" collet works much the same way as a drill chuck. Once tightened, it will not work loose. Knobs are mounted with free-drive screws which can be tightened using a Phillips or an ordinary screwdriver.

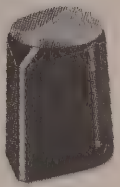
STANDARD KNOB



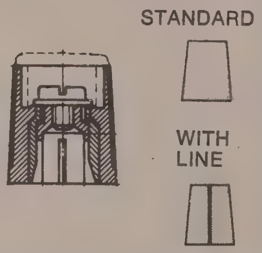
WING KNOB



ARROW KNOB



TYPICAL CROSS SECTION



MATERIAL

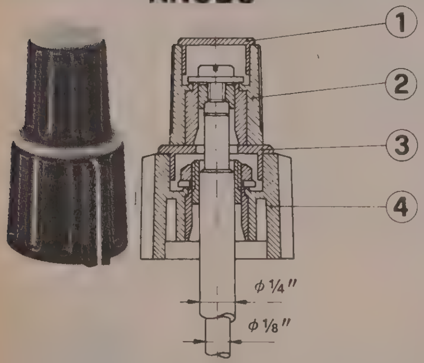
All mouldings of the collet knob are produced from polyamide. Transparent dials are made of luran. Brass 58 is used for the collets, sleeves and nuts. Steel is used for the screws and washers.

TEMPERATURE STABILITY

With normal mechanical stresses: −20°C to +70°C

We can also provide special types of knobs and accessories and custom color matching at lowest prices with prompt delivery. Contact Power Dynamics, Inc.

CONCENTRIC KNOBS

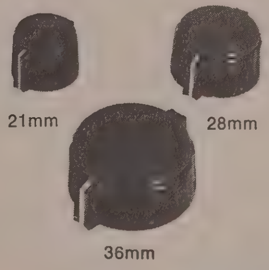


1. Cap 15mm, matte finish, gray
2. Knob 15mm, matte finish, black, collet ⅛ inch
3. Intermediate cap 21mm, matte finish, gray
4. Wing knob 21mm, with line, matte finish, black collet ¼ inch

Also available in 21mm, 28mm sizes and Lo-Profile Knob.

LO-PROFILE KNOBS

Available in 21mm, 28mm and 36mm styles only



(Not available as "Arrow Knobs")

Overall height as follows:

21mm-Overall Height 15mm with cap

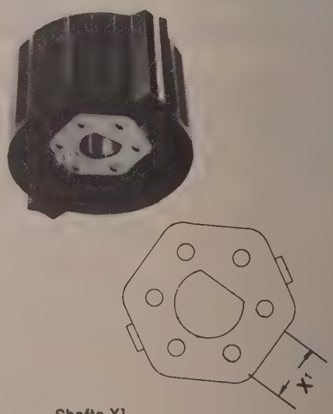
LOCKING DEVICE



Shafts	X¹	
6mm	5.0	49 15 60 0
¼"	5.08	49 15 61 0

The locking device is a punched part to be pressed separately into the knob, allowing an accurate positioning of the collet knob and giving it an increased torque.

Available for knobs of 21, 28 and 36mm diameters.

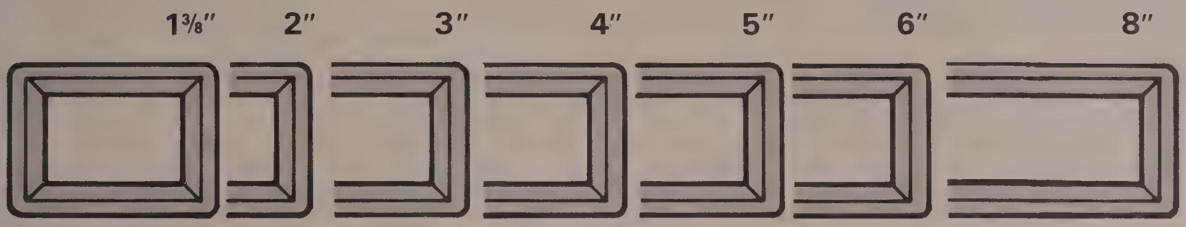
MODEL 140 SERIES BEZEL & FILTER ASSEMBLY

SIZES AVAILABLE



LOW COST bezel and filter assemblies enhance digital readouts easily, effectively and economically.

ATTRACTIVE plastic bezels are supplied with a variety of colored acrylic filters to match any type of display. Black bezels are standard but color variations are available on special order.

VARIETY OF SIZES are available to enhance the most popular digital displays.

INSTALLS EASILY without tools, adhesives or hardware in any panel thickness from .040 in. to .125 in.

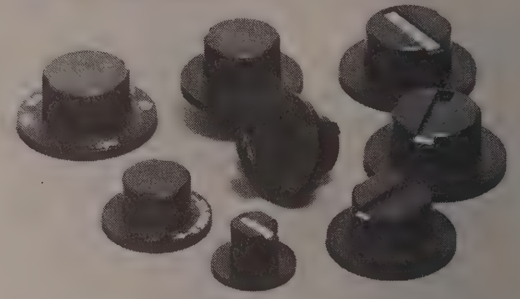
Industrial Control Knobs



Presenting the new TK Series

A unique control knob for general industrial applications requiring simplicity and functionality. Human factors engineering dictated the design. Applications for the **TK Series** are unlimited. A few uses include equipment controls, timers, thermostats, gas controls and heating devices. Diameters from 1-1/8″ to 2″. Lusterless satin black finish is standard. Many shaft hole sizes and mountings available. Options include pointers, decorative inlays and custom markings.

Write or call today for more information and a free sample package.

Miniature Switch Knobs

Rogan responds to the rapid expansion of the miniature switch market with the introduction of its new Gamma 50 Group. Molded of ABS thermoplastic, this series is ideally suited for applications where minimal space is available. The Gamma 50 Group offers three basic styles from which to choose: a plain round knob (.37″ O.D.), a plain round knob with tapered skirt (.62″ O.D.) and a plain round knob with functional pointer (.46″ O.D.). All are designed to be adaptable for applications that require either set screw or press-fit mounting. Your choice of eighteen standard colors. Optional decorative aluminum caps are available.

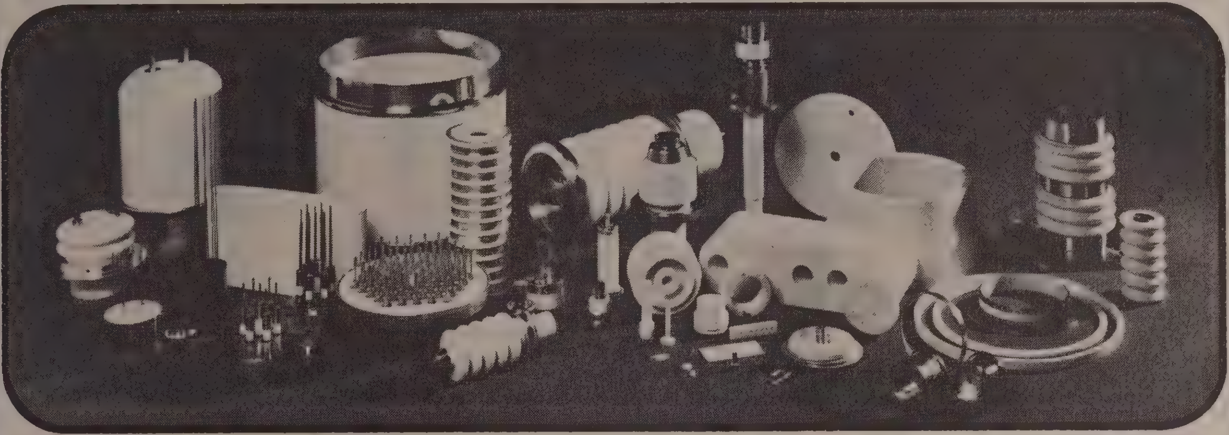
ALBEROX *... For outstanding performance in high temperature, hermetic terminals.*

We're SPECIALISTS in brazing METAL parts to high alumina CERAMICS for demanding HIGH TEMPERATURE, HERMETIC applications.

CUSTOM HERMETIC CONNECTORS Multipin hermetic connectors for demanding vacuum and space applications requiring 400°C. bakeout — conditions where glass connectors won't stand up — are being produced in a variety of configurations. To save cost, Alberox can also provide connector sub-assemblies such as pin decks to be brazed or welded into shells or flanges by the customer.

MINIATURE TUBE AND PIN SEALS Many high temperature applications require insulated pin or tube feedthrus. These are available with weldable or brazeable metal parts, and can be added to covers or flanges, etc. All Alberox feedthrus are suitable for cryogenic environments.



Since 1961, we have designed and produced a wide variety of seals for custom applications in diverse components such as . . .

- VACUUM FEEDTHRU TERMINALS
- CERAMIC ELECTRON TUBE AND VACUUM SWITCH ENVELOPES
- NUCLEAR REACTOR PENETRATOR FEEDTHRU TERMINALS and INSULATORS
- SQUIBB and DETONATOR CONNECTORS
- POWER SEMICONDUCTOR HOUSINGS
- SPACE FLIGHT HERMETIC CONNECTORS
- JET ENGINE THERMOCOUPLE COMPONENTS
- HIGH PRESSURE OIL WELL LOGGING FEEDTHRUS
- CAPACITORS and TRANSFORMER TERMINALS

In addition to the above, Alberox has designed and produced state-of-the-art components for critical nuclear devices.

The Alberox plant was designed and built specifically for the efficient production of ceramic-to-metal seals. We manufacture our own A-950 high alumina ceramic, which enables us to optimize on the best metalizing process for this ceramic; thus we can provide superior seals. By making our own ceramic, our customers benefit by fast delivery on custom designs.

Another important feature of Alberox is that all of the plating requirements are met "in-house", including nickel, gold, copper, silver, bright tin and solder plating!

We have several types of BRAZING FURNACES for brazing ceramic-to-metal and metal-to-metal parts in HIGH VACUUM, or HYDROGEN, ARGON or any other specified atmosphere! The standard operating procedure is to custom program the brazing cycle, taking into account the ceramic, the types of metals, braze materials and the atmosphere.

Alberox exercises complete control, from the design stage right through all manufacturing operations — to meet or exceed the highest quality standards and maintain the fastest delivery in the industry. Products made by Alberox are assured to outperform all design parameters set for them!

HIGH PRESSURE FEEDTHRUS *Alberox A-950 Alumina* has extraordinarily high compressive strength (350,000 psi). By using this strength to its best advantage, ceramic-to-metal seals can be produced to withstand high static or dynamic pressures. Thousands of these seals have been manufactured by Alberox.

MULTITERMINAL FEEDTHRUS Multiterminal feedthrus differ from multipin connectors in that individual feedthru terminals are brazed or welded into a metal deck or flange. These feedthrus are generally used for higher voltage applications than can be accommodated by a regular ceramic pin deck or connector. Alberox has an extensive line of catalog tubular terminal bushings which are often used for the individual feedthrus. In this way, custom multiterminal feedthrus can be delivered quickly.

POWER FEEDTHRUS Copper, or just about any other type of metal, from ⅛ inch to over 1 inch in diameter can be provided in power feedthrus. Modifications of our standard catalog tubular and fluted terminal bushings are often perfectly suited, and custom ceramic-to-metal seal designs can be easily accommodated. Weldable or brazeable flanges also can be added to the feedthrus to allow easy installation on existing flanges or bulkheads.

INSULATORS AND STANDOFFS Insulators and standoffs can be supplied in tubular or fluted shapes, bare or glazed, with or without metal adapters or studs. Alberox manufactures plain ceramic parts for use as spacers, insulators, supports, isolators, decks, or washers. Metalized and glazed cylinders are also available for envelopes of high power electron tubes such as Thyratrons or for vacuum switches.

CATALOG HIGH VOLTAGE BUSHINGS Alberox stocks the largest variety of high voltage tubular and fluted high alumina terminal bushings in the industry. Modifications to these catalog items are easily made. Typical modifications are: special studs, brazed-in-center conductors, different metal parts, finishes and ceramic dimensional changes. Fast delivery at reasonable prices can still be maintained. Ask for Catalog #472 which illustrates details of these parts.

Alberox is ready to assist you with your ceramic-to-metal seal design requirements. When you need FAST DELIVERY of SUPERB ceramic-to-metal seals, at realistic prices — contact ALBEROX.

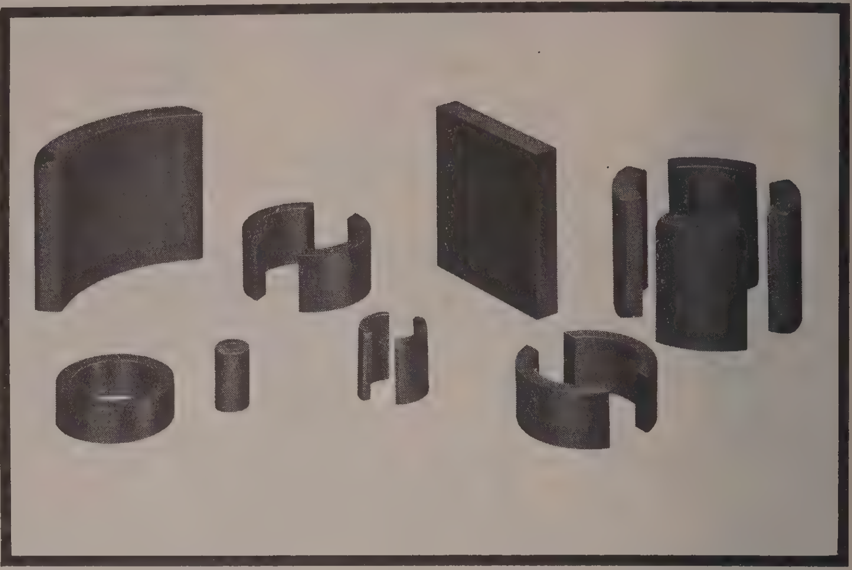
CERAMIC PERMANENT MAGNETS



GENERAL DESCRIPTION — Allen-Bradley offers a wide range of ferrite permanent magnets in material grades M6 through M10. Each is an oriented ceramic permanent magnet material ideally suited for specific requirements. This wide range of materials allows the design engineer to custom fit his magnet choice to the needs of the application and the severity of the operating environment.

This selection of permanent magnet materials represents the most technically advanced ceramic grades available in production quantities today. Typical configurations are angular arc segments, rings, bars, blocks, cylinders and slabs. Common applications are:

1. DC Commutator Motors
2. Brushless Motors
3. Synchronous Motors
4. Linear Actuators
5. Stepper Motors
6. Alternators and Generators
7. Magnetos
8. Magnetic Separators
9. Material Handling and Holding Devices

APPLICATIONS — Magnetic circuits that can be designed to take full advantage of the specific flux density and coercive force of each material offer opportunities for improved performance in the assembled product in one or more of the following ways:

1. Higher efficiency
2. Cooler operation
3. Greater output power
4. Smaller package size
5. Less weight
6. Lower cost

DESIGN VERSATILITY — A wide range of options using Allen-Bradley magnetic materials are available to the magnetic circuit designer.

- Large and small arcs - current sizes range from 1/10 oz. to over 5 lbs.
- Large and small blocks - current sizes range from roughly 1/100 oz. to over 10 lbs.
- Single or multiple pole patterns can be magnetized on a single magnet. The number of poles is limited only by the capability of magnetizing fixturing.
- Radial or transverse orientation.

MAGNETIZATION — It is usually desirable to magnetize the magnet after assembly to avoid handling problems. Since magnets are oriented in manufacture, they must be magnetized in the direction of orientation in order to obtain the listed magnetic properties. In other directions, only a fraction of the listed magnetic properties can be realized. These magnets require a magnetization force of 10,000 oersteds on 20,000 ampere turns per inch of magnet length in direction of orientation to secure proper magnetization.

DESIGN NOTES — The total flux produced by a magnet of any configuration is a function not only of the magnetic properties of the material from which it is made but also its physical dimensions, and the degree of orientation and other factors related to the manufacturing process. To insure delivery of flux as designed, the magnet must be magnetized to saturation and have sufficient coercive force to resist the demagnetizing effect of opposing magnetic fields to which it might be exposed.

The characteristics plotted on the next page show the normal and intrinsic demagnetization curves for each material at various temperatures. To avoid loss of flux, irreversible except by remagnetization, it is necessary that a magnet be operated above the knee of the demagnetization curve corresponding to the lowest temperature to which it may be subjected. The determination of this low temperature operating point must take into consideration not only the permeance coefficient of the magnetic circuit in which the magnet operates, but also any other demagnetizing m.m.f.'s which may exist.

COMPARATIVE PERFORMANCE —		M6	M7	M8	M9	M9B	M10
Peak Intrinsic Energy Product (BiHi), mega-gauss-oersteds		8.5	12.0	10.5	13.0	12.5	12.0
Peak Normal Energy Product (BdHd), mega-gauss-oersteds		2.7	2.7	3.5	3.2	3.4	3.8
Residual Induction (Br), gauss	typical [1]	3400	3400	3850	3700	3800	4000
Intrinsic Coercive Force (Hci), oersteds	typical minimum	3200 3000	4250 4000	3150 3000	4200 4000	4000 3800	3500 3300
Normal Coercive Force (Hc), oersteds	typical	2900	3250	2950	3425	3450	3350

[1] The flux performance of production magnets will be within ±7% of the flux produced by a magnet having nominal print dimensions and typical residual induction.

SOFT FERRITE MATERIAL

GENERAL DESCRIPTION — Allen-Bradley offers ferrite cores produced from three materials -- designated W5, R02 and R03. Each material is designed to fulfill specific applications, since no material can provide the specific magnetic properties needed for every circuit.

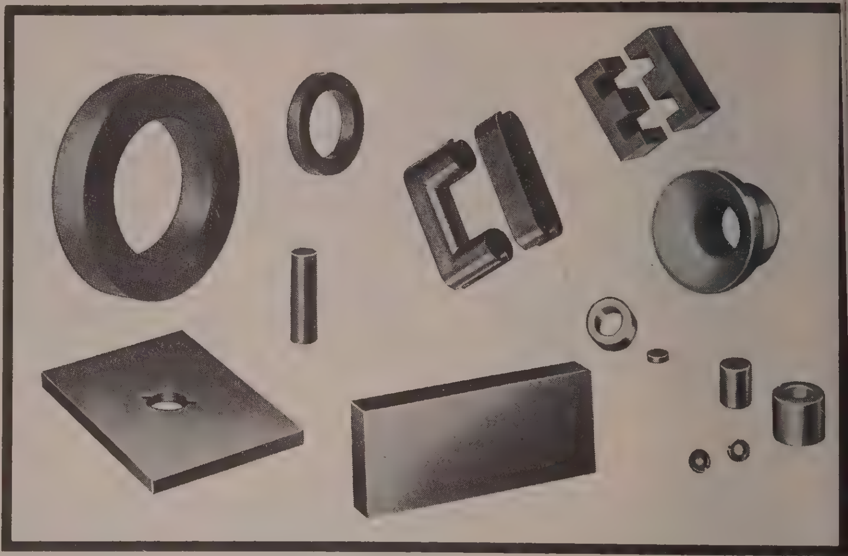
W5 MATERIAL — W5 is designed to be used in circuits where a low loss power ferrite is required. It is capable of operating at high flux densities at frequencies up to 500 KHz. Above 500 KHz, it may continue to provide useful performance when applied at low flux densities. Because of its low core losses, it is ideally suited for applications above 400 Hz where the excessive heating of laminated iron or tape wound cores becomes impractical. W5 also exhibits a linear B vs. H variation at flux densities less than 1500 gauss.

The versatility of W5 material is the major factor for the existence of the standard ferrite core program. This program offers W5 material in a variety of part shapes. namely Bar cores, E-cores, Pot cores, Toroidal cores, and U-cores.

R02 MATERIAL — For circuits operating at frequencies up to 10 MHz or where a temperature stable initial permeability material is required, R02 should be specified. R02 is ideally suited for demanding applications such as those requiring high Q and for temperature stable inductors. R02 material has core losses similar to those of W5 material cores, at frequencies between 500 KHz and 1 MHz. Between 1 MHz and 10 MHz core losses for R02 are less than those for W5. R02 is a desirable substitute for W5 at high frequencies.

R03 MATERIAL — This rectangular loop ferrite material exhibits high induction and low coercive force. It is useful in continuous switching applications which drive the core to saturation at frequencies less than 25 KHz. Rectangularity (Br/Bs) of greater than 80 percent makes R03 particularly suitable for magnetic amplifiers, frequency converters, and switching device applications.

Because of the increasing interest in R03 cores, this material is now available through the Standard Ferrite Core program. R03 is now available in eleven different sizes of toroids.



The following table is a summary of the typical characteristics of each material at 25° C.

Magnetic Properties	W5 16KHz	R02 4KHz	R03 1.5KHz
Saturation Flux Density (B_s) Gauss @ 10 Oersteds	4900	2750	3900
Initial Permeability (μ_i)	2800	290	325
Maximum Permeability ($\mu_{\text{màx}}$)	4000	510	3500
Core Loss (P_{cl}) (μ watts/cm^3-Hz) @ 1350 Gauss	2.5	—	—
Rectangularity (B_r/B_s)	—	—	$\geq$.80
Temp Coefficient of μ_i (TC)%/°C	—	.02	—

APPLICATIONS:

W5 Material
Switching Power Supplies
Transformers — All Types
Inductors
Ignition Systems
Regulators
Displays

R02 Material
Inductors
Transformers
Saturable Reactors
Particle Accelerators
Induction Heaters
Antennas

R03 Material
Magnetic Amplifiers
Frequency Converters
Magnetic Memories
Voltage Feedback Inverters
Magnetic Switches

For more information request Publication 5657 (R02), Publication 3020-030 (R03) and Publication 3020-050 (W5).

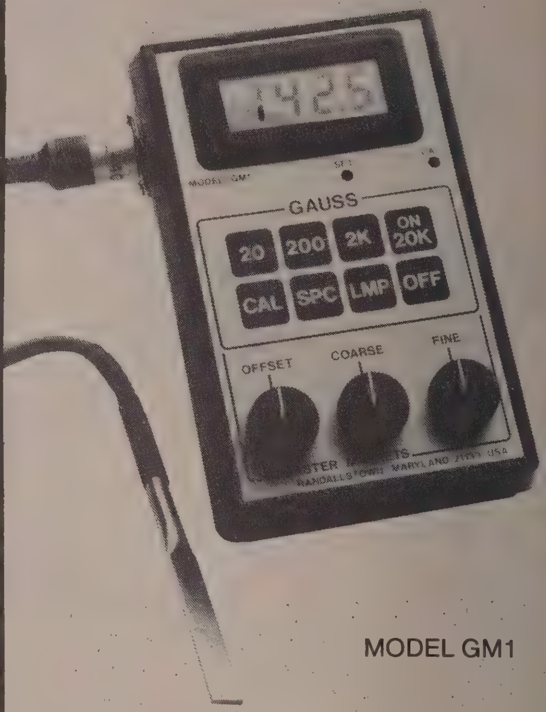
Micropower GAUSSMETER



MODEL GM1

- 0.25% ±1 digit accuracy all ranges
- Automatic low battery warning, 100 hrs. life, 9V battery
- No reference magnets required... precalibrated probes
- Cal function for special or custom probes
- Calibrated analog output 200mV Full scale
- Front panel calibration and set-up
- Touch keyboard controls
- Display lighting
- Incremental/expanded scale operation. Null out up to ±4 kG
- Millitesla version available, at no extra cost
- Easy zeroing with three well balanced controls
- 3 ft. cable
- Rugged ABS case
- January 1984 price: $324.00 + Probes
- Probes for every application available at low cost
- Duracell battery included

NOTES:

1. Normal tolerance of μ_o is ±20%.
2. For extended temperature ranges in all materials or tighter temperature coefficients of permeability, contact Krystinel Engineering Dept.
3. Loss data include both coil and core losses as read on a one/half inch diameter toroid.
4. Hysteresis loop data were taken @ 25°C.

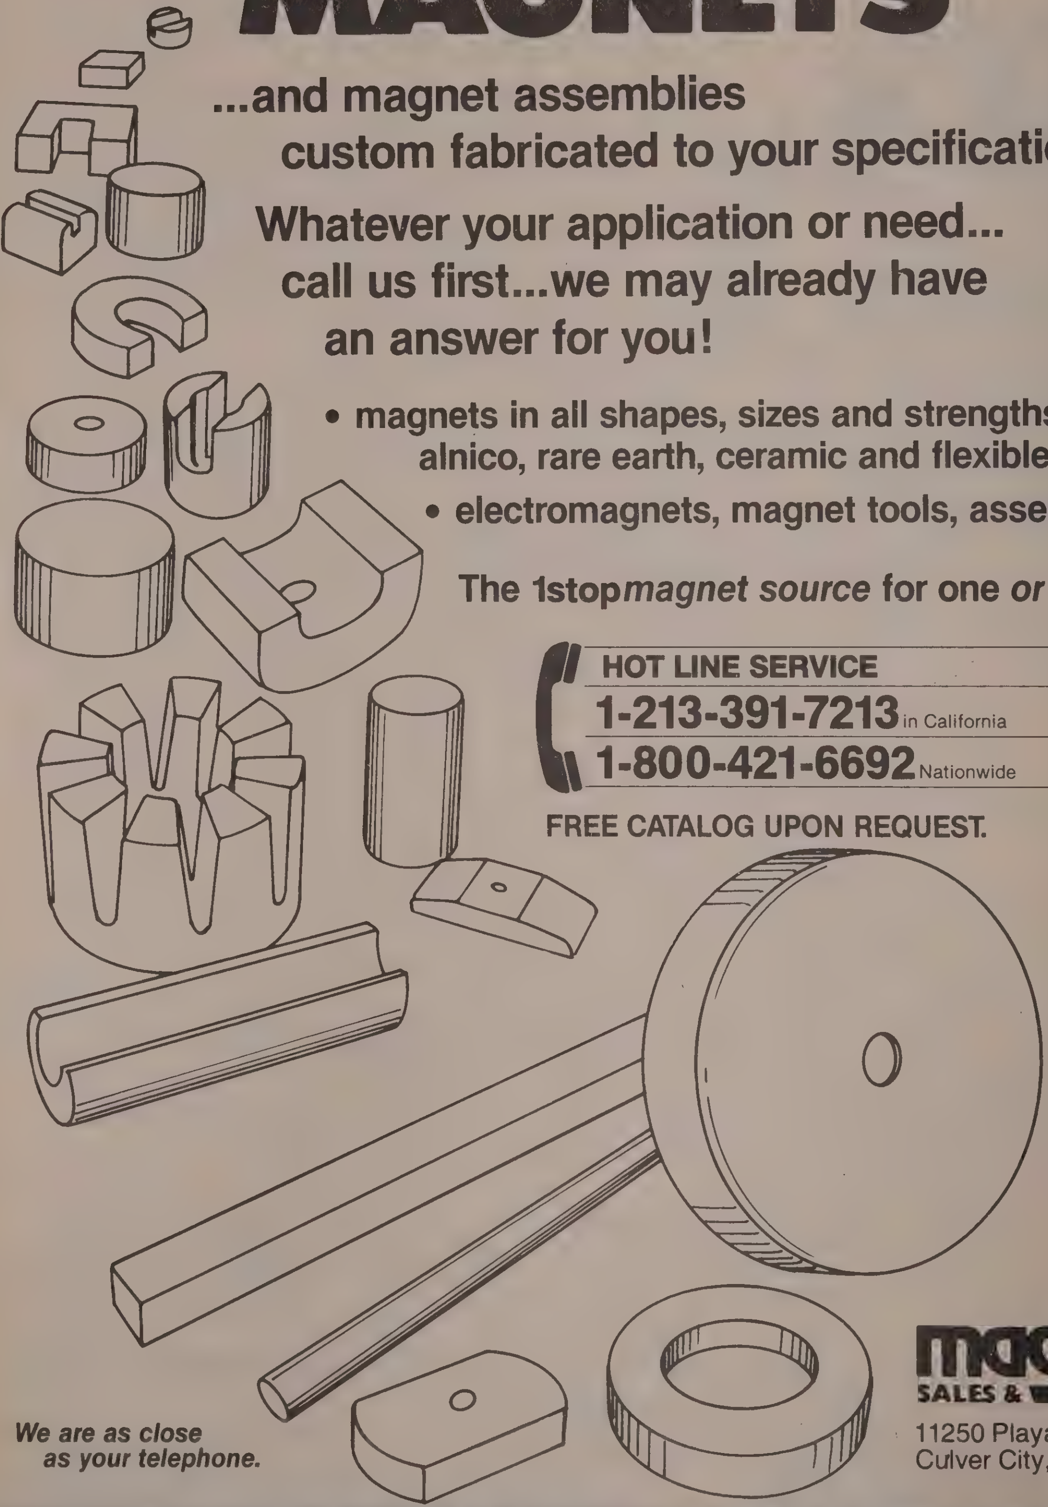
MAGNET SALES & MFG. CO. MAGNET SALES & MFG. CO. MAGNET

PERMANENT MAGNETS



...and magnet assemblies
custom fabricated to your specifications!

Whatever your application or need...
call us first...we may already have
an answer for you!

- magnets in all shapes, sizes and strengths—alnico, rare earth, ceramic and flexible
- electromagnets, magnet tools, assemblies

The 1stop*magnet source* for one *or* a million!

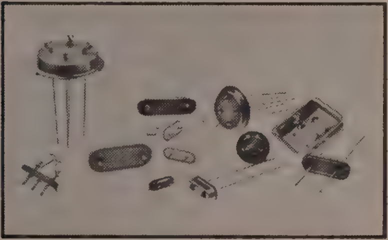
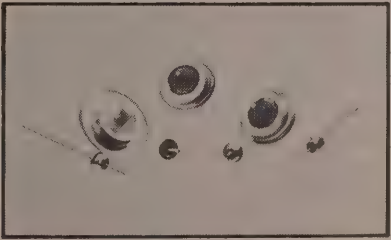
QUARTZ CRYSTAL BASES



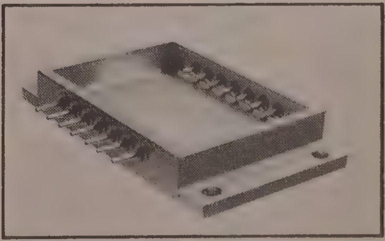
Reeves-Hoffman manufactures an extensive line of crystal bases, either to military standards or customer specification. Send us your prints for review. We may have a design that will satisfy your needs.

SPECIALIZED TERMINALS



A large variety of single pin terminals are available in numerous materials and platings. From a solderable terminal for an oscillator to a weldable tantalum lead terminal for a lithium battery.

POWER PACKAGES

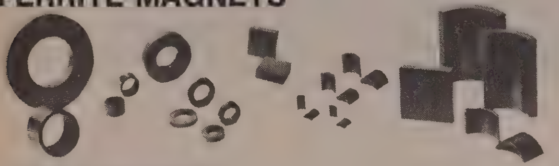


Custom designs to meet your specific requirements. Our in-house capability allows us to work with various materials and methods to achieve the results you desire; High Thermal Transfer and Mechanical Stability.

TDK

MAGNETS

FERRITE MAGNETS



TDK manufactures a wide variety of high performance ferrite cores and magnets. They improve the devices they are used in and can be substituted for ALNICO in many applications. Both wet and dry pressed materials are available. Wet pressed: FB$_4$A, FB$_4$B, FB$_4$X, FB$_4$H, FB$_4$N. Dry pressed: FB$_1$, FB$_2$, FB$_3$B, FB$_3$X, FB$_3$K.

Material characteristics

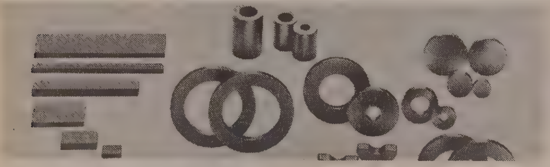
RARE EARTH COBALT (REC) MAGNETS



TDK has developed the first REC magnet with a maximum energy product of 30 MGOe. This provides designers with a new high performance material previously unavailable. TDK has reduced the samarium and cobalt content by 10-15% and still provided temperature characteristics rivalling ALNICO. May be used in place of: REC-18B, 22B, 22, 24, 26 & 30 of the 2-17 group, and REC-18 and 20 of the 1-5 group. Excellent for use in speakers, motors, klystrons and other applications requiring very high performance magnets.

TDK

FERRITE CORES

FERRITE CORES CONSUMER USE

TDK ferrite cores are manufactured to the highest quality standards and in a wide variety of shapes from 38 different materials to provide the best performance. The types shown here are intended for consumer applications. The table to the right provides basic data. For complete information ask for Catalogue DAE-001A.

TDK Type	Description
CR	Deflection Yoke
UR	"U" Core
EE	"E" Core
EI	"EI" Core
T	Toroidal Core
RHH	Dbl. Aperture Core
R4H	Dbl. Aperture Core
RID	Dbl. Aperture Core
THP	Threaded Cup Core
DR	Bobbin Core
P	Cup Core
TH	Threaded Core
RI	Sleeve
RB	Cylindrical Core with Screw Inserted
BF	Ferrite Beads
R	Cylindrical Core
AR	Antenna Core
CS	Ferrite Substrates

For yoke, U and E cores (H series materials)

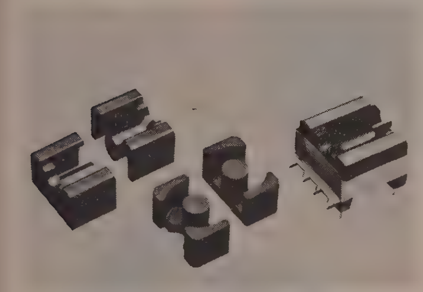
INDUSTRIAL USE



A full line of ferrites specifically designed for industrial use is available from TDK. These include: Pot Cores; Filter & Choke Cores; EE, EI, EC, PQ, EP, LP, X and PCH Cores; Toroidal Cores; and Thermal Ferrites. See Catalogue DLE-002F & -014A.

CHOKE CORES FOR SWITCHING POWER SUPPLIES

The "H7C4" material used in these cores is new and intended for high frequency switching power supplies. It has superlative power loss characteristics in the high frequency range.

FEATURES

1. High permeability
2. High saturation flux density
3. Negative power loss temperature dependency
4. Safeguards against thermal runaway
5. Low power loss from 100 kHz to 500 kHz
6. Low power loss in high magnetic fields

ROTRON D.C.
FAN CAPITOL OF THE ELECTRONICS INDUSTRY

At the Commercial Division of EG&G Rotron, we manufacture the world's finest brushless DC fans. Available either factory direct or through our nationwide distributor network (and in Canada, too), our line of American-made brushless DC fans covers virtually every electronic component cooling need. Call (800) 431-6033 (in NYS: 914-657-6661) for complete product literature, or write to us today. We think you will agree that EG&G Rotron (D.C.) is the Fan Capitol of the Electronics Industry.

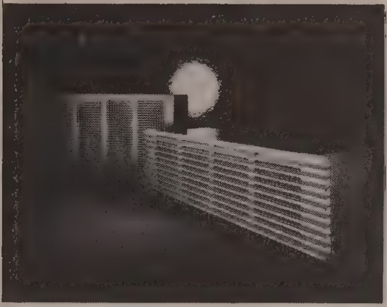
AMCO Cooling Devices

Cooling Devices for Electronics from AMCO Engineering Co.

AMCO Fans

AMCO's new line of high performance tube axial fans offers a variety of quiet air flow speeds and assembly options to meet your spot cooling requirements. Fans are available individually, in tandem assemblies or pre-mounted on attractively colored panels to simplify mounting to enclosure frames. Diameters of 3", 4" (low or high flow), 6" and 10" are offered, providing a range of air flows from 27 to 540 SCFM. AMCO fans include front protection grilles and mounting hardware. Standard panel mounted assemblies are available in 19", 24" and 30" width EIA panels and allow multiple fan configurations. Variable speed control is included with BTA10 fan. Optional accessories are available.

Recognized
Listed



AMCO Blowers

AMCO's line of dual scroll blower assemblies feature solid state variable speed controls incorporating high gain RF noise filters and full wave phase control circuitry to achieve infinite speed variations. Model BDS5 occupies 5¼" panel height and provides 150 to 200 SCFM with quiet operation at 51.7 to 55.8 dB. Occupying 8¾" panel height, Model BDS8 delivers 325 to 425 SCFM at 51 to 55 dB. For recessed base mounted applications, Model BRDS provides 300 to 400 SCFM at 51 to 55 dB, while utilizing only 3½" of vertical panel space. Blower housings are plated and grilles are clear anodized aluminum. All blowers mount in 19", 24" and 30" panel width consoles and are prewired with 3' or 6' three-conductor cords.

Purchase of an AMCO blower assembly includes mounting hardware, formed clear anodized aluminum grille, reusable filter, speed control, grille mounting hardware and blower box mounting hardware (BRDS only). Optional accessories include air deflectors, dust filters, replacement parts, hardware and deluxe grilles (BRDS only).

BRDS	X	300	400	51	55	Recessed Base Panel

**Because laboratory environment (barometric pressure, temperature and humidity) can vary, all air flow performance ratings are corrected to standard cubic feet per minute—SCFM. This technique is a more accurate method of rating performance than using observed CFM which can vary depending on test conditions.*

Quick Selection Guide

The table at left is presented as a quick reference guide to AMCO Fans and Blowers. For more information on each fan or blower, request AMCO Catalog 803 or call the AMCO representative nearest you—ask about additional models soon to be available and special services provided by AMCO's Cooling Systems Laboratory.

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

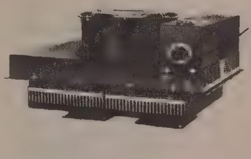
YIG yttrium iron garnet

AIR CONDITIONERS

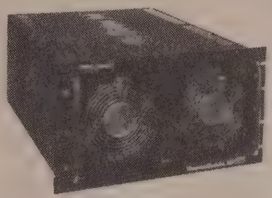
Temperature Control...

Solid State Cooling & Heating From One Product.

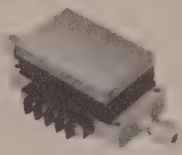
Thermoelectric Air Conditioners are a solid state method of refrigeration, which eliminates the need for a compressor, refrigerant fluids or piping. The only moving parts are highly reliable fans used to dissipate output heat to the ambient air. These air conditioners can be applied in computers, machine tool controls, instrumentation & electronics for hostile environment protection. They offer design flexibility in a wide range of industrial and consumer applications where compactness and reliability are key.



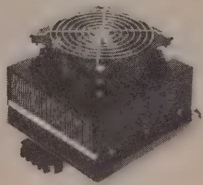
AHP-1700



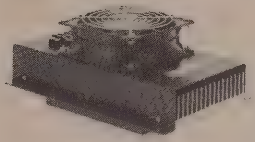
AHP-3000



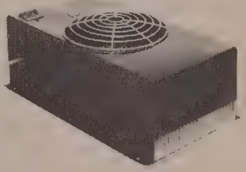
LHP-150



LHP-800



AHP-300



AHP-1000

Features:

- *No load cooling to –5°F (–20°C) at room temperature*
- *Lightweight, compact designs*
- *No compressor, no fluids, no coils*
- *Closed system protection from dust, chips, & moisture*
- *No moving parts except fans, means high reliability*
- *Low vibration, noise & maintenance*
- *Metal finishes resist corrosion*
- *Operates in any orientation - horizontal, vertical, etc.*
- *All models available from stock*

Other Products:

- Liquid cooled air conditioners rated to 1500 BTU/HR
- Thermoelectric cooling modules
- Temperature controllers
- Standard DC power supplies

Products

AIR CONDITIONERS (AIR COOLED)

AHP-150, with Cold Plate
Rating: 110 BTU/hr.
Overall Dimensions: 5.0W x 7.0L x 4.25T

AHP-300, with Cold Plate
Rating: 240 BTU/hr.
Overall Dimensions: 7.0W x 10.0L x 4.5T

AHP-300, with Cold Side Fin and Fan
Rating: 240 BTU/hr.
Overall Dimensions: 7.0W x 10.0L x 7.5T

AHP-800, with Cold Plate
Rating: 500 BTU/hr.
Overall Dimensions: 9.0W x 15.0L x 5.25T

AHP-800, with Cold Side Fin and Fan
Rating: 500 BTU/hr.
Overall Dimensions: 9.0W x 15.0L x 8.25T

AHP-1000, with Cold Plate
Rating: 560 BTU/hr.
Overall Dimensions: 8.35W x 15.0L x 7.2T

AHP-1000, with Cold Side Fin and Fan
Rating: 560 BTU/hr.
Overall Dimensions: 8.35W x 15.0L x 9.8T

AHP-1700, with Cold Side Fin and Fan
Rating: 1100 BTU/hr.
Overall Dimensions: 12.25W x 19.0L x 10.4T

AHP-3000
Rating: 2100 BTU/hr.
Overall Dimensions: 19.0W x 23.75L x 10.50T

AIR CONDITIONERS (LIQUID COOLED)

LHP-150, with Cold Plate
Rating: 135 BTU/hr.
Overall Dimensions: 2.7W x 5.2L x 1.65T

LHP-300, with Cold Plate
Rating: 205 BTU/hr.
Overall Dimensions: 6.0W x 4.5L x 1.65T

LHP-300, with Cold Sink and Fan
Rating: 305 BTU/hr.
Overall Dimensions: 6.0W x 4.5L x 4.75T

LHP-800, with Cold Plate
Rating: 740 BTU/hr.
Overall Dimensions: 6.225W x 7.93L x 1.78T

LHP-800, with Cold Sink and Fan
Rating: 740 BTU/hr.
Overall Dimensions: 6.225W x 7.93L x 5.73T

LHP-1700, with Cold Side Fin and Fan
Rating: 1500 BTU/hr.
Overall Dimensions: 7.0W x 19.0L x 8.67T

TEMPERATURE CONTROLLERS

TC-2, Cool Mode
Range: +20°C to 50°C

TC-106, Cool Mode
Range: –39.9°C to +39.9°C
Overall Dimensions: 3.25H x 6.0W x 6.18D

TC-107, Heat Mode
Range: –55°C to +150°C
Overall Dimensions: 3.25H x 6.0W x 6.18D

TC-108, Heat-Cool Mode
Range: –55°C to +150°C
Overall Dimensions: 3.25H x 6.0W x 6.18D

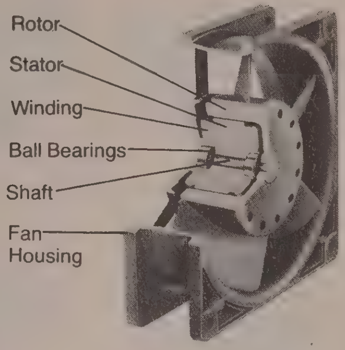
ebm Tubeaxial Fans

External Rotor Motor
All Metal Construction

One simple, reliable design for every electronic application

Motors

The motors used in ebm Tubeaxial fans are either shaded-pole, or PSC designs with Class "B" insulation. Available fans operate at 115V or 230V, 50/60Hz. Dual voltage 115/230V motors and other special models rated from 12V to 240V are also available. All motors are impedence protected in accordance with UL, CSA and VDE requirements. Electromagnetic interference (EMI) is greatly reduced by the self-shielding external rotor. This inherent feature of the ebm design makes it ideal for use in sensitive electronic equipment.



Acoustics

Acoustical sound measurements are made in an anechoic chamber at nominal voltage with a microphone one meter from fan air inlet.

Safety

All fans are designed to meet UL, CSA and VDE standards. Approved products are listed in UL yellow card E54522; CSA file LR3145 and VDE 836 and 11585. It is the responsibility of the user to be sure fans are installed and operated in accordance with all safety codes. Care should be taken to insure that the connecting screws for ground leads do not extend into the housing opening and impede operation of the impeller blades.

Nr. E 54 522 836

Construction

All-metal construction provides excellent heat dissipation, long life and structural stability. The fan itself functions as a heat sink by effectively transferring heat from the motor to the air stream via the metal impeller blades. The impeller blades are sheet steel, precision machined and welded to the metal rotor casing. The housing is die-cast aluminum.

The rotor and impeller blades are dynamically balanced in two planes in accordance with VDI2060. In addition, the fans are finished with an electrostatically applied black varnish to protect against severe environmental conditions.

Bearing System

The type of bearing system selected will directly affect the "life" of the fan. It is recommended that sleeve bearings be used for −10°C to 60°C; ambients and ball-bearings for −30°C to 75°C. With either bearing system, typical operating life is between 20,000 and 40,000 hours. Actual life will depend on ambient temperature, duty cycle, mounting position and environmental conditions; 100,000 hours is not uncommon. Bearings are totally maintenance free.

EG&G ROTRON

AC FANS

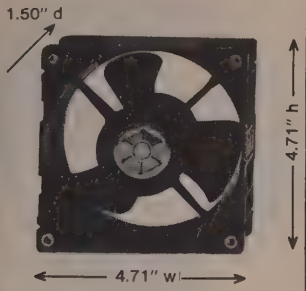
MUFFIN® VENTURI FAN

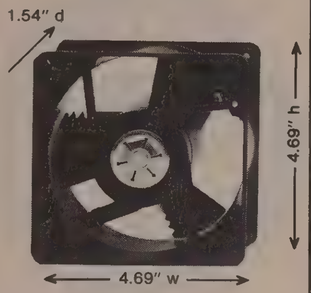


The dependable, low cost, largest selling fan for commercial cooling applications.

- 105 cfm (49.6 L/Sec) free air delivery
- 4.71" sq. x 1.50" deep (119.6 mm x 38.1 mm)
- Weight: 17.2 oz. (0.49 kg)
- Acoustical rating as low as NC-43
- Famous Muffin motor reliability
- Impedance protected
- For ambients to 70°C
- UL yellow card recognized and CSA certified

Catalog Sheet COM 040

MUFFIN® XL FAN

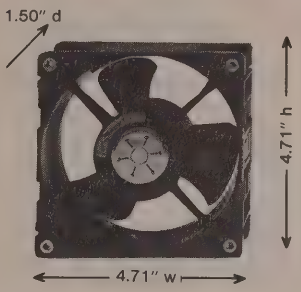


High performance and low noise level, with Muffin reliability. Sturdy one-piece metal venturi.

- 115 cfm (54.3 L/Sec) free air delivery
- 4.69" sq. x 1.54" deep (119.1 mm x 39.1 mm)
- Weight: 21 oz. (0.61 kg)
- Convenient ground lug bosses
- Feathered Edge™ airfoil blades for quietest operation
- Available in two flow directions
- Impedance protected
- For ambients to 70°C
- UL yellow card recognized and CSA certified
- VDE models available

Catalog Sheet COM 043

WHISPER® VENTURI FAN

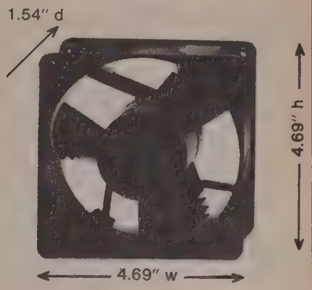


The quiet one for efficient cooling where low noise level is a must.

- 57 to 75 cfm (26.9 to 35.4 L/Sec) free air delivery
- 4.71" sq. x 1.50" deep (119.6 mm x 38.1 mm)
- Weight: 17.2 oz. (0.49 kg)
- Acoustical rating as low as NC-27
- Famous Muffin motor reliability
- Impedance protected
- For ambients to 70°C
- UL yellow card recognized and CSA certified

Catalog Sheet COM 050

WHISPER® XL FAN



High performance and low noise level with Muffin reliability. Sturdy one-piece metal venturi.

- 50 to 80 cfm (23.6 to 37.8 L/Sec) free air delivery
- 4.69" sq. x 1.54" deep (119.1 mm x 39.1 mm)
- Weight: 21 oz. (0.61 kg)
- Convenient ground lug bosses
- Feathered Edge™ airfoil blades for quietest operation
- Impedance protected
- For ambients to 70°C
- UL yellow card recognized and CSA certified
- VDE models available

Catalog Sheet COM 051

HI-LO FANS

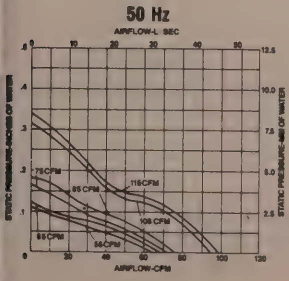
HI-LO 4715

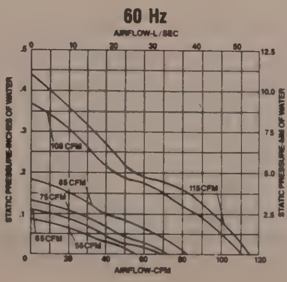
- 55 to 115 cfm (26 to 54.3 L/Sec)
- Size - 4.7" sq. x 1.50" deep (119.4 mm x 38.1 mm)
- Acoustics rating as low as NC-22
- Weight - 27 oz. (0.76 kg)
- For ambients to 70°C

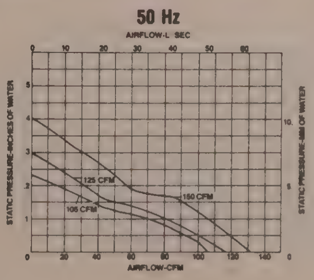
- **Meet UL, CSA, and VDE requirements**
- **Sleeve and ball bearings**
- **Optional dual voltage capability**

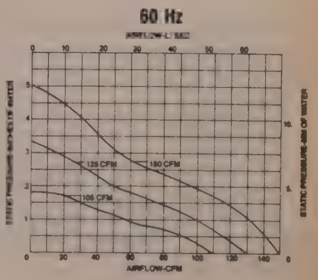
HI-LO 5015

- 105 to 150 cfm (49.6 to 70.8 L/Sec)
- Size - 5.0" sq. x 1.50" deep (127 mm x 38.1 mm)
- Acoustics rating as low as NC-33
- Weight - 27 oz. (0.76 kg)
- For ambients to 70°C







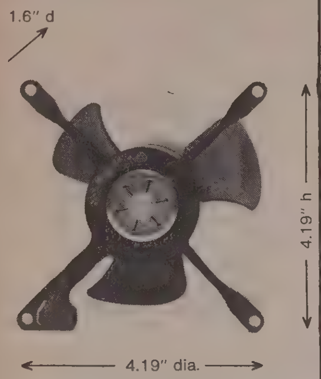


ROTRON, INC., COMMERCIAL DIVISION, SHOKAN, NY 12481 TEL. (914) 657-6661 TWX: 510-247-1941

EG&G ROTRON

AC FANS

SKELETON FANS

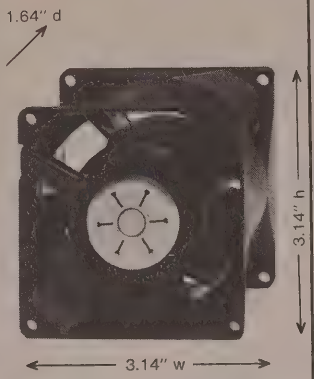


Reduced costs. Save .5" space (13.2 mm) on height and width compared to equivalent venturi models; particularly helpful in tight packaging applications. Mount directly to orifice molded into your own panel design.

- 57 to 105 cfm (26.9 to 49.6 L/Sec) free air delivery
- 1.6" (40.64 mm) deep; propeller dia. 4.19" (106.4 mm). Mounting holes on 4.125" centers (104.78 mm)
- Weight: 12.8 oz. (0.36 kg)
- Acoustical rating, depending on application, as low as NC-27
- Famous Muffin motor reliability
- Impedance protected
- For ambients to 70°C
- UL yellow card recognized and CSA certified

Catalog Sheet COM 058

SPRITE® FAN

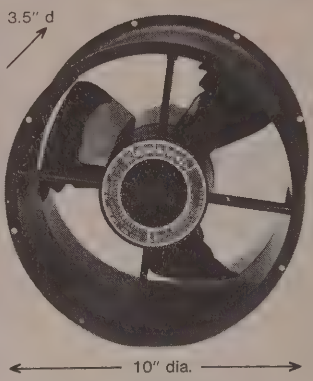


A smaller size fan that delivers relatively high pressures at close-to-maximum air delivery.

- 21 to 35 cfm (9.9 to 16.5 L/Sec) free air delivery
- 3.14" sq. x 1.64" deep (79.2 mm x 41.7 mm)
- Weight: 18 oz. (0.51 kg)
- Famous Muffin motor reliability
- Acoustical rating as low as NC-28
- Rugged die-cast zinc housing
- Impedance protected
- For ambients to 70°C
- UL yellow card recognized and CSA certified
- VDE models available
- Lead wire and terminal models

Catalog Sheet COM 030

CARAVEL® FAN

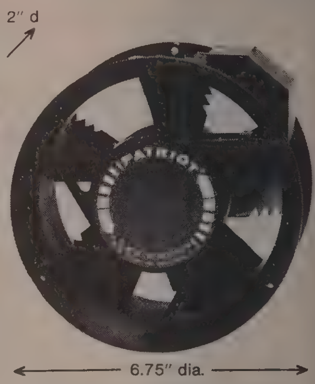


Maximum air volume, from a narrow fan, for flushing large racks and cabinets.

- 550 cfm (259.6 L/Sec) free air delivery
- 10" dia. x 3.5" deep (254 mm x 88.9 mm)
- Weight: 4.4 lbs. (1.99 kg)
- Ball bearing thermally protected slow speed motor
- Exclusive new Feathered Edge™ blade for low noise level operation
- Acoustical rating as low as NC-45
- For ambients to 60°C
- UL yellow card recognized and CSA certified

Catalog Sheet COM 110

PATRIOT® FAN



Quiet high pressure performance in a compact rugged fan.

- 240 cfm (113.3 L/Sec) free air delivery
- 6.75" dia. x 2.00" deep (171.5 mm x 50.8 mm)
- Weight: 1.84 lbs. (0.84 kg)
- Acoustical rating as low as NC-47
- One-piece die-cast aluminum housing
- Long life ball bearings
- Permanent split capacitor motor, capacitor provided
- For ambients to 70°C
- UL yellow card recognized and CSA certified
- Available with fan performance sensor. Senses and reacts to speed reduction, voltage reduction, open winding, non-start. No customer-supplied electronics necessary.

Catalog Sheet COM 083

UL, CSA AND VDE APPROVALS

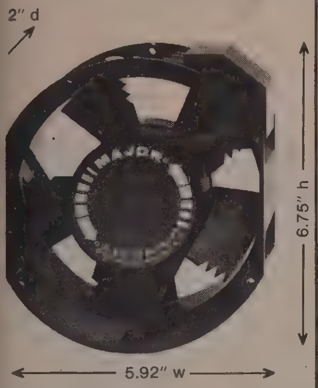
For years, Rotron fans have met UL and CSA safety requirements. And now, 4 Rotron fans - the Hi-Lo, Muffin XL, Whisper XL and Sprite are the first American-made equipment-cooling airmovers to meet the VDE fire and shock hazard safety standards. This VDE component approval, set by the West German Association of Electrical Engineers, makes it easier for OEM manufacturers to sell their products in West Germany and other Common Market nations.

1. VDE file no. 25636, 1703
2. UL component recognition file no. E31293
3. CSA Certification file no. LR20495, LR44938, LR46126, LR52898
4. Plug & Cord accessories listed under UL file no. E42397
5. All models 100% tested to meet 1500 VAC dielectric strength for one minute (production line equivalent 1800 VAC for 1 second)

EG&G ROTRON

AC FANS AND BLOWERS

MAJOR® FAN



For low cost, low noise, high pressure/volume cooling in the tightest of spaces.

- 240 cfm (113.3 L/Sec) free air delivery
- 6.75″ x 5.92″ x 2.00″ deep (171.5 mm x 150.4 mm x 50.8 mm)
- Weight: 1.84 lbs. (0.84 kg)
- Acoustical rating as low as NC-60
- One-piece die-cast aluminum housing
- Long life bearings
- Thermally protected
- For ambients to 70°C
- Permanent split capacitor motor, capacitor provided
- UL yellow card recognized and CSA certified
- Available with fan sensor. Senses and reacts to speed reduction, voltage reduction, open winding, non-start. No customer-supplied electronics necessary

Catalog Sheet COM 080

FEATHER® FAN

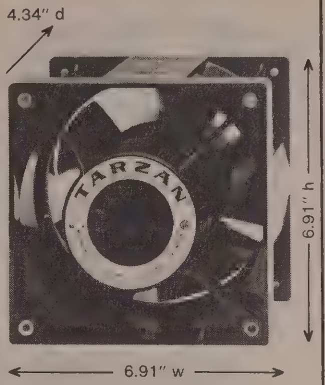
2.47″ d
FEATHER FAN
7″ dia

High volume air performance where space is severely limited, particularly in depth.

- 245 cfm (115.6 L/Sec) free air delivery
- 7″ dia. x 2.47″ deep (177.8 mm x 62.7 mm)
- Weight: 1.5 lbs. (0.68 kg)
- Exclusive new Feathered Edge™ blade is extra quiet at free delivery NC-45
- Permanently lubricated ball bearings
- Permanent split capacitor motor, capacitor provided
- For ambients to 65°C
- UL yellow card recognized

Catalog Sheet COM 090

TARZAN® FAN

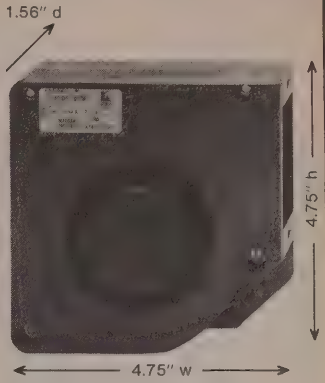


High air volume and pressure combined, for tightly packed cabinets and chassis.

- 340 cfm (160.5 L/Sec) free air delivery
- 6.91″ sq. x 4.34″ deep (175.5 mm x 110.2 mm)
- Weight: 5 lbs. (2.26 kg)
- Acoustical rating as low as NC-57
- Ball bearing thermally protected motor
- For ambients to 55°C
- Centrifugal blower performance in a compact axial flow fan
- UL yellow card recognized and CSA certified

Catalog Sheet COM 120

BISCUIT BLOWER



The only air moving device that fits inside a 1¾″ rack panel mounted instrument.

- 22 cfm (10.4 L/Sec) free air delivery
- High pressure capability
- Built around famous Muffin fan features
- 4.75″ sq. x 1.56″ deep (120.65 mm x 39.7 mm)
- Weight: 19 oz. (0.54 kg)
- Acoustical rating as low as NC-42
- For ambients to 70°C
- UL yellow card recognized

Catalog Sheet COM 130

ROTRON, INC., COMMERCIAL DIVISION, SHOKAN, NY 12481 TEL. (914) 657-6661 TWX: 510-247-1941

EG&G ROTRON

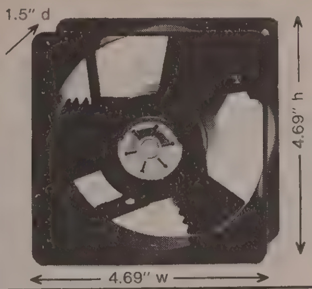
BRUSHLESS DC FANS

Rotron's American-made solid state brushless DC fans contain all the necessary circuitry within an extremely compact metal housing. Their superior design allows operation at greatly reduced voltages. This allows you to tailor your [illegible] requirements.

Rotron DC fans use far less energy than comparable AC fans, meet [illegible] safety [illegible], and are designed for long life. It is possible to standardize your inventory of fans by eliminating the need to match worldwide AC voltage / frequency requirements. DC fans can provide backup cooling during AC power interruption, and are available with thermal and speed sensing options.

Rotron DC fans are available in 12, 24, and 48 VDC (nominal) models, in sizes for virtually every electronic equipment application. For further information, please contact your Rotron distributor.

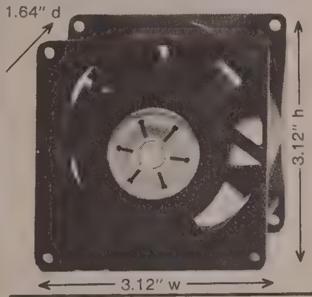
MUFFIN® DC FAN



- 40 to 130 cfm (18.9 to 61.4 L/Sec)
- Size: 4.69″ sq. x 1.5″ deep (119.13 mm x 39.12 mm)
- Weight: 21.5 oz. (0.61 kg)
- Terminal or leadwire versions

Catalog Sheet COM 041B

SPRITE® DC FAN

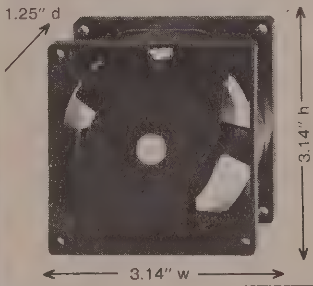


- 10 to 40 cfm (4.8 to 18.9 L/Sec)
- Size: 3.12″ sq. x 1.64″ deep (79.2 mm x 41.7 mm)
- Weight: 17.5 oz. (0.50 kg)
- Terminal or leadwire versions
- Superior low voltage capability

Catalog Sheet COM 031

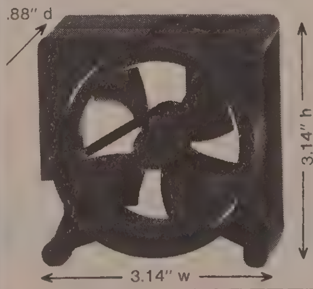
- Also available in single flange and reverse flow models

SPRINT® DC FAN



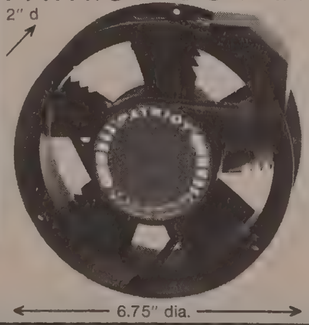
- Small size: 3.14″ x 3.14″ x1.25″ (80.0 x 80.0 x 32.0 mm)
- Lightweight: 6.3 oz. (178 gr)
- Low Noise: Noise power emission level of 3.9 - 4.8 Bels
- Low Power Consumption: 3 Watts
- Low EMI/RFI
- Long Life: Muffin® bearing system
- Polarity protection
- 25 - 35 cfm (11.8 - 16.5 L/Sec)
- Voltage: 12 and 24 VDC available (nominal)
- Operating Ambient: −10°C to +70°C

SCAMP™ DC FAN



- Thinnest fan available - .88″ (22.4 mm) deep and only 3.14″ (79.2 mm) sq.
- Low power draw - less than 2 watts
- Lightweight - 2.8 oz. (79.41 gr)
- 21 cfm (9.9 L/Sec)
- Polarity protected
- Low cost
- Motor winding location allows for lowest possible bearing temperature

PATRIOT® DC FAN



- 175 to 240 cfm (82.6 to 113.3 L/Sec)
- Size: 6.75″ dia. x 2.00″ deep (171.5 mm x 50.8 mm)
- Weight: 1.84 lbs. (.836kg)
- Available terminal only

EG&G ROTRON

MILITARY/AEROSPACE FANS AND BLOWERS

Rotron Custom Division specializes in "AC" & "DC" airmovers to withstand the hostile environments found in Military, Aerospace, and other high reliability applications. Our "AC" product line has six (6) airmovers currently QPL approved. Our ECDC (Electronically Commutated Direct Current) product line is designed to meet requirements of MIL-B-28873, which is the new specification for brushless DC airmovers.

All brushless DC (ECDC) fans are supplied with a built-in performance sensor, which when coupled with a Rotron Low Speed Warning Detector (LSWD) or similar device, will allow fan speed (RPM) to be monitored for added system reliability. Fan Performance Sensors are also available for most of our "AC" product line as an option. Call or write for more information, including our ability to design new products to meet your toughest application requirements.

MIL GRADE BRUSHLESS DC FANS

Rotron ECDC (Electronically Commutated Direct Current) fans have already been tested, and passed vibration requirements of Mil-Std-202 Method 201 and Mil-Std 810C Method 514.2; Shock requirements of Mil-Std-202 Method 213 test conditions "A" & "C"; and Humidity/Salt Spray per MIL-B-28873, which is the new specification for brushless DC airmovers.

Selected models have been subjected to Nuclear Gamma Dot dose rates to 10^{11} Rad (Sil)/sec and Nuclear Radiation exposure to 10^{12} neutron/cm, with no degradation in performance.

Slash sheet and QPL approval to MIL-B-28873, is now being pursued.

Features include:

- designed to meet requirements of MIL-B-28873 Specification for Electronically Commutated Brushless Direct Current (ECDC) Fans and Blowers.
- no brushes to wear out; long life with low maintenance
- low power consumption, low EMI/RFI
- high operating temperature capability; to 100°C on some models
- rotational speed (RPM) change accomplished by simply varying the voltage.

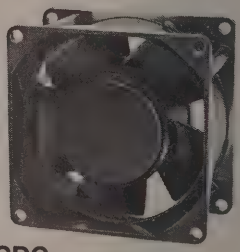
Spartan ECDC

- up to 135 cfm (65 L/Sec) free air delivery at 12 VDC and 180 cfm (86.5 L/Sec) at 26 VDC
- dimensionally interchangeable with Muffin and Spartan AC & DC Fans
- built-in fan performance sensor
- designed to meet all applicable military specs
- no brushes to wear out; low maintenance
- withstands ambients from −54°C to 100°C
- available in 12 & 26 VDC models
- housing, ball bearing suspension system, & lubricant are same as supplied in proven high reliability AC designs

Consult Factory For Special Designs

Saucer ECDC

- 250 cfm (120 L/Sec) free air delivery at 12 VDC and up to 325 cfm (156.3 L/Sec) at 26 V or 48 VDC
- dimensionally interchangeable with Feather & Saucer AC Fans
- built-in fan performance sensor
- designed to meet all applicable military specs
- no brushes to wear out; low maintenance
- withstands ambients from −54°C to 100°C
- available in 12, 26, & 48 VDC models
- housing, ball bearing suspension system, & lubricant are same as supplied in proven high reliability AC designs



MIL 80 ECDC

- up to 65 cfm (28.8 L/Sec) free air delivery at 12 V & 26 VDC and 38 cfm (18.3 L/Sec) at 48 VDC
- dimensionally interchangeable with Sprite and MIL 80 AC Fans
- built-in fan performance sensor
- designed to meet all applicable military specs
- no brushes to wear out; low maintenance
- withstands ambients from −54°C to 100°C
- available in 12, 26, & 48 VDC models
- housing, ball bearing suspension system, & lubricant are same as supplied in proven high reliability AC designs

Consult Factory for Special Designs

Saucer® Fan

High volume and high pressure both, from a minimum of fan space.

- 280 cfm (132 L/Sec) free air delivery
- generates pressures up to .5″ (12.7 mm) H_2O
- driving motor entirely within hub for minimum depth 2.50″ (63.5 mm), dia. 7″ (177.8 mm)
- pre-lubricated stainless steel ball bearings
- for ambients from −60°F (−54°C) to +257°F (+125°C)
- clamping rings at venturi ends for easy mounting
- meet all applicable military specs (MS connectors available)

See Custom Catalog

Aximax® 1, 2, 2H & 3

Family of miniature, high performance air movers for airborne and other critical space/weight/performance applications.

- free air delivery from 10 cfm to 155 cfm (4.7 to 73 L/Sec)
- optional Altivar® motors automatically increase speed with altitude
- life expectancies from 10,000 hours at 72°C, at 22,000 RPM
- withstands ambients up to 257°F (125°C)
- sizes: 1½″ x 1½″ (38.1 mm x 38.1 mm), 2″ x 1½″ (50.8 mm x 38.1 mm), and 3″ x 2 5/16″ (76.2 mm x 58.7 mm)
- weight: 4 oz. (113 grams), 4½ oz. (128 grams) and 14 oz. (.4 kg) respectively
- meet all applicable military specs (MS connectors available)

Models for 115 VAC, 1 phase, 400 Hz; 200 VAC, 3 phase, 400 Hz; and 115 VAC, 1 phase, 60 Hz

See Custom Catalog

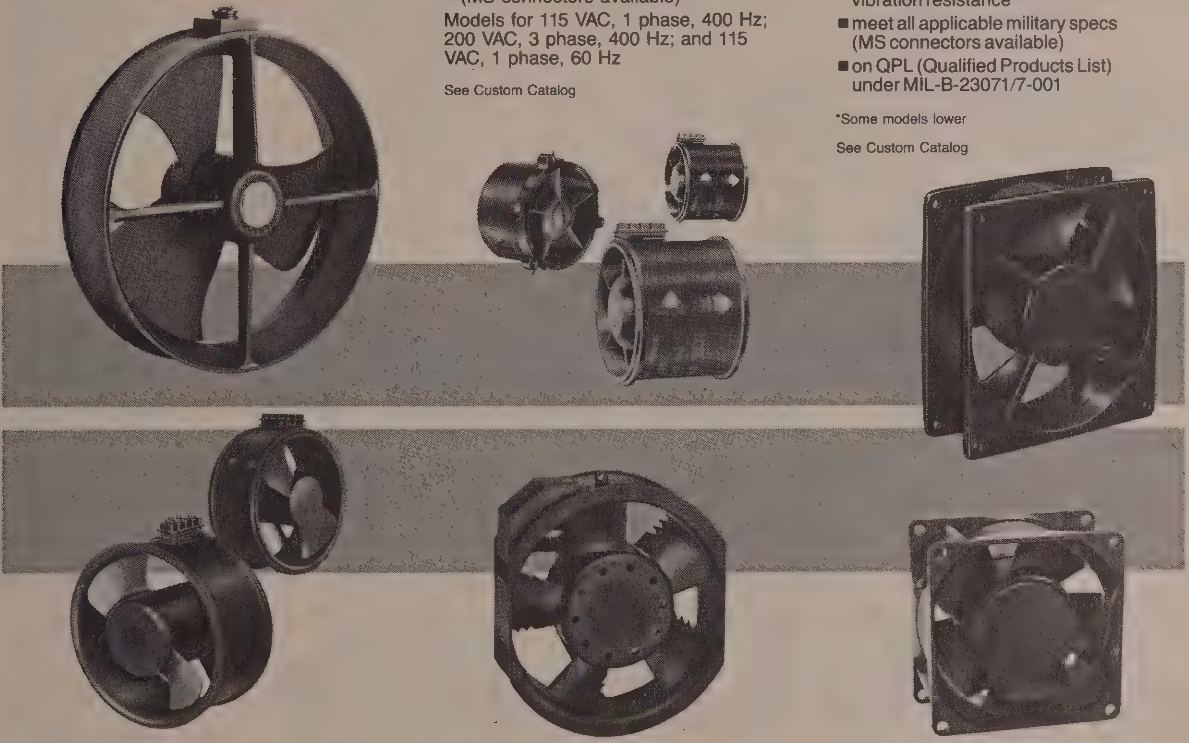
Spartan® Fan

The MIL SPEC version of the famous Muffin fan.

- 113 cfm (53 L/Sec) free air delivery. Up to 188 cfm (89 L/Sec) for some 400 Hz models
- unusually high pressure characteristics-up to .8″ (20.3 mm) H_2O.
- dimensionally interchangeable with the Muffin fan-4.71″ sq. x 1.50″ (119.6 mm x 38.1 mm)
- double shielded stainless steel ball bearings
- lubricated for life
- highly efficient multi-slot motor
- withstands ambients from −60°F (−54°C) to +212°F (+100°C)*
- venturi, spiders, and hub are single aluminum casting for shock and vibration resistance
- meet all applicable military specs (MS connectors available)
- on QPL (Qualified Products List) under MIL-B-23071/7-001

*Some models lower

See Custom Catalog



Propimax® 2, 3, 3B & 3BM

Large volume and high pressure air movers for airborne equipment.

- free air delivery from 22 to 225 cfm (10.3 to 106.2 L/Sec)
- offer pressures as high as 7″ (177.8 mm) H_2O at cut-off
- optional Altivar® motors automatically increase speed with altitude
- life expectancies of 10,000 hours at 72°C, at 22,000 RPM
- withstands ambients up to 257°F (125°C)
- size/weight: 3¼″ x 1½″ (82.5 mm x 38.1 mm) and 6.5 oz. (184.3 g) for Propimax 2, 3¾″ x 2″ (95.3 mm x 50.8 mm) and 15.2 oz. (431 g) for Propimax 3 & 3B
- meet all applicable military specs (MS connectors available)

Models for 115 VAC, 1 phase, 400 Hz; 200 VAC, 3 phase, 400 Hz; 115 VAC, 1 phase, 60 Hz

See Custom Catalog

MIL 901

The MIL SPEC version of the famous Major®/Patriot® fans.

- free air delivery to 280 cfm (104 L/Sec)
- pressure building capability up to .8″ (20.3 mm) H_2O at cut-off
- withstands MIL-S-901 shock levels
- on QPL (Qualified Products List) under MIL-B-23071/29-001
- meet all applicable military specs (MS connectors available)

See Custom Catalog

MIL 80

The MIL SPEC version of the famous Sprite® fan.

- free air delivery from 28 to 58 cfm (13 to 27 L/Sec)
- pressure building capability up to .5″ (12.7 mm) H_2O at cut-off
- withstands ambients up to 257°F (125°C)
- on QPL (Qualified Products List) under MIL-B-23071/28-001
- meet all applicable military specs (MS connectors available)

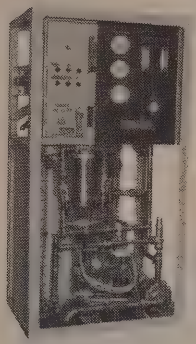
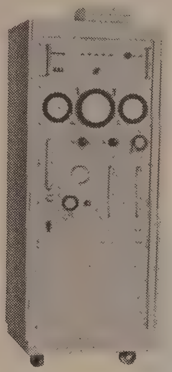
EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

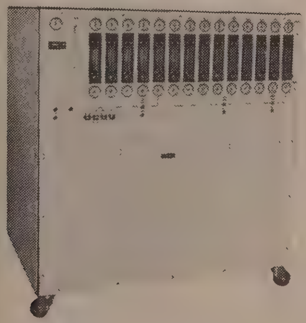
Electro
IMPULSE, INC.
EXCELLENCE IN ENGINEERING SINCE 1949



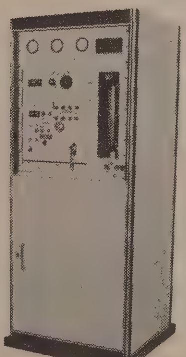
Shipboard Seawater to ETH/Water. H/E cools advanced radar system.



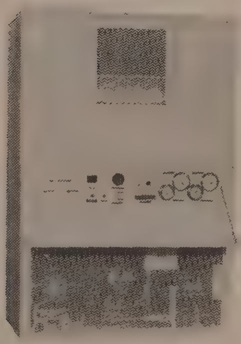
Coolanol to Air Military Heat Exchanger.



14 Path Cooling Unit with full instrumentation.



Burn in of travelling wave tubes is automatic using solid state systems in this Heat Exchanger.



Outdoor Mobile Heat Exchanger.

Closed Loop Cooling Systems

Self contained cooling packages for a wide variety of applications which allow user to

- **ELIMINATE TAP WATER**
- **CONTROL COOLANT QUALITY**
- **CONTROL COOLANT TEMPERATURES**
- **REDUCE COSTS**
- **IMPROVE PERFORMANCE OF EQUIPMENT**

HIGHEST QUALITY Industrial/Military Packages designed for long life/minimum maintenance.
UNITS AVAILABLE to circulate/cool air, water, coolanols, flourocarbons, hydraulic fluids, or any exotic coolants.
SEALED COOLANT SYSTEMS allow for high degree of purity: Filters, De-Ionizer Systems available.
HIGHLY EFFICIENT HEAT EXCHANGERS keep operating power to a minimum. Hot air exhausts can be used for space heating.
EXCELLENT TEMPERATURE CONTROL utilizing state of the art technology.
WIDE VARIETY OF OPTIONS available for monitoring, interlocking, controls, logic interfaces — customize a unit as you want it.

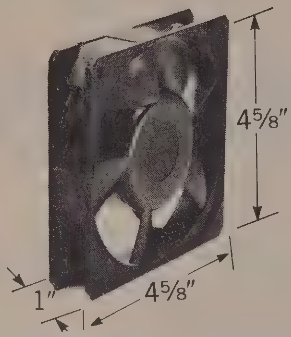
ETRI tube

ETRI has long been a leader in the design of air-moving devices, from large mine ventilators to miniature flat axial fans. Today, ETRI air movers are cooling and protecting the most sophisticated of electronic packages. Throughout this time, our basic commitment to uncompromising quality and high performance standards has not changed. Our history of innovative designs and materials, coupled with precise manufacturing techniques provide you with an efficient, quality product for long maintenance-free operation.

MODEL 98

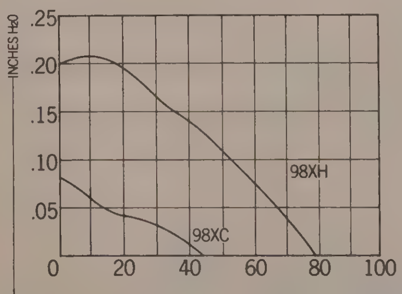


High volume/pressure performance where space is at a premium.

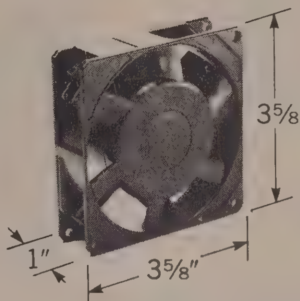
- Unique 1″ thin profile on 4⅝″ fan.
- Two RPM versions available.
- Available in either sleeve or ball bearing construction.
- Precision engineered blade-to-venturi fit.
- Low input power—as low as 10 watts.
- UL recognized/CSA certified.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
98XC-2182	115	60	10	110	1700	28	45
98XC-2181	220	60	12	70	1700	28	45
98XH-2182	115	60	11	110	3000	39	79
98XH-2181	220	60	13	65	3000	39	79

Model numbers shown are for sleeve bearing versions. To order ball bearing fans, omit the first "2" from the last group of digits



MODEL 99



Slim 1″ profile takes up less behind-the-panel space.

- Three different speed models in two voltage versions.
- Noise levels as low as 23 db (sil).
- True airfoil impeller blades move more air.
- Convenient standard terminals.
- Precision balanced lightweight rotor for longer vibration-free work life.
- UL recognized/CSA approved.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
99XM-2182	115	60	6	65	1700	23	21

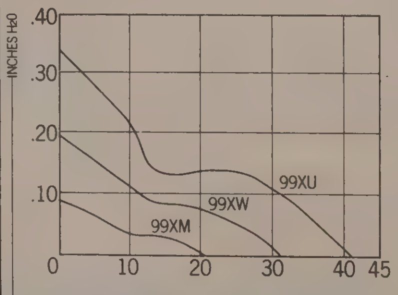
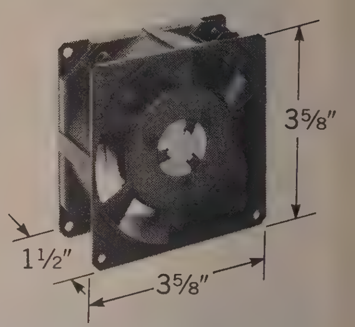
99XW-2181	220	60	7	40	2500	32	32
99XU-2182	115	60	9	105	3200	37	40
99XU-2181	220	60	11	60	3200	37	40

Model numbers shown are for sleeve bearing versions. To order ball bearing fans, omit the first "2" from the last group of digits.



MODEL 113



An intermediate size fan. Ideal for power supply applications.

- 3.25″ mounting centers.
- Quiet, efficient operation with maximum volume/pressure delivery.
- 94V-O rated glass-filled impeller is heat stable with high resistance to breakage.
- Available in either sleeve or ball bearing construction.
- UL recognized/CSA approved.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
113XN-2182	115	60	11	135	3300	35	53
113XN-2181	220	60	12	80	3300	35	53

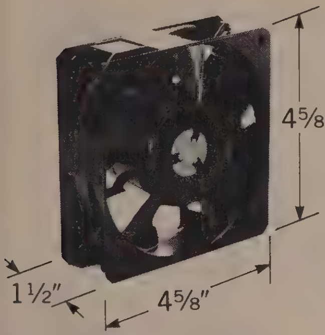
ETRI

ETRI/PO Box 568/608 Broome St/Monroe, NC 28110/TWX 810-649-1352 **(704)289-5423**

axial fans.

ETRI's popular-sized fans utilize rugged die cast housings for strength and durability. Glass-filled hermoplastic impellers (94V-O rated) are heat-stable and resistant to breakage. Rotors are lightweight and precision balanced for vibration-free operation. Bearings (either sleeve or ball) are ifetime lubricated. All models operate efficiently at 50Hz or 60Hz and most are available in either 115VAC or 220VAC. Every model is UL Recognized (file E64887) and CSA Certified (file 43861). Many models are VDE approved. For more information call ETRI at 704/289-5423.

MODEL 125



Extremely effective in high density applications where high pressure performance is required.

- Develops 90 CFM at .15″ H_2O and 75 CFM at .2″ H_2O.
- Can replace two conventional fans in demanding applications.
- Produces highest volume of air per watt of power of any fan of its type.
- Available in either sleeve or ball bearing construction.
- UL recognized/CSA certified.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
125XL-2282	115	60	10	115	1650	29	57

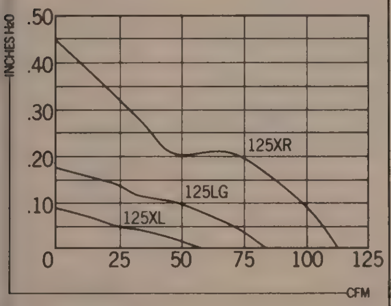
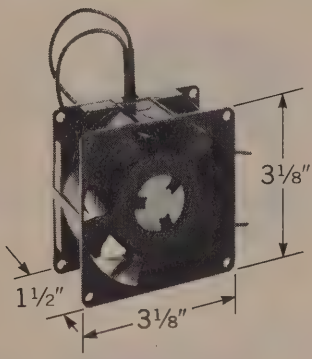
125LG-2282	115	60	13	160	2400	36	83
125LG-2281	220	60	15	90	2400	36	83
125XR-2282	115	60	15	180	3250	40	112
125XR-2281	220	60	15	105	3250	40	112

Model numbers shown are for sleeve bearing versions. To order ball bearing fans, omit the first "2" from the last group of digits



MODEL 126

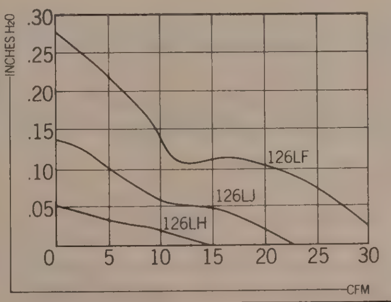


Low input power, low noise, high performance in this fan package.

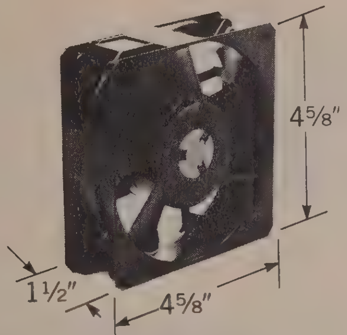
- 2.81″ mounting centers.
- Very quiet operation—only 8 db (sil) on Model 126LH.
- #20AWG, 12″ long, flying leads.
- Three different RPM models.
- Available in either sleeve or ball bearing construction.
- UL recognized CSA certified.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
126LH-2182	115	60	3	40	1550	9	15
126LJ-2182	115	60	5	60	2400	19	23
126LF-2182	115	60	8	100	3200	26	32
126LF-2181	220	60	8	60	3200	26	32

Model numbers shown are for sleeve bearing versions. To order ball bearing fans, omit the first "2" from the last group of digits



MODEL 141



105, 75, and 55 CFM versions are available in this most popular size fan.

- 4.125″ mounting centers and standard terminal configuration.
- Low power consumption—only 8 watts on 141LV model
- Tight blade-to-venturi fit assures optimum performance.
- Available in either sleeve or ball bearing construction.
- UL recognized/CSA certified
- Reverse flow models available.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)

ETRI

ETRI PO Box 568 608 Broome St. Monroe, NC 28110 TWX 810-649-1352 **(704) 289-5423**

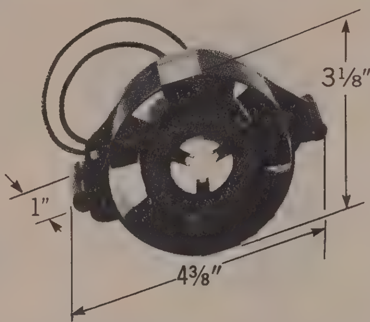
ETRI fans

ETRI's flat tubeaxial fans are quiet, efficient, cost effective components that are ideal for most electronic cooling applications. For complete technical specifications and delivery information call the ETRI factory at (704) 289-5423.

and accessories.

Accessory items assure correct fit on ETRI fans. Finger Guards will retro fit most existing fans.

MODEL 146



3″ x 1″ fan specially designed for desk-top electronic applications

- Low acoustical levels.
- 25 CFM at free air delivery.
- Simplified time saving mounting with bosses and speed nuts provides real economy for high volume installation.
- 115 or 220 volt.
- UL recognized/CSA certified/VDE approved.
- Will fit 3⅛″ designs in a 1″ profile.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
146DF-2182	115	60	5	60	3100	24.7	25

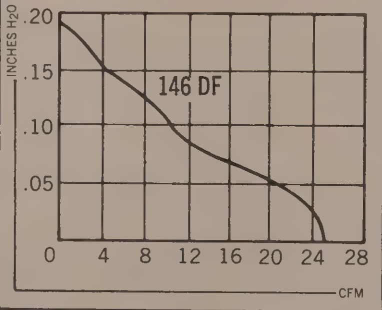
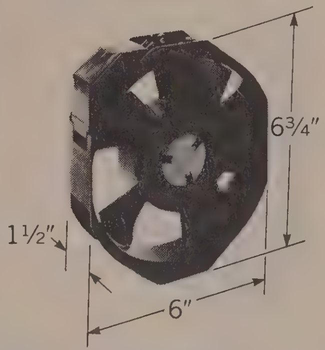
Model numbers shown are for sleeve bearing versions. To order ball bearing fans, omit the first "2" from the last group of digits



MODEL 148



Ideal for high pressure/high flow applications. Develops 180 CFM at .3″ H_2O.

- 1½″ thick—less than most 6″ fans.
- Efficient, permanent split-capacitor motor, thermally protected.
- Pre-loaded ABEC-3, double-shielded, ball bearing system runs quietly in any position.
- UL recognized/CSA certified.
- Reduced speed versions available.
- Provides wide range cooling with low acoustical disturbances.

PART NUMBER	VOLT (V)	FREQ (Hz)	POWER INPUT (W)	CURRENT INPUT (ma)	SPEED (RPM)	NOISE LEVEL SIL/dB	FREE AIR DELIVERY (CFM)
148VE282	115	60	11	90	1650	33	123

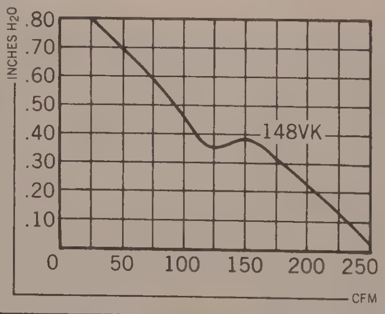
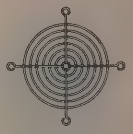
148VK281	220	60	33	170	3200	50.5	255

Model numbers shown are for sleeve bearing versions. To order ball bearing fans, omit the first "2" from the last group of digits



FINGER GUARDS

Ensures safe operation in situations that require guarding.



- Standard mounting centers for versatile installation.
- Meets UL Spacing requirements.
- Sturdy .062″ steel wire rings welded to .080″ ribs.
- Bright zinc-plated finish.

FILTERS

Provides maximum air flow while permitting effective filtering.

- Expanded/slit aluminum foil traps dust particles.
- Minimum pressure loss.
- Complies with UL requirements.

CORDS

All cords are UL recognized #18AWG wire.

- Black SPT-1 type wire in several lengths.

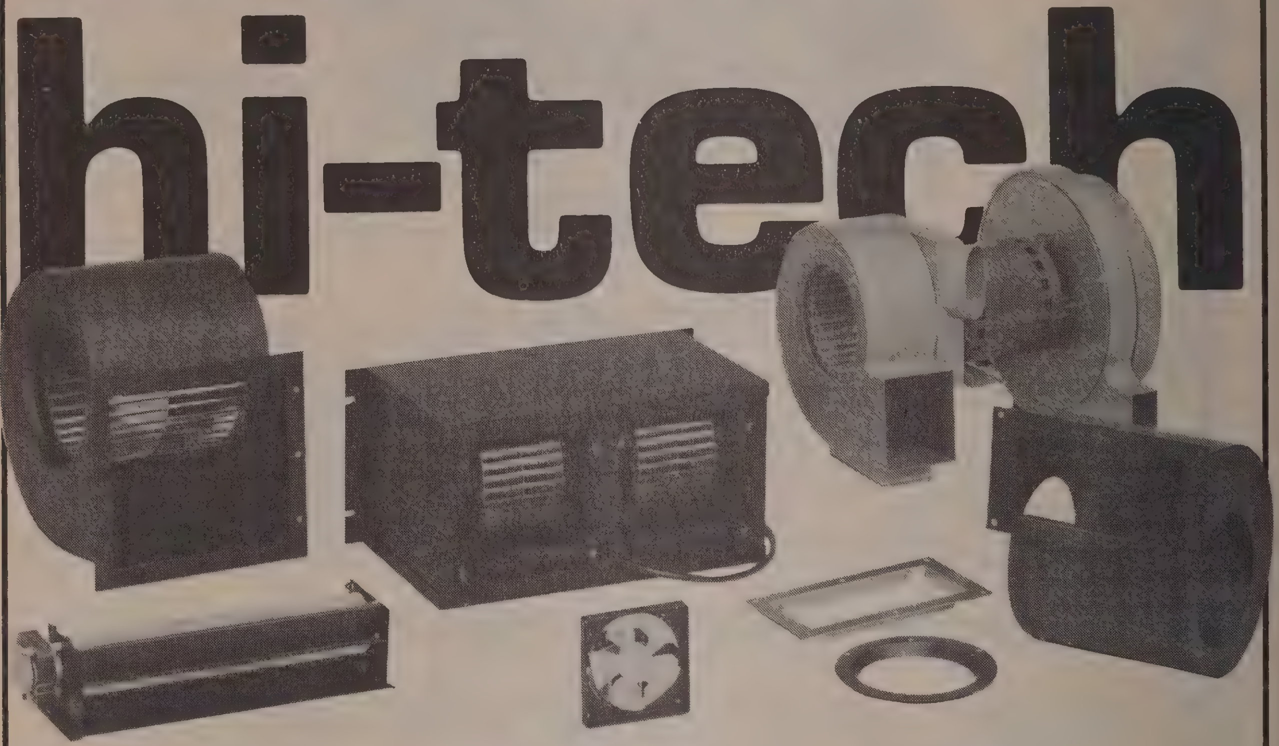
the reliable alternative for fans, blowers and cooling devices



MODULAR CABINET BLOWERS
Applications include heat exchangers, slot blowers, coolers, filter boxes. As a solid state temperature control, unit maintains optimum temperature range.

PACKAGE BLOWERS
Fully assembled high performance blowers feature standard double inlet wheels and automatic reset thermal protection. Housings are heavy-weight steel with a durable flat black finish.

BLOWER HOUSINGS/PARTS
Housings, inlet flanges, cover plates and outlet collars in sizes from 2″ to 13″ are available for prompt delivery. All parts can be furnished either unpainted or with a hard wearing flat black finish.

AXIAL FLOW FANS
Hi-Tech's axial flow fans are the economical solution for high volume, low static pressure applications; for limited space, spot cooling installations; and where extremely low sound levels are required.

TANGENTIAL BLOWERS
LAMINA-FLO tangential blowers are designed for low profile, wide outlet installations and feature high CFM, even air flow patterns and extremely quiet operation.

SINGLE/DUAL CENTRIFUGAL BLOWERS
Smooth, vibration-free performance assured with balanced wheels and motors. Single and three phase UL approved motors. Static pressures from 0″ to 3.0″; outputs to 2000 CFM; wheel diameters from 3″ to 12″.

When you need a backup source you need them now! When you need assistance with a custom fan or blower you need it now! Hi-Tech will provide that bend-over-backwards service plus first line quality and uncompromising product reliability.

Hi-Tech designs and builds all kinds of cooling components, from axial fans to solid state temperature controllers. Send us your needs. Hi-Tech — The reliable alternative.

hi-tech ,inc. *fluid handling specialists*

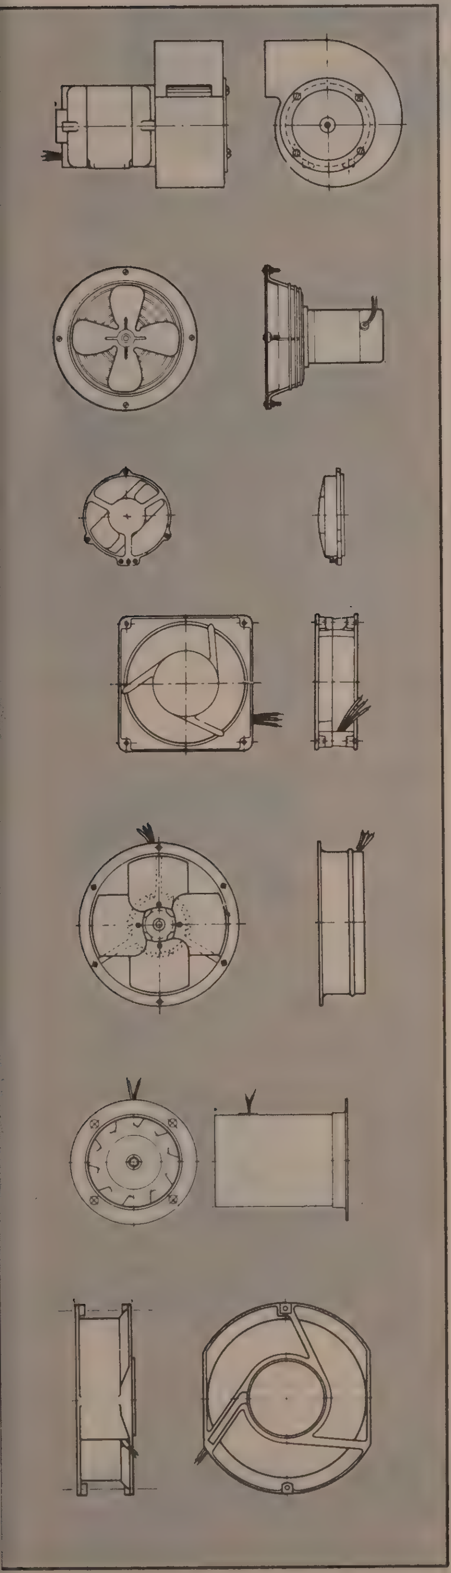
custom airmovers

PRECISION OEM AND MILITARY APPLICATIONS

Select your airmover from the thousand or more catalog designs or let us custom build it.



Centrifugal Blowers

Centrifugal blowers have special housings for attachment to ducts, boots, transition pieces or equipment walls. Air is moved by a wheel (containing multiple cut-outs or blades), which is driven by any of the various types of IMC motors or by an external source of rotating energy. They are most often used in applications requiring air that is transported through ducts or for blast cooling of electronic and control enclosures where high velocity air is required.

Sizes: 16 Frame to 55 Frame
Air Delivery: 6.3 cfm to 3,000 cfm
Frequency: 60 HZ-400 HZ – DC and Brushless DC
Accessories: Outlet Flanges Inlet Rims – Inlet Cones
Inlet Filters. Boot Accommodations and Air Vane Switches.

Propeller and Tubeaxial Fans

Commercial and military propeller and tubeaxial fans are noted for their short axial length. This facilitates mounting in electronic compartments and cabinets where space is at a premium. Molded airfoil designed impellers provide high air flow at low noise levels.

Propeller Fans

Sizes: 3″ to 10.5″ diameter.
Air Delivery: 32 cfm to 1,100 cfm.
Frequency: 60 HZ – 400 HZ – Variable and DC.

Tubeaxial Fans

Sizes: 3.125″ Sq. to 12.25″ diameter round.
From 1.5″ deep to 3.75.″
Frequency: 60 HZ – 400 HZ – Variable.

Vaneaxial Fans

The vaneaxial fan is an axial flow airmover whose impeller hub is relatively large and which employs straightening vanes to recover a substantial portion of the pressure. The entire airmover – its motor, impeller and housing are a single source of responsibility. IMC features the Turbo-Slot® vaneaxial fan which produces high pressure at low speed, Mixed Flow fans which combine the space-saving advantages of the axial type fan with the desirable performance characteristics of the centrifugal fan and standard vaneaxial fans. "Hi-Slip" models for high altitude applications are available as well as many custom models to fit your specific needs.

Sizes: 1″ to 26″ diameter.
Air Delivery: 6.5 cfm to 12,000 cfm.
Frequency: 60 HZ – 400 HZ – DC and Brushless DC.
Motor driven and gear driven.

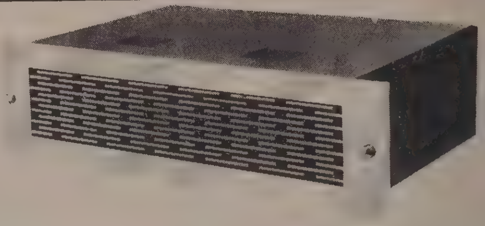
McLEAN PACKAGED COOLING EQUIPMENT



RACK—MOUNTED BLOWERS

Over 100 models available in any panel width. Heights from 3½″ to 12¼″. Airflows to 1000 CFM. Pressurize systems with cool, filtered air. Prevent dust from entering systems. Standard EIA notching. Quick, easy mounting. No cutting. No filing. Also Packaged Fans for pressurizing or evacuating. Four sizes. Airflows from 275 to 1200 CFM. All units available to Commercial, Military or EMI Shielded Specifications.

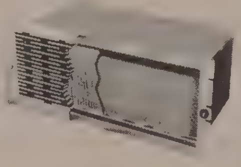
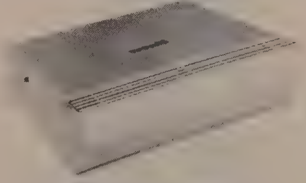
* ALL MODELS ARE 19″ WIDTH EXCEPT IDB300 (HALF PANEL) ** ALL MOTORS ARE 115V 50/60 HZ UL APPROVED
UNITS ALSO AVAILABLE TO OTHER RACK WIDTHS AND FOR RECESSED INSTALLATION



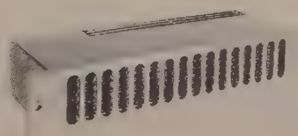
EMI—SHIELDED UNITS
All packaged blowers available with an EMI shield and wave guide media built into the airstream. Cuts signal leakage inward or outward.

HEAT EXCHANGERS
Maintain cabinet temperature at 80°F maximum with 1 KW heat dissipation. Air recirculates in rack and is cooled by exchanger in blower case.

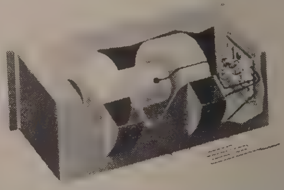
HEATER—COOLERS
For unheated field installations. Maintains an even 65°F with surrounding air as low as 10°F.



SIDEWINDER BLOWERS
More air. More pressure. Less space. Delivers 180, 350 or 550CFM in a 17″ wide airstream.



SLOT BLOWERS
Ideal for jam-packed circuitry. Delivers 150 CFM from a 3½″ panel. Quiet.



SOLID STATE TEMPERATURE CONTROLLERS
Cuts noise level. Modulates blower speed. Keeps operating between 80-90°F. Costs less than air conditioning.

Also a broad line of accessory equipment including grilles, controls, etc.

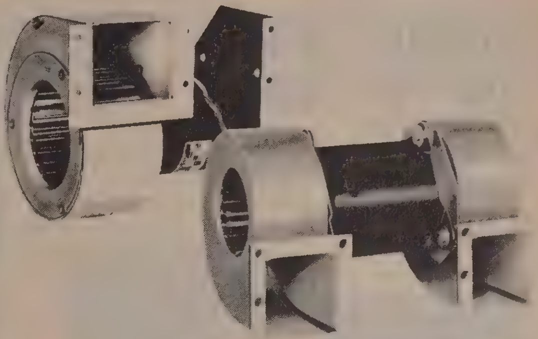
McLEAN SINGLE & DUAL CENTRIFUGAL BLOWERS

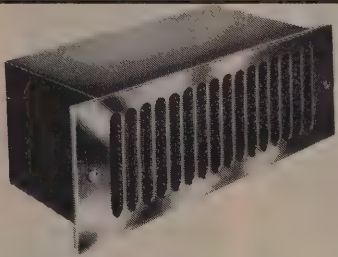
Fans—Orifice, Panel, Reversible, Filter Grille Panels

SINGLE & DUAL CENTRIFUGALS

Wide choice of static pressures — 0″ to 3.0″. Outputs range up to 2000 CFM. Wheel diameters range from 3″ to 12″. Motors supplied to any AC frequency or power, single or three-phase. Bearings properly loaded, double-shielded, permanently lubricated. Motors and wheels precision balanced for vibration-free performance. Motors, UL approved.

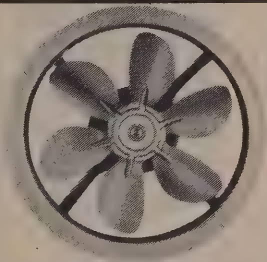
NEW!
VANGUARD SERIES





PACKAGED PROPELLER FANS

Low cost fans for use where static pressure requirements are minimal. Panel height, 7″. Units operate at 115V/60/50 Hz.



ORIFICE MOUNTED FANS

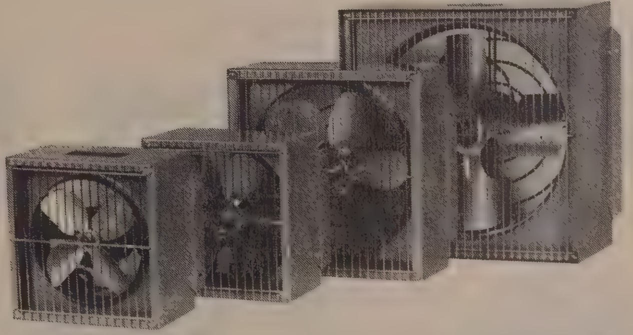
Push or pull airflow. CFMs 275, 300 or 395. Dim. 4″ x 8½″ or 4¾″ x 10¼″. Quiet, vibrationless 115V/50/60 Hz, 1600 RPM, or 3000 RPM.

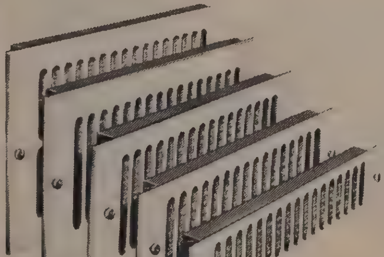
PANEL MOUNTED FANS

Low cost, long life, ready to mount, shaft in any position. 265 CFM, 3100 RPM, 115V/50/60 Hz. Dim. 9″ square panel on 7″ centers, 4$\frac{23}{32}$″ deep.

REVERSIBLE FILTER BOX PROPELLER FANS

MODEL 1RB65 delivers 275 cfm, 3100 rpm 4½″ deep x 8⅞″ square. MODEL 1RB80 delivers 450 cfm, 1650 rpm 4½″ deep x 8⅞″ square. MODEL 1RB100 delivers 725 cfm, 1600 rpm 4½″ deep x 12⅛″ square. MODEL 1RB120 delivers 1200 cfm, 1450 rpm 7⅜″ deep x 15⅛″ square. MODEL LA120 Back Draft Damper is used in conjunction with Model 1RB120. Louvers automatically open when power is applied and close when power is off. May be used in horizontal or vertical positions.





FILTER GRILLE ASSEMBLIES

For use in cabinets where louvered area is needed for ventilation. Supplied complete with dust filters and in panel heights of 3½″ to 10½″ and widths 9½″, 19″, 24″ and 30″.

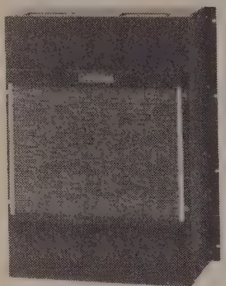
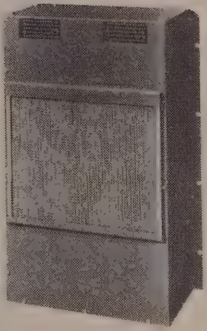
McLEAN MIDWEST AIR CONDITIONERS
For Electronics & Computer-Controlled Machine Tool Systems

SLIMBOY® SERIES 1200 TO 12000 BTU/HR

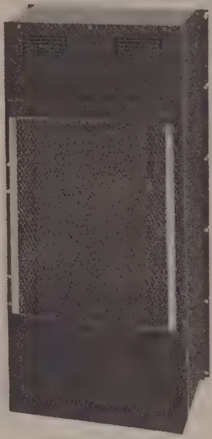
Cool & protect electronic control systems operating in harsh factory settings. "Closed-Loop" design constantly cools and recirculates internal cabinet air locking out heat, moisture & airborne particulates. Components are cooled by clean air only. Continuous duty to 20,000 hours assured at ambients to 125°F. Units mount quickly & easily. Available in 115V/50-60HZ, 115V/60HZ, 230V/50HZ and 230V/60HZ. Send for Condensed Catalog No. 8118 or specific folders indicated below.



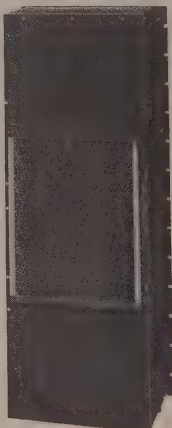
SLIMBOY® 24 SERIES
Capacity: 1400-2000-3000 BTU/HR. Reliable cooling for medium range use. Can be door, side or rack-mounted. 24″ high, 9⅛″ deep, 19″ wide. Specify Catalog Folder 8121.



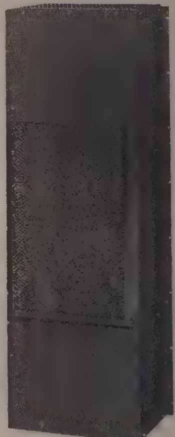
28 SERIES SLIMBOY®
Capacity: 2000-3000-4000 BTU/HR. Effective cooling in a 28½″ high package that can be door-mounted, side-mounted or rack-mounted. 28½″ high, 9⅛″-deep, 19″ wide. Specify Catalog Folder 8102.



36 SERIES SLIMBOY®
Capacity: 4000-5000-6000 BTU/HR. Large capacity cooling in a 36 11/16″ high package that can be door-mounted, side-mounted or rack-mounted. 36 11/16″ high, 10″ deep, 19″ wide. Specify Catalog Folder 8103.



47 SERIES SLIMBOY®
Capacity: 4000-5000-6000 BTU/HR. Fully interchangeable mounting with competitive models; a 47¼″ high package for door-mounting, side-mounting or rack-mounting. 47¼″ high, 10″ deep, 19″ wide. Specify Catalog Folder 8104.



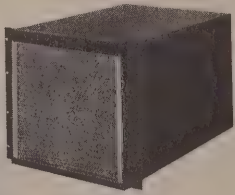
52 SERIES SLIMBOY®
Capacity: 5000-6000-7000-8000-9000-10000-12000 BTU/HR. Maximum range of capacities in a unit for door-mounting, side-mounting or rack-mounting. 52⅝″ high, 9½″ deep, 19″ wide. Specify Catalog Folder 8105.

MICRO-MINI SLIMBOY®, HIBOY® & LOBOY® SERIES

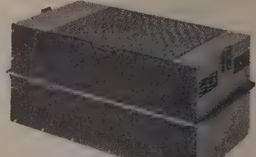
MICRO-MINI SLIMBOY® 13 SERIES

Capacity: 1200 BTU/HR @ 110°F. The 14⅛″ width of the MICRO-MINI SLIMBOY® makes it an ideal unit for mounting on enclosures that are only 18″ deep. 12⅞″ high, 6¼″ deep, 14⅛″ wide. Specify Catalog Folder 8101.

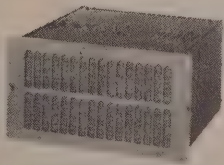
HIBOY® 11 SERIES
Capacity: 2000-3000-4000 BTU/HR. Unit can be rack-mounted inside the enclosure at the top or mounted outside the enclosure on the top surface. 10 15/32″ high, 19⅝″ deep, 19″ wide. Specify Catalog Folder 8106.



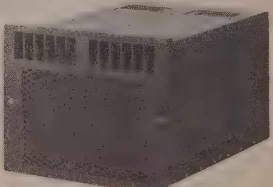
HIBOY® 16 SERIES
Capacity: 5000-6000-7000 BTU/HR. High capacity cooling for enclosures requiring inside or outside top-mounting installation. 15 23/32″ high, 24″ deep, 19″ wide. Specify Catalog Folder 8107.



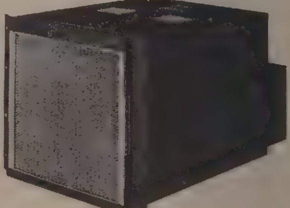
HIBOY® 30 SERIES
Capacity: 4000-5000-6000 BTU/HR. Large capacity package for mounting on top of the enclosure, partially recessed. Special models also available for mounting on the top surface of the cabinet. 14″ high, 31⅜″ long, 16⅜″ wide. Specify Catalog Folder 8108.



LOBOY® 11 SERIES
Capacity: 2000-3000-4000 BTU/HR. Package for rack-mounting inside the enclosure near the bottom. 10 15/32″ high, 19⅝″ deep, 19″ wide. Specify Catalog Folder 8109.



LOBOY® 14 SERIES
Capacity: 4000, 5000, 6000, 7000 BTU/HR. Mounts at or near bottom of enclosure. Cool air blows up. 14¾″ high, 24 11/16″ deep, 19″ wide. Specify Catalog Folder 8120.



LOBOY® 16 SERIES
Capacity: 5000-6000-7000 BTU/HR. High capacity package for mounting inside the enclosure near the bottom. 15 23/32″ high, 24″ deep, 19″ wide. Specify Catalog Folder 8110.

McLEAN MIDWEST AIR-TO-AIR HEAT EXCHANGERS

For Electronics & Computer-Controlled Machine Tool Systems

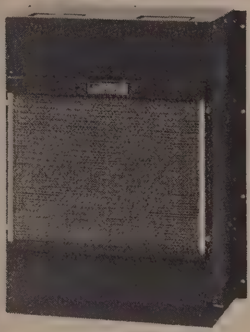
McLean Heat Exchangers will remove up to 1000 watts of heat load from a sealed enclosure with only a 30°F temperature differential above the ambient, at a maximum ambient temperature of 125°F.

Heat Exchangers differ from air conditioners in that they can not cool the enclosure below the ambient temperature. But where the ambient air is not excessively hot or moisture-laden, and where the electronic controls can operate in an enclosure temperature slightly above the ambient, it's possible that a McLean Heat Exchanger can be used to transfer heat from inside the electronic enclosure to the outside atmosphere.

McLean Heat Exchangers employ the same closed loop design that's used in the McLean air conditioners. Hostile ambient air is sealed out of the cabinet. Clean air from the enclosure itself is continuously cooled and recirculated.

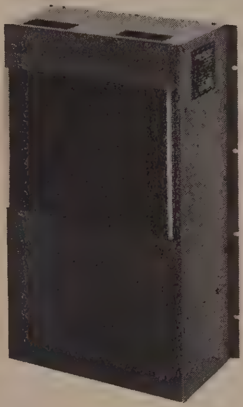
Full line of package configurations for door-mounting, side-mounting, rack-mounting and top-mounting. Operating temperature range: 0°F to 125°F. Special coating for heat pipe cores available when units are required to operate in corrosive environments.

See our catalog in
THOMCAT



HE-24 SERIES

For door-, side-, or rack-mounting. 24″ high, 9⅛″ deep, 19″ wide. Specify Catalog Folder 8122.

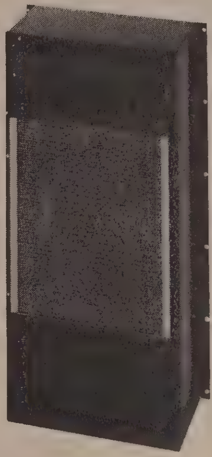


HE-28 SERIES

Unit can be door-mounted, side-mounted or rack-mounted. 28½″ high, 8⅝″ deep, 19″ wide. Specify Catalog Folder 8111.

HE-33 SERIES

Narrow width makes it ideal for shallow enclosures. Can be door-, or side-mounted. 34¼″ high, 9″ deep, 13¾″ wide. Specify Catalog Folder 8123.



HE-36 SERIES

For door-mounting, side-mounting or rack-mounting. 36 11/16″ high, 8⅝″ deep, 19″ wide. Specify Catalog Folder 8112.

HE-47 SERIES

Package can be door-mounted, side-mounted or rack-mounted. 47⅛″ high, 8⅝″ deep, 19″ wide. Specify Catalog Folder 8113.

◀HE-52 SERIES

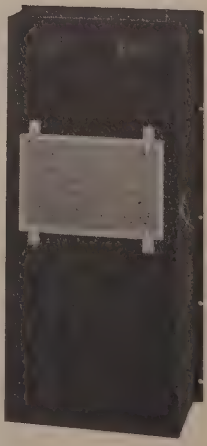
For mounting on door, side or rack. 52 9/16″ high, 9½″ deep, 19″ wide. Specify Catalog Folder 8114.

HE-30 SERIES

For mounting on top of the enclosure, partially recessed. Special models also available for mounting on the top surface of the cabinet. 16¾″ high, 31⅜″ deep, 16⅜″ wide. Specify Catalog Folder 8115.

◀HP-3600 SERIES

For mounting on door, side or rack. 36¾″ high, 7″ deep, 19″ wide. Specify Catalog Folder 8116.



HP-3800 ▶ SERIES

For mounting on door, side or rack. 38⅛″ high, 8″ deep, 19″ wide. Specify Catalog Folder 8117.

SOLID STATE COOLING WITH THERMOELECTRICS

Thermoelectric (Peltier) Heat Pump Module Specifications

Thermocouples constructed of N & P elements of highest grade bismuth telluride in form of oriented polycrystalline ingots. Ingot ends soldered to copper bus bars interfaced with ceramic plates, affording good mechanical integrity, high dielectric strength and thermal conduction. Temperature range, −150°C to +110°C. Solid state construction. Both hot and cold faces lapped flat, TYPE L. Both faces metallized and tinned, TYPE TT. Hybrid, hot face tinned, cold face lapped, TYPE TL.

SOLID STATE COOLING WITH THERMOELECTRICS

How to Use Universal Performance Graphs

Example: Convert universal scale values of Q_C/ GxN, V/N and I = 50G for Module Number CP1.4-127-06 L.

CP1.4-127-06 L

Hot and Cold Faces Lapped Flat, Type L
.06″ Thermocouple Height
127 Thermocouples
1.4 mm x 1.4 mm Thermoelement Cross Section

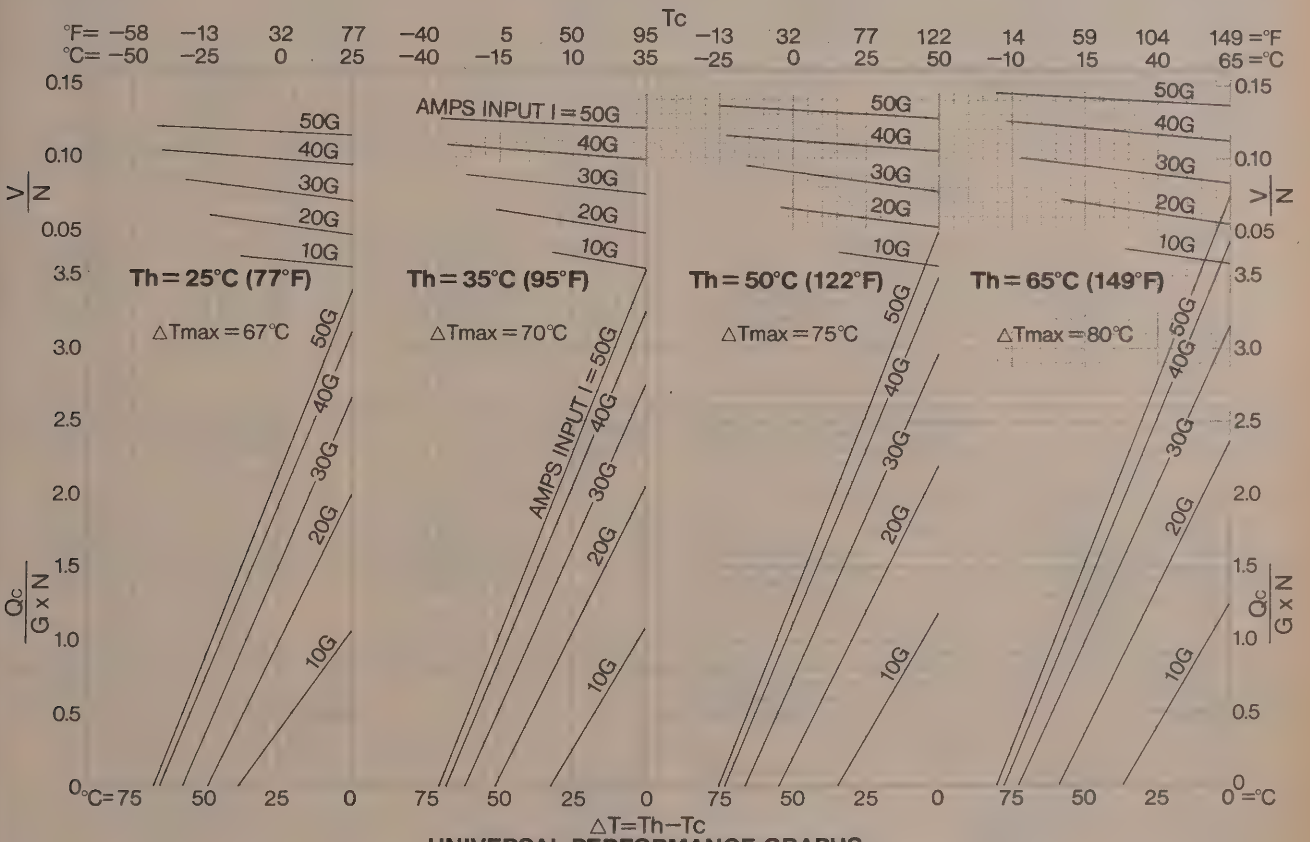
1. Obtain universal multipliers for CP1.4-127-06L from Module Specifications Chart: N = 127 (number of thermocouples)
G = 0.12
(thermoelement geometry factor)
G x N = 15.24

2. Calculate amps input Imax = 50G = 50 x 0.12 = 6.0 amps. Also identify I = 40G = 40 x 0.12 = 4.8 amps, etc. Note: Imax values are also listed in Module Specifications Table.

3. Convert Q_C/GxN scale values to Q_C = Watts Heat Pumped values: Q_C = Q_C/GxN x GxN. Example: from universal scale, Q_C/GxN = 3, then Q_C = 3 x 15.24 = 45.72

4. Convert V/N scale values to V = Volts Input values: V = V/N x N. Example: from universal scale, V/N = 0.09, then V = 0.09 x 127 = 11.4 x 3.

5. From graphs, determine Input Current (I) and Heat Pumped Rating (Q_C) for CP1.4-127-06L, operating at Input Voltage V = 12, Tc = 5°C, Th = 35°C; ΔT = Th − Tc = 35 − 5 = 30°C. From V vs. Tc (upper) graphs, Th = 35°C panel, locate I = 4.3 amps (36G) at V = 12, Tc = 5. Drop down vertically on Tc = 5°C/ΔT = 30°C abscissa to point corresponding to I = 4.3 amps. Read Q_C = 25.1 watts (Q_C/GxN = 1.65) heat pumped.

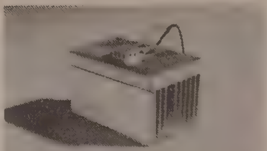


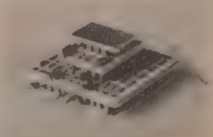
UNIVERSAL PERFORMANCE GRAPHS

Tc = Cold Face Temperature; Th = Hot Face Temperature; I = Module Current, Amps; V = Module Voltage, Volts; Qc = Watts Heat Pumped; N = Number of Thermocouples; G = Thermoelement Geometry Factor

Special Heat Pump Assemblies

Special assemblies are available in O.E.M. quantities, designed to customer requirements using heat exchangers furnished by customer or by Melcor. Multi-stage cascades also available in standard and custom configuration, with temperatures to −95°C (6 stage). Ceramic construction with solder interfacing between stages.





MINIATURE FANS DC

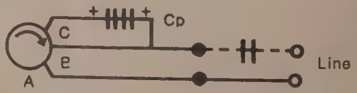
† Electrolytic Caps ** For clockwise impeller rotation. Reverse leads and C for CCW rotation.

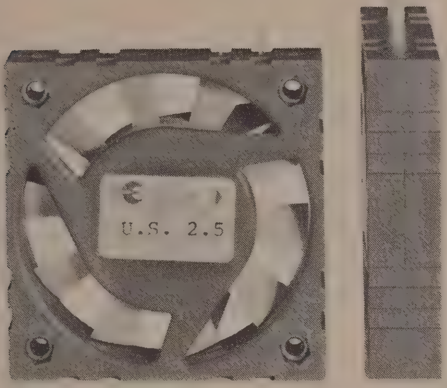


* Line capacitors can be utilized to operate any fan off 115 or 220 volt sources.

micronel SYCAMORE RESEARCH CENTER, 2142F INDUSTRIAL COURT, VISTA, CA 92083 (619) 727-7400

SPECIAL MINIATURE FANS

BRUSHLESS DC FANS

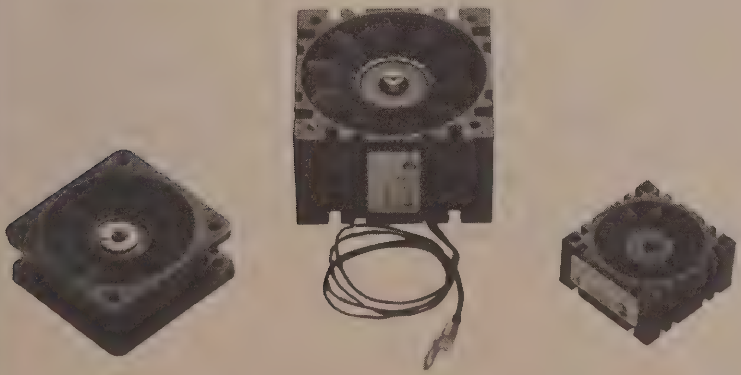


FEATURES
- Ultra Thin Design - 0.55″
- High performance - up to 20 CFM
- Low noise ≤20 DBA
- Long life ≥20,000 hrs.
- Low EMI/RFI
- Polarity protected

HIGH TEMPERATURE FANS

FEATURES
- Operational temp. to 85°C
- High performance - up to 50 CFM
- Long life ≥12,000 hrs.
- Variable speed
- Bi-directional
- Temperature controlled

TEMPERATURE CONTROLLED FANS



FEATURES
- CFM proportional to cooling needs
- Low noise ≥10 DBA
- Air volume - 3 CFM to 50 CFM
- Small dia. - 1″ and larger
- Long life - up to 20,000 hrs.
- Low power - 0.25W - up

MICRONEL's broad experience and technical expertise in development and design of high performance precision motors and assemblies has been utilized to develop the product shown herein. Our appreciation of the customer's system performance requirements, thermal constraints, mechanical interfaces, and cost factors allow MICRONEL U.S. to offer unique solutions to your problems. TRY US!

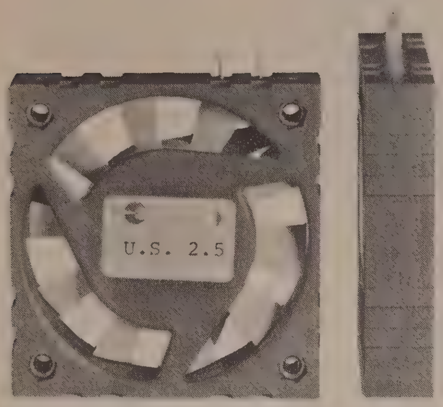
MINIATURE BRUSHLESS DC/AC FANS

ULTRA-SLIM SERIES



"Actual Size"
Model US 2.5

NEW!

MICRONEL'S* NEW US SERIES

fans utilize an aerodynamically optimized impeller driven by an unique brushless D.C. motor. The high reliability electronic drive circuitry contain provisions for thermally controlling fan C.F.M. output. The series can also be operated on AC line voltages of 5V, 12V, 115V and 220V.

* Patent Pending

The US Series is currently available in the following sizes:

	MODEL US 2.5	MODEL US 3.1†	MODEL US 4.1†
Size	2.45 x 2.45 x 0.55	3.15 x 3.15 x 0.55	4.13 x 4.13 x 0.55
Air Volume	10 CFM	30	80

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

PAMOTOR SOLID STATE BRUSHLESS DC FANS

THE ONLY COMPANY OFFERING YOU A FULL FAMILY OF SOLID STATE, BRUSHLESS DC FANS IN POPULAR FRAME SIZES & VOLTAGES, & AT POPULAR PRICES.

PAMOTOR has a full line of self-contained, solid state, brushless DC fans for you to choose from. Through their design, these fans have been engineered to tackle those specialized applications which require highly reliable DC performance. Common uses include mobile radio equipment, medical electronics, shipboard computers, airborne applications, communications systems, automotive applications, marine use and telecommunications; wherever DC voltage is normally available. They are also finding wide acceptance for use in power stand-by modes to prevent memory loss in the event of AC power failure.

These fans are especially efficient and will outperform similar sized fans at normal operating back pressure. Typically, they offer greater air volume (cfm), reduced noise levels and reduced power drain. For example, the power drain at maximum back pressure is approximately 25% of that required in conventional AC units. These fans also achieve a new low in magnetic radiation and RF noise, thereby assuring the pure signals necessary for critical airborne or shipboard use.

These fans work well at all rated voltages, and are extremely quiet. They can be adjusted for performance and noise level by altering the voltage within the voltage range for your particular application. They feature a brushless motor with all electronics mounted on a PC card within the motor frame. Drive amplifiers for the motor are controlled by a patented Hall-effect generator circuit which is coupled by small pole pieces to the motor's field magnet (Patent No. 3-873-897). Available voltages include 5 VDC nominal, 12 VDC nominal, 24 VDC nominal and 48 VDC nominal.

The brushless DC motor is polarity protected* to avoid accidental damage and costly down time. If the input polarity is accidentally reversed, integral diodes block all circuits and the motor simply stops. Even in a locked rotor condition,* the motor goes into a neutral state to avoid damage. Precision bearings and lubricants help to achieve a life expectancy of 35,000 hours (sleeve bearing) and 60,000 hours (ball bearing) at maximum permissible ambient temperature. Note: If the ambient temperature in which the fan operates is at 20° C below the above levels the life expectancy increases by 10,000 hours.

These fans do not require an external voltage inverter. This means that you save valuable mounting space and weight because the only consideration in mounting is the fan itself. This new concept has eliminated many of the inherent reliability and RF noise problems generally associated with using AC motors in a DC environment.

DC Fans Quick Selection Guide

Model	Voltage Range	Airflow Range	Nominal Input Power (zero static pressure)	Frame Size
	VDC	cfm	Watts	inches
812	6-15	11-29	3.0	2-1/2 sq. x 1 D
814	12-30	11-29	3.0	
3124F	18-30	33-57	2.5	3-5/8 sq. x 1 D
4105GX	4.5-5.5	82-100	4.0	4-11/16 sq. x 1-1/2 D
4112X	9.5-14	82-122	4.0	
4112GX	8-16	60-120	4.3	
4112KX	8-14.5	75-125	6.0

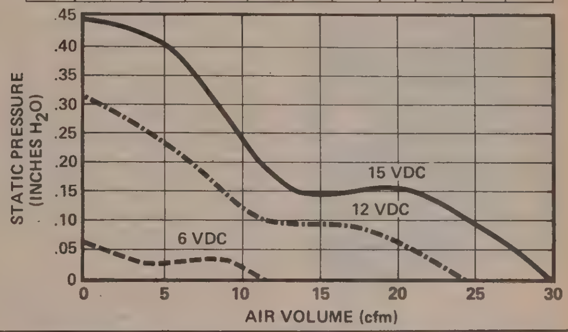
770 AIRPORT BOULEVARD, BURLINGAME, CALIFORNIA 94010 • TEL (415) 347-1203 • TWX 910-374-2353

Model 812 DC Fan

Size: 2-1/2″ Square x 1″ Deep
Advantages: High performance, solid state integral electronics, no external inverter required, sub-miniature frame size, locked rotor and polarity protected.
Construction: Venturi and impeller are glass fiber reinforced plastic, brushless electronic motor, 12″ leads.
Life Expectancy: 60,000 hours at 65° C.
Max. Operating Temp.: +65° C.
Safety Codes: Conforms to UL, CSA, VDE and IEC standards.

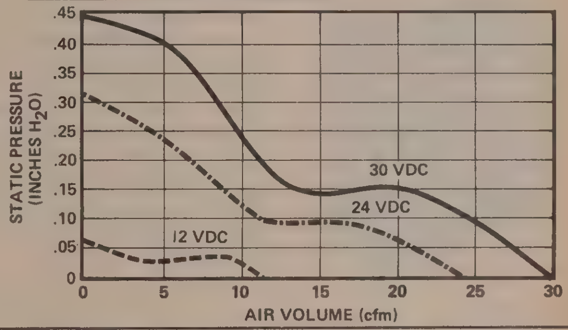
Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (dc)	Input Current	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
812		X	6-15 12 nominal	250 mA @ free air	3 W @ free air	23	5300	3	40	28



Model 814 DC Fan

Size: 2-1/2″ Square x 1″ Deep
Advantages: High performance, solid state integral electronics, no external inverter required, sub-miniature frame size, locked rotor and polarity protected.
Construction: Venturi and impeller are glass fiber reinforced plastic, brushless electronic motor, 12″ leads.
Life Expectancy: 60,000 hours at 65° C.
Max. Operating Temp.: +65° C.
Safety Codes: Conforms to UL, CSA, VDE and IEC standards.

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (dc)	Input Current	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
814		X	12-30 24 nominal	125 mA @ free air	3 W @ free air	23	5300	3	40	28

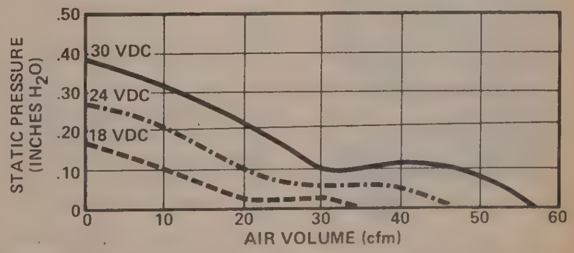


Model 3124F DC Fan

Size: 3-5/8″ Square x 1″ Deep
Advantages: Extra slim profile, solid state integral electronics, no external inverter required, locked rotor and polarity protected.
Construction: All-metal, brushless electronic motor, terminal block.
Life Expectancy: 60,000 hours at 65° C.
Max. Operating Temp.: +65° C.
Safety Codes: Conforms to UL, CSA, VDE and IEC standards.

Fan accessories are available.

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (dc)	Input Current	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
3124F		X	18-30 24 nominal	103 mA @ free air	2.5 W @ free air	45	3000	14	40	30



Model 4105GX DC Fan

Size: 4-11/16″ Square x 1-1/2″ Deep
Advantages: Solid state integral electronics, no external inverter required, low input power, high airflow.
Construction: Aluminum alloy venturi, glass fiber reinforced plastic impeller, brushless electronic motor, terminal block.
Life Expectancy: 35,000 hours at 65° C.
Max. Operating Temp.: +65° C.
Safety Codes: Conforms to UL, CSA, VDE and IEC standards.

Fan accessories are available.

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (dc)	Input Current	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level

Cooling Devices Product Manual

PAMOTOR announces the availability of their all new product manual.

Detailed, yet easy to read, the manual contains all information needed to select the correct fan or blower for specific requirements.

Application notes, helpful hints - what to look for, what to avoid - product specifications, they are all here, between common covers. For a free copy please send request on letterhead to PAMOTOR, 770 Airport Blvd., Burlingame, CA 94010, Attn: Marketing Dept.

Fans & Blowers

PAMOTOR
ONE OF THE PURDY GROUP OF COMPANIES

PAMOTOR AC FANS

Field proven, quality products you can rely upon for all of your cooling requirements.

PAMOTOR offers a wide variety of fans for your selection. Each model combines the features of extended life with high airflow delivery at low noise levels.

Lightweight all-metal construction is typical of PAMOTOR AC fans. This all-metal construction eliminates breakage and warping often found in conventional plastic fans. This all-metal feature also permits the entire fan to function as a natural heat sink, assuring cooler operation by effectively transferring heat from the rotor into the air stream via the impeller blades. Potential injurious heat is also transferred from the stator to the die-cast venturi by way of the metal struts. Life expectancy: (1) AC fans with sleeve bearings - 20,000 hours at maximum permissible ambient temperatures. (2) AC fans with ball bearings - 20,000 hours at 72° C or at the maximum permissible temperature if this is less than 72° C. Note: If the ambient temperature in which the fan operates is at 20° C below the above levels the life expectancy increases by 10,000 hours.

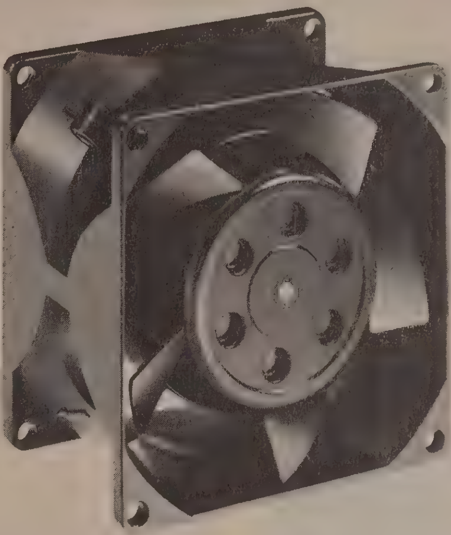
The PAMOTOR exclusive bearing lubrication system incorporates hand-fitted broached sintered iron sleeve bearings on most fans, with precision high-temperature ball bearing versions also available. The dual sleeve bearings are separated by a large oil felt reservoir, which provides continuous fault free circulation of a special lubricant to the shaft and bearing surface.

An efficient, powerful inside-out motor, housed entirely within the impeller hub to conserve axial depth, has higher torque capabilities and a lower internal heat rise than the contemporary fixed shaft designs.

The impeller blades are computer designed and impulse welded to the precision hub and dynamically balanced to within .0001 inches in each end plane to minimize acoustical and mechanical vibrations.

PAMOTOR also offers a super premium grade fan; the PENTAFLOW series (5 year warranty).

Perhaps the two most important fields of application for PENTAFLOW fans are: (1) in limited-production deluxe equipment, in professional-grade instrumentation, in few-of-a-kind, custom-designed and permanently-installed systems requiring optimum performance and absolute dependability for many years; and (2) as field replacements for retrofit units for original-equipment fans that have proven to be unreliable, are too noisy, or do not produce sufficient cooling airflow.



PAMOTOR fans are Underwriters' Laboratories, Inc. recognized and have their Yellow Card Component Recognition Number E41168. Many are CSA certified and VDE approved.

AC Fans Quick Selection Guide

Model	Operating Voltage VAC	Frequency Hz	Airflow cfm	Frame Size inches
Shaded Pole Fans				
2500S	115	50/60	115	4-1/2 sq. x 2 D
2550S	230	50/60	115	
4600X	115	50/60	120	4-11/16 sq. x 1-1/2 D
4600XP	115	50/60	120

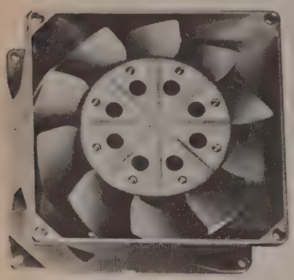
ONE OF THE PURDY GROUP OF COMPANIES

770 AIRPORT BOULEVARD, BURLINGAME, CALIFORNIA 94010 • TEL (415) 347-1203 • TWX 910-374-2353

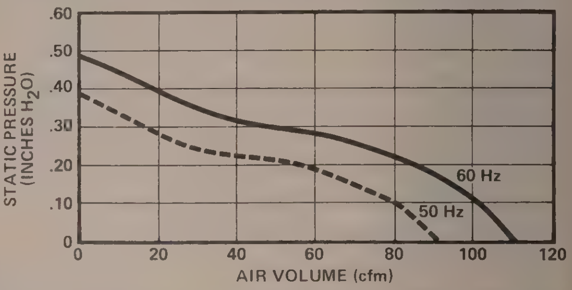
2500 Series Shaded Pole Fans

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
2500S	X		115	50/60	27 W	115	3300	32	59	42
2550S	X		230	50/60	27 W	115	3300	32	59	42



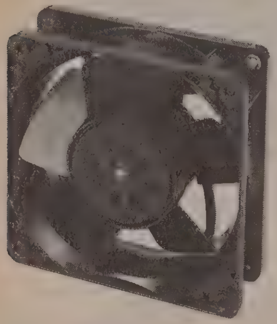
Size: 4-1/2″ Square x 2″ Deep
Advantages: Powerful, high cooling capacity.
Construction: All-metal, shaded-pole motor, 12″ leads (2550S, 6″ Leads).
Max. Operating Temp.: +55° C @ 115 VAC/60 Hz or 230 VAC/60 Hz.
Safety Codes: UL recognized, Yellow Card E41168. CSA certified. Also conforms to VDE and IEC standards.

Fan accessories are available.



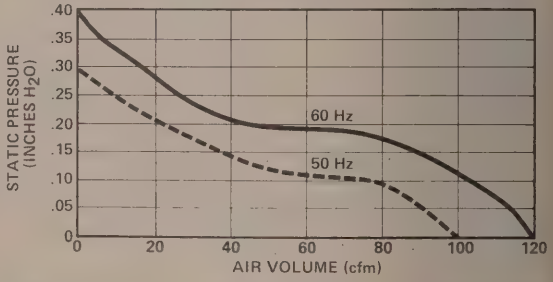
4600X Series Shaded Pole Fans

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
4600X	X		115	50/60	18 W	120	3100	20	50	40
4606X*		X	115	50/60	17.5 W	120	3170	20	51	41
4650X	X		230	50/60	17 W	120	3100	20	50	40
4656X*		X	230	50/60	17 W	120	3150	20	51	41



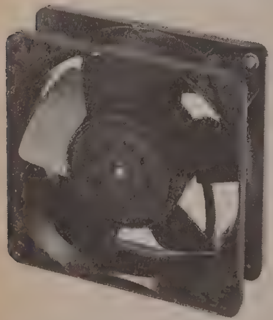
Size: 4-11/16″ Square x 1-1/2″ Deep
Advantages: High airflow at maximum back pressure.
Construction: All-metal, shaded-pole motor, terminal block.
Max. Operating Temp.: +65° C (*+85° C) @ 115 VAC/60 Hz or 230 VAC/60 Hz.
Safety Codes: UL recognized, Yellow Card E41168. CSA certified and VDE approved. Also conforms to IEC standards.

Fan accessories are available.



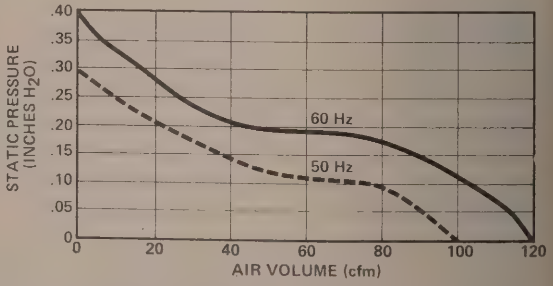
4600XP Pentaflow™ Premium Fan

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
4600XP	X		115	50/60	18 W	120	3100	20	50	40



Size: 4-11/16″ Square x 1-1/2″ Deep
Advantages: High airflow at maximum back pressures, 5 year warranty.
Construction: All-metal, shaded-pole motor, terminal block.
Max. Operating Temp.: +65° C @ 115 VAC/60 Hz.
Safety Codes: UL recognized, Yellow Card E41168. CSA certified and VDE approved. Also conforms to IEC standards.

Fan accessories are available.



4800X Series Shaded Pole Fans

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
4800X	X		115	50/60	9.5 W	70	2000	19	32	23
4850X	X		230	50/60	9.5 W	70	1800	19	32	23

Size: 4-11/16″ Square x 1-1/2″ Deep
Advantages: The quietest of fans in this size.
Construction: All-metal, shaded-pole motor, terminal block.
Max. Operating Temp.: +80° C @ 115 VAC/60 Hz or 230 VAC/60 Hz.
Safety Codes. UL recognized, Yellow Card E41168. CSA certified and VDE approved. Also conforms to IEC standards.

Fan accessories are available.

									dB (A)	dB (SIL)
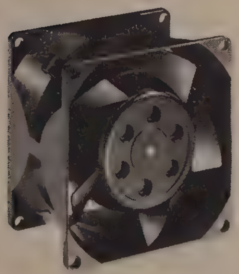
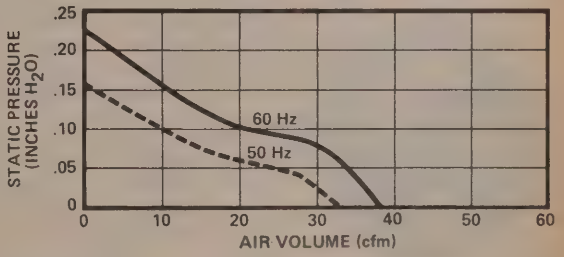
8500DP	X		115	50/60	12 W	40	3250	17	35	27



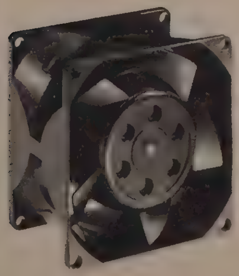
Size: 3-1/8" Square x 1-1/2" Deep
Advantages: Compact, high airflow, low noise, 5 year warranty.
Construction: All-metal shaded-pole motor, 12" leads.
Max. Operating Temp.: +70° C @ 115 VAC/ 60 Hz.
Safety Codes: UL recognized, Yellow Card E41168. CSA certified and VDE approved. Also conforms to IEC standards.

Fan accessories are available.



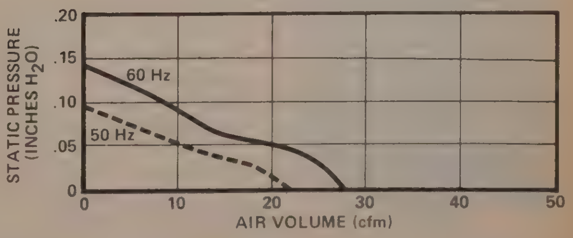
8800 Series Shaded Pole Fans

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
8800D	X		115	50/60	12.5 W	27	2550	17	30	21
8850D	X		230	50/60	13 W	27	2550	17	30	21



Size: 3-1/8" Square x 1-1/2" Deep
Advantages: Compact, very low noise.
Construction: All-metal, shaded-pole motor, 17" leads.
Max. Operating Temp.: +70° C @ 115 VAC/60 Hz or 230 VAC/60 Hz.
Safety Codes: UL recognized, Yellow Card E41168. CSA certified and VDE approved. Also conforms to IEC standards.

Fan accessories are available.



Fans & Blowers

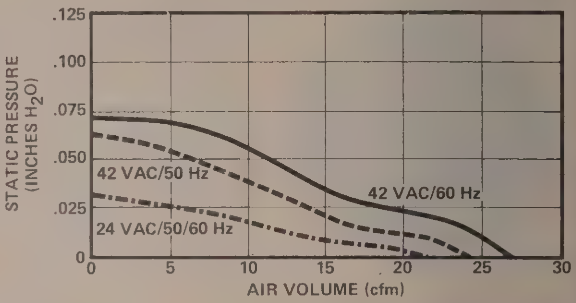
PAMOTOR
ONE OF THE PURDY GROUP OF COMPANIES

770 AIRPORT BOULEVARD, BURLINGAME, CALIFORNIA 94010 • TEL (415) 347-1203 • TWX 910-374-2353

Model 900 Induction Fan

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
900	X		24-42	50/60	2.3 W	20	1700	5	22	15

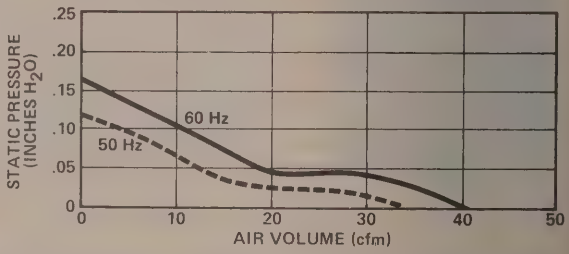
Size: 3-1/8″ Diameter x 1-1/2″ Deep
Advantages: Compact - little mounting space required, very quiet, extremely low stray field, axial and radial air entry.
Construction: Special Trogamid-T, induction motor, 6″ leads.
Max. Operating Temp.: +85° C @ 24 VAC/60 Hz, and +55° C @ 42 VAC/60 Hz.
Safety Codes: UL recognized, Yellow Card E41168 and VDE approved. CSA certified models are available upon request. Conforms to IEC standards.
Capacitor Required: 5.6 mfd.



Model 950 Induction Fan

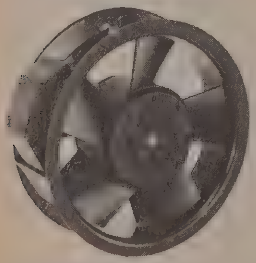
Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
950	X		24	50/60	6.5 W	40	3550	5	40	31

Size: 3″ Diameter x 1-1/2″ Deep
Advantages: Very efficient, quiet, small frame.
Construction: Polyamide, 5″ leads.
Max. Operating Temp.: +70° C @ 24 VAC/60 Hz.
Safety Codes: UL recognized, Yellow Card E41168 and VDE approved. CSA certified models are available upon request. Conforms to IEC standards.
Capacitor Required: 15 mfd.



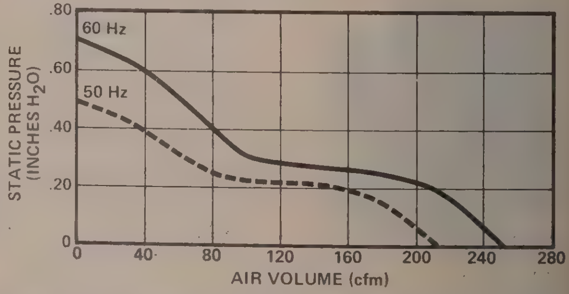
6008S Series Split Capacitor Fans

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
6008S		X	115	50/60	26.5 W	250	3400	38	54	45
6058S		X	230	50/60	26 W	250	3400	38	54	45



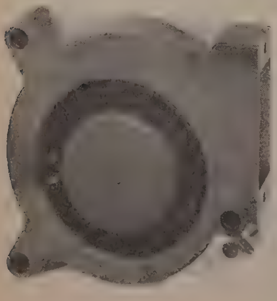
Size: 6-3/4″ Diameter x 2″ Deep
Advantages: High airflow, low noise, capacitor furnished with fan.
Construction: Aluminum alloy housing, glass filled polyphenylene oxide impeller, efficient split capacitor motor, terminal block.
Max. Operating Temp.: +80° C @ 115 VAC/60 Hz or 230 VAC/60 Hz.
Safety Codes: UL recognized, Yellow Card E41168. CSA certified. Also conforms to VDE and IEC standards.

Fan accessories are available.



RL90-18/00 Radial Blower

Model Number	Sintered Iron Sleeve	Ball Bearing	Voltage (ac)	Frequency (Hz)	Input Power	Airflow (cfm)	Speed (rpm)	Weight (ounces)	Noise Level	
									dB (A)	dB (SIL)
RL90-18/00	X		115	50/60	20 W	25	2730	23	56	45



Size: 4-3/4″ Square x 1-1/2″ Deep
Advantages: High concentrated airflow at maximum pressures, low acoustical disturbance, perfect for spot cooling.
Construction: Polycarbonate housing, polyamide wheel, shaded-pole motor, 12″ leads.
Max. Operating Temp.: +55° C @ 115 VAC/60 Hz.
Safety Codes: UL recognized, Yellow Card E41168. VDE approved. Conforms to CSA and IEC standards.

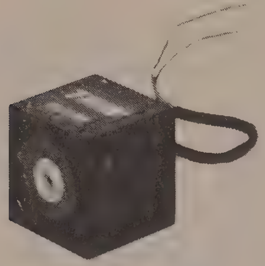
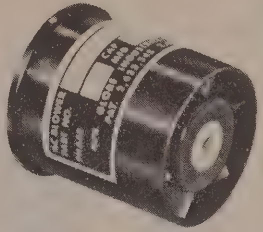
Fans and Blowers

TRW offers a wide range of a.c. and d.c. fans and blowers for every cooling need. Many standard models are stocked for 48 hour delivery. And because TRW is the largest precision motor source, we can move fast to provide engineered specials in prototype or production quantities. Check your needs below. Hundreds of other units are available.

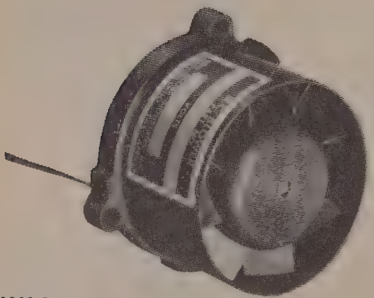


VAX-1
1″^{3} BLOWER, 1″^{3} VANEAXIAL A.C. delivers up to 6 cfm @ 0.7″ H_2O; 26 v.a.c.; single phase, 400 Hz. 1.5 oz. 1000 hrs. min. @ 85°C.



VAX-1
1⅛″ VANEAXIAL A.C. or D.C. VAX-1-AC delivers 10 cfm @ .6″ H_2O. 26 v.a.c., single phase, 400 Hz. 1.5 oz. VAX-1-DC delivers 8.5 cfm @ .5″ H_2O. 26 v.d.c. 1.4 oz.

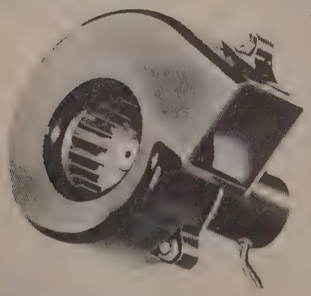
VAX-1.5
1¾″ VANEAXIAL A.C. or D.C. VAX-1.5-AC delivers 12.0 cfm @ 1.9″ H_2O. 115 v.a.c., single phase, 400 Hz. 4.0 oz. VAX-1.5-DC delivers 15 cfm @ 1.3″ H_2O. 27 or 50 v.d.c. 5.0 oz.



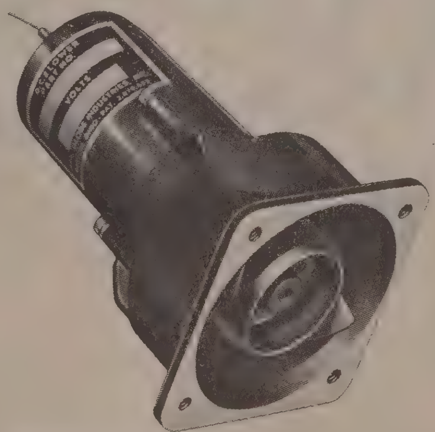
VAX-2
2″ VANEAXIAL A.C. or D.C. VAX-2 delivers 50 cfm @ 2.1″ H_2O; 115 or 200 v.a.c., 1 or 3 phase; 60 or 400 Hz; 6 oz. VAX-2 D.C. delivers 37 cfm @ 1.5″ H_2O; 26 v.d.c.; 5 oz.

VAX-3
3″ VANEAXIAL. Four types A.C. and D.C. deliver 85 to 165 cfm at 0″ H_2O. 115 and 200 v.a.c.; 12 and 28 v.d.c. 14 to 17 oz.

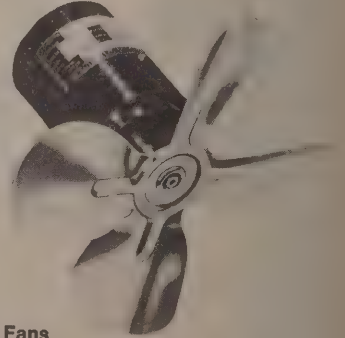
VAX-4-FC
4″ HIGH ALTITUDE VANEAXIAL A.C. delivers 170 cfm @ 0″ H_2O, 140 cfm @ 2.1″ H_2O at 25,000 ft. or 95 cfm @ 2.5″ H_2O at sea level. 200 v.a.c., 3-phase, 400 Hz. 2 lbs.



Centrifugal Blowers
1″ to 2½″ impeller dia, RH or LH scroll models, A.C. or D.C.; round or rectangular outlet; up to 33 cfm @ 0″ H_2O 115 v.a.c., 60 or 400 Hz; 27 v.d.c.; 4 to 13 oz. CW or CCW rotation.



Tubeaxial Blowers
Tubeaxial blowers deliver up to 62 cfm free air, available in a.c. or d.c. 27 to 200 v.a.c. 1, 2 or 3-phase, 60 and 400 Hz. 4 to 70 v.d.c. 5 to 9½ oz. Airflow either direction.



Open Fans
Fifteen types, a.c. and d.c., deliver 28 to 195 cfm. Fan diameters from 2″ to 5½″. 26 v.d.c. Economical and reliable.

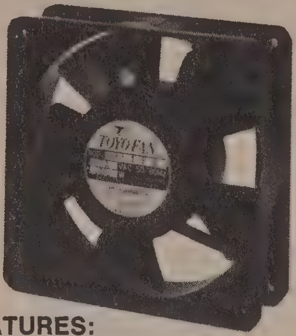
TF120 Series



FEATURES:

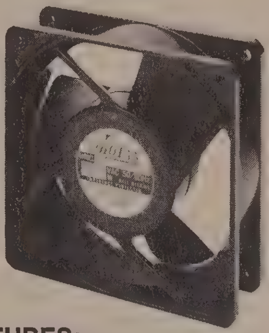
- 4.70″ sq. x 1.50″ deep (119.5mm x 38mm)
- 104 to 76 CFM free air delivery
- Choice of three speeds for various applications
- Noise rating as low as 38 dB(A) at 1.5m
- Precision ball bearings provide long service life
- Rugged die cast aluminum frame
- Choice of 115VAC or 230VAC
- Choice of terminals or wire leads
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certified — File No. LR48371
- Also available in dual voltage fan Model TF120345 Series
- **Sleeve bearing model available soon**

ULTRA THIN FAN
TF120RX Series

FEATURES:

- The thinnest axial fan available — .787″ (20mm) thick
- High performance
- Low noise level
- Precision ball bearings provide long service life
- Durable die cast aluminum frame
- Choice of 115VAC or 230VAC
- Impedance protected
- U.L. recognition and CSA certification pending

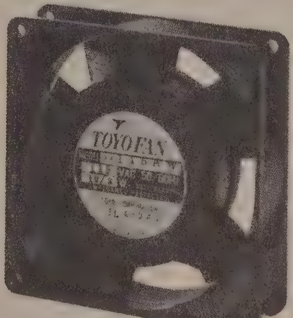
QUIET FAN
TF120U Series



FEATURES:

- Designed for low noise level applications
- Precision ball bearings provide long service life
- Durable die cast aluminum frame
- Choice of 115VAC or 230VAC
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certification pending

TF92 Series



FEATURES:

- Less than 1 inch deep
- 3.62″ sq. x .98″ deep (92mm x 25mm)
- 34 to 27 CFM free air delivery
- Choice of three speeds for various applications
- Noise rating as low as 32 dB(A) at 1.5m
- Precision ball bearings provide long service life
- Rugged die cast aluminum frame
- Choice of 115VAC or 230VAC
- Choice of terminals or wire leads
- Impedance protected
- U.L. recognized — File No. E75082
- CSA certified — File No. LR48371
- Also available in dual voltage fan Model TF92345 Series
- **Sleeve bearing model available soon**

THE THIN FAN
TF120R Series

FEATURES:

- Less than 1 inch deep
- 4.70″ x .98″ deep (119.5mm x 25mm)
- 92 to 76 CFM free air delivery
- Choice of two speeds for various applications
- Noise rating as low as 34 dB(A) at 1.5m
- Precision ball bearings provide long service life
- Rugged die cast aluminum frame.
- Choice of 115VAC or 230VAC
- Impedance protected
- U.L. recognition and CSA certification pending

ULTRA THIN FAN
TF92RX Series

FEATURES:

- The thinnest axial fan available — .787″ (20mm) thick
- High performance
- Low noise level
- Precision ball bearings provide long service life
- Durable die cast aluminum frame
- Impedance protected
- U.L. recognition and CSA certification pending

U.S. TOYO FAN CORPORATION

4915 Walnut Grove Avenue
San Gabriel, California 91776
(818) 287-5297
TWX (910) 589-1540

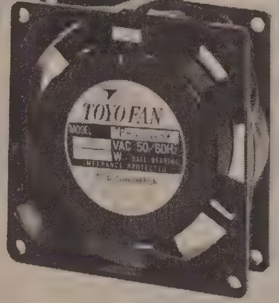
TF80 Series

TOYO FAN
MODEL
VAC 50/60Hz
W
TOYO CORPORATION

FEATURES:

- Low profile design — 3.15″ sq. x 1.50″ (80mm x 38mm)
- High performance airflow
- Low noise level
- Precision ball bearings provide long service life
- Rugged die cast aluminum frame
- Choice of 115VAC or 230VAC
- Choice of terminals or lead wires
- Impedance protected
- U.L. recognition and CSA certification pending
- Also available in dual voltage fan Model TF80345 Series
- **Sleeve bearing model available soon**

SMALL-THIN FAN
TF80R Series



FEATURES:

- Low profile design — 3$^1/_8$″ square
- Less than 1 inch thick — .984″ (25mm)
- Precision ball bearings provide long service life
- Durable die cast aluminum frame
- Choice of 115VAC or 230VAC
- Impedance protected
- U.L. recognition and CSA certification pending

SMALL-ULTRA THIN FAN
TF80RX Series

TOYO FAN
MODEL
VAC 50/60Hz
W BALL BEARING
IMPEDANCE PROTECTED

FEATURES:

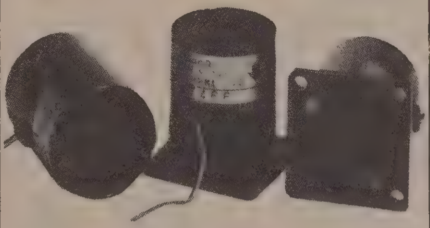
- The thinnest axial fan available — .787″ (20mm thick)
- Low profile design — 3$^1/_8$″ square
- High performance
- Low noise level
- Precision ball bearings provide long service life
- Durable die cast aluminum frame
- Choice of 115VAC or 230VAC
- Impedance protected
- U.L. recognition and CSA certification pending

DC BRUSHLESS
TFD80 Series & TFD120 Series

FEATURES:

- DC brushless motor provides low EMI/RFI interference
- Available in 12 and 24 Volt DC
- 4.70″ square x 1½″ thick TFD120 Series
- 3.15″ square x .984″ or 1.26″ thick TFD80 Series
- Precision ball bearings provide long service life
- Polarity protected
- Impedance protected

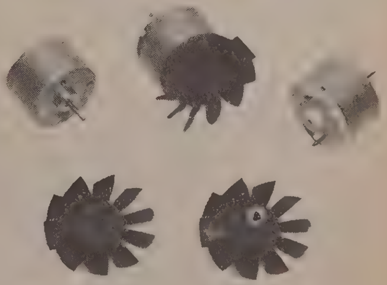
DC MICRO FAN
SMF1836 Series



FEATURES:

- Provides cooling in extremely confined areas
- Compact-miniature size — 1.42″ diameter x 1.77″ long
- High performance
- Choice of 5, 10, 12, and 24VDC
- Choice of optional mounting flanges
- **Brushless model also available**

DC MINI FAN
SL510 Series



FEATURES:

- Low cost
- Miniature size — 1.50″ long x 1.72″ diameter including impeller
- Low acoustical noise
- Dependable performance

WARRANTY — All U.S. Toyo fans are warranted to be free of defects in materials and workmanship for a period of one year from date of delivery.

AIRFLOW PERFORMANCE DATA — Performance data obtained with test chamber and methods in accordance with AMCA Standard 210-74.

ACOUSTICAL NOISE DATA — Acoustical measurements made at distances of 1.0 and 1.5 meters from fan intake. All measurements made on dB (A) scale. Fans operating at 60Hz line frequency.

OPERATING TEMPERATURE — Recommended ambient operating temperature is −30°C to +70°C.

IMPEDANCE PROTECTION — All fans are designed and manufactured to prevent "burn-out" failure caused by restriction of rotating parts.

LIFE EXPECTANCY — Life test data available on request.

SAFETY — All fans are designed and manufactured to meet UL and CSA standards. Approved fans are listed as follows: UL File No. E75082 and CSA File No. 48371M2.

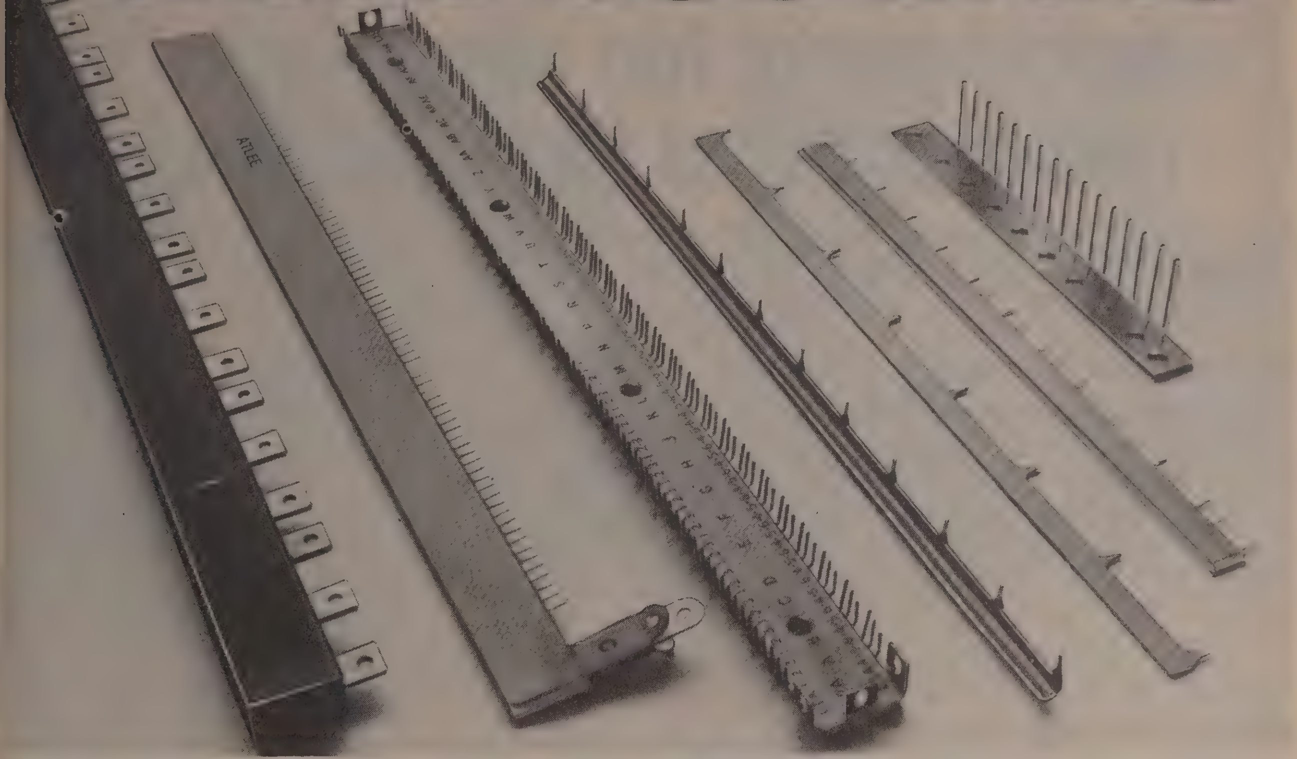
AMP ⋈ DISTRIBUTOR MARKETING

A Subsidiary of AMP Incorporated. AMP is a trademark of AMP Incorporated

ATLEE BUS BARS



Atlee is a full line manufacturer of bus bars, serving the computer industry, avionics, military contractors and various high tech manufacturers. We have available design and engineering services as well as prototype department. In addition, Atlee has sales representatives nationwide to service our customers. Please contact Atlee to service your bus bar requirements.

TO SPECIFY AN ATLEE BUS BAR

Please contact the factory for a bus bar catalog and any questions you may have.

TO SPECIFY A CUSTOM BUS BAR

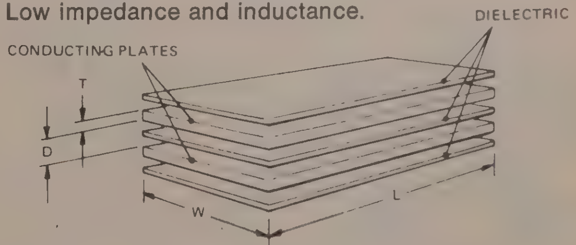
If your requirements do not permit the use of an Atlee Standard Bus Bar, send a drawing print or even a rough sketch of the Bus Bar that would meet your specifications and let Atlee's Sales Engineering Department work out the details and give you a quotation. Atlee will manufacture any type bus bar to your specifications. In general the information required includes:

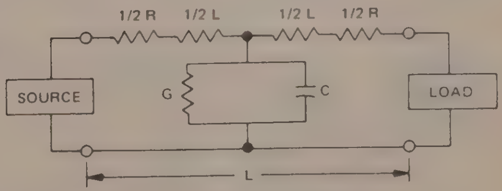
1. Application and quantity
2. Space available
3. Current paths required
4. Type of terminations
5. Number and location of terminations
6. Current requirements
7. Voltage drop requirements
8. Tab to tab spacing on each conductor
9. Type of mounting
10. Capacitance desired
11. Dielectric strength
12. Environmental requirements
13. Type finish on conductors
14. Marking
15. Quantity

DESIGNER'S NOTES

Atlee laminated bus bars consist of flat conductor layers stacked on one another and separated by appropriate dielectrics. Typically such an assembly is laminated and edge-sealed or encapsulated so that the final product becomes a rigid unit with high reliability and stable electrical and mechanical properties. These properties provide uniform capacity, low impedance, and high-speed transmissions of signal and current. Atlee bus bars are an economical alternative to multi-layer printed circuit boards and wire harnesses. They offer:

- Lowered production costs, because assembly is simple and fast.
- Reduced volume which permits higher density packaging than possible with wire harnesses.
- Reduced noise with ideally distributed capacitance and isolation of conductors.
- High current-carrying capacity.
- Low impedance and inductance.

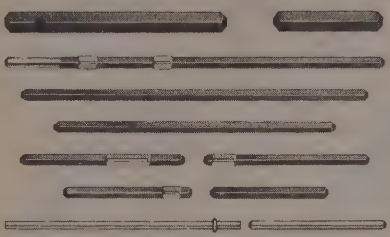




ATLEE 1 GILL STREET, WOBURN, MA 01801 • (617) 933-3510 • TELEX 949407

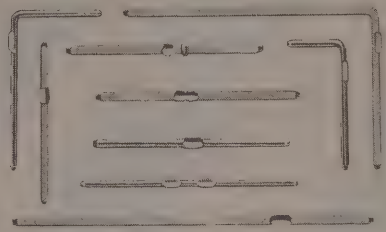
Precision formed and plated metal parts for electronic and electrical applications.

WRAPOST® TERMINALS



Industry's finest. Square and/or round, .025″ or .045″, up to 3″ lengths, single or double locking stars. Standard and custom sizes.

FLAT CABLE HEADER PINS

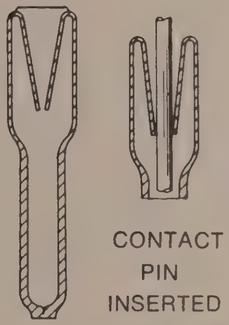


Provides smooth mating in female connectors. Straight or 90°, with or without locking stars. Lead-in angles perfectly blended for low insertion force.

BANDOLIERED PINS

Standard and custom bandolier styles. In-house selection plating allows zone or striped plating to cut precious metal plating costs.

SPRING SOCKET PINS

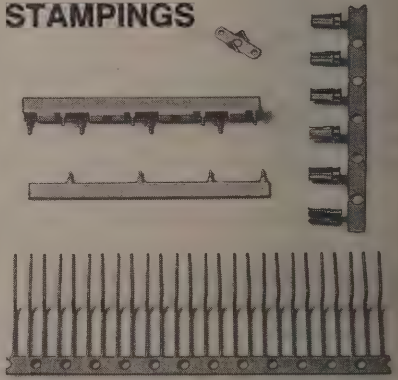


Low cost, low profile spring socket pins. Accepts .185″ lead length . . . used in .075″ and up grids. Takes round or square pins without orientation.

DIE SWAGED PARTS

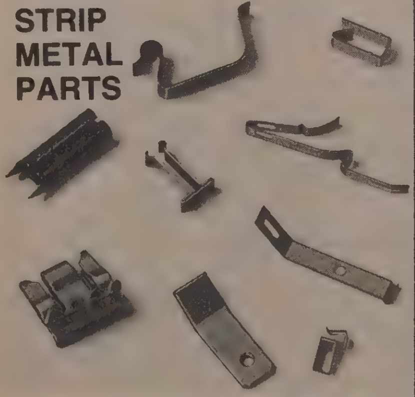
Cut cost of screw machine parts by 50–70%. High speed, scrapless forming to precision tolerances.

STAMPINGS



Simple blanking to complex forming with progressive dies.

STRIP METAL PARTS



Tubular parts or complex stampings. Our fourslide expertise can help cut your part costs.

METAL WIRE PARTS

Intricate forming even in difficult materials. Capability includes combination wire and strip metal parts.

Auto-Swage specializes in high speed, precision forming of terminals, pins, contacts, leads, spacers, clips, sockets, etc. Die swaging, pin rolling, fourslide forming and stamping operations allows selection of lowest cost forming method. In-house plating (both barrel and selective zone) assures single source responsibility on all your orders. Send parts today for our quotation.

PERMA POWER®

Sockets Plus™

Multiple Outlet Strips

A safe and convenient way to distribute power where it's needed

- Acts as power control center; most units have on/off switch and indicator light.
- Overload protected, built-in 15 amp circuit breaker shuts off power *here*—not down the line.
- Rated 1875 watts, 125 V., 15A.
- Double insulated #14/3 "SJT" line cord.
- U-ground outlets with electrically-wired ground; phosphor bronze, dual wiping contacts.
- Heavy duty, 22 gauge metal construction.
- Tough silver and black industrial finish, corrosion resistant zinc phosphate undercoat.

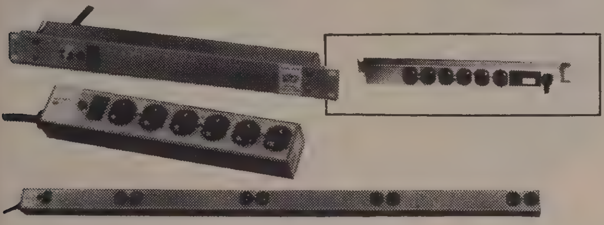
Multiple Outlet Strips

Sockets Plus™

INDUSTRIAL/SCIENTIFIC/MEDICAL "HIGH ABUSE" MODELS with Hospital Grade components



SPECIFICATIONS FOR PLUGS AND RECEPTACLES

Designated by a green dot—your assurance the components are U.L. Hospital Grade

- UL Hospital Grade Standards #498 and #544
- Federal Specification WC 596E (8200, 8210, 8300, 8310)
- NEMA Standard WD1
- NEMA 5-15R and 5-20R
- CSA Certified (8200-8210 series only)
- Corrosion-resistant per ASTM B-117-73

This industrial/scientific/medical series of Multiple Outlet Strips is specifically designed for high-abuse applications, for special safety requirements, or where equipment is exposed to fumes from corrosive chemicals or liquids.

When conditions require an outlet strip that "measures up," you need components that measure up. The plugs and receptacles in these strips are "Hospital Grade"—verified by Underwriters' Laboratories to have passed a series of torturous tests assuring the user of continuous, safe operation, even in the face of human negligence and corrosive environments.

Plugs and receptacles meet or exceed these "Hospital Grade" UL tests:
■ Abrupt removal of plug ■ Ground pin retention ■ Terminal strength ■ Assembly security ■ Face impact ■ Ground contact temperature ■ Ground contact resistance ■ Fault current test ■ Mold stress relief

All units have 6-foot double-insulated #14/3 "SJT" line cord. All are overload-protected by a built-in 15-amp circuit breaker that shuts off the power *here*, not down the line.

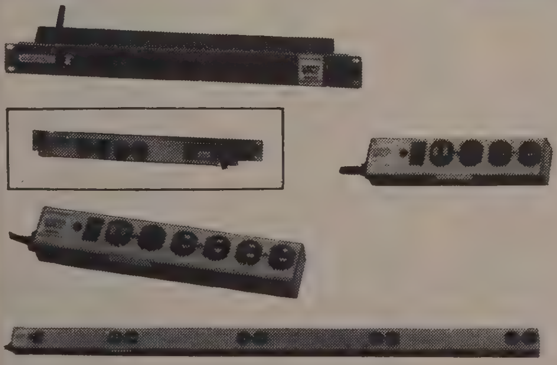
GROUND FAULT CIRCUIT INTERRUPTER MODELS



Moisture or dampness, improper or faulty wiring, or worn insulation can all contribute to a condition where the electric current in an appliance takes an unexpected path "to ground." If a person using such an appliance is in this current path, the resultant electric shock can cause injury or even death.

Perma Power GFCI Multiple Outlet Strip Models provide protection from these potentially hazardous ground fault currents. These models detect ground fault leakage current before it reaches hazardous levels, and instantly shut off all power to tools, appliances or equipment, thus guarding the user and providing assurance of maximum personal safety. When properly used and maintained, the GFCI Fault Finder device interrupts the circuit upon detecting any leakage greater than 0.006 amperes. Built-in "Test" and "Reset" buttons provide maximum user confidence.

The Perma Power GFCI outlet strips also have a built-in 15-amp circuit breaker to guard *the line* from overload conditions, but it's the GFCI device that guards individuals. Each strip has a double-insulated, #14/3 "SJT" line cord, and is rated at 1875 watts, 125 volts, 15 amps. To act as a power control center, each unit has an on/off switch and indicator light.

Free Customizing.

Let our Engineering and R&D Depts. design a product for your specific needs.

If you need 50 or more multiple outlet strips, SGL WABER® has the expertise to help you develop a product with one or all of the following variations:

- Case size and shape (longer, shorter, deeper, wider, etc.)
- Relocation of components
- Increased or decreased number of outlets, switches, pilot lights, fuses, circuit breakers
- Special grade outlets, timers, motors, switches, pilot lights (e.g., hospital grade)
- More circuits or different capacity circuits
- 1 amp to 20 amps; 1 volt to 250 volts AC
- Length, type, and size of power supply cord
- Special configurations to meet local code requirements
- Over 480 UL Listed and 310 CSA Certified non-stocking designs are available to meet your specific need
- Other unusual characteristics

We are pleased that our customers keep coming back to SGL WABER to use our experience and capability to create those special quality electrical interconnections to fit their most exacting applications.

Let us be of service to you. Call or write us today!
THERE IS NO OBLIGATION ON YOUR PART.

**HIGH PERFORMANCE CONTROL OF AIRBORNE AND STRUCTUREBORNE NOISE OVER WIDEST FREQUENCY RANGE.
HIGHEST RATIO OF PERFORMANCE TO THICKNESS OF CURRENTLY AVAILABLE MATERIALS.**

PROTECT

precision electronics from damage due to handling and shock.

STOP

sensitive, high speed parts safely . . . within controlled parameters.

QUIET

vibrating sheet metal parts or housings.

TYPICAL APPLICATIONS

DISK DRIVES

- Shock, Vibration Isolation Grommets
- Crash Stops
- Stepper Motor Inertial Dampers
- Grounding Strap Dampers

PRINTERS

- Print Head Bumper Stops
- Cabinet Damping/Sound Absorbing Composites
- Metal Parts Damping
- Striker Bar Damping

ELECTRONICS CABINETRY

- Shock, Vibration Isolation Mounts
- Damping/Sound Absorbing Composites

PRECISION EQUIPMENT

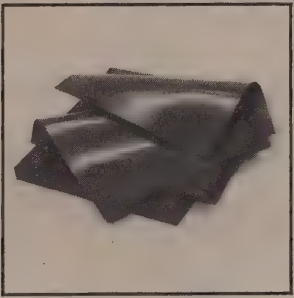
- Structural Damping
- Lab-Type Isolation Mounts

PRINTED CIRCUIT BOARD DAMPING

MOTOR, FAN

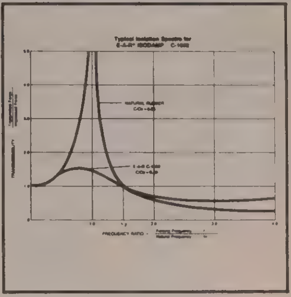
- Isolation Mounting Grommets
- Plenum Sound Absorbers

ACOUSTIC GASKETS AND SEALS



C-1002 "SOFT BLUE" ISOLATION

- Highly damped vibration isolation material
- Uniquely effective for shock or vibration over a broad frequency range
- Excellent wear and physical properties
- Available in sheets, die cut or custom injection molded parts
- Ideal for:
  - — Disk drive shock protection grommets
  - — Crash stops
  - — Stepper motor inertial dampers
  - — Isolation grommets for fractional HP motors and small fans
  - — Precision equipment mounts
  - — Acoustic gaskets and seals

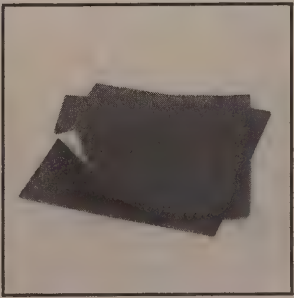


C-1002 GROMMETS

- Available in standard sizes for common metal thicknesses, bolt dimensions and loading parameters

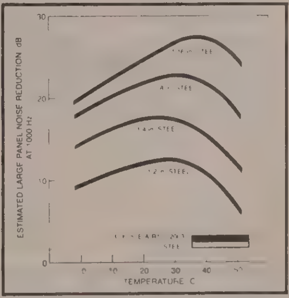
ISODAMP® GROMMETS

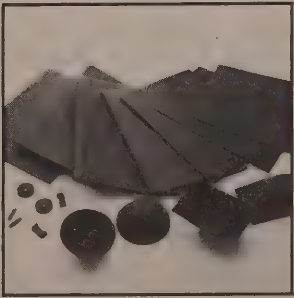
PRODUCT NUMBER	BOLT SIZE	PLATE THICK-NESS	UNITS/BOX
Grommet 1	3/16"	1/16"	500
Grommet 2	3/16"	1/8"	500
Grommet 3	1/4"	1/16"	500
Grommet 4	1/4"	1/8"	500
Grommet 5	3/16"	1/16"	500
Star Grommet	1/4"	varies	500



C-2003 "HARD BLUE" DAMPING

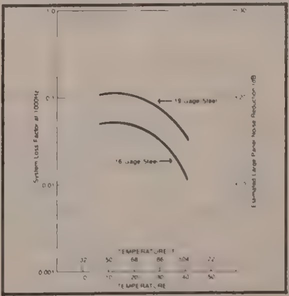
- Uniquely efficient damping material
- Easily applied with strong pressure sensitive adhesive backing
- Available in sheets or custom die-cut parts
- Ideal for:
  - — Disk drive grounding strap damping
  - — Metal parts damping
  - — Electronics cabinetry damping





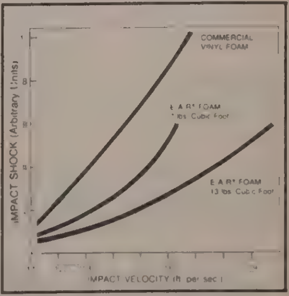
C-2200 DAMPING MATERIAL

- Cost effective vibration damping for metal, plastic and structural foam
- Available in composite with plain and embossed sound absorbing foams for easy installation
- Available in sheets or die-cut parts; Also may be injection molded or vacuum formed for special applications
- Ideal for:
  - — Printer housings
  - — Electronics cabinetry
  - — Metal parts damping



C-3001, 3002 DAMPING FOAMS

- Energy absorbing, PVC alloy, closed cell foam
- Superior damping; light weight
- Available in sheets, rolls, or die-cut parts
- Ideal for:
  - — Printed circuit board damping
  - — Acoustic gaskets and seals
  - — Low load crash stops
  - — Protective packaging for shipment of delicate instruments



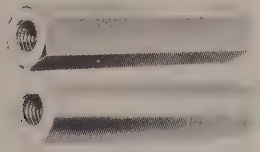
LEADERSHIP IN NOISE CONTROL

UNICORP

Leading Manufacturer of Precision Electronic Hardware

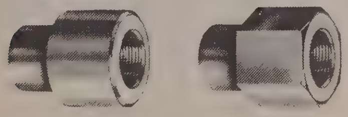
Buy direct from the manufacturer
Buy from the largest inventory of standard sizes and materials

Standoffs, Spacers



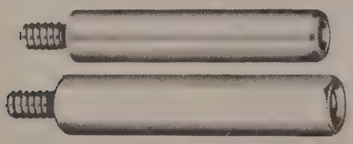
Threaded, Unthreaded
Shapes: round—square—hex
Diameters: ⅛" through ⅝"
Materials: brass, aluminum, stainless steel, cold rolled steel, nylon, teflon, linen base phenolic, 10% glass filled Lexan®

Standoffs—Swage and Rivet Type



Threaded, Unthreaded
Shapes: round—hex
Diameters: ⅛" through ⅜"
Materials: brass, aluminum, stainless steel, cold rolled steel

Standoffs—Male to Female



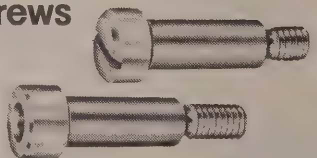
Shapes: Round—square—hex
Diameters: ⅛" through ½"
Materials: brass, aluminum, stainless steel, carbon steel, nylon

Captive Panel Hardware

Screws and Retainers

Head configurations: knurled and slotted, knurled and unslotted, slotted hex, unslotted hex
Materials: brass, aluminum, stainless steel, carbon steel, nylon, 10% glass-filled Lexan
Threads: 4-40 through 5/16-24
Retainers: standard and spring-loaded

Precision Shoulder Screws



Head shapes: slotted round, Allen round
Diameters: ¼" to ¾"
Material: Type 303 stainless steel—other materials on special order

Handles

Shapes: round, oval, rectangular, half-round
Styles: internal thread, external thread, straight, offset, hinged, extruded
Materials: brass, aluminum, stainless steel, carbon steel

Insulating Washers

Shapes: Shoulder, flat. Precision machined—not molded.
Diameters: Shoulder .187 to .505; flat .093 to .386
Materials: nylon, teflon, glass-filled Lexan, phenolic

Custom Manufacturing

UNICORP will manufacture non-standard shapes and sizes to fit your design requirements at reasonable prices. Send us your specifications.

Tubing With and Without Sealant

Features

■ Thermally stabilized ■ Thick wall ■ High shrink ratio 3 to 1 ■ Excellent electrical insulating properties ■ Unaffected by long shelf life ■ Highly resistant to moisture, fungus and weathering ■ Exceptional chemical resistance ■ Highly resistant to splitting even over severe configurations ■ Mechanically seals to standard plastic and elastomeric materials and conduit ■ Recognized under the Component Program of Underwriters Laboratories Inc. where indicated. File #E69768

Request Catalog No. 76-369

Thin Wall Heat Shrinkable Tubing — Type VFP-I

Features

■ Thermally stabilized ■ Ease of installation ■ Exceptional chemical resistance ■ Meets or exceeds the requirements of UL Standard 224 and MIL-I-23053C/5 Class I ■ Excellent electrical insulating properties ■ Flexible and flame retardant ■ Recognized under the Component Program of Underwriters Laboratories Inc. (File No. E 75641) and Certified by the Canadian Standards Association (No. LR47982-1)

RELAY INSULATORS

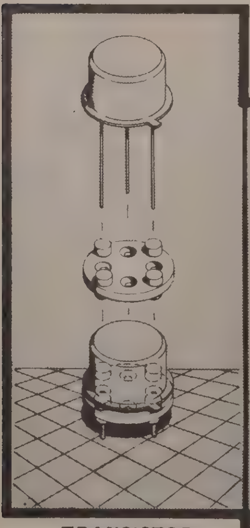
Stock to 4 Weeks Max.

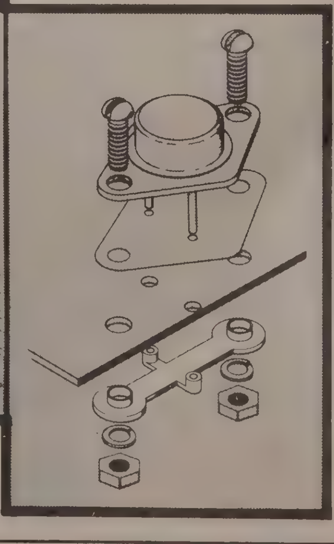
MOST ORDERS FILLED IMMEDIATELY FROM INVENTORY

FOR NEARLY 20 YEARS ROBISON ELECTRONICS, INC. HAS BEEN SERVING THE ELECTRONICS INDUSTRY AS A MANUFACTURER OF PROPRIETARY PLASTIC MOLDED PRODUCTS.

Our component mounting insulators have been the mainstay of a product line that can be considered as basic hardware designed to assist in the fabrication of more reliable assemblies.

TO-3 and TO-66 type insulators pictured below shorten assembly time by taking the place of four insulators.





TRANSISTOR INSULATORS

Our component mounting insulators ensure product reliability in the following ways:

- **UNIFORMLY SPACES AND INSULATES THE COMPONENT FROM THE PRINTED CIRCUITRY**
- **PROVIDES CLEARANCE TO ALLOW SOLDER-FILLET FORMATION ON DOUBLE SIDED CIRCUIT BOARDS**
- **PERMITS FLUSH CLEANING OF SOLDER-FLUX RESIDUES**
- **ALLOWS INSPECTION OF SOLDER-FILLETS**
- **PERMITS IMPROVED CONVECTION AIR COOLING**
- **AIDS IN PREVENTING MOISTURE ENTRAPMENT DUE TO CONDENSATION**
- **REDUCES EFFECT OF SHOCK AND VIBRATION BY PROVIDING A SECURE, PERMANENT MOUNTING BASE**
- **PROTECTS THE COMPONENT FROM OVERHEATING DURING SOLDERING BY INCREASING THE EFFECTIVE LEAD LENGTH BETWEEN THE COMPONENT AND THE PRINTED CIRCUIT BOARD**

Our extensive line of insulators, though designed specifically for capacitors, diodes, resistors, DIPs, relays and transistors, can also be used to mount other components such as trim potentionmeters, LEDs, integrated circuits, etc.

ZEUS TUBING

Meets Your Most Challenging Insulation Requirements!

SUB-LITE-WALL™ • HEAT SHRINK SPAGHETTI • SNAPTUBE™

BEADING • SHAPES • UNIQUE WIRE INSULATIONS

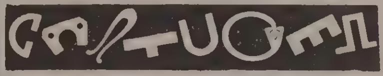
Made from High Performance Fluoropolymer Extrusions

TEFLON* TFE, FEP, PFA, & TEFZEL®

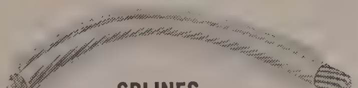
For the most demanding applications in aerospace, electronics, medical, automotive, chemical & industrial fields.

SUB-LITE-WALL™ TUBING

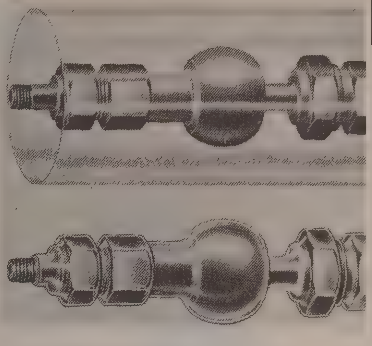
SPIRAL-CUT CABLE WRAP



SHAPES



SPLINES



HEAT SHRINK TUBING

SUB-LITE-WALL™ TUBING OF TEFLON* — The world's smallest tubing. Rivals nature's own capillaries. Walls as thin as 0.0015″ in I.D.s of 0.022″ and larger. Also I.D.s less than 0.002″ with wall thicknesses of 0.007″ or greater, or an 0.060″ I.D. with wall thickness of only 0.0015″! (Note: The average dimension of a human hair is 0.003″.) Superior lubricity — slides easily into tiny convoluted passages. Chemically inert and stable. Available for heat-shrink applications. Withstands extremes of heat (up to 500°F). Zero water absorption. I.D.s and wall thicknesses absolutely uniform!

HEAT SHRINK TUBING OF TEFLON* TFE — Now your components can overpower hell, high water, and the acid test when protected by Zeus heat shrink TFE tubing! Provided in the expanded state. A brief application of heat produces a skin-tight protective jacket to items that will be subjected to extremes of heat, corrosion, shock, moisture! Shrink ratios up to 4 to 1. Wide range of AWG, fractional inch, and industrial sizes. Standard wall, thin wall, and lightweight wall. Outstanding electrical, thermal, and mechanical properties.

DUAL-SHRINK TUBING OF TEFLON* TFE/FEP — Features an outer tubing of heat-shrink TFE and an inner tubing of FEP. TFE shrinks for tight fit when heat is applied. FEP melts and flows to form an encapsulation with a fit so tight that it can withstand severe stresses of pull or vibration and protect against moisture, acids, etc. Ideal for wires, cables, connectors, etc. Service temperature up to 450°F.

HEAVY CONSTRUCTION TUBING OF TEFLON* TFE — For extra strength, durability, and easy handling. For automotive, chemical, electrical and mechanical applications. Features low coefficient of friction, high heat and abrasion resistance, inertness and stability.

SPAGHETTI TUBING OF TEFLON* TFE — The ultimate in heat resistance, continuous use at 500°F, chemical stability, and dielectric properties. Unmatched concentricity and close tolerances. Standard wall, thin wall, and lightweight wall. Inert to solvents, acids, alkalies, and salts. Wide range of AWG sizes, fractional inch and industrial grade. Commercial and Mil Specs. UL File No. E-64007A.

TUBING OF TEFLON* FEP — Chemically inert, excellent dielectric properties. Continuous use at 400°F. Non-aging, anti-stick. Great tensile strength. UL File No. E-64007.

TUBING OF TEFLON* PFA — Tough, flexible. Continuous use near 500°F. Features clarity, chemical inertness, excellent flex-life, and chemical flow. Exceptional stress-crack resistance combined with great dielectric properties. For extended service in critical electrical, chemical, and thermal environments.

TUBING OF TEFZEL® — Mechanically superior, tough material of medium stiffness with excellent flex-life, impact resistance, cut-through resistance and low water absorption. Weather-resistant, and inert to most solvents and chemicals. Excellent resistance to high energy radiation. Low-loss dielectric. Continuous use at 300°F.

SNAPTUBE™ — A cost-effective protective wrapping of Teflon TFE for the restoration and reutilization of conductors with damaged insulations. Snaps quickly into place over wires or cables. Conductors can be left in place so that cost and installation of the conductor is not lost. Can also be used as a chafing guard over wire, cable, or wire bundles to form a homogeneous cable structure. Cut into small sections SNAPTUBE can be used as CABLE TIES. Available also in long lengths and sizes to accommodate wire bundles. Also available for color coding.

SPIRAL-CUT CABLE WRAPS OF TEFLON* — For harnessing and insulating wires, cables, etc. Expandable, abrasion-resistant. Over wire bundles, openings provide individual leads to be broken out at any point while creating a rugged, homogeneous harness assembly which can be channeled, bent, or flexed. Available in TFE, FEP, PFA, or TEFZEL.®

ROUND BEADING OR MINIATURE ROD — Available in TFE, FEP, PFA, or TEFZEL® and in a range of diameters and tolerances to meet most requirements. TFE beading is fully cured.

SHAPES OF TEFLON* TFE — Unlimited capability and variety made to customer specification.

SPLINES OF TEFLON* TFE — For coaxial cables requiring the ultimate in TFE/AIR primary dielectric over a primary conductor of coaxial cable or tube. Unsurpassed concentricity and tolerance.

ZEUS "C" SHAPE GUIDE RAIL COVERS OF TEFLON*TFE — Slick surface increases conveyor-line speed. Doubles system life for beer soda and food packagers, and manufacturers of cans and containers

Data sheets available on any of the above items. For new catalog write on company letterhead stating area of interest

A PANEL OF EXPERTS

EMC NOW OFFERS COMPATIBLE WIRE WRAPPABLE BOARDS FEATURING 108–PIN CONNECTOR!

EMC PANEL OF EXPERTS:
Quality high-density w/w boards offer up to 540 I/O connector pins and 465 16-pin I.C.'s.

EMC STAMPED AND FORMED 4-FINGER CONTACTS

- **Avoid Damage to IC Leads** with our special design featuring
  - burr-free internal edges
  - flexibility for consistent insertion & withdrawal force

EMC NURL-LOC® TERMINALS

- **Avoid Panel Damage:** Nurl-loc® ribs allow material displacement without tearing the board.
- **Avoid Panel Warp:** Nurl-loc® ribs have up to 500% more bearing surface to distribute pressure evenly.
- **Avoid Pin Straightening:** Nurl-loc® guiding action during insertion into panel promotes accurate positioning.
- **Avoid Terminal Twisting:** Nurl-loc® ribs prevent terminals from spinning during wire-wrapping.

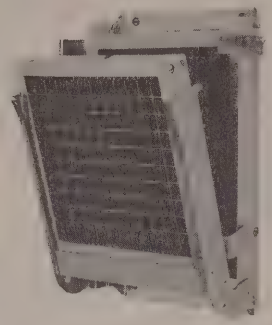
Patchboard Programming Systems

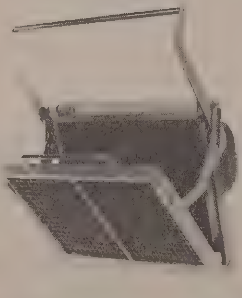
MODEL 902 200 POSITIONS



MODEL 904 440 POSITIONS

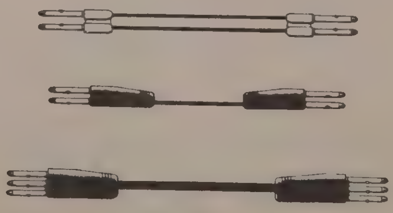
MODEL 901 680 POSITIONS

MODEL 922 1280 POSITIONS



MODEL 921 1600 POSITIONS

MODEL 910 5120 POSITIONS



Allied Systems now offers two complete lines of patchcord programming systems, with more than twenty-one sizes available. Allied also supplies associated patch cords and hardware for both lines.

Catalog 567 covers IBM style systems which normally have a contact spacing of .250 X .281 or .281 X .281. These systems use larger taper pins for rear panel wiring.

Catalog 667 covers hook type systems which have a contact spacing of .250 X .250. These systems are available for taper pin, wire wrap or locking latch type rear panel wiring.

Patch cords are available in a variety of types: single conductor, coax, two conductor shielded, etc., to fit any programming requirement.

Thirteen sizes of *fixed* programming systems are available in both types of systems, ranging in size from 200 to 3264 contacts.

The extremely competitive pricing of the Allied Systems lines, plus the unexcelled quality of their products, gives you, the user, a competitive edge in the design and pricing of your system.

Call your nearest Allied Rep. or Home Office for application help in using Allied Systems patch panels and programming systems, or for prices.

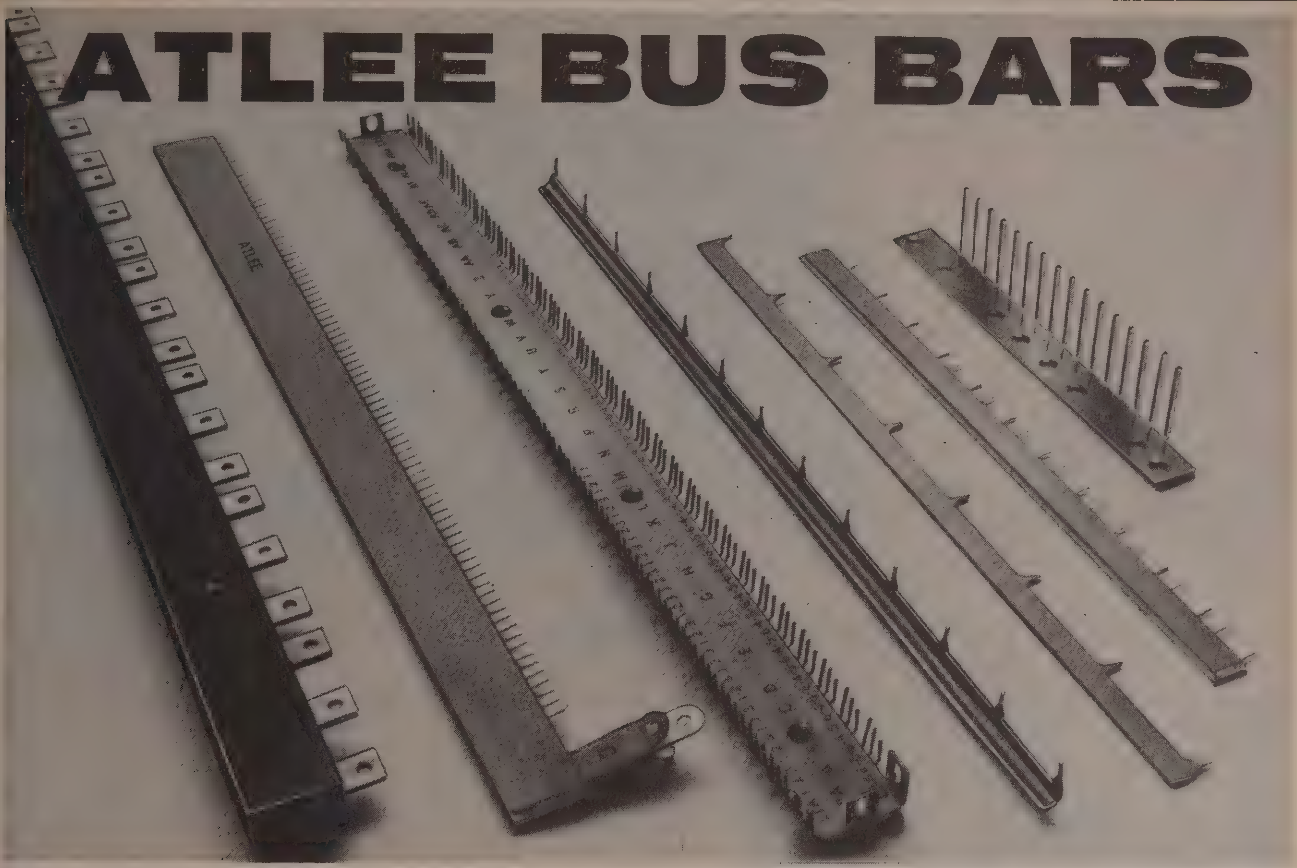
ATLEE BUS BARS



Atlee is a full line manufacturer of bus bars, serving the computer industry, avionics, military contractors and various high tech manufacturers. We have available design and engineering services as well as prototype department. In addition, Atlee has sales representatives nationwide to service our customers. Please contact Atlee to service your bus bar requirements.

TO SPECIFY AN ATLEE BUS BAR

Please contact the factory for a bus bar catalog and any questions you may have.

TO SPECIFY A CUSTOM BUS BAR

If your requirements do not permit the use of an Atlee Standard Bus Bar, send a drawing print or even a rough sketch of the Bus Bar that would meet your specifications and let Atlee's Sales Engineering Department work out the details and give you a quotation. Atlee will manufacture any type bus bar to your specifications. In general the information required includes:

1. Application and quantity
2. Space available
3. Current paths required
4. Type of terminations
5. Number and location of terminations
6. Current requirements
7. Voltage drop requirements
8. Tab to tab spacing on each conductor
9. Type of mounting
10. Capacitance desired
11. Dielectric strength
12. Environmental requirements
13. Type finish on conductors
14. Marking
15. Quantity

DESIGNER'S NOTES

Atlee laminated bus bars consist of flat conductor layers stacked on one another and separated by appropriate dielectrics. Typically such an assembly is laminated and edge-sealed or encapsulated so that the final product becomes a rigid unit with high reliability and stable electrical and mechanical properties. These properties provide uniform capacity, low impedance, and high-speed transmissions of signal and current. Atlee bus bars are an economical alternative to multi-layer printed circuit boards and wire harnesses. They offer:

- Lowered production costs, because assembly is simple and fast.
- Reduced volume which permits higher density packaging than possible with wire harnesses.
- Reduced noise with ideally distributed capacitance and isolation of conductors.
- High current-carrying capacity.
- Low impedance and inductance.

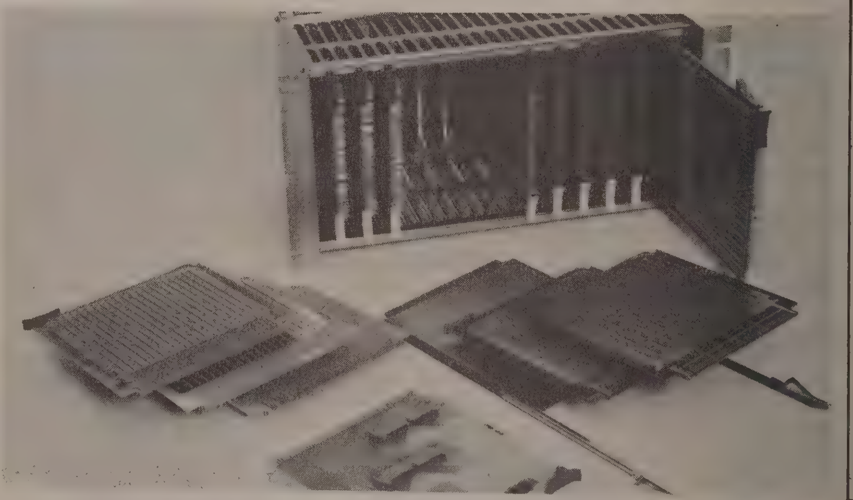
MODULAR SERIES

Augat's MODULAR SERIES is designed to handle a broad range of ICs. Panels are available in segmented or full size for maximum cost effectiveness.

- Accepts 14- through 64-pin dual-in-line ICs
- Panels are .125″ thick for added strength
- Choice of four plug-compatible I/O styles
- Silkscreened nomenclature
- .125″ diameter circuit clearances and cross traces between socket terminals on wire-wrap side for maximization of power and ground bussing
- V and G positions use sleeves (no inner contact) for easy soldering of decoupling capacitor on the same side of the panel
- Two-piece, tapered-entry socket terminals feature a four-fingered, fully machined (neither stamped nor formed) inner contact and a machined outer sleeve
- Available in committed and uncommitted patterns as well as Universal
- Designed for wiring on automatic wire wrap machinery
- Full size drawer is designed to accept 4 full size modular panels; half size drawer is designed to accept 2 full size modular panels; all drawers are mountable in a 19″ rack

R SERIES



- Augat's R SERIES panels are available in 1/8″ or 1/16″ thicknesses
- Available for TTL, Schottky and ECL design
- Dual 60 edge fingers (120 I/O positions) on .100″ centers gives a 2:1 I/O to IC ratio; finger I/O is provided with polarization slot
- I/O is available with uncommitted fingers or the prededicated fingers to power and ground
- Extended version has provision for mounting 4 TO-3 case voltage regulators in pattern or Universal style
- Silkscreened nomenclature
- .125″ diameter circuit clearances and cross traces between socket terminals on wire-wrap side for maximization of power and ground bussing
- V & G positions use sleeves (no inner contacts) for easy soldering of decoupling capacitors on the same side of the panel
- Two-piece, tapered entry socket terminals feature a four-fingered, fully machined (neither stamped nor formed) inner contact and a machined outer sleeve
- Card cage is designed to accept 13 cards on 1.2″ centers; cage is mountable on standard 19″ racks
- Backpanel is supplied with 13 card edge connectors in committed or uncommitted format; provision for an additional 12 connectors is standard on R SERIES backpanels
- Card cages are available to hold 3, 6 or 9 panels on 1.2″ centers
- All R SERIES panels and backpanels are designed for wiring on automatic wire-wrapping machinery
- Full complement of accessory cards available for the R SERIES (i.e. extender cards, blank cards, discrete cards, etc.); see page 37 for details
- Worksheets are available for R SERIES panels upon request

- HI-PAK™ (High Packaging Density) Universal pattern allows devices with between-row-spacing of .3″, .4″, .6″ or .9″ to be placed anywhere on the panel
- Front of panel J1 and J2 is drilled to accept two 96-pin DIN connectors, aluminum front panel, puller handles, or flat cable headers, as required
- VCC and GND pins will accept radial lead capacitors with lead spacing of .3″ or .2″
- Green solder mask with white nomenclature for easy readability
- Solder plate alongside columns allows installation of solder clips when required

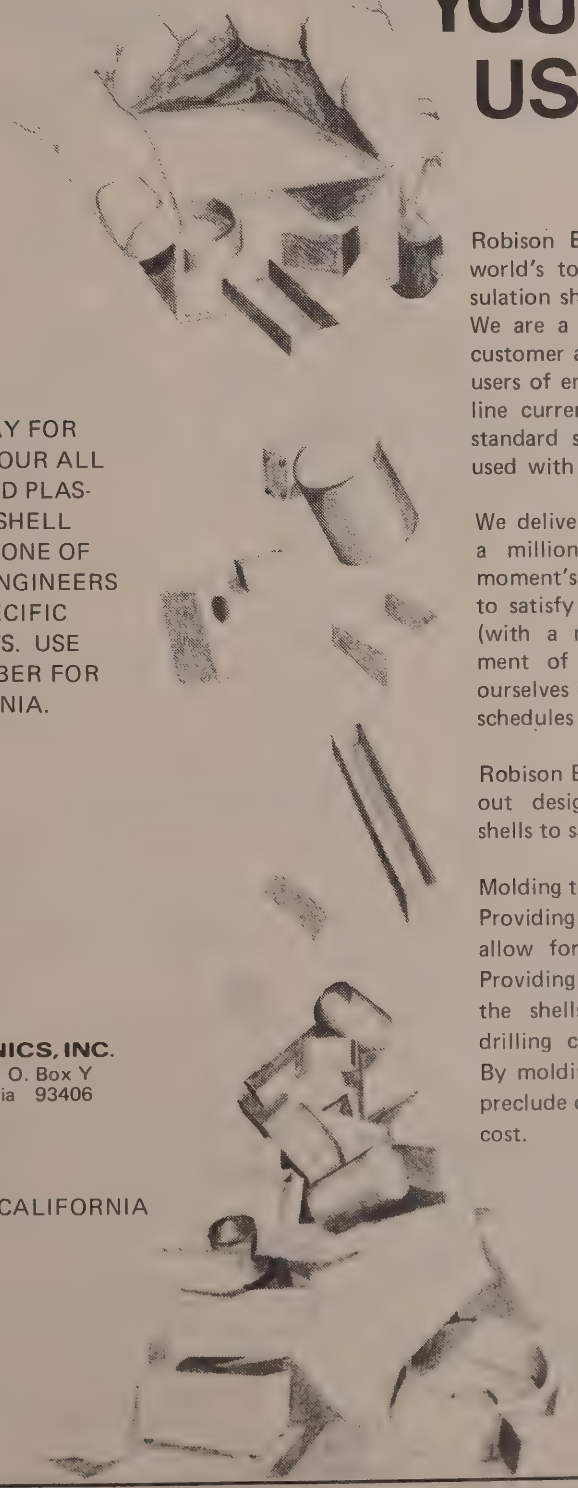
MOLDED PLASTIC ENCAPSULATION SHELLS
YOU'LL FIND US AT THE TOP



Robison Electronics, Inc., is one of the world's top suppliers of molded encapsulation shells to the electronics industry. We are a major supplier to over 1,500 customer accounts, including most major users of encapsulation shells; our product line currently includes more than 2,500 standard sizes and special headers to be used with these shells.

We deliver...our inventory stands at over a million parts, ready to ship at a moment's notice. We will tool new items to satisfy specific customer requirements (with a minimum initial order requirement of only 250 parts). We pride ourselves in providing quick, firm delivery schedules of a quality product.

Robison Electronics, Inc., produces (with out design compromise) encapsulation shells to satisfy the end need by:

Molding to design sizes
Providing a step in the open end to allow for a header.
Providing cored holes in the bottom of the shells, or in the headers to save drilling costs.
By molding shells to the desired depth to preclude cutting deeper shells at increased cost.

For your encapsulation shells,
call the TOP

CALL OR WRITE TODAY FOR YOUR FREE COPY OF OUR ALL NEW 96-PAGE "MOLDED PLASTIC ENCAPSULATION SHELL CATALOG." ASK FOR ONE OF OUR APPLICATIONS ENGINEERS TO DISCUSS YOUR SPECIFIC SHELL REQUIREMENTS. USE OUR TOLL-FREE NUMBER FOR OUTSIDE OF CALIFORNIA.

INPUT/OUTPUT SYSTEMS
(PB Boards for I/O Modules)

MODULE BOARDS

Gordos hybrid thick film I/O Systems give you everything you need to interface with any 5, 15, or 24 volt logic unit.

Since the function is self-contained in each module, you determine the layout of your own system boards. The plug-in modules with single hold-down screw make later revisions easy; and the barrier strip allows module replacement without disconnecting the wires.

Gordos Module Board

- Plug-compatible logic contracts on 8, 16, and 24 position boards. Screw terminal logic connections on 4 position boards
- Barrier strip with screw terminals for load connections
- Circuitry for pull-up resistors
- 5 amp field replaceable fuses
- LED status indicators
- All even pins logic GND.

All Metric Series boards contain high density 96 pin inverse DIN connectors.

24 Extender Cards

Ruggedly framed and supported extender card with 96 pin Reverse DIN connectors, 5-layers, 96 patched test points for each board size and logic option.

12 Backplanes

For .800″ or 1.200″ card centers. 96 pin Reverse DIN connectors, press-fit V&G wrap-pins. Massive power and ground planes. Wire wrap interconnections. TTL, Schottky, ECL and High-Speed Universal.

16 Card Racks

6 free standing and 6 Retma mount vertical racks for each size board .800″ and 1.200″ card spacing. 2 horizontal (free standing or Retma mount) racks for Model 32 boards, and mixer racks for different board sizes.

Three Pin Technologies

Stitch-Wire
MIL-approved wiring technique providing optimum performance for ECL and fast Schottky devices. Fast, easy and low cost changeability with the highest reliability of difussion bonding.

Wire-Wrap
Tin or gold plated 1 to 3 level wrap pins. Suitable for TTL and some Schottky applications.

Insulation Displacement. Fast, convenient breadboarding for a test circuit. Available only in TTL boards in the Metric Series. Easy conversion to Stitch-Wire.

Design, Wiring Services and Equipment.

Logic conversion, Stitch-wiring, Insulation Displacement wiring. Numerically controlled and manually operated Stitch-Wire machine. Custom Board Design.

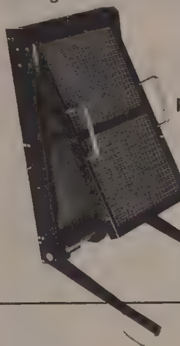
MAC PANEL

1958-1983 Our 25th Year
PLUGBOARD PROGRAMMING SYSTEMS

SERIES 140 PLUGBOARD SYSTEMS

Extremely strong and compact systems with removable plugboards. Features cam-closing mechanism. Choice of taper pin or wrap terminations for connecting to external equipment. A complete line of Series 140 plugwires is offered. Catalog 102.



Model 939 (2,560 positions)

Series 140 Plugwire Tip

SERIES 157 PLUGBOARD SYSTEMS

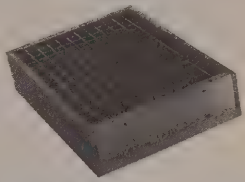
Reliable economical program control. Taper pin or wrap terminations to external equipment. Removable plugboard patched with Series 157 plugwires. Catalog 101.

Model 922 (1,280 positions)

Series 157 Plugwire Tip

SERIES 157 FIXED SYSTEMS

Used where program change requirements do not dictate the use of removable plugboards. Systems from 200 to 1280 contact positions are offered from stock. Sizes up to 9,600 positions are made to order. Catalog 101.



Model 809 (816 positions)

IN-STOCK CONNECTORS & TOOLS

We maintain shelf stock on connectors, and crimping, insertion and extracting hand tools. Used for interconnecting the plugboard system to external equipment.

APPLICATIONS OF REMOVABLE PLUGBOARD SYSTEMS

MAC PANEL Plugboard Programming Systems are used whenever there is a need for frequent or fast changes in the functions performed by electrical equipment and circuits or in the interconnection of two or more machines and/or circuits. Removable Plugboards are prewired with plugwire assemblies to provide a given pattern of interconnection. Changes can be made either by changing the program wired in the removable Plugboard or by simply replacing the Plugboard in the Receiver with another pre-programmed Plugboard in a matter of seconds. **MAC PANEL** Plugboard Programming Systems are used as large connectors with up to 5,120 contact positions on standard models. Thousands of **MAC PANEL** systems have been installed in the United States and in over forty foreign countries since 1958.

GENERAL PRODUCT DESCRIPTION

Each system consists of a Receiver and one or more removable Plugboards. The Receiver is the frame and the engaging mechanism that accepts the removable Plugboard. Depending on the system there are from one to six molded black phenolic or blue diallyl phthalate panels in the Receiver and Plugboard frames. A molded panel will contain up to 1280 holes or contact positions. These panels are silk screened with a grid pattern that provides a unique alphanumeric address for each contact position in the system. Special customized printing in any number of colors can be provided on either the Plugboard or Receiver.

A contact spring is factory installed in each Receiver contact position. The front portion of these nickel or gold plated contact springs mates with nickel or gold plated plugwire tips inserted in the appropriate contact position of the Plugboard when the Plugboard is inserted in the Receiver. All Receivers are equipped with a mechanical interlock that assures proper mating of contact springs and plugwire tips. Each contact position can also be directly connected to the equipment from the rear of the Receiver by soldering, insertion of taper pins, or wire-wrapping. The desired method of connection must be determined prior to ordering so that the appropriate type of contact springs will be provided in the Receiver.

MAC PANEL maintains shelf stock on over 500 types of plugwire assemblies. These include single conductor and multi-conductor unshielded and shielded plugwires as well as crimpable and wire-wrapable plugwire tips.

MAC PANEL customer service personnel and design engineers invite your inquiries. We can promptly and economically design, build, and install a special custom system or plugwire if our standard product will not meet your requirements.

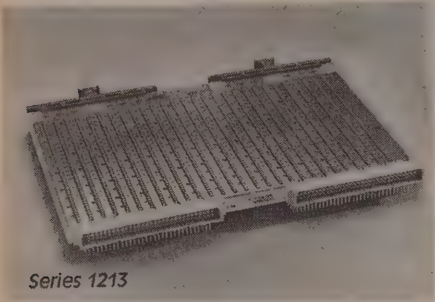
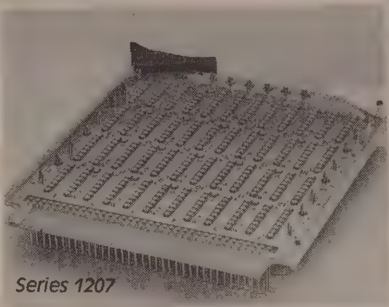
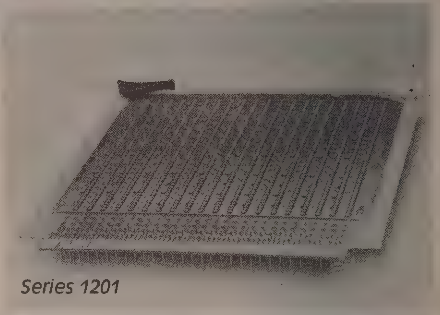
BOARDS...I.C. Pluggable, Computer Interface and Schottky



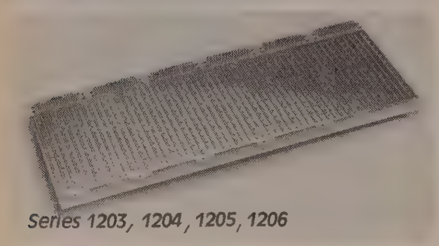
Series 1213



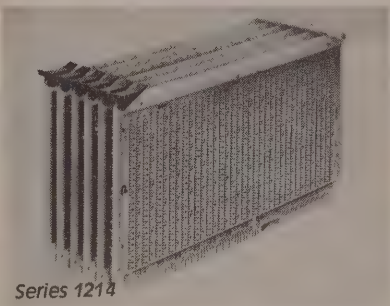
Series 1207



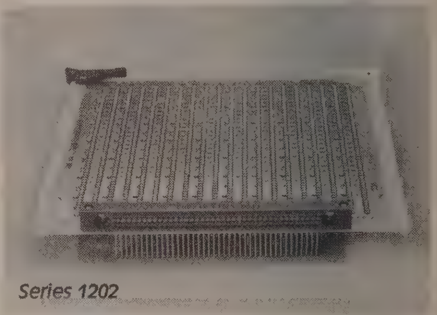
Series 1201



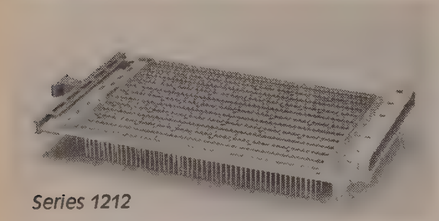
Series 1203, 1204, 1205, 1206



Series 1214



Series 1202



Series 1212

I.C. PLUGGABLE PANELS

Standard cards accept 14 or 16 or 20 pin dip packages. Universal pattern accepts dip packages on .300″ and .600″ centers. Boards have two-piece tapered entry socket terminal with 4-leaf inner contact. 1, 2 or 3-level wire wrap tails.

Edge Connector Types

Series 1201 (120 Contacts) 60 patterns with either internal or external volt and ground commitments.

Series 1207 (72 Contacts) 12, 18 and 24 patterns. Extra slotted pins for mounting discrete components. 6 test points.

Series 1208, 1209, 1210, 1211 (70 or 140 Contacts) Four different sizes. External volt & ground commitments. Can accept filter capacitors.

One-or-Two 96 Pin Connector Type

Series 1212 & 1213 (Metric) Single or double widths. Boards have pull handles with holes to probe test points.

Pin & Socket Connector Type

Series 1202 (120 pins) 60 or 72 patterns. Supplied with 120-contact male connector. Female connector sold separately.

Modular Types

Series 1203, 1204, 1205, 1206 Choice of 4 I/O styles. 30 patterns per section. Up to 6 sections available.

COMPUTER INTERFACE PANELS

Series 1214 A wide variety available in the most demanded bussing configurations:

- Data General Micro Nova Panel
- IEEE-696 S-100 Bus Panel
- Prolog 7000 Standard Bus Panel
- Digital Equipment Corp Panels
- INTEL Multibus Panel
- Motorola Versabus Panel

SCHOTTKY PANELS

Series 2000 All standard Precicontact Packaging Panels can be supplied in multilayer Schottky configurations with voltage plane sandwiched between two outer ground planes. These true laminated printed circuit panels with plane-to-plane continuity made via plated-thru holes provide low impedance ground distribution and reduced noise at high frequencies.

CUSTOM PANELS

Series 1299 Precicontact can provide custom panels to your exact specifications. Our design staff will work closely with you to quickly and economically solve your packaging problem.

Low profile DIP Sockets approved for MIL-S 83734

Series SO-M High reliability and performance at low cost. Accommodates 8 thru 40 flat lead DIP IC's or 0.51/.016 to 0.51/.021 dia. round leads maintaining high retention. Tapered entry socket terminal with 4-leaf BeCu closed entry inner contact and machined outer sleeve. Four-finger contact accepts short IC leads. Closed-end construction eliminates wicking problems.

1 00 TYP.
19 Dia. thru
.25
50
020 thk Alloy 110 Copper, HH Tin Precoated .00001 thk.

SPECIFICATIONS/AVAILABILITY

Quik/ Bus conductors are available in reels of 50 conductor feet, standard. Conductor is .020" thick copper, HH, tin precoated. Current carrying capacity is 74 AMPS @ 30°C temperature rise.

QUIK/BUS APPLICATIONS

Quik/ Bus was developed by Rogers to provide a fast, economical way to make multi-layer bus bars with no tooling cost, no waiting for custom parts. This do-it-yourself Quik / Bus approach is especially useful for prototypes and low volume uses. It retains all the advantages of custom fabricated laminar power distribution bus bars.

FOR OTHER STYLES OF QUIK/BUS CONDUCTORS CONTACT THE FACTORY.

HOW TO MAKE MULTILAYER BUS BARS WITH QUIK/BUS CONDUCTORS

1. Unroll conductors from reel.
2. Cut to length.
3. Remove unneeded input and output tabs where necessary.
4. For large end tabs peel back insulation and cut. Punch holes as required.
5. Form tabs as required.
6. Align conductors and form bus bar body as required.
7. Bundle securely with cable ties.
8. Check finished part for shorts.

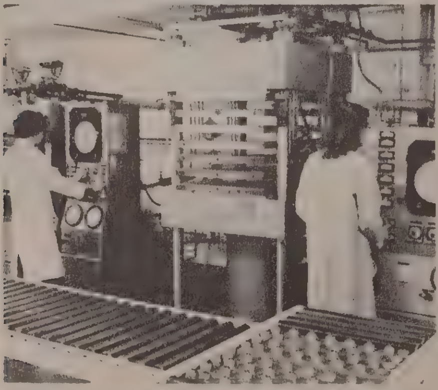
PCB Connector Backpanel Systems

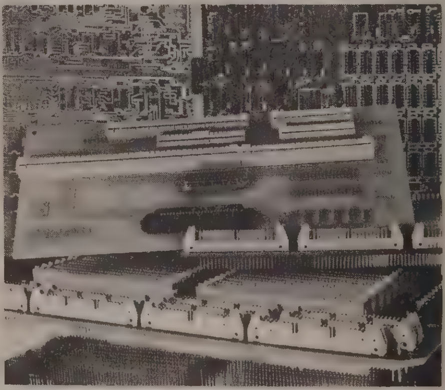
The solderless press-fit connector concept, first produced in 1970, offers an extremely reliable, low cost method of interconnection in electronic packaging. Press-fit is widely used in backpanel applications by manufacturers of main frame computer, peripheral and tele-communications equipment. The PK Series of press-fit contacts is standardized on .100, .125, .150, and .156 centers for ease of interchangeability with other backpanel manufacturers. The SY series replaces most discrete connectors.

Multi-layer Capability



Symtron's experience in lamination dates back to the birth of multi-layer boards. Our Edge here really keeps us ahead of our competitors. Multiple opening steam and electric presses are used. Qualified to MIL-P-55110C.

Pressfit Capabilities



Along with the Standard Product Lines, Symtron offers Pressfit Terminal Blocks, subminiature D connectors, Vertical Headers, DIN, and Telephone Connectors.

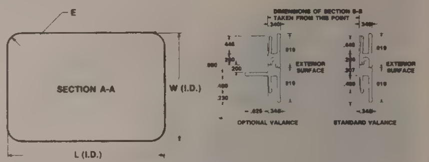
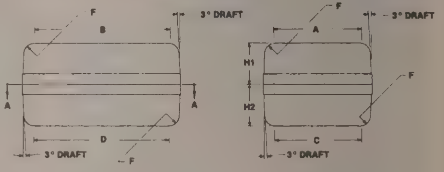
Gemini specializes in custom designed cases for industry. We have the capability to design a case specifically for your product and follow through from prototypes to production. If you are currently purchasing a standard case from another manufacturer, we may be able to duplicate that case at a lower cost. We welcome the opportunity to quote on your case requirements and to work with you on design.

Gemini's standard line of **HEAVY DUTY TRANSIT CASES** are constructed from high density polyethylene, and extremely tough and resilient material ideally suited to the abuses transit cases are subjected to. The heavy wall (.100″ nominal) shells and heavy duty 1.838″ wide #6063 T52 aluminum valance combine to form a container capable of transporting delicate portable instruments under the most adverse conditions. Available with recessed wheels and folding handle.





Gemini's standard line of **HEAVY DUTY CARRYING CASES** are constructed from rugged A.B.S. and feature a heavy wall aluminum valance to provide an extremely rugged case with contemporary lines for transporting delicate portable instruments under the most demanding conditions.

Standard Features include:

- .100″ to .150″ nominal wall black A.B.S. shells
- variable case depth
- heavy wall 1.838″ wide #6063 T52 aluminum valance with dust seal
- choice of handle, latch, hinge and bumpers

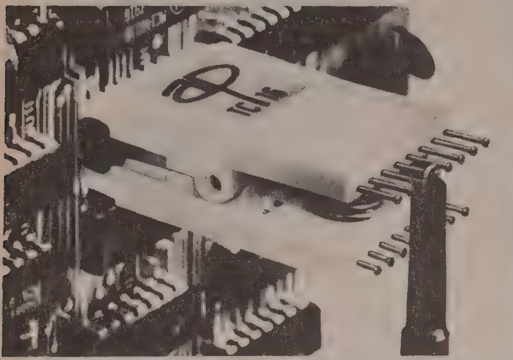
INTEGRATED CIRCUIT ACCESSORIES CABLE JUMPERS, IC TEST CLIPS, CONNECTORS, SWITCHES



IC TEST CLIPS — We've improved on the original

The Super-Grip II IC Test Clip has a narrow nose for fitting on DIP's on high-density boards. "Open-nose" design also permits probe tip access at DIP leads. New "duck-bill" contacts are flat, won't roll off narrow DIP leads. Contact comb fits between DIP leads, eliminates shorts. New "nail-head" contact pins keep probe hooks from sliding off. Offset pin rows allows probes to hang free on longer top row pins and not interfere with shorter lower row. Sizes to fit all DIP's (TC-14 fits 14-pin DIP etc.). Gold-plated or unplated alloy-770 pin contacts. Simplifies testing, trouble-shooting and QC inspection. Also available with long, headless lead pins for attaching cable connectors.

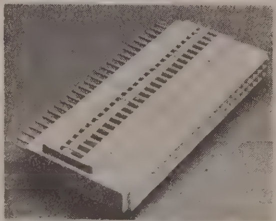
INTRA-SWITCH

AP No.	No. Pins
922578-20	20
922578-26	26
922578-34	34
922578-40	40
922578-50	50



The Intra-Switch allows opening and closing any number of lines individually. It is interjected between standard .10" x .10" dual-row system connectors to provide instant line-by-line switching for diagnostic or QA testing. Ideal for switching command signals to or from test equipment and programming optional preset logic functions. Contacts are Alloy 770. Switches are recessed and actuate by pencil or probe tip.

INTRA-CONNECTOR

AP No.	No. Pins
922576-20	20

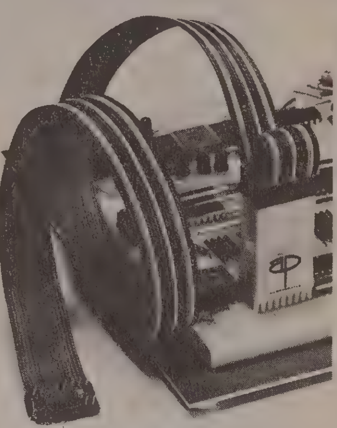
922576-34	34
922576-40	40
922576-50	50
922576-60	60

In use, Intra-Connector is interjected between mating system connectors to provide external pin contacts for probing individually or connecting to another cable assembly. Mates with standard .10" x .10" dual-row connectors or PC board-mounted .025" sq. pins. Ideal for daisy chaining. Signals can be probed under no load and full load conditions using two Intra-Connectors plus an Intra-Switch. Contacts are Alloy 770.



LOGICAL CONNECTIONS

A P Logical Connections are a Test Clip/Jumper Assembly combined. They are the most convenient and reliable way to connect remote testing equipment to DIP circuitry. A Logical Connection combines the performance proven IC Test Clip with a complete, tested, ready-to-use cable assembly. It provides the ideal connection from a logic analyzer to DIP IC. On one end, a pair of single-row socket connectors attach to the pins of a connector-compatible model Test Clip. On the other end, choose from among the four industry standard connector types shown below, or order it open-ended, to terminate with your own connector. All important performance features of A P Test Clips (described at left) are incorporated in Logical Connections. Connectors have Alloy 770 contacts, probe access holes in backs and are molded into the color-coded flat ribbon cable for optimum electrical integrity and strain relief. Models listed below all are 18" long.

Plunger Wires
Jumper Wires

BREADBOARD JUMPER WIRE KIT

350 wires cut to 14 different lengths from 0.1" to 5.0". Each length is color coded and segregated in convenient plastic box. Leads are stripped 1/4" and bent 90° for easy insertion. Wire is solid, tinned 22-gauge copper with PVC insulation. **JK1 Wire Kit . . . 92335**

JUMPER WIRE PACKAGES

Shown above: individual packages with all wires same length and color in each package.

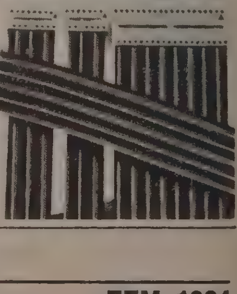
923345-10	1.0	Brown	100

DIP JUMPERS

DIP jumpers fit standard DIP sockets. Ideal for jumpering within PC boards; between boards, backplanes, and motherboards; I/O signals, etc. Connectors molded onto cable for optimum strain relief; factory tested; probe access holes on backs. Conductors: 28 AWG. Color-coded cable uses 10-color sequence.



Suffix in AP No. is length (-06=6 in.)

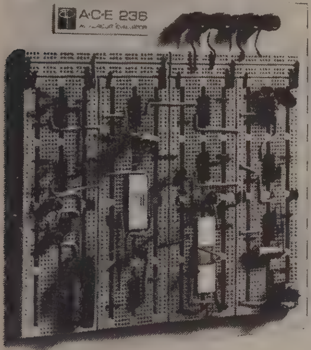
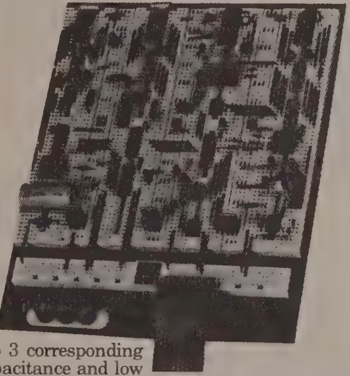
**INTEGRATED CIRCUIT ACCESSORIES
POWERED BREADBOARDS,
TERMINAL & DISTRIBUTION STRIPS**

ACE ALL-CIRCUIT EVALUATORS

Two kits and 8 assembled breadboards for quick build-up and check-out of experimental circuits. All models have integral voltage distribution system with solderless plug-in tie points on universal .100" x .100" matrix for excellent circuit design flexibility. These ACE's accept all DIP's, TO-5's, discrete components and solid wire patch cords to .032". Uses buses for voltage, ground, reset and clock lines, shift command, etc. Five-way binding posts. Aluminum base serves as ground; has gold-anodized protective surface. Multi-tie-point terminals are non-corrosive nickel silver.



ACE 236



BREADBOARD II

Fully assembled. Unique system of 3 distribution strips. 2 levels of printed circuits and 3 binding posts. 18 buses are color coded and internally connected to 3 corresponding color binding posts. High distributed capacitance and low inductance minimize unwanted voltage spikes, provide superior low impedance system. Same plug-in matrix features as ACE's. Laminated NEMA G-10 glass epoxy; circuits and ground plane are 2-oz. copper; terminals are copper alloy 770.

AP No.	ACE's and Breadboard II	Tie-Pts.	DIP Cap.	No. Buses	No. Posts	Size (inches)

POWERACE POWERED BREADBOARDS

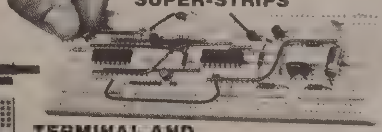
Fully assembled. All three Powerace models offer a new dimension in convenience for fast, solderless, circuit building and testing. Each incorporates two A P Super-Strips with 1680 plug-in tie points to hold up to 18 14-pin DIP's. Breadboards accept all DIP sizes including RTL, DTL, TTL and CMOS devices, TO-5's and discretes with leads up to .032" dia. Built-in groundplane — ideal for high-frequency and high-speed/low-noise circuits. Interconnect with any solid 20 or 30 AWG wire via plug-in tie-point blocks on panels. Operate on 200 to 240 VAC at 50 Hz or on 110 to 130 VAC at 60 Hz (with fused power supplies). Ripple/noise is ≤ 10 mV at full load. Dimensions of all three Poweraces are: 7.5" wide, 11.5" deep, 4.0" high at the rear, but only 0.75" high at the front for working-level convenience. Weights are approx. 2.5 lb. Complete operating instructions included.

POWERACE 101 — General purpose for all types of circuits. Power supply is regulated, adjustable from +5 to +15 VDC at 600 mA. Line and load regulation is ≤ 3%. O-15 VDC meter for monitoring power supply or circuits.

POWERACE 102 — For prototyping digital circuits. Power supply is regulated +5 VDC at 1 amp. Line load regulation is ≤ 1%. Built-in pulse detection with memory — combined with three buffered logic indicators, provide free built-in logic probe. Also contains two logic switches, four data switches, a clock generator and a one-shot pulse generator.

POWERACE 103 — Triple-output power supply for linear and digital circuits has outputs of +5 VDC at 750 mA; +15 VDC at 250 mA; and -15 VDC at 250 mA (±15-volt outputs track). Line and load regulation is ≤ 1%. Meter is built-in 15-O-15 VDC. Also contains two buffered logic indicators, two logic switches and two data switches.

SUPER-STRIPS



CIRCUIT-STRIPS

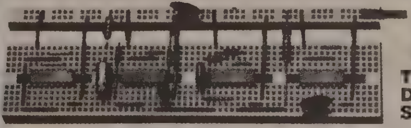
Super-Strip universal, breadboarding elements have 840 solderless, plug-in tie points, integral, low-impedance distribution system, accept all DIP's, TO-5's, discretes and solid jumpers to .032". Hold up to nine 14-pin DIP's. Choice of contact finishes. Includes integral, non-shorting, instant-mounting backing.

Circuit-Strip duplicates the advantages of the Super-Strip but in a smaller size. Then it goes one better with a molded-in alpha-numeric grid for faster and easier identification of every tie point in your circuit. This makes labeling schematics easier in lab or training course, and simplifies troubleshooting. Circuit-Strip holds up to six 14-pin DIP's and is available with or without gold contact finish.

TIE-POINT BLOCKS

Four models available with .1" matrix of solderless, plug-in, 4-tie-point terminals for custom layouts, attaching relays, displays, in/out patching. LED block accepts 3/16" dia. bulb (not included). All have solder tails and mount by press-fitting into holes. Packaged 20 per pack.

AP No.	Tie-Point Blocks	Tie-Points
923297	TB1 (single)	4
923299	TB2 (double)	8
923301	TB3 (triple)	12
923303	TB4 (quad)	16
923305	LB1 (LED)	1
923306	Assortment: 4 each of above 5 styles	



TERMINAL AND DISTRIBUTION STRIPS

For building custom breadboards. Solderless, plug-in matrices on .1" x .1" centers that accept all DIP's, TO-5's, discretes and solid wire jumpers to .032". Terminal strips available in 4- and 5-tie-pt. single and dual rows. Distribution strips available with 2 or 6 buses. Includes integral, non-shorting mounting backing.

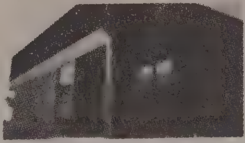
Bring Your Magnetic Interference Problems To The Problem Solving Magnetic Shielding Specialists

AD-VANCE MAGNETICS

COMPLETE FACILITIES IN 3 LARGE MODERN PLANTS • 4 DECADES OF MAGNETIC SHIELDING LEADERSHIP

Rochester, Indiana



West Coast

Over 90% past and present magnetic shield designs have been created by engineers and fabricated by production personnel with Ad-Vance.

AD-MU shielding is everywhere: off planet in spacecraft and satellites; planet-wide in exacting industrial, military, laboratory and consumer applications.

ECONOMICAL AD-MU FOILS—CUT & APPLY IN MINUTES

Cut with Ordinary Scissors

These do-it-yourself foils solve many magnetic shielding problems for designers, experimenters, production people and relatively small production runs

- No waiting—save days or weeks of valuable time. Always keep a supply handy for emergencies.
- Eliminate designing, tooling and fabrication costs of pre-fabricated shields.
- Especially suited for hard-to-get-at places.
- Delivered already heat treated, ready for instant use.

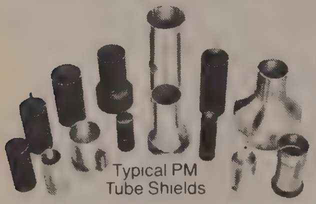
AD-MU CUSTOM FABRICATED SHIELDS FOR CATHODE RAY TUBES

Enhance CRT performance by eliminating effects of external magnetic fields on the electron beam.

Ad-Vance already owns tooling for many types of magnetic shields used during the past quarter century, making tooling savings possible. Or, our Engineering Dept. will gladly help design and produce the optimum shield for your application.

Typical CRT Shields; others to your specs

AD-MU HIGH PERMEABILITY SHIELDS FIT 324 TYPES OF PHOTOMULTIPLIER TUBES



Typical PM Tube Shields

For your special application or specific magnetic environment, Ad-Vance engineers can either modify a stock shield or custom design a shield to your exact requirement.

AD-MU TRANSFORMER SHIELDS

Reduce or eliminate the problem of stray field emission caused by transformers. Custom designed and fabricated to your precise specification.

AD-MU CUSTOM FABRICATED SHIELDS FOR OTHER COMPONENTS & SYSTEMS

Any specified configuration or shielding requirement from the simplest component to the most complex system can be handled by the Ad-Vance Engineering Dept.

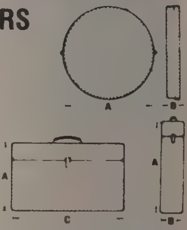
AD-MU SHEET STOCK—DELIVERY FROM STOCK

- For your in-house designing and manufacturing convenience.
- Easy to work, bend, stamp, draw, finish, etc. on ordinary sheet metal working equipment. SHIELDS MUST BE HEAT TREATED before end use or further finishing by plating, painting, etc.

STURDY AD-MU TAPE DATA PROTECTORS

Holds up to 36 Cassette Cartridges

Round or Rectangular Types



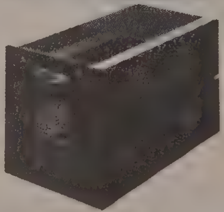
- Prevent distortion, partial erasure or degradation of valuable tape recorded data during routine safekeeping or transport.
- Provide inexpensive insurance against magnetic pollution.

AD-MU ALLOYS PROTECT PERMANENTLY

- Won't saturate when properly used.
- No excessive permeability loss from shock.
- No costly periodic annealings expense/inconvenience.
- Minimum retentivity.

84-PAGE TIME-SAVING ENGINEERING REFERENCE MANUAL/CATALOG

- Gives Major Guidelines for magnetic shielding design/procurement.
- 2/3 of pages contain valuable technical/engineering information about the entire magnetic shielding field.
- 1/3 is product/facilities data.



3984 hits in only 10.6 minutes on CNC press vs. 56 minutes average on manual turret duplicator press.

LOWER COSTS TO AD-VANCE CUSTOMERS ON THEIR PUNCHED PRODUCTS

- New CNC Control Capability also increases product quality and provides absolute precision.
- Repeatability to ±.005 accuracy. .002 accuracy not unusual.
- From prototype quantities to tens of thousands.

As Endless As Man's Imagination...

Amuneal Will Meet Your Toughest Magnetic Shield Specifications

Everyday, new and unique applications for magnetic shields continue to emerge ... and so do the stringent requirements that must be met. Transforming these challenging ideas into actual use can seem like a monumental task. Not at Amuneal.

We have the proven versatility and advanced facilities to design and manufacture magnetic shields to meet your toughest specifications. To do it, we've got a team of engineers and specialists who are ... just as tough.

Our people are involved in every phase of development ... in selecting the proper alloy and shield's geometric design ... in determining the best method of fabrication ... in controlling hydrogen annealing ... in the construction of a prototye and its thorough analytical testing and finally, in manufacturing whatever quantities your requirements dictate.

If you have a shielding project, call us at (215) **535-3000**
There's no limit to what we can do for you.

...Matching Man's Visions With Ingenuity

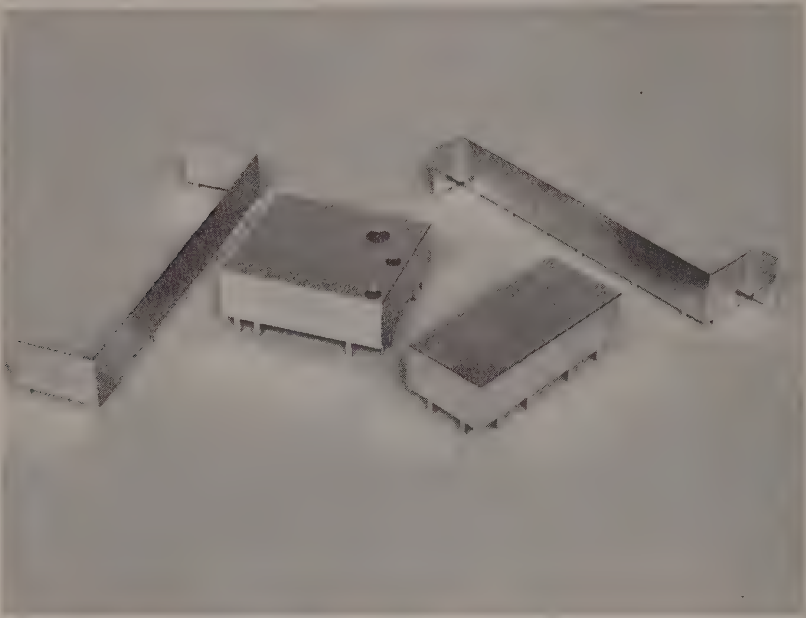
RFI / EMI SHIELDING

Atlee manufactures custom RFI/EMI shielding made from beryllium copper, brass or nickel silver. These shields are used to isolate the source of RFI on the circuit board.



Atlee finger contacts and gasketing made from beryllium copper are used for grounding and shielding applications. Ideal for electronic enclosures and chassis.

HOW TO STOP EMI

BEFORE IT STOPS YOUR PRODUCT.

The rapidly evolving world of electronics opens new vistas of efficiency and convenience in our professional and personal lives. There is, however, a reverse side to the electronic "coin": pollution by EMI/RFI and other spurious signals generated in many electronic systems and radiated by inter-connecting cables.

U.S.F.C.C. and foreign government regulations of increasing severity limit permissible EMI/RFI emissions for most electronic or electronically controlled equipment. Violators are subject to costly penalties.

Unique properties of ferrite provide relatively constant impedances over a broad segment of the high to ultra-high frequency ranges. They attenuate unwanted signals without contributing to power loss at DC and low frequencies. Fair-Rite beads, sleeves and toroids have become industry standards. They are installed simply by sliding or clamping one or more onto the leads of involved components or on connecting wires, or inserting "beads on leads" into PC boards.

CABLE AND CONNECTOR
EMI SUPPRESSOR KIT
FAIR-RITE
PRODUCTS CORP

THE NEW CABLE & CONNECTOR EMI SUPPRESSOR KIT.

To aid the designer in selecting and specifying ferrite components to solve specific EMI/RFI problems, Fair-Rite, the leader in ferrites for shielding, has developed three Engineering Evaluation Kits providing the necessary ferrite cores, with descriptions and technical data to help solve given EMI/RFI problems.

FAIR-RITE'S NEW CABLE AND CONNECTOR EMI SUPPRESSOR KIT offers 13 different large beads and toroids, one-piece and split sleeves, and the new multi-hole shielding plates for use with IC/DIP's and multi-pin connectors. All are in the ferrite material of choice for shielding applications, Fair-Rite No. 43; impedance (Z) values are from 47 to 285 ohms typical at 100 MHz.

THE NEW BEAD ON LEAD AND WOUND BEAD, OR |Z| KIT offers 10 different beads on leads, plus two 6-hole shield beads wound with 1½ and 2½ turns, all in Fair-Rite No. 43 material. Production quantities of the beads on leads are available taped and reeled for use with high speed automatic insertion equipment per EIA Standard RS296D. The beads supplied yield impedance values from 68 to 680 ohms typical at 100 MHz.

THE FAIR-RITE BEAD, BALUN AND BROADBAND KIT, "JOULE BOX" provides 34 different shield beads, balun and broadband cores in seven different Fair-Rite materials. Literally thousands of designers have used this kit to guide them in the suppression of unwanted circuit noise over the past seven years. Its continued popularity is proof of its value as a design tool. Impedance values range from 30 ohms to 550 ohms, typical, at 25 MHz or 100 MHz, depending on material.

EACH KIT comes with its own Engineering Bulletin fully describing the contents and guiding the designer in the use of Fair-Rite components to solve his EMI/RFI problems. Also, Impedance vs. Frequency and other curves are included, as well as concise explanations of the function of ferrites in EMI/RFI suppression.

KITS ARE $25.00 EACH postpaid from stock against your payment; or plus shipping when ordered on your PO or letterhead.

The Engineering Bulletins are **FREE** for the asking. So is our catalog.

Fair-Rite also manufactures a broad range of ferrite cores for other electronic applications, including: coil forms; U, E and I cores; rods and slugs; pot cores; and a wide range of bobbin (drum) cores, as well as custom shapes to special order.

Now! EMC testing services from Instrument Specialties—the company that knows shielding inside and out!

If you're involved with keeping RFI/EMI in or out, you already know about Instrument Specialties. You've probably used our beryllium copper shielding strips...received our engineering help ...even used our new line of ESD devices.

And *now*—the superb EMC testing facilities we use to assure performance of our products is *available to you for the first time.* You now can access the sophisticated equipment you don't have—but *must* have—to secure the test results you need!

State-of-the-art computer-controlled emission and susceptibility measurements from 10 kHz to 1 GHz...RF gasket evaluation...FCC/VDE/CISPR and MIL-STD-461A/B Tests...networks for power line conducted RF emission tests...semi-anechoic shielded enclosure...confirming open field test site...computer-produced hard copy readout of test results—all are yours at Instrument Specialties.

Following testing, you'll leave our facility with the precise documentation you need. In the event you need help to meet required interference specifications, we can supply that as well. All this, from one qualified source!

For more information, rates, and schedule availability, phone us and ask for EMC Customer Service. Or, write us at Dept. EEM-10.

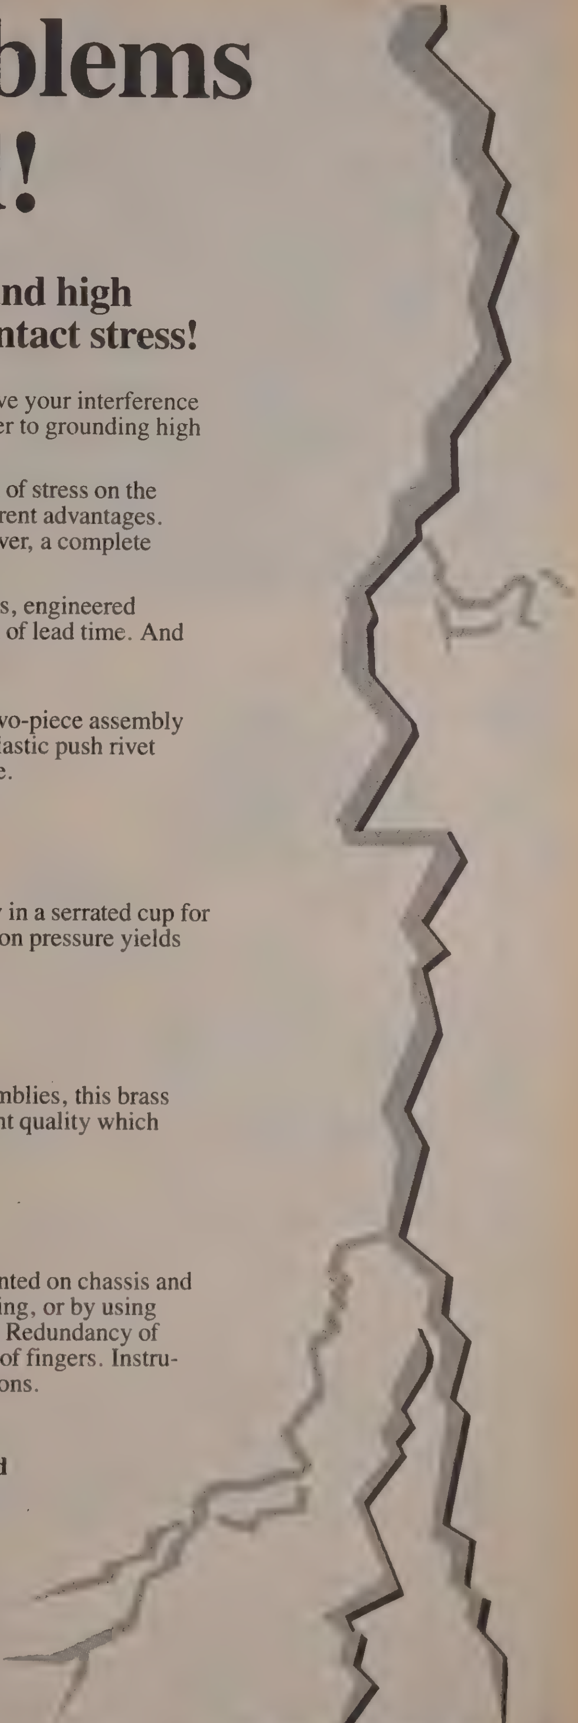
Drive ESD problems into the ground!

NEW Instrument Specialties devices ground high voltage static discharge with minimum contact stress!



You *know* how Instrument Specialties' shielding strips have helped solve your interference control problems. Now, a design breakthrough can provide your answer to grounding high voltage discharge.

These new assemblies provide optimum contact force with a minimum of stress on the contact. Material is either brass, or beryllium coppper, with all its inherent advantages. Mounting is compatible with all surface textures and materials. Moreover, a complete spectrum of platings is available to ensure galvanic compatibility.

A few typical, off-the-shelf assemblies are shown here. *Special* designs, engineered precisely to meet your requirements, can be produced with a minimum of lead time. And there's no charge for consultation.

97-700

The Instrument Specialties' "Mushroom" is a two-piece assembly consisting of a beryllium copper top plate and plastic push rivet which mounts through a .250 inch diameter hole.

97-710

The "Pop-Up" is a spring-loaded brass assembly in a serrated cup for easy snap-in mounting. One pound of compression pressure yields over 1000 pounds contact force per square inch.

97-720

Used with both the Mushroom and Pop-Up assemblies, this brass contact plate acts as a mating surface of consistent quality which mounts in the opposing plane.

97-733

These beryllium copper grounding bars are mounted on chassis and cabinet frame components by riveting, heat staking, or by using common hardware such as screws and fasteners. Redundancy of contact points is attained by varying the number of fingers. Instrument Specialties also offers many custom variations.

To get your copy of our complete manual, discussing theoretical and practical aspects of interference and grounding problems and their solutions, use the Reader Service Card. Or, write directly to the address shown below, Attn: Dept. EEM-11.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

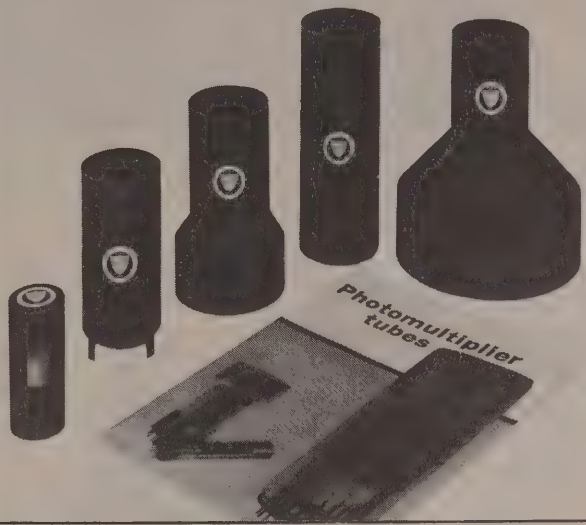
magnetic shields for photomultiplier tubes

Magnetic shields shipped from stock for 90% of photomultiplier tubes.



MAGNETIC SHIELD DIVISION

Perfection Mica Company
750 North Thomas Drive
Bensenville, Illinois 60106 U.S.A.
(312) 766-7800 TWX (910) 256-4815

CO-NETIC magnetic shields improve the amplification characteristics of photomultiplier tubes by providing significant attenuation of magnetic fields. Effective shielding is ensured over a wide range of field intensities. When grounded, the shields provide protection against electrostatic interference.

CO-NETIC shields are highly resistant to shock and vibration. The shields have minimal retentivity and do not require periodic re-annealing.

Request catalog PM-4, which lists recommended shields for over 650 photomultiplier tubes.

LAB KITS & PROBES

Lab Kit contains assorted CO-NETIC and NETIC shielding materials, double-faced pressure sensitive tape for shield construction and

20 millivolts/gauss A.C. magnetic pickup probe .... all for	$99.50
Probe only, 20 mV/gauss, axial	$49.50
Probe only, 60 mV/gauss, axial (shown) or transverse	$79.50

Request Lab Kit catalog LK-2, Probe catalog EP-3.

COMPONENT SHIELDS

Full time engineering staff available for consultation on shielding problems. Magnetic Shield Division is also the preferred source for custom shields to your specifications. Extensive standard and special tooling provide fast shipment. Call for design assistance or send print for prompt quotation.

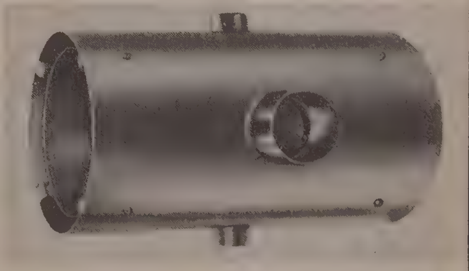
INTER-8 WEAVE CABLE

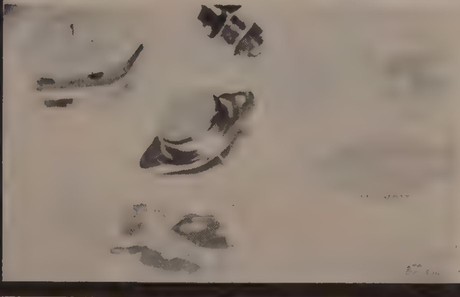
Our patented, woven configuration of four signal leads provides superior attenuation over a twisted pair. Attenuation improvement of unshielded INTER-8 WEAVE cable is −20 db for radiation and −12 db for pickup. An additional −20 db is obtained with our braided CO-NETIC jacket. Available in #24 AWG, unshielded or shielded. Request catalog WC-1

ZERO GAUSS CHAMBERS

Zero gauss chambers provide the ultimate in magnetic shielding. Magnetic Shield Division's general-purpose zero gauss chamber offers a significant reduction in both static and time varying fields found in laboratory and research environments. Degaussing coils can be furnished, and a Helmholtz coil system can be incorporated to generate known fields. Three concentrically spaced CO-NETIC chambers with closed ends and removable covers are provided. Placement of openings is optional. Attenuation in excess of −60 db is typical.

Request catalog ZG-2





MICA INSULATORS

Available in sheet, wafer, flakes and ground form. Clear, natural and built-up sheet stock thicknesses from .002" to .062". Save tooling expense on a wide variety of fabricated parts, including semi-conductor insulators in .002" to .003" thickness with .002" hole tolerances. Excellent heat resistance and high dielectric strength provide improved breakdown protection and increased efficiency of electronic components. Request catalog K-14.

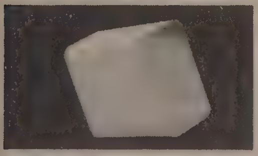
MAGNETIC SHIELDS and MμShield Materials

World's most complete source of custom shields for PM, Cathode Ray, and Storage Tubes; Seamless Tubing Shields; and Magnetic Shielding Materials

Custom Fabricated Shields

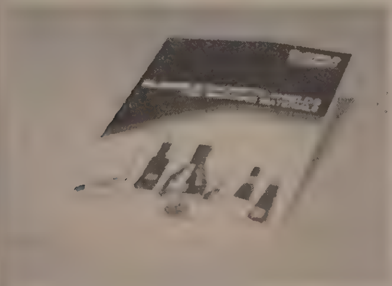
MμShield offers 35 years experience in the design and production of magnetic shields for research and industry. We can help you with prototype design and provide custom shields in any quantities. Metal forming and heat treating expertise insures shields of unsurpassed quality with guaranteed listed field reductions. Your inquiries are invited.



Seamless Tubing Shields

MμShield Company is the only source of **seamless** tubing magnetic shields for lasers, electron microscopes, cables, and seamless rectangular shields for bubble memory devices. Our special technology eliminates the non-uniformity of permeability from tubing shields having welded seams.

Send For Free Designer's Guide and MμShield Catalog



A "must have" magnetic shielding reference for the design engineer. Technical information, design aids, descriptions of shielding materials, and MμShield's special heat treating and processing services are presented.

HI-PERM SHIELDING MATERIALS
Sheets, Coils, Tubes in Stock

1. **High Saturation Shielding**
   Permeability range from 200 to 50,000. Saturation Point between 18,000 and 20,000 gauss.
2. **Medium Permeability Shielding**
   Normally used as a buffer. Permeability range from 12,500 to 150,000. Saturation Point 15,000 gauss approx.
3. **High Permeability Shielding**
   Permeability from 80,000, at B-40, to 350,000.
   Saturation Point 7,500 gauss approx.

All materials heat treated for maximum permeability.

COILS .002", .005", .010" thicknesses. 5½", 7", 15" widths.
Minimum order 2'.
SHEETS .015" to .060" thicknesses. Full sheet 30" x 10'.
Minimum order 30" x 36".
TUBES 0.10" to 4.50" I.D. Wall thicknesses from .010" to .060".
Any lengths to 20'.

Shielding Materials Kit
Contains assortment of materials for making experimental magnetic shields, and a shielding characteristics chart.

Heat Treating Service

Customers may use our Special Heat Treating and Processing Service to give their own fabrications optimum permeability and low shock characteristics. Permeability of MμShield materials is guaranteed.

WIRE MESH SHIELDING MATERIAL

TECHNICAL DATA

TECKNIT is a reliable source for a wide variety of EMI shielding materials. One of the most popular is supplied in the form of wire mesh. Almost any metal which can be drawn into a wire can be used by TECKNIT to provide the most effective EMI shielding to fit a specific application.

STANDARD WIRE MATERIALS

"X" CODE	MATERIAL
1	Monel 0.0045" dia.
2	Aluminum Alloy 0.005" dia.
3	Brass, Silver-plated 0.0045" dia.
4	Tin-coated, Copper-clad steel 0.0045" dia.
5	Tin-plated Phosphor/Bronze 0.0045" dia.

TECKNIT wire shielding materials are produced in a variety of styles and configurations to meet any application. Some are wire mesh alone and others have elastomer cores and some are preformed gaskets. The variety is nearly infinite.

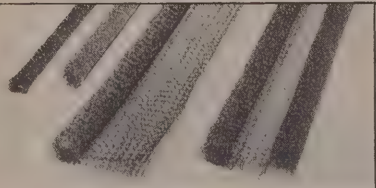
Many factors beyond price affect the design of EMI shielding. These include physical, environmental and electrical factors. If for example, an enclosure cover will be opened seldomly and the equipment is operating in air at room temperature, a simpler shield may suffice. But, if a physical seal is needed, another style of shield will be needed.

For sheet metal enclosures, round or finned strips are preferable to allow for minor misalignments. Rectangular strips are generally used for cast or machined enclosure covers. A double knitted shape compressed to 75% of original height provides the optimum shielding in most cases and is superior to a single shape. The single shape decreases shielding 5 to 10 dB.

A most effective EMI shield can be applied to any wiring harness by using TECKNIT wire mesh strip which applies like tape over the harness to shield against static discharge and grounding.

Brief descriptions of a broad range of TECKNIT products appear on the following pages. For complete catalog data or technical assistance call TECKNIT. TECKNIT can custom design an effective EMI shielding product for any application.

WIRE MESH GASKET MATERIAL



TECKNIT STRIPS provide Total Shielding Effectiveness up to 120 dB from 1.0 kHz to 10.0 GHz. Compression for round forms should be from 5 to 25 psi and 10 to 60 psi for rectangular shapes. A sampling of standard parts appears to the right. The "X" refers to metal used. See list in heading. Data sheet A-200.

WIRE MESH SHIELDING MATERIAL

WIRE MESH SHIELDING TAPE

Applies to any harness just as plastic tape would. Provides an excellent shield against static or grounding charges with minimum bulk and excellent physical protection.

DESCRIPTION

Double layer strip of knitted tin-coated copper-clad steel wire. Provides more EMI shielding than any comparable material or tape.

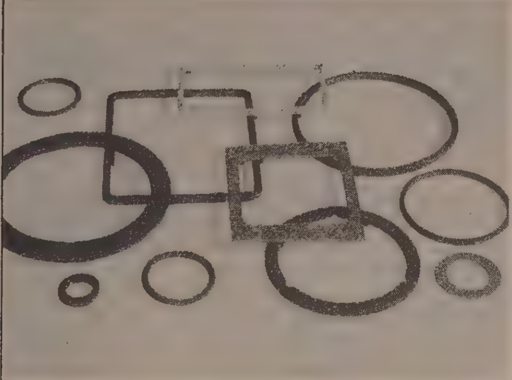
APPLICATIONS

Particularly effective as primary or secondary shielding for electrical or electronic cables and harnesses. Closely conforms to irregular shapes adding very little to overall diameter and weight.

SPECIFICATIONS

Supplied in 25 & 50 ft. or continuous spools from 1000 to 2500 ft. Standard width: 1.00.″ Thickness: 0.02″. Weight: 8.0 oz/100 ft. Pull strength: 50 lbs. Elongation: 100%. Necking: 47% at 25# (75% at 50#). Corrosion resistance and Solderability: Excellent. Data sheet A-230.

DIE-COMPRESSED MESH GASKETS



Made from compressed knitted wire with no joints or splices for the ultimate in EMI shielding. Smallest practical size is 3/16″ OD with 1/16″ ID.

DESCRIPTION

Manufactured to custom specifications. Most types are rings, but other shapes are available and can be supplied with mounting holes or recesses. The material is die-compressed from knitted wire to form desired shape.

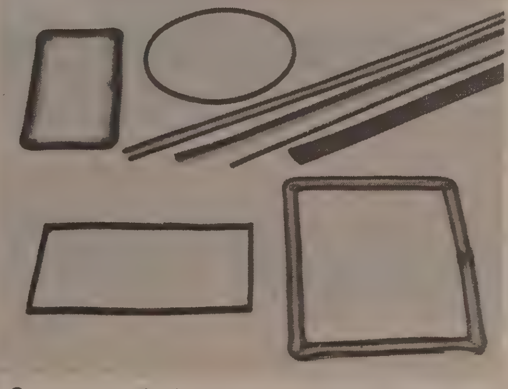
APPLICATIONS

For CATV, microwave ovens, waveguide flanges, shaft seals and the like. Any size providing maximum thickness does not exceed 0.063″ and gasket height is 0.25″ or less. Typically supplied as rings up to 3″ diameter. Max. OD: 12″.

SPECIFICATIONS

Available in four metals: Tin-plated Phosphor/Bronze (best performance), Monel, Silver-plated Brass & Tinned Copper-clad Steel. EMI effectiveness from 200 kHz to 10 GHz with a peak of 130+ dB at 1 MHz (3″ ring). Data sheet A-300.

CUSTOM MESH GASKETS



Custom made from any standard wire mesh shape and assembled to fit specific applications. May be mesh alone or in combination with other sealants.

DESCRIPTION

Made from any TECKNIT strip material with or without elastomer core (See previous page.) Available with fiberglass cores for microwave oven applications.

APPLICATIONS

Ultra-conformal nature of these gaskets allows them to be used wherever EMI shielding is a must. May be held in place by rivets, clips, spotwelds or adhesives.

SPECIFICATIONS

Shielding ability the same as the materials these gaskets are made from as detailed in previous products. For custom applications contact TECKNIT. Data sheet A-310.

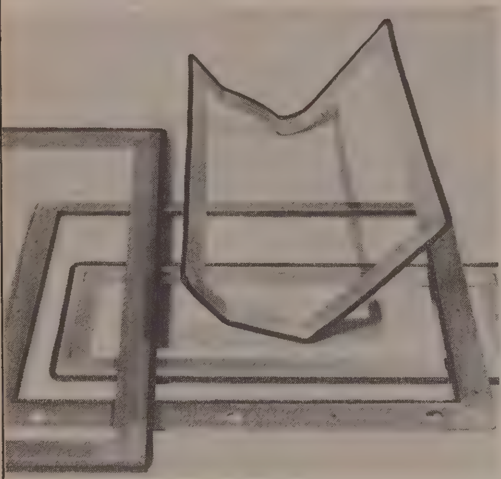
WIRE MESH SHIELDING MATERIAL

WIRE MESH WITH ELASTOMER SEAL

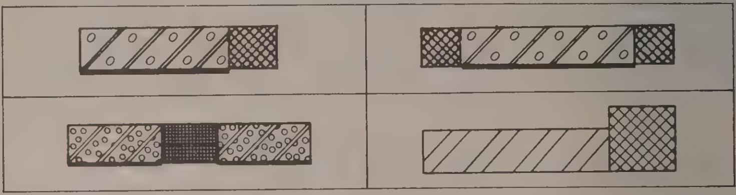


DESCRIPTION

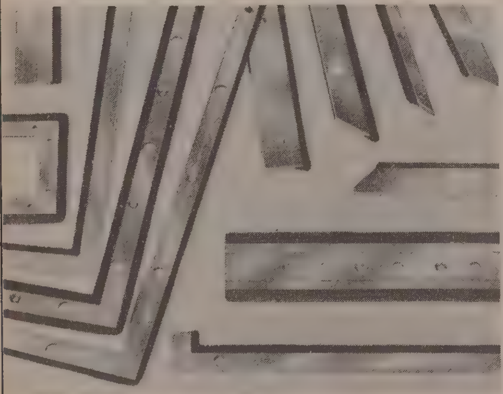
Regular wire mesh EMI gaskets in combination with elastomer gaskets for sealing against air or moisture leaks. The illustrations to the right are but four normal combinations. Others are available. Can be supplied with solid stops to prevent EMI seal flattening.

SPECIFICATIONS

Specifications follow those of the other TECKNIT EMI materials. Elastomer specs depend on type used. Solid silicone may be used over a range of −62° to +260°C. Ask TECKNIT for complete details and recommendations. Data sheet A-431.



WIRE MESH WITH ALUMINUM STRIP

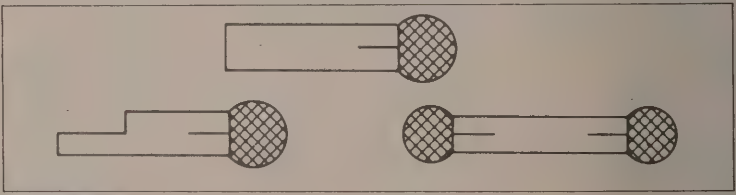


DESCRIPTION

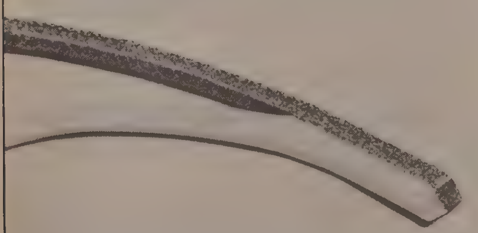
Available in lengths up to 15 feet or custom assembled. Regular TECKNIT wire mesh EMI gasket material applied to sold aluminum extrusions in virtually any imaginable shape. The drawings to the right show three normal shapes.

SPECIFICATIONS

Normally supplied with Monel or Tinned Copper-clad Steel wire mesh attached to 6063-T1 aluminum alloy extrusions. Neoprene and silicone sponge cores available. Temp. range with silicone sponge is −75° to +205°C. Data sheet A-510.



COMPOSITE WIRE MESH AND SILICONE RUBBER STRIP



DESCRIPTION

Monel wire mesh partially imbedded in cured silicone rubber for both military and hi-rel commercial applications. Ideal for installation in cast or machined grooves in enclosures and/or doors. The small cross section saves space and weight. Drawings show three possible cross sections.

SPECIFICATIONS

Wire mesh is Monel per QQ-N-281, Class A or AMS-4730. Sealant is Silicone rubber ZZ-R-765, Class 2A, Grade 50. Color: Gray. Brittle point: −73°C. Composite peel strength: 5.25 N/cm (31 bf/in.) min. Temp.: −62° to +260°C. Data sheet A-800.

METAL FIBERS AND SCREENS

WIRE SCREEN IMPREGNATED WITH ELASTOMER

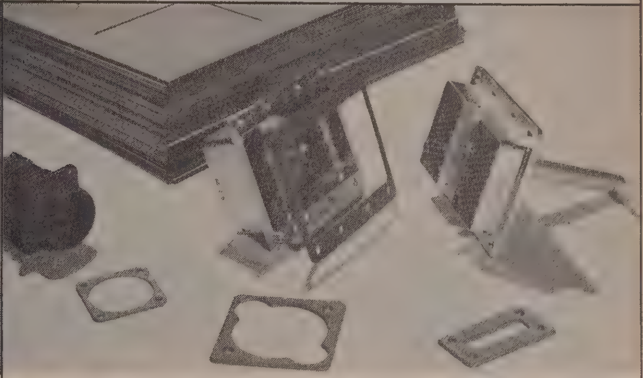
DESCRIPTION

TECKNIT DUOLASTIC solves the dual problem of sealing against liquids and providing an EMI shield. Made of woven aluminum wire screen impregnated with neoprene or silicone fluid sealing material. Both mating surfaces contact the screen as the sealant makes the joint pressure tight.

SPECIFICATIONS

Provides 75-100 dB shielding to 1 GHz. Oper.: −40° to +100°C (Neoprene), −62° to +260°C (Silicone). Thickness: 0.016″ & 0.020″. Max. Size: 8″ wide x 50′ long. Data sheet B-420.

THIN GASKETS OF SINTERED METAL FIBER



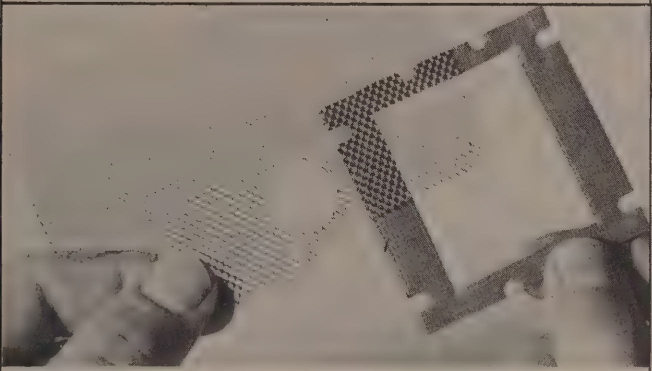
DESCRIPTION

Made of felt/metal fiber in sheet form. Unfilled for normal use. Filled with silicone elastomer to seal against fluids. Supplied in sheets 12″ x 15″ x 0.031″ or 0.063″ thick.

SPECIFICATIONS

Operate: −40° to +200°C. Shielding at 20 psi: (E field) 105 dB (10 kHz) to 65 dB (1.0 GHz), Max. 110 dB (1.0 MHz). Metal Fibers: Steel alloy 347 (Fed Std. 66). Data sheet B-450.

EXPANDED METAL GASKETS



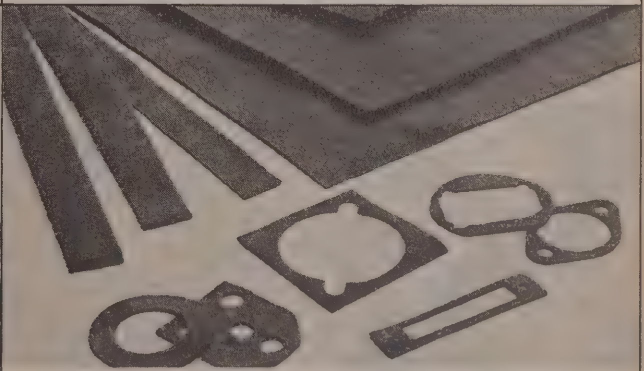
DESCRIPTION

Made in sheets up to 7.5″ wide x 10′ long of Monel or Aluminum. Plain metal for simple EMI shielding or impregnated with silicone for fluid sealing.

SPECIFICATIONS

Oper.: −62° to +260°C with silicone. Closing force 50 psi. Shield: 75 to 100 dB to 1.0 GHz. Two thicknesses: 0.051″ & 0.081″ filled or unfilled. Data sheet B-480.

NICKEL FIBER-FILLED SILICONE ELASTOMER



DESCRIPTION

CONMAX is a composite of randomly oriented nickel fibers uniformly dispersed in a silicone elastomer. May be die cut for EMI gaskets that shield to 135 dB (1 MHz) and withstand 150 psi closure force. Data sheet B-830.

SPECIFICATIONS

Oper.: −54° to +232°C.

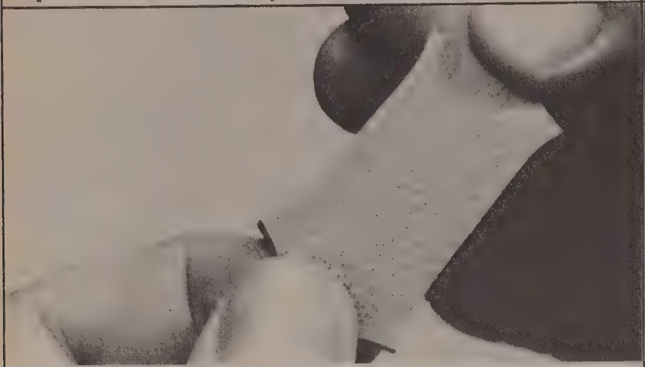
ORIENTED WIRE SHIELDING MATERIAL

IN SILICONE RUBBER (ELASTOMET®)



DESCRIPTION

Monel or Aluminum wires oriented, embedded and bonded in a solid silicone elastomer to provide excellent EMI shielding and sealing in strips or sheets (up to 9″ x 9″).

SPECIFICATIONS

Std. strips 3″ wide up to 11′ long. Wires are convoluted to provide springing action and distributed 960/sq. in. Oper.: −55° to +200°C. Data sheet C-820.

IN SOFT SILICONE SPONGE (ELASTOFOAM®)

DESCRIPTION

Monel or Aluminum wires oriented, embedded and bonded in a soft closed cell silicone sponge elastomer. For closures with irregular surfaces and/or frequent access. In strips or die cut gaskets.

SPECIFICATIONS

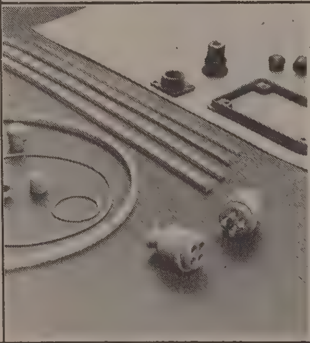
Oper.: −55° to +170°C. Thickness (in.): .062 to .500 Width (in.): .125 to 1.000. Convoluted wire to provide spring action 960/sq. in. Max. compression: 20% (Mechanical stops recommended to prevent overcompression. Data sheet C-880.

CONDUCTIVE ELASTOMERS

EXTRUDED SILVER-FILLED SILICONE

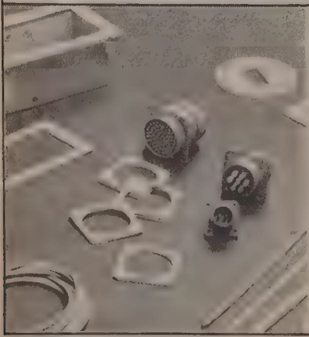
CONSIL-E is a solid continuously extruded silver plated particle filled silicone elastomer material that provides excellent EMI shielding in six standard forms: solid round, tubular, solid "D", finned tubular, solid "U" and solid rectangular in strips to specification. Operate from −51° to +177°C. Data sheet D-180.

MOLDED SILVER-FILLED SILICONE



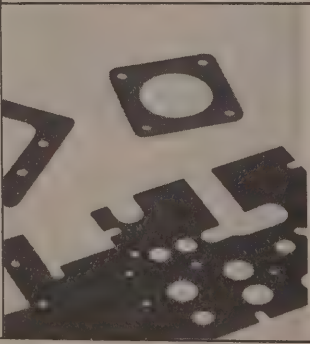
CONSIL-II is a solid silicone elastomer filled with silver coated particles providing high conductivity and broadband shielding (>75 dB). Available in strips, sheets, molded shapes and die cut flat gaskets. Operate from −51° to +177°C. Maximum length for strips is 18″. Data sheet D-840.

PURE SILVER-FILLED SILICONE



CONSIL-R is similar to CONSIL-E & -II except the particles are pure silver for minimum resistance (0.006 Ohm/cm). Available in extrusions or as strips, sheets, molded shapes and die cut gaskets. Operate from −51° to +177°C. Data sheet D-850.

CARBON-FILLED SILICONE



SC-CONSIL provides similar performance to other TECKNIT CONSIL products at lower cost. It is available in strips, sheets (up to 12″ x 18″), extrusions and as molded parts. Particularly suitable as door gaskets for microwave ovens in extruded form. Operate from −54° to +227°C Data sheet D-860.

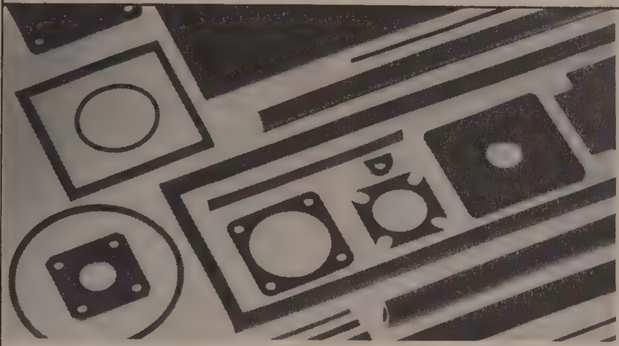
SILVER-COPPER FILLED SILICONE ELASTOMER

CONSIL-C



DESCRIPTION

A silicone elastomer filled with silver plated copper particles to provide broadband shielding effectiveness with excellent moisture sealing for enclosure joints and seams. CONSIL-C is available in sheets up to 12" x 18" and die cut flat gaskets. Standard rectangular, round and solid "D" shapes are available in a wide range of sizes. Hollow strip forms are available on special order.

APPLICATION

CONSIL-C is used for seals for missiles, missile control systems, waveguides and connectors. Recommended compression is 5% at 50 to 200 psi closure force depending on cross section. Typical performance at 10 GHz is 90 dB with a 100 pound closure force. The material is gray with a smooth texture. Data sheet D-870.

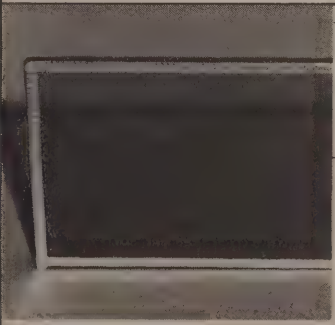
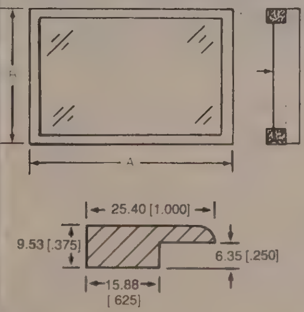
HIGH PERFORMANCE EMC WINDOWS

TECKSHIELD-F





DESCRIPTION

These windows provide optimum optical transmission and excellent EMI shielding in severe interference environments. They are used in "TEMPEST" Visual Display Units (VDU) as well as in printers and enclosures requiring large viewing apertures. A special blackened mesh is laminated between two sheets of flat glass. The edge termination is complete around the perimeter connecting the mesh to the outer TECKNIT DUOGASKET. Full lamination prevents moisture intrusion and improves optical performance. Options include an outer aluminum frame, polarizers, glare reducers and color filters. Maximum size is 14" x 18" with a standard thickness of 0.205". Data sheet PIN-0005.

SPECIFICATIONS

MATERIAL DESCRIPTION

Standard Optical Medium	Glass per Federal Specification DD-G-451, Type I, Class I
Optical Medium Options	
Color	Contact factory.
Surface Finish	P-50, recommended viewing distance 1.25 cm [½ inch] or less P-85, recommended viewing distance 2.5 cm [1 inch] or less. High efficiency coating (less than 1% reflection).
Standard Mesh Screen	Screen mesh per TECKNIT® specification 92-00580, blackened
Open Area	60%
Surface Resistivity (Maximum)	20 milliohms per square
Optional Mesh Screen	Screen mesh per TECKNIT® specification 92-00583, blackened
Open Area	45%
Surface Resistivity (Maximum)	10 milliohms per square
Standard Interface Gasket	Duogasket. **TECKNIT** P/N 43-63985
Optional Frame	Aluminum alloy 6063-T6 per QQ-A-200/9, chromate conversion coated per MIL-C-5541, class 1. Painted when specified.

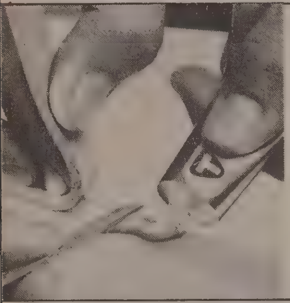
PERFORMANCE CHARACTERISTICS

Shielding Effectiveness Minimum)	Magnetic	10 kHz	60 dB
	Electric	100 MHz	120 dB
	Plane Wave	1 GHz	60 dB
Temperature	−55°C to 80°C		

TECKNIT a TWP company **Eastern** • 129 Dermody Street • Cranford, New Jersey 07016 • (201) 272-5500 • FSCM 07700
Western • 320 North Nopal Street • Santa Barbara, California 93103 • (805) 963-5811 • FSCM 53217

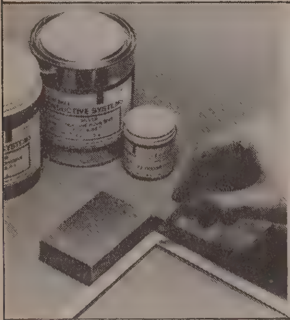
CONDUCTIVE SYSTEMS

SILVER-FILLED SILICONE RTV



The CON/RTV-I system is a pure silver loaded, one component RTV silicone adhesive/sealant. Ready for use without mixing. Cures quickly (Tack free 2 min.) (Handle in 2 hrs.) at room temperature to form seal or bond gaskets to surface. Supplied in 2 oz. tube. Shelf life sealed, 4 mos. Oper.: −60° to +175°C. Resistivity: 0.01 Ohm/cm. Data sheet G-721.

SILVER, NICKEL OR CARBON FILLED

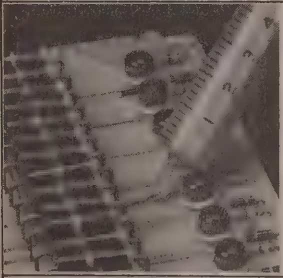


Two part RTV adhesive/sealants in choice of: silver plated, nickel or carbon particles dispersed in a silicone rubber medium which cures to 80% full strength at room temperature in 24 hrs. In 1, 8 or 16 oz. packages with a shelf life as sealed of 6 mos. and a pot life (covered) of 4 hrs. Store at +5° to +30°C. Resistivity (Ohm/cm): Silver (0.01), Nickel (0.10), Carbon (100). Data sheet G-722.

SILVER-FILLED FLEXIBLE RESIN

One part silver/acetate or silver/silicone caulking material with silver coated particles for best conductivity. Better than any carbon or copper system at lower cost. Apply silver/acetate with brush, silver silicone with spatula or caulking gun. Supplied in 1 lb. packages. Set up: 4 hrs. Tack free: 15 min. Data Sheet G-723.

SILVER-FILLED EPOXY

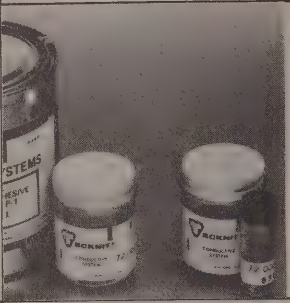


Two part system of epoxy resin and hardener. Choice of flexible cure with silver plated particles or rigid cure with pure silver particles. Low resistivity: 0.02 Ohm/cm (Flex.), .001 Ohm/cm (Rigid). Cure time: Room 24 hrs.; +99°C 30 min. Light creamy paste. Apply with caulking gun. Ideal for waveguides. Data sheet G-724.

SILVER-FILLED SILICONE GREASE

One part system for use on high current sliding electrical contacts. Supplied in handy tubes or jar with indefinite shelf life. Operate: −54° to +232°C with a drop point of +220°C (min.). Prevents contact corrosion. Use on ball & socket joints of insulators to prevent EMI. Data sheet G-725.

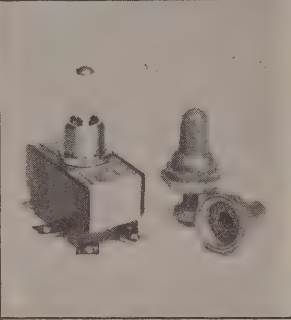
CONDUCTIVE ACRYLIC & LATEX



Provides excellent EMI shielding with attractive finish. Acrylics are sprayable in variety of colors: Silver-gray, beige, gray & black. Latex (beige) can be applied with spray, dip or brush. Available as beige emulsion. All 4H pencil hard. Translucent insulating dielectric sprayable overcoat also available. Data sheet G-730.

SHIELDING COMPONENTS

EMC SWITCH SEALS

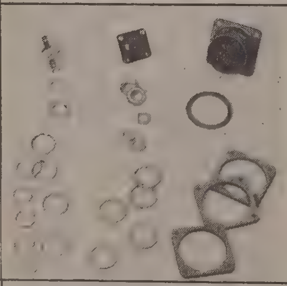


Provides positive physical and EMI seal for standard toggle switches. Replaces standard mounting hardware. Monel wire mesh shield with silicone rubber boot in 3 standard sizes. Also available as shaft seal for ⅛″ & ¼″ shafts. Data sheet H-902.

FUZZ BUTTON

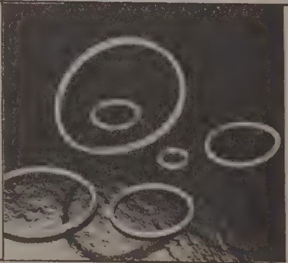
Resilient, low-impedance, multipath contact elements for use as connectors in switches, earphones and the like. Available in diameters from .030″ to .745″ and heights from .030″ to .750″ in a wide choice of materials such as gold plated copper/silver, monel, silver plated brass, etc. Resistivity 5-7 Ohms when loaded. Data sheet H-920.

EMI CONNECTOR GASKETS



Standard EMI shielding gaskets to fit most round (flanged) MIL and commercial connectors. Available in all regular TECKNIT EMI gasket materials such as DUOLASTIC, TECKFELT, etc. Complete list of all standard sizes and types is in data sheet H-903.

CONDUCTIVE "O-SEALS"



Resilient rings of CONSIL-II silicone elastomer in round or rectangular cross section. Combine high electrical conductivity with pressure seal .For use only on static seals (No relative motion). Used on MIL and commercial connector shells and as replacement for MIL MS-29513 items. Data sheet H-904.

TECKNIT a TWP company **Eastern** • 129 Dermody Street • Cranford, New Jersey 07016 • (201) 272-5500 • FSCM 07700

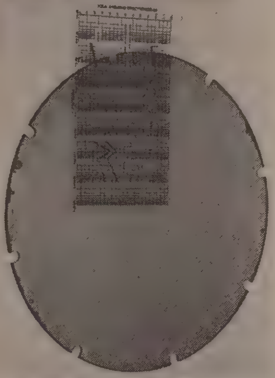
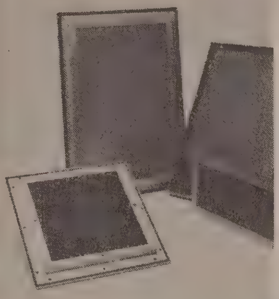
SHIELDING WINDOWS AND VENTS

ELECTRICALLY CONDUCTIVE & TRANSPARENT



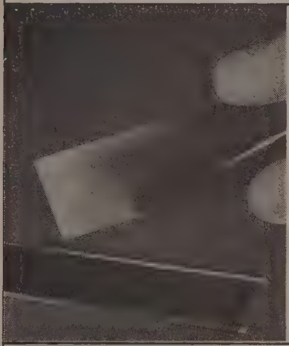
For use in applications requiring EMI shielding in flat or curved surfaces up to 24″ x 30″. For CRT, instrument and viewing use. Substrate may be any transparent material such as glass or plastic. The ECTC coating prevents EMI energy from entering or leaving the device. Standard mounting is by means of an aluminum frame for continuity. Data sheet EMC-700.

ALUMINUM HONEYCOMB AIR VENT PANELS



TECKCELL panels provide the maximum EMI shielding with minimum air flow restriction and at lowest possible cost because of standardized construction. Available in a wide variety of standard sizes to fit openings from 2″ x 2″ to 18″ x 18″. A chromate finish is standard on the aluminum frames. Many custom sizes can be supplied. Available with rainshield and foam filter. Data sheet F-600.

TRANSPARENT CONDUCTIVE COATING ON POLYESTER FILM



TECKFILM. For application to any transparent panel in sizes up to 24″ x 24″. Only .005″ thick and colorless. Vacuum deposited gold with a protective ceramic overcoat. Haze is 5% or less. Shielding effectiveness is 140 dB at 1 kHz decreasing to 25 dB at 10 GHz. Easy to apply to any clean flat surface. Data sheet E-701.

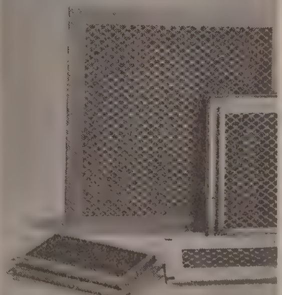
STEEL HONEYCOMB AIR VENT PANELS

These TECKCELL panels provide excellent magnetic shielding but at a reduced EMI capability compared to aluminum TECKCELL. Tin plating provides better EMI shielding, but cadmium plating is also available. Standard sizes fit openings from 2″ x 2″ to 18″ x 18″. Custom sizes, rainshields and foam filters are available. Data sheet F-620.

LAMINATED SHIELDING SCREEN

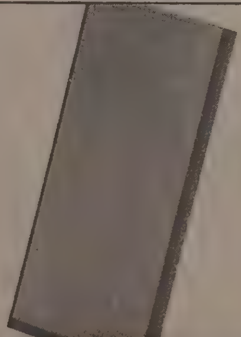
Laminate consists of ultrafine Monel wire knitted mesh between transparent acrylic sheets of any desired color and up to any practical size. An EMI gasket contacts the inner mesh at the outer edges of the panel perimeter to provide complete current path. Available with polarizers and nonglare surfaces. Effective from 1 kHz to 100 MHz. Data sheet E-710.

DUST ARRESTING ALUMINUM AIR VENT PANELS



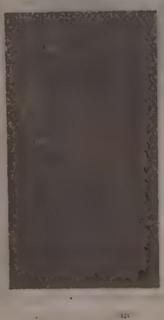
TECKSCREEN panels have a permanent all-metal filter medium, frame and interface EMI gasket. Both faces of the panel have a protective expanded metal grille. Basic construction is aluminum with a chromate finish. Sizes same as standard TECKCELL vents. May be used with most standard cooling fans. Data sheet F-630.

CAST EMC WINDOWS



Custom designed cast acrylic windows in any color with fine wire knitted mesh EMI shielding cast in place. Thicknesses: .062″ & .125″. Sizes up to 18″ x 22″. Mesh is Tinned copper-clad steel or monel. An outer EMI seal must be used to provide current path. Effective from 1 kHz to 10 GHz. Data sheet E-711.

THIN DUST/EMI FILTER PANELS



TECKAIRE® panels are ultra thin and feature a viscous (water soluble hydrocarbon oil) coating for trapping dust. Frame is only .188″ thick including EMI gasket. May be EMI self-gasketed for minimum surface projection (.180″) with decreased opening size. All made to custom requirements with excellent EMI shielding. Data sheet F-640.

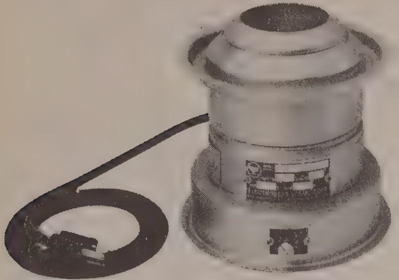
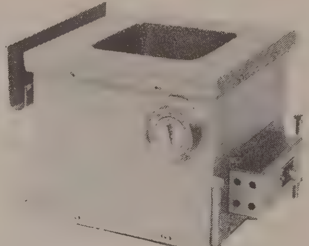
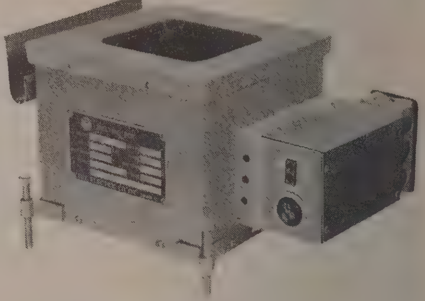
DEE ® SOLDER POTS

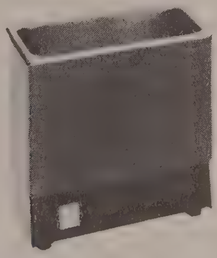
• Round, square and rectangular models from the most reliable name in solder pots — DEE Electric (an Electrovert Company) • Rugged and dependable for heavy-duty uses • High thermal conductivity guarantees rapid heating, uniform solder bath temperature, and stable temperature control • Interior of heavy-duty cast iron crucible is smooth and free of all welds, heating elements and thermocouples • All pots are fully insulated. A very low watt density ceramic heating element encircles the crucible • Capacities from 1 lb. 4 oz. to 2 lbs. 12 oz. • Heating elements and other Dee manufactured components are warranteed for 18 months.





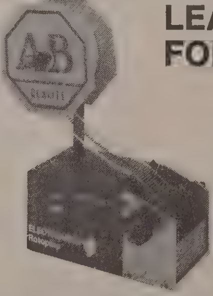


ULTRASONIC CLEANERS



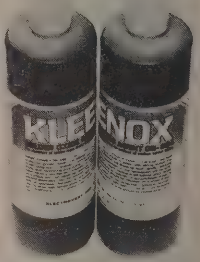
• Durable and reliable with self-contained generator and transducer elements bonded to bottom of stainless steel tank • ½, ¾, 1 and 1½ gal. capacity models with accessories • Solid state circuitry provides stable temperature in cleaning tank and stable output frequency that automatically and continually adjust to changes in solution level • Available 110/120 and 220/240 VAC, 50/60 Hz • Automatic timers and heaters available.

LEAD FORMING



• Rotoprep™ is a high speed unit for ⅛ to ½ watt size axial components . . . on tape and reel, or with optional attachments, card feed • Speed control can be adjusted from 0 to 33,000 parts per hour • Can be easily and quickly adjusted • To set up production run, simply loosen 2 set screws and manually position ratchets and tape quides. • Electrically operated from any standard 115 VAC, 50/60 Hz outlets. 230 VAC, 50/60 Hz optional.

KLEENOX® SOLDER RECOVERING AGENT



• A liquid solder-oxide reducing agent makes possible the recovery of 60 to 80% pure solder from molten baths • Applied after each 8 hour shift • One tablespoon will activate the bath within 5 minutes, separating the solder from the dross.

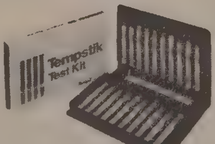
LEV CHEK SOLDERWAVE GAUGE

• A simple, effective diagnostic tool for monitoring flux coverage, wave shape, wave turbulence and conveyor leveling in wave solder systems • Permits "topside" observation of "wave-to-board" contact.

DESOLDERING TOOL

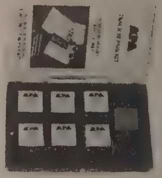
• Offers full industrial performance at an "economy" price • Features all metal precision construction • Suction is precisely regulated for efficient solder removal without damage to delicate circuitry • Self-cleaning.

TEMPIL STICK KIT



• An invaluable tool for accurate temperature measurements • To use, simply mark surface to be heated. Mark will melt when specified temperature is reached • Wide variety of temperature ratings is available.

PCB REPAIR KIT



• Repair PCB circuitry quickly, easily • Includes everything you need to repair or replace PCB circuitry, including plated through-holes • Complete ready-to-use with circuitry, tools, materials and instruction manual.

SOLDER SERVICE KITS*

1. Flux Hydrometer: for testing flux specific gravity from 0.800 to 1.000 in 0.005 graduations **2.** Illuminating Magnifying Lens: 5X power; with batteries and carrying case **3.** Thermometer: (8″) calibrated from —150 to 1000°F. **4.** Tempil Stik: rated at 175°F. **5.** Surface Pyrometer: for spot checking surface preheat. Rated 50 to 1000°F. **6.** 18″ Titanium Board Stiffener: to support large PC boards during wavesoldering. Prevents warping **7.** Safety Glasses: laminated safety eyeglasses **8.** Insulated Gloves: 1 pair, heavy duty **9.** Wavesolder Tool Kit: Allen key set (5/64″ to 1/4″); open end wrench (5/16″ and 3/8″); lug wrench for solder drain valve (Electrovert Systems); stainless steel spatula; and nozzle scraper.

* Items 1 through 9 sold together as a kit, or separately. Hydrometer tips, floats, and bulbs also sold separately.

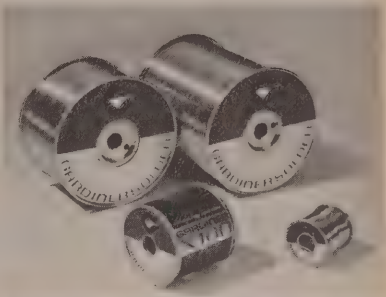
GARDINER SOLDERING PRODUCTS

GARDINER SOLID & FLUX CORED WIRE SOLDERS



Solid Wire Solder: Uniform in diameter and alloy and are equal to flux cored solders in purity and quality. All standard diameters.
WW-300 Rosin Cored Wire Solder: Available in any solder alloy, many wire sizes and flux core percentages. Conforms to Fed. Spec.: QQ-S-571, Type R.
XM-200 Mildly Activated Rosin Cored Wire Solder: For use with easily solderable metals whose surface tarnish is not easily removed. Meets Fed. Spec.: QQ-S-571, Type RMA.
X-45 Highly Active Rosin Cored Wire Solder: Meets Fed. Spec.: QQ-S-571, Type RA.
X-55 Activated Rosin Cored Wire Solder: For super-critical electronic circuits. Activator leaves only pure rosin residue. Conforms to Fed. Spec.: QQ-S-571, Type RA.

X-90 Super Activated Rosin Cored Wire Solder: For use when activated Rosins fail to remove heavily oxided films on metals.

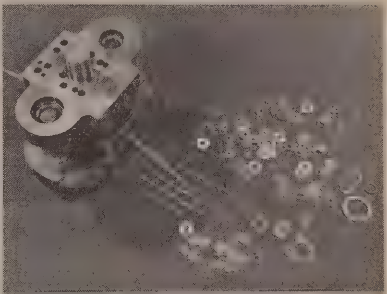
OR-300 Organic Flux Cored Wire Solder: Developed to overcome problems inherent with difficult-to-solder metals.

OR-350 Organic Flux Cored Wire Solder (Water Soluble Residues)- A halide-free solid flux core developed for soldering electronic devices compatible with water.

OR-400 Organic Flux Cored Wire Solder: For difficult-to-solder metals which cannot be soldered with activated Rosin fluxes.

OR-500 Organic Flux Cored Wire Solder: For difficult-to-solder parts due to mass or a heavily oxidized coating.

X-100 Activated Rosin Cored Wire Solder: Conforms to Fed. Spec.: QQ-S-571, Type RA.
Mildly Activated and Activated Solder Pastes: Available in any solder alloy and in particle sizes from 200 to 325 mesh, Mildly Activated and Activated Rosin Flux Pastes adhere to Fed. Spec.: QQ-S-571, Type RMA or Type RA.
GSP-5800 Organic and GSP-6800 Inorganic Chloride Solder Pastes: Available in all solder alloys and in any particle sizes from 200 to 325 mesh. Flux residues are water-soluble.



GARDINER SOLDER PREFORMS

Solid or Flux Cored Solder Preforms: Rings, washers, discs, sleeves, pellets or segments in any alloy, flux type and percentage, for reliable, automated electronic soldering.

GARDINER PURE-A-LOY BAR SOLDERS & ANODES

PURE-A-LOY Cast and Extruded Bar Solders: Purest, electronic solder commercially available. Exceeds QQ-S-571 and ASTM specifications.
PURE-A-LOY Extruded Anodes: Advantages: 1. Uniform oxidation and maximum life anodes. 2. Faster plating. 3. Less sludging and necking. 4. Bright, dense and uniform plated coating.

GARDINER FLUXES & RELATED PRODUCTS

Series GF-1000 Water-white Rosin Flux: Removable residue. Meets Mil-F-14256, Type R.
Series GF-1100 Water-white Rosin Flux: Same as GF-1000 but much faster drying action.
Series GF-1200 Mildly Activated Rosin Flux: Conforms to Mil-F-14256, Type RMA.
Series GF-1400 Super Mildly Activated Rosin Flux: Conforms to MIL-F-14256, Type RMA while nearly matching power of Mil-approved RA flux.
Series GF-2000 Activated Rosin Flux: Highly stable flux having an excellent wetting action.
Series GF-2100 Activated Rosin Flux: For foaming application in automated soldering.
Series GF-2200 Activated Rosin Flux: Designed for the very-hard-to-handle soldering jobs.
Series GF-2300 Activated Rosin Flux: For automatic soldering.
Series GF-2400 Mildly Activated Non-Halogen Rosin Flux: Designed for foaming application.
Series GF-2500 Activated Rosin Flux: Rosin Flux used in Gardiner X-45 cored wire solder.
Series GF-2600 Activated Rosin Foam Flux: Meets Federal Specification Mil-F-14256.
Series GF-2700 Activated Rosin Liquid Flux: Meets the Mil-F-14256 amendment of 1975.
Series GF-2800 Activated Rosin Flux: Conforms to QQ-S-571, amendment of June 1975.
Series GF-5100 Aquasolv Organic Flux: Water soluble, easily removable.
Series GF-5300 Aquasolv Organic Flux: For automated soldering of printed circuit assemblies and printed circuit cards using the Hydro-squeegee Process. Residues are completely removed.
Series GF-5400 Aquasolv Organic Flux: For electronic components compatible with water.
Series GF-5500 Aquasolv Organic Flux: For reflow soldering of plated circuit boards.
Series GF-8000 Surf-Klean Copper Cleaner: For removal of thick tarnish films.
Series GF-8500 Surf-Seal: For printed circuit boards during extended storage.
GFT-3000 Rosin Flux Thinner: For GF-2000 Activated Rosin Flux.
GFT-3100 Rosin Flux Thinner: For GF-1000 WW Rosin Flux.
GFT-3200 Rosin Flux Thinner: For organic fluxes GF-5132 and GF-5425.
GFT-3300 Rosin Flux Thinner: For GF-2100F.
GFT-3400 Rosin Flux Thinner: For GF-2300 and GF-2400 Activated Rosin Fluxes.
GFT-3500 Rosin Flux Thinner: For GF-2400F and GF-2600F Activated Rosin Fluxes.
GFT-3600 Rosin Flux Thinner: For GF-1100 and GF-2200.
GFT-3700 Rosin Flux Thinner: For GF-2700F.
GFT-3800 Rosin Flux Thinner: For GF-2200.
GFT-3900 Rosin Flux Thinner: For GF-2800F.
GFR-4000 Rosin Flux Remover: May be used in a vapor degreaser.
GFR-4060 Rosin Flux Remover: Similar to 4000 but a little more active.
GFR-4100 Rosin Flux Remover: Dissolves rosin residues, ionic soils, greases and oils.
GFR-4300 Rosin Flux Remover: For cleaning polycarbonate resins.
GFR-4420 Rosin Flux Remover: Dissolves rosin residues, ionic soils, greases and oils.

Gardiner Solder Analysis Program

Analysis of solders-in-use is necessary for avoiding problems of tin depletion and foreign metal contamination.

Gardiner Test Laboratory now offers a selection of three groups of solder analyses. Each group is designed specifically to control the level of soluble metals introduced during the soldering process. Issued to the customer with each analysis is a typed laboratory report with a brief assessment of contamination.

PROBLEM SOLVING TECHNOLOGY FOR EVERY SOLDERING NEED.

More than eighty years experience in the solder industry stand behind every Kester product. The Kester name means product purity . . . technological superiority . . . the highest standards of business practice . . . experienced, qualified personnel . . . and competitive prices. The complete line of Kester solders, fluxes and related chemicals are manufactured in five plants, assuring fast shipment at the lowest cost.

With world-wide research facilities, Kester traditionally leads the industry in product development and problem solving. Customers are encouraged to call on Kester for technical assistance in the field, regional lab support and soldering analysis services.

At Kester, we're dedicated to helping you meet your solder & chemical requirements with the best products and services available in the world today. Write or call for detailed literature on the complete line of Kester products for your industry.

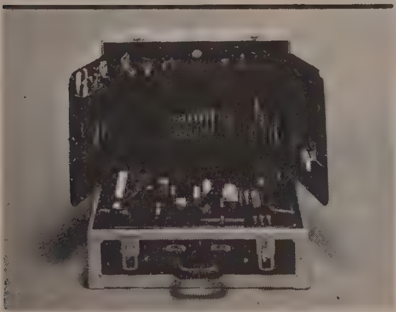
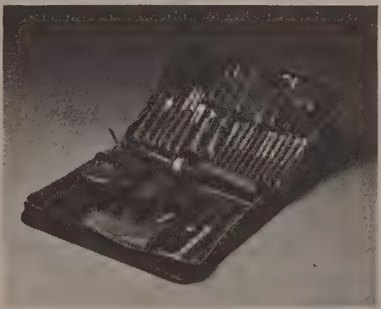
JTK-87LCST Two-pallet kit with special circuit board compartment.

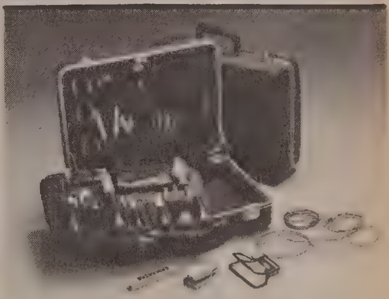
JTK-17ST Field Engineer's Kit in super-tough two-pallet case.



JTK-99 Service Technician's Kit in three styles of rugged wing pallet cases.

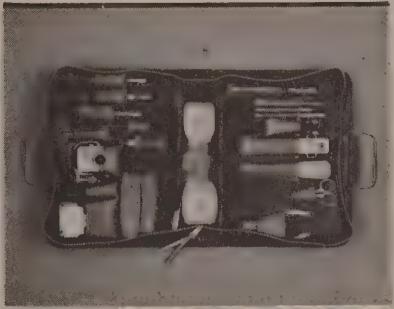


JTK-65 Computer Terminal Printer Maintenance Kit in zipper case with or without handles.



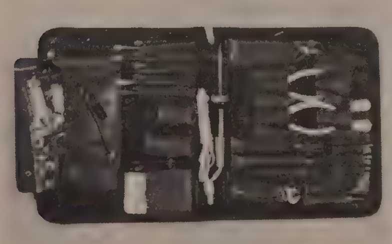
JTK-66 Computer Technician's Kit in two-pallet injection molded case.

JTK-54 Central Office Telecommunications Kit in two-pallet attache' case.



JTK-44 Telecommunications Kit for outside plant, cable TV, Telecommunication servicing.

JTK-81 Designer Draftsman Kit. More than 50 drawing aids in a deluxe attache' case.



JTK-16 Service Technician's Kit in padded zipper cases: vinyl, Cordura nylon, or leather, with or without handles.

Custom Kits Complete custom tool kit service featuring any type of specialized tools or tool case you need.

Free Catalog

Complete selection of tool kits, test equipment, and hard-to-find precision tools.

YOU CAN'T SEE IT

BUT IT CAN DESTROY YOUR BEST DESIGN

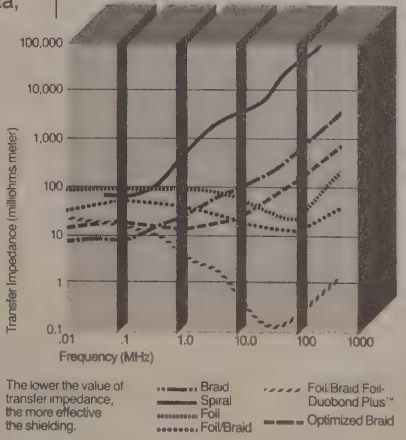
The next time your performance is measured by the success of your system's design, take a closer look at the critical link: will the shielded cable you select maintain signal integrity? At Belden, we're working to protect this critical link.

Shield Effectiveness
With the convergence of data, audio and video transmissions, one of the greatest challenges is to preserve the integrity of each signal. This evolution of technology, coupled with the need to comply with FCC regulations has created a growing demand for sophisticated cable shielding.

Belden responds to these demands with innovative shielding and shield effectiveness test methods to supply you with high quality, dependable electronic wire and cable.

How you control interference with shielded cable is a critical link to successful system design.

Transfer Impedance Test Results



The lower the value of transfer impedance, the more effective the shielding.

Test Methods Protect Your System
To help you define interference problems, Belden's Technical Research Center evaluates the development, implementation and refinement of shields and shield effectiveness testing. Our Transfer Impedance Test is but one of many rigorous tests employed by Belden engineers. The procedures we use help you select the proper shielded cable that results in cost-effective system performance.

Effective Assistance
Belden has recently published a *Cable Shield Performance and Selection Guide*. It's free, and it helps you define your interference problem, acquaints you with current FCC regulations, and familiarizes you with the trade-offs associated with different shield designs and Belden's various test procedures for measuring shielding effectiveness. Shield performance results are detailed from each test to properly guide your cable selection.

Contact Belden today for your free personal copy. Belden Electronic Wire and Cable, P.O. Box 1980, Richmond, IN 47375. Phone: 317-983-5200.

There is no equal.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

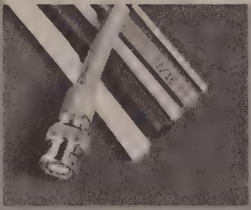
RELIABILITY BY DESIGN.

alpha reliability extends beyond our precision-engineered products that are used in computer design. It also includes personal service, off-the-shelf availability, small-quantity orders, and on-time deliveries from our worldwide network of **Authorized Alpha Distributors.** These well-trained, courteous professionals can provide you with precise and useful information that can make your job a little easier and a lot more productive. And, you can always rely on **Alpha** engineers for all the technical assistance you need, from product engineering support to samples for use in prototype design.

For more information about the **Alpha** line of high-performance, reliable products for the computer industry, or product catalogs with complete selection criteria, applications and specifications, contact your local **Alpha Distributor** or call **Alpha Wire Corporation.**

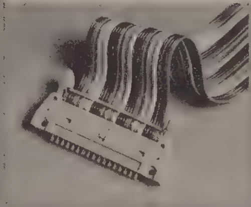
Data Cable—

Rely on **Alpha** as a single, quality source for a complete line of data transmission cable and accessories for computer and information systems interfaces. Products in-



FIT® Shrinkable Tubing—

Alpha is Number 1 in the industry with a full range of sizes, colors, preformed shapes, adhesive coatings and packaging options that make it easy to select



Flat Cable & Connectors—

Alpha's new 4-wall header, center-polarized female socket and metal shell D-subminiature enclosure are just a part of the total **Alpha** System for Mass Ter-

OMNIGUARD™ Electronic Cable—

Alpha's totally new concept of hazard-matched cables provides a wide margin of protection against environmental risks, both indoors and out—moisture, cleanclude 50 to 100-Ohm coaxial, triaxial, data, individually and/or overall shielded multi-pair cables and molded cable assemblies for RS-232C and IEEE-488 applications.

the correct tubing for any application. Most meet the performance requirements of MIL-I-23053 and are UL and CSA recognized.

mination that lets you make all the right connections. Most of the **Alpha** line is dimensionally compatible with French Specification HE10 and DIN 41651. Almost every **Alpha** connector has UL and CSA approval and is QPL-listed.

ing fluids, disinfectants, chemicals, oils, temperature extremes, mechanical abuse, and many others. Available with 2-100 conductors, 2-60 pairs, in all AWG sizes from 24 to 12, in several UL and CSA styles. Order it unshielded, foil shielded, or with **SUPRASHIELD™** for maximum signal-emissions protection.

alpha

Performance.
Right down the line.

ALPHA WIRE CORPORATION

Instrumentation Cable	300-600	60-105	12-26	BC, TC	PE, PP, PVC RUB, XLP, EPR	PVC, NEO Hypalon	Optional
Plenum Cable	300-600	200	12-24	BC	FEP	FEP	Optional
Portable & Flex. Cord	300-600	60-105	10-18	BC, TC	PVC, RUB, NEO HYP, EPR, XLP	PVC, RUB NEO, HYP	Optional

LEGEND:
BC = Bare Copper
CW = Bare Copper Covered Steel
EPR = Ethylene Propylene Rubber
FEP = Florinated Ethylene Propylene
FPE = Cellular (foam) polyethylene
HYP = Hypalon (DuPont™)
NVC = Non-Contaminating PVC
NEO = Neoprene
RUB = Rubber
PE = Polyethylene
PP = Polypropylene
PVC = Polyvinyl Chloride
SC = Silver Coated Copper
SSP = Semi-solid polyethylene
TC = Tinned Copper
XLP = Cross-linked Polyethylene

***AVAILABLE SHIELDS:**
- Aluminum/Polyester Tape
- Bare or Tinned Copper Tape
- Bare or Tinned Copper Braid
- Spiral Wrapped Tinned Copper

Celebrating 60 years of service to the electrical and electronic industries.

AMERICAN
INSULATED WIRE CORP.

36 Freeman Street • P.O. Box 880 • Pawtucket, RI 02862 • 401-726-0700

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire guage

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction code
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct curent
DIL dual in-line
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

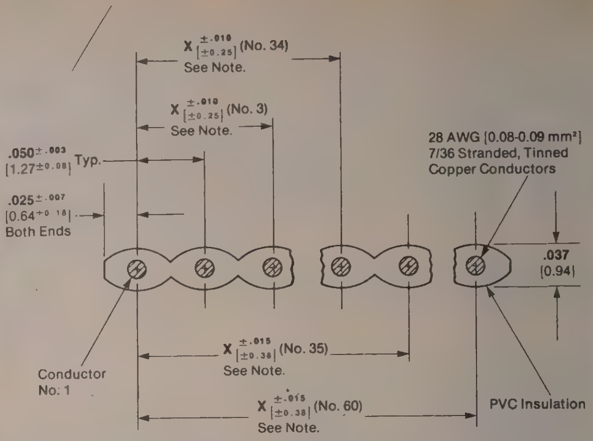
WPS word processing software

Y

YIG yttrium iron garnet

AMP Ribbon Cable

AMP
CAL
100 FT



Note: Tolerance of dimensions between conductors 1 and 3 thru 34 is ±.010 [±0.25]; tolerance between conductors 1 and 35 thru 60 is ±.015 [±0.38].

Temperature Rating: −20°C to +105°C
Voltage Rating: 300 volts per UL Style 2651
Insulation Resistance: 10,000 megohms per 10 ft. [3.05 m] (minimum)

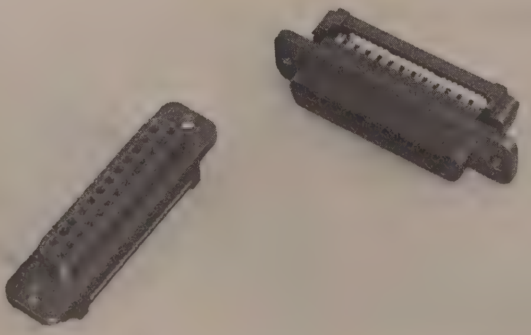
Features: ■ Recognized under the component program of Underwriters Laboratories Inc. File No. E53793, UL Style ® 2651 ■ 100 feet [30.48 m] and 300 feet [91.44 m] lengths without splices ■ Available with evey fifth conductor marked in 100 foot lengths ■ Can be readily "ripped" or slit to obtain less no. of conductors ■ Symmetrical geometry for ease of registration while terminating on either side of cable ■ Manufacturing methods provide cable stability for consistently reliable terminations ■ Dark blue color stripe on number one conductor for easy cable orientation ■ Compatible with all slotted beam connector technologies on .050 [1.27] centers

HDF-20 Low Profile Connectors

(for Round Conductor Flat Ribbon Cable)



Features: ■ Low profile design; .335 [8.51] max. from top of connector flange to back of cover ■ One-step termination of housing assembly and cover ■ Terminates flat ribbon cable with 30 AWG [0.05 mm²] solid, 28 AWG [0.08-0.09 mm²] solid or stranded and 26 AWG [0.12-0.15 mm²] solid conductors ■ Mates with any standard AMPLIMITE subminiature HD-20 or military (D type) connector ■ Plug and receptacle assemblies, all-plastic or with front metal shell, in 9, 15, 25 and 37 positions ■ Two-piece construction; UL recognized black thermoplastic, 94V-0 rated ■ Right-angle (90°) cable terminations ■ Contact centerline transition from .109 [2.77] at connector interface to .100 [2.54] (.050 [1.27] staggered) at cable termination ■ Duplex plated AMP-LATCH insulation displacement crimp contacts ■ No cable preparation required, except for cutting the cable end square ■ End-termination and daisy chain applications ■ Convenient circuit probe testing after cable termination

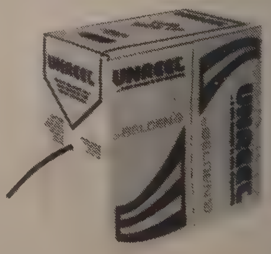
Belden "UNREEL®" Dispensers

- Easy to use.
- Light in weight.
- Faster than standard reels.
- Easy to store and transport.
- No snagging, twisting and kinking.
- Not liable to backlash.
- Continuous feed-out system.
- Efficient throw away Packaging.

Belden cables are available in unique "UNREEL" dispenser packs. "UNREEL" overcomes the problems associated with spools and reels. "UNREEL" is economical: so easy to use, it saves up to 30% of your time on every job, compared to conventional spool and non spool fed systems. To order, add the letter "U" before desired length. Example Belden Part No. 8451 Length U-1000.



MULTI-CONDUCTOR CABLES

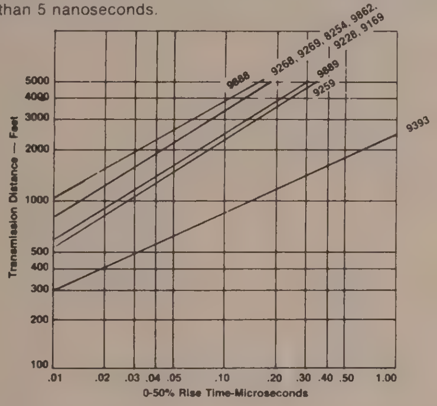
Coaxial Computer Cables

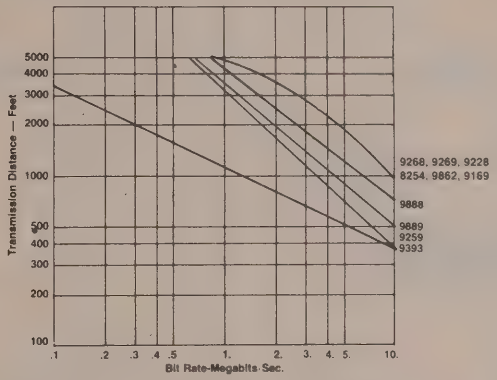
RISE TIME

Cables are terminated in their characteristic impedance. Signal source electrical characteristics: 50 ohms and 10% to 90% rise time less than 5 nanoseconds.

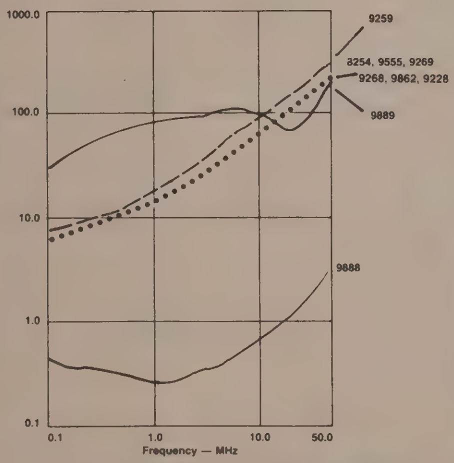


BIT RATE

Charts assume 5% peak to peak time jitter as determined by eye pattern measurements of pseudorandom NRZ code.



TRANSFER IMPEDANCE (Milliohms/Meter)



SINUSOIDAL FREQUENCY ATTENUATION CHART

Locate the line on the chart which represents the desired cable

Locate the frequency on the bottom horizontal scale

Read up to the desired line and then across to the vertical scale on the left to find attenuation figure for that frequency.

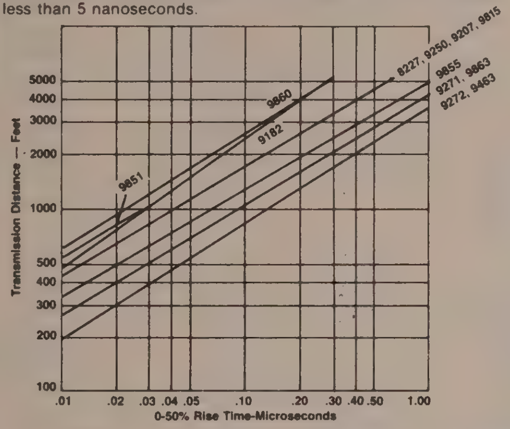
Twinaxial 2 & 3 Pair Data Cables

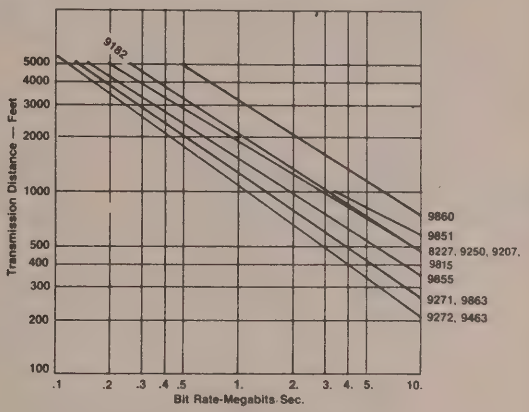
RISE TIME

Cables are terminated in their characteristic impedance. Signal source electrical characteristics: 50 ohms and 10% to 90% rise time less than 5 nanoseconds.

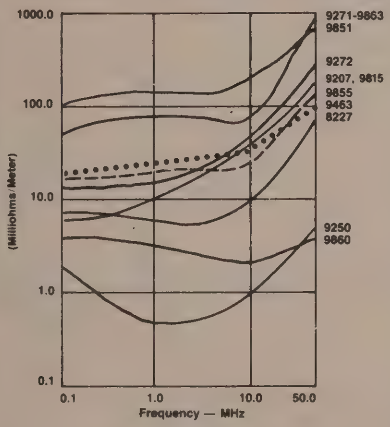


BIT RATE

Charts assume 5% peak to peak time jitter as determined by eye pattern measurements of pseudorandom NRZ code.



TRANSFER IMPEDANCE



ATTENUATION CHART

Locate the line on the chart which represents the desired cable.

Locate the frequency on the bottom horizontal scale.

Read up to the desired line and then across to the vertical scale on the left to find attenuation figure for that frequency.

6 dbv LENGTH LIMIT — DC LINE LOSSES

6 dbv limit is the cable length for which 50% of the DC input volume appears across the load if the cable is terminated in its characteristic impedance.

COMPUTER CABLES
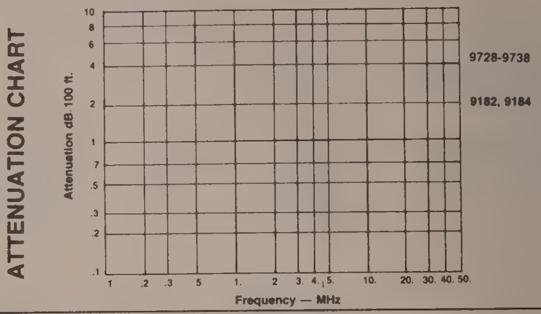
Datalene Insulated Cables

Datalene™ Insulated Cables MEETS EIA RS-422 TYPE REQUIREMENTS

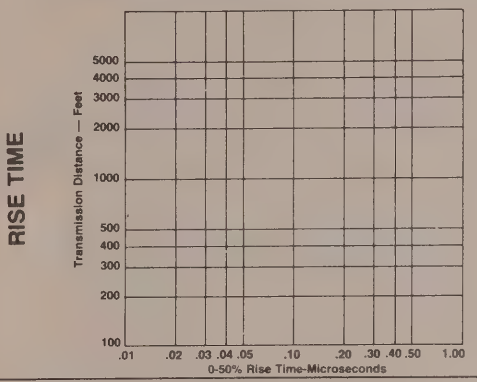
INDIVIDUALLY SHIELDED PAIRS

DATALENE — insulated line of shielded pair electronic cables are designed for precision computer and data communications applications. DATALENE insulation features are low dielectric constant, and a dissipation factor for high-speed, low-distortion data handling. Physical properties include good crush resistance and light weight.

6 dbv LENGTH LIMIT — DC LINE LOSSES
6 dbv limit is the cable length for which 50% of the DC input volume appears across the load if the cable is terminated in its characteristic impedance.



Cables are terminated in their characteristic impedance. Signal source electrical characteristics: 50 ohms and 10% to 90% rise time less than 5 nanoseconds.



Charts assume 5% peak to peak time jitter as determined by eye pattern measurements of pseudorandom NRZ code.

the wire protectors

BREEZE-ILLINOIS, INCORPORATED
Designs and Manufactures
Interconnector assemblies
that are Shielded Against
EMI, EMP, RFI, Nuclear
Radiation, Compromising
Emanations (TEMPEST),
Mechanical Stressing,
Chemical Environments,
Weather and Temperature

Breeze-Illinois, Inc. has over 50 years experience in the manufacture of quality interconnection systems including design, development, manufacturing and evaluation for wide-ranging applications in industry, NASA, and the military. The company specializes in protected cable assemblies. These systems include all types of electrical and optical systems, pneumatic links and hybrid combinations. They are produced under the Breeze-Illinois trade names of:

- **Bi-LINK™** Complete interconnector systems custom designed to fulfill the requirements of specific customer applications.
- **BiSHIELD™** Cable assemblies designed to customer specifications or Breeze-Illinois standards to fulfill specific protection requirements.
- **Bi-PRO™** Metallic and non-metallic flexible convoluted conduit wire-ways that protects transfer media against all outside influences.
- **Bi-OPTIC™** Fiber optic interconnectors and hybrid systems using combinations of fiber optics and conventional transfer media.
- **Bi-TEST™** Precision test cables specifically constructed to fulfill the rigid requirements of test environments.
- **Bi-SHELL™** Backshell terminations and other hardware that pertains to the termination of protective wire coverings.

Interconnectors are our only product line. We offer quality components off-the-shelf or we can study your systems requirements and prepare trouble-free, reliable and efficient interconnections for you. We will prepare proposals, write reports, build prototypes and make complete test and evaluation studies.

So contact us for any interconnector need—large or small. Breeze-Illinois can save you money, space, weight and time and eliminate or avoid your interference and/or environmental protection problems too.

The name Breeze-Illinois is synonymous with wiring protection.

Our experience in manufacturing our own hardware such as coupling nuts, backshell assemblies, junction boxes, branches and connectors has established the name Breeze as the standard in the protected cable assembly field. We are highly competitive and best qualified to construct custom designed assemblies for our customers—from one assembly to thousands of copies. If you wish to assemble your own interconnectors, we manufacture individual components and can supply many off-the-shelf items for your interconnector needs. We also braid textiles such as Nylon and Dacron to wire bundles from your simplest design to your most complicated system.

We have a nationwide network of sales representatives anxious to serve you—Call or write us today.

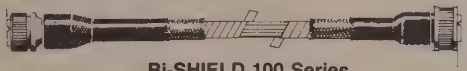
Bi-SHIELD™ Cable Assemblies

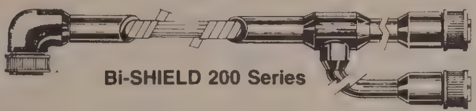
Custom Designed Interconnector Assemblies for Every Application

Breeze-Illinois' complete line of cable assemblies offer shielding, environmental and mechanical protection covering all applications. Custom designs and unique combinations are our specialty and are too numerous to list. Basic series configurations are shown below. Let us know your requirement. Our engineers will help design in the protection that is right for your system.



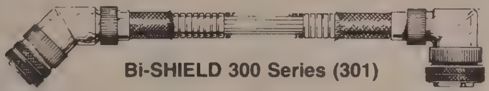
Bi-SHIELD 100 Series

For cost effective, light weight, service flexing applications.



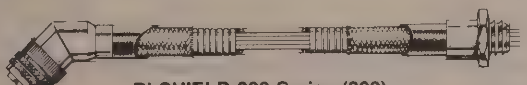
Bi-SHIELD 200 Series

Bi-SHIELD 200 series. Environmental protected cables through molded and blown on elastomer jackets or extruded jackets.



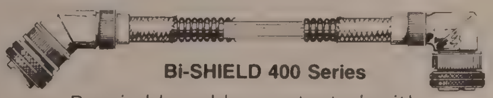
Bi-SHIELD 300 Series (301)

Repairable cables protected with Bi-PRO metallic convoluted conduit for high shielding levels



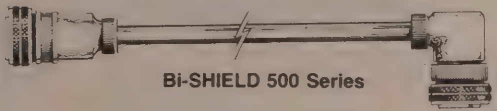
Bi-SHIELD 300 Series (302)

Cables protected with Bi-PRO metallic convoluted conduit for high shielding levels and environmental protection.



Bi-SHIELD 400 Series

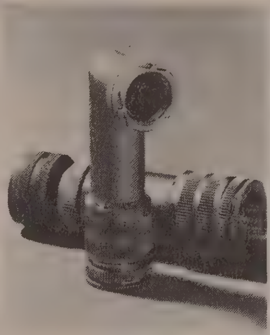
Repairable cables protected with Bi-PRO non-metallic conduit for good environmental protection.



Bi-SHIELD 500 Series

Cables constructed from commercial bulk cable and state of the art backshell adapters.

Bi-SHELL™ Cable Terminations



Superior Backshell Designs As Versatile as They are Varied

Pictured here is the unique field maintainable and repairable shielded backshell, the Bi-SHELL 60. It allows repeated assembly/disassembly with no degradation to its shielding capabilities or mechanical integrity. Breeze will design custom backshells for specific applications or problem situations. Call today for more information. We have service representatives close to you.

BRIM WIRE — CABLE — TUBING — HARDWARE
ELECTRONICS, INC. FAIR LAWN, N.J. 201-796-2886

BRIM CHV CORONA RESISTANT HIGH VOLTAGE TEFLON* CABLE

BRIM CHV eliminates the need for bulky, thick insulation, as used with silicone rubber high voltage cables, and provides high temperature resistance not available with polyethylene insulated high voltage cables, plus the added benefit of retarding and detering corona discharges. Even under severe stress, including mechanical strain, moisture, corona or chemical, or high temperature conditions, there is no cracking of the insulation. Cable construction meets and exceeds MIL-W-16878D.

OPERATING VOLTAGE: Voltage capabilities are based on the thickness of the jacket.

OPERATING TEMPERATURE: −90°C to +250°C

DESCRIPTION: Silver plated copper conductor, per QQ-W-343, special corona retarding insulation, TFE tape wrap insulation, & a color coded jacket overall.

STD. COLORS: Red, White, Black, Green, Blue, Yellow, Orange, Brown, Purple, Gray. Stripped colors are also available.

STD. P-U: 250′, 500′, 1000′.

CONSTRUCTION VARIATIONS AVAILABLE TO ORDER.

BRIM HIGH TEMPERATURE LEAD WIRE

These small diameter high temperature lead wires allow unique constructions. The basic wire conforms to MIL-W-3861-stranded nickel plated copper; when shielded, nickel plated copper shielding is per MIL-N-46026A. Rated for 100 Volts RMS.*

Type 1: 800°F High Temperature Rating — Suitable for aircraft, or missile lead wire for operations between 500°F to 800°F. Cond. insulation: Fiberglass braid, impregnated with a silicone varnish, over a stranded nickel plated conductor.

Type 2: 1500°F High Temperature Rating — Suitable as a radiation resistant aircraft, or missile lead wire for operations between 800°F to 1500°F. Cond. insulation: Inorganic braid over a stranded nickel plated copper conductor.

Type 3: 2000°F High Temperature Rating — Suitable as a radiation resistant aircraft or missile lead wire for operations between 1500°F to 2000°F. Cond. Insulation: special formulated ceramic braid over a stranded nickel plated copper conductor, and a nickel plated braided shield overall.

* For dry locations.

TFE & FEP TEFLON SHIELDED CABLES • BRIMCROM • BRIMFLYX • STAINLESS STEEL TUBULAR BRAID

TEFLON IMPREGNATED BRAID OVER SHIELD PER MIL-W-16878

DESCRIPTION: One to five twisted conductors of Type E extruded TFE* insulation (.010″ wall), over a stranded silver plated copper conductor. If shielded, braided silver plated shield with a min. coverage of 90% over the conductor(s). When jacketed, either a fused double reversed TFE tape wrap jacket, a Teflon* impregnated fiberglass braided jacket, or an extruded FEP jacket. Cables are fungus, solvent, flame, acid, alkali, and oil resistant. Rated for 600 Volts. Stranding: 26 AWG — 7 strands, 24 AWG to 16 AWG — 19 strands. Color code: 1-White, 2-Black, 3-Red, 4-Green, 5-Yellow. Jacket color: White. OPER. TEMP.: TFE −65°C to +250°C. FEP: −65°C to +200°C.

BRIMCROM™

MICROMINIATURE TEFLON* HOOK-UP WIRE

Conductors are silver plated copper dip coated with TFE Teflon* insulation. Rated for 300 Volts, −90°C to +260°C. BRIMCROM is highly flexible, chemically inert, weather resistant, nonflammable. Suitable wherever high temperatures and lack of space are absolutely critical, such as aircraft, missiles, medical, and microminiaturized electronic components, and system designs. STD. P-U: 1000′

TWO AND THREE CONDUCTOR LAMINATED RIBBON CABLES USING BRIMCROM CONDUCTORS ARE AVAILABLE TO ORDER.

BRIMFLYX™ ULTRA-FLEXIBLE WIRE

DESCRIPTION: Soft bare copper conductor, insulated with a special flexible PVC formulation to minimize kinking & allow for ultra-low bending torque.

Designed for use where wires encounter continuous flexing, such as in data processing equipment, mercury thermostats, magnetic drums, and rotating servo platforms.
OPER. TEMP.: −40°C to +80°C

UL & CSA POWER RECTRACTILE CORDS

RETRACTED LENGTHS: 1 ft., 2 ft., 3 ft., 4 ft. EXTENDED LENGTHS: 6 ft., 12 ft., 18 ft., 25 ft. BRIM retractile cords are long lasting, and useful where cords must change their length or position. Our cords will extend to approximately six times their retracted length, and will return to their original shape and length, when they are released. Retractile cords eliminate tangles, twists, knots. OPER. TEMP.: −20°C to +60°C. COND. COLOR CODE: 1-Black, 2-White, 3-Red, 4-Green, 5-Orange, 6-Blue, 7-Yellow. VOLTAGE RATING: SVO SJO and SJO types — 300V; SO, and SO types — 600V.

RETRACTILE COMMUNICATION CORDS UL APPROVED

RETRACTED LENGTHS: 2, 3, 4 ft.
EXTENDED LENGTHS: 12, 18, and 25 ft. OPER. TEMP.: −20°C to +60°C

DESCRIPTION: Cords are composed of multicond. 23 AWG 21/36 tinned soft copper for a longer flex life. Cords are jacketed in either TPR, or special vinyl-"Byron"-formulation, for a long service life. These cords are suitable for communication equipment, such as ham operations, head sets, radio equipment, telephone car carriers, etc. 120V working. 1 AMP carrying capacity. Nom. cond. resistance .022 ohms per linear foot, .185 ohms per retracted foot.
† Stocked in Bryon only. STD. PKG.: 6

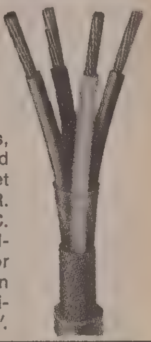
MINIATURE SHIELDED CONTROL AND INSTRUMENTATION CABLES — 600V MIL-W-16878D TYPE B



DESCRIPTION: Stranded tinned copper conductors, .010″ wall PVC, cabled, mylar binder, braided tinned copper shield, 90% min. coverage, gray PVC jacket overall. All material pass UL VW-1 test. OPER. VOLT.: 600 Volts. OPER. TEMP.: −55°C to +105°C. PVC is resistant to acid, fungus, oils, moisture, solvents, flame. Used as an interconnecting cable for electronic equipment, control and instrumentation cable telemetry and remote control cable for sensitive recording instruments. STD. P-U: 500′, 1000′.

BRIM MINIFLYX™ SUBMINIATURE ULTRA-FLEXIBLE INSTRUMENTATION CABLES

DESCRIPTION: Ultra-flexible stranded bare copper conductors, .005″ wall of soft flexible PVC, braided shield, White .010″ soft flexible PVC jacket overall. Suitable as an instrumentation cable where Ultra-flexibility & subminiaturization are essential, in low voltage applications. For example: biomedical instruments, missiles, computer, miniature relays, disc drives, servo systems, recorders.
OPERATING TEMPERATURE: −40°C to +90°C.
OPERATING VOLTAGE: 200 Volts.

ALUMINUM MYLAR FOIL SHIELDED CABLES

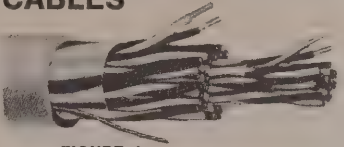

FIGURE 1

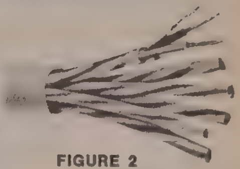

FIGURE 2

INDIVIDUALLY SHIELDED PAIRS — 22 and 18 AWG — POLYETHYLENE

DESCRIPTION: 22 AWG 7/30 TC or 18 AWG 16/30 TC, wall of polyethylene insulated conductors, conductors are twisted into pairs, an aluminum mylar foil shield with a stranded TC drain wire over each pair, the shielded pairs are cabled, chrome PVC jacket overall. Color coded. Nom. Cap. between conductors: 25PF/Ft. Nom. Cap. between one conductor and remaining conductor connected to shield: 45PF/Ft. Suitable for audio, R.F. data and pulse applications requiring superior circuit isolation.
OPERATING VOLTAGE: 300V.
OPERATING TEMPERATURE: −20°C to +60°C.

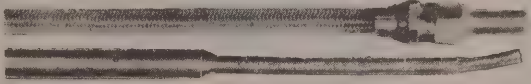
BRIM WIRE — CABLE — TUBING — HARDWARE ELECTRONICS, INC. FAIR LAWN, N.J. 201-796-2886

HEAT SHRINKABLE TUBINGS: BRIFLON™ TEFLON • TEFZEL — SILICONE RUBBER TUBING

SH200, SH250, SH254 & SHTF tubings have excellent resistance to weathering, chemicals (oils, fuels, solvents, acids, alkalis, fluids), & fungus, are non-corrosive, low water absorption (.01%), will not burn nor support combustion, have hi dielectric strength (850V/MIL dry), low dielectric constant, & a very low coefficient of friction. Hi mechanical strength yet flexible. (Low temp. flexibility −67°C). Their excellent electrical characteristics remain stable throughout their electrical range. Longitudinal change with full shrinkage: FEP −15%: TFE −20%. Color: Natural (FEP-transparent; TFE-translucent).



SH200 (FEP) MIL-I-23053/11

SH200: an extruded modified FEP (Fluorinated-Ethylene-Propylene) Teflon* tubing, with a continuous Oper. Temp. of +205°C (400°F). SH200 completely shrinks at 350°F (partial shrinkage possible at 200°F). Shrinkage ratio — 1.3:1. It melts at 525-563°F so it can be used to encapsulate. Now many sensitive components, parts, devices, etc. can be protected with Teflon*. Fills void between the hi temp. of TFE, and low temp. of PVC and polyolefin tubings.

OTHER SIZES IN TFE AND FEP, AND COLORS ARE AVAILABLE TO ORDER. ETCHING FOR BONDING IS AVAILABLE TO ORDER.

SH254 4:1 SHRINKABLE TFE

SH254 tubing can recover to approximately 1/4 of its expanded size when heated to its "gel" point (621°F-625°F). Because of its exceptional shrinkage capability, its recommended that the outside diameter of the object to be shrunk down upon should not be more than 50% of the expanded I.D. of the size of the tubing used. Conforms to AMS 3584 and MIL-I-23053/12 — except for its 4:1 shrink ratio. SH254 is non-flamable, non-corrosive, and offers all of the other outstanding electrical, chemical, and mechanical properties of Teflon*. * DuPont

SHTF SHRINKABLE TFE/FEP

SHTF is made with a combination of TFE and FEP Teflons*. The inner wall is made of FEP and the outer wall of TFE. When the tubing is heated, the TFE begins to shrink down tightly over the FEP. The FEP inner wall melts and flows-squeezes-into and around the item covered, creating a solid or near solid encapsulation. The fit is so tight that it is safe against most environmental hazards, involving pull or vibrations. It can be used as a strain relief, or moisture-proof covering for wires, connectors, terminals, splices, electronic devices, etc. SHTF is non-flamable, non-corrosive, and offers all of the other outstanding electrical, chemical, and mechanical properties of Teflon*. Color: Natural (Transparent). OPERATING TEMPERATURE: −85°F to +450°F.

SHRINKABLE E-TFE TEFZEL* TUBING — MIL-I-23053/14

Designed for ruggedness. Excellent chemical resistance and high dielectric qualities which exist over a wide temperature range. Superior to Teflon* in its mechanical strength. Shrink Ratio-1.5:1. Shrinks quickly on application of only 300°F (150°C). Because of its quick shrinking ability at a relatively low temperature, many heat sensitive components and materials (solder joints, plastics, wood, metal) can now be easily protected. It is also heat sealable, chemically inert, self-extinguishing (non-flamable in air). Dielectric Strength: 400V/MIL. Uses: cable jacketing, wire markers, terminal covers, temperature probes, immersion tubing, heat exchanger coils, sight glasses, roll covers, chafe guards, component insulation. STD. COLOR: Translucent.

BRIMFLEX™ SHRINKABLE TUBINGS — SPIRAL WRAP TUBINGS

BRIFLEX™ SHRINKABLE PVC TUBINGS: MIL-I-23053/2B & HEAVY WALL PVC TUBING

SHRINKABLE IRRADIATED POLYOLEFIN: MIL-I-23053/5 — SPIRAL WRAP TUBING

BRIMFLEX™ POLYVINYLCHLORIDE SHRINKABLE TUBING — MIL-I-23053/2B & UL VW-1

SHRINK RATIO: 2:1 (50%) — OPERATING TEMPERATURE: −20°C to +105°C
BRIMFLEX™ SH105 is a flexible all purpose shrinkable PVC tubing that shrinks 50% of its expanded size when exposed to temperatures below 200°F (within one minute). SH105 meets MIL-I-23053/2B, Class 2, and conforms to MIL-I-631D, Grade C. Longitudinal shrinkage: approximately 20%. SH105 is self-extinguishing, resistant to fungus, most oils, and chemicals, sunlight, moisture, and is non-corrosive. SH105 is suitable for insulating wires, cables, and electronic components, that vary in shapes, and dimensions. Produces a smooth snug flexible fit, in most applications — even around sharp bends. Dielectric Strength: 700V/MIL min., ASTM-D922. Tensile Strength: 2000PSI min. Suggested Storage Temperature: under 70°F for up to 10 months. UL Approved SH105 is available to order.
STD. COLORS: Black, Clear, Red, White. Other colors available to order.

SHRINKABLE IRRADIATED POLYOLEFIN TUBING — ALL PURPOSE — MIL-I-23053/5

Flexible, yet greater electrical, chemical, and abrasion resistance, and greater mechanical strength than that of shrinkable PVC tubing. It not only insulates, it can also encapsulate, giving a watertight fit. Won't crack or peel. Its non-corrosive, has excellent resistance to soldering irons, oils, solvents, acids, alkalis, fuels, hydraulic fluids, fungus. Shrink Ratio-2:1 (50%). Shrinks when exposed to 250°F. Longitudinal shrinkage: 5%. Dielectric Strength: 1300V/MIL. Colored tubing is self-extinguishing; clear tubing is slow burning. Uses: Strain relief, jacketing material, component insulation. OPERATING TEMPERATURE: −55°C to +135°C. Meets MIL-I-23053/5, Class 1, 2. MIL-I-7444B, AMS 3636B, AMS 3637A, ASTM D876, ASTM D150, ASTM D257, ASTM D2671, ASTM D792.

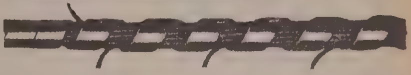
SPIRAL WRAP TUBINGS FOR HARNESSING



Easily twists on and off. Can be repeatedly flexed without cracking or breaking. Expandable. Holds wire, and cable bundles securely, and allows leadoffs or additions at any point. Bends around sharp corners, and protection against sharp edges. Available in 4 types of insulations: Polyethylene, Rulan (a flame retardent type of polyethylene), Nylon, Teflon. All are resistant to organic solvents, alkalis, and acids (nylon satisfactory except for strong acids). OSHA and UL approved for harnessing cables.

BLACK NYLON AND POLYETHYLENE SPIRAL WRAP FOR ULTRAVIOLET RAY PROTECTION IS AVAIABLE.

SHRINK RATIO: 2:1 (50%) — OPERATING TEMPERATURE: −20°C to +105°C
SH110 meets or exceeds the performance requirements of MIL-I-23053/2B, Class 2 but for its dimensions — its heavier wall. SH110 is a Heavy Wall Shrinkable PVC tubing, yet its flexible, and will shrink at temperatures below 200°F (within one minute). Provides outstanding dielectric and mechanical protection without damage to enclosed or adjacent components, even around sharp bends. Longitudinal shrinkage: approximately 20%. SH110 is self-extinguishing, resistant to fungus, moisture, sunlight, and most oils, and chemicals. Dielectric Strength: 600V/MIL min,. ASTM-D922. Suitable as a heavy duty all-purpose shrinkable tubing that is less expensive, almost as flexible, and has a higher temperature ability than that of Shrinkable Neoprene tubing. Suggested Storage Temperature: Under 70°F for up to 10 months.

SEMI-RIGID POLYOLEFIN SHRINKABLE TUBING IS AVAILABLE TO ORDER.
CUT AND PRINTED WIRE MARKERS ARE AVAILABLE TO ORDER.

SAFETY

In this catalog you will find more products which are Underwriters Laboratories, Inc. Listed. The UL voltage rating is the maximum voltage prescribed by UL for a particular application. For those applications where UL labled cable is not required, cable can be used in electronic applications up to Carol Electronic Cables' suggested working voltage, provided that the user has determined that the power source is sufficiently current limited.

This is the result of an ongoing program to maximize the number of wire and cable products which meet or exceed the highest standards of safety in the industry.

User safety is the concern of Carol Electronic Cables product design.

The Carol Electronic Cables line includes a full range of COMPUTER CABLES. For technical data, ask for our new Computer Cable Catalog.

Carol's engineering and manufacturing capabilities are ready to serve your special cable needs. Ask us to quote on your requirements — and to demonstrate how our plants can be turned around to meet your delivery needs.

Columbia Electronic Cables Division of Carol Cable Company, Inc. has warehouses and redistribution centers in New Bedford, Massachusetts; River Grove (Chicago), Illinois; and Los Angeles, California.

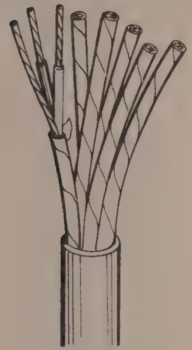
AUDIO/DATA INDIVIDUALLY SHIELDED MULTIPLE PAIR CABLE PVC JACKET

UL LISTED 2493



Stock Color: Chrome gray jacket. **Construction:** Stranded tinned copper conductors, color-coded polypropylene insulation, cabled in pairs, each pair and its stranded drain wire under Flexfoil® aluminum foil/polyester shield, PVC jacket overall. For description of Flexfoil®, see page **2**•2001. **Specifications:** Jacket: +60°C. Conductors: +105°C. Suggested working voltage: 22 gauge — 300V; 20 gauge — 300V; 18 gauge — 300V. 100 Megohms/M insulation resistance between shields. 115 PF/FT. capacitance between adjacent shields. 1500V voltage breakdowns between adjacent shields. 50V working voltage between adjacent shields. 22 gauge and 20 gauge series — 22 gauge drain wire; 18 gauge series — 20 gauge drain wire. **Jacket only passes VW-1 Vertical Flame Test. Applications:** For audio RF and pulse applications requiring superior circuit isolation. The use of polypropylene insulation results in excellent high frequency properties and mechanical durability. **Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available).

SEE COLOR CODE NO. 1 PAGE 2•2004

CLEARFLEX® Audio cable with clear insulation that matches cable colors to interior wall colors. Extra-flexible insulation for easy handling and reduced installation cost.

DURAFOAM® Patented (U.S. & Canada) 300 ohm foam transmission line. Isolated conductors and dielectric provide unmatched performance over full TV and FM spectrum. Unconditionally guaranteed for 15 years in normal atmospheric conditions.

DURA-COLOR® RG 59/U type cable. Aluminum foil/polyester shield provides 100% RF shielding. Sweep tested for 82 channels. Low loss, uses standard "F" fittings, non-contaminating.

FLEXFOAM® Complete microphone cable line, capacitance up to 35% less than standard cables. Cable lengths can be increased by as much as 50% and still provide adequate signal. Foam polyethylene dielectric and extra-flexible, glossy jackets or unparalleled limpness.

FLEXFOIL® Laminated aluminum foil/polyester shielding material. Provides 100% shielding, easy termination and reduced cable diameter. Construction eliminates metal to metal contact, providing isolation between adjacent shields in cable assembly. Polyester film for extra insulation and strength.

FLEXLIFE® Special jacketing material gives high gloss appearance, top flexibility and life.

PERMAFOAM® Transmission cables with low loss foam polyethylene dielectrics and permaline jackets for extra life.

PERMALINE® High molecular weight polyethelene jacketing material contains a small percentage of carbon black. Non-contaminating, high resistance to weather, salt air, chemical fumes, fungus, acids. Excellent moisture resistance. Usable in direct burial installations.

STAPLE-PRUF® Audio cables, jacketing material fills in space between conductors. Cable can absorb shock of staple guns. Fill prevents staple cutting into cable and shorting out conductors.

SUPERFLEX® RG type cables, foam polyethylene dielectric for low loss. Flexlife jackets for outstanding appearance, flex and life.

First color in stripe combination is body color. Second or third colors are stripes. Example: White / Black / Red. Other striped combinations available to order.

TELEPHONE & AUDIO CABLE UNSHIELDED STAPLE-PRUF SOLID FILL PVC JACKET

Stock Color: Beige jacket. **Construction:** Bare copper conductors, color-coded polyethylene insulation, parallel, solid fill PVC jacket overall. **Specifications:** −20°C to +60°C. UL listed Wires, Misc.) 90V max. **Applications:** Telephone systems, speaker extensions, intercoms and other signaling devices and applications where cable is to stapled. Solid fill construction fills the space between the conductors and absorbs the shock of staples preventing the staples from cutting into the conductors. **Put-up:** 500′ and 1000′ spools. (Other put-ups also available.)

AUDIO CABLE UNSHIELDED TWO-CONDUCTOR CLEARFLEX® PVC JACKET

Stock Color: Clear. **Construction:** One conductor tinned copper, one conductor bare copper for polarity identification, clear PVC insulation, conductors cabled, Clearflex® PVC jacket overall. For description of Clearflex®, see page **2•2001**. **Specifications:** −20°C to +60°C. **Applications:** Telephone systems, speaker and audio systems, rear audio speaker extensions, crystal clear insulation and outer jacket will match background color of wall or other installations. **Put-up:** 500′ and 1000′ spools. (Other put-ups also available.)

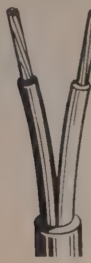
AUDIO AND COMMUNICATIONS CABLE

AUDIO CABLE UNSHIELDED 2 CONDUCTOR PERMALINE® JACKET



Stock Color: Black jacket. **Construction:** Tinned copper conductors, color-coded PVC insulation, Permaline (high molecular weight polyethylene) jacket overall, conductors cabled. **Specifications:** −20°C to +60°C. **Applications:** Speaker extensions paging systems, PA systems and other audio applications requiring 2 conductors. Permaline jacket resists severe weather conditions. See page 2•2001. for further information on Permaline. **Put-up:** 500′ and 1000′ spools. (Other put-ups also available.)

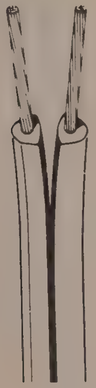
AUDIO CABLE LOW ENERGY SAFETY CONTROL WIRE



Stock Color: Black*. **Construction:** Bare copper solid conductors, PVC insulation, conductors parallel, rip-type construction, ridge on one conductor for polarity. **Specifications:** +105°C. N.F.P.A.-N.E.C. approved UL Power Limited Fire Protective signaling circuit cable. **Applications:** Burglar alarm, fire detection, audio signal circuit wiring. **Put-up:** 500′ spools. (Other put-ups also available.)

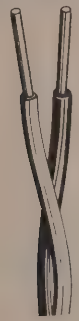
24015**	3	16	Solid	.115 x .320

* Consult factory for production requirements on other colors.
** Power limited circuit cable.

Stock Color: Clear. **Construction:** One conductor tinned copper, one conductor bare copper for polarity identification, PVC insulation, identifying ridge on one conductor, conductors laid parallel, rip-type construction for easy separation of conductors when split apart. **Specifications:** −20°C to +60°C. **Applications:** Intercom systems, interconnecting cables, telephones, remote control circuits, fire and burglar alarm systems: **Put-up:** 100′, 250′, 500′ and 1000′ spools. 100′ spools packaged in attractive counter display cartons. UL Listed 125V XT.

AUDIO CABLE UNSHIELDED UNJACKETED MULTI-CONDUCTOR



Stock Color: See table below. **Construction:** Solid conductors bare copper, stranded conductors, 1 tinned, 1 bare color coded PVC insulation (except Cat. No. C2744 which has both conductors the same color, brown or white, ridge on one conductor for polarity, ridged conductor tinned copper), conductors cabled. **Specifications:** −20°C to +60°C. **Entire cable passes VW-1 Vertical Flame Test. Applications:** Intercom systems, interconnecting cables, telephones, remote control circuits, fire and burglar alarm systems. **Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available.)

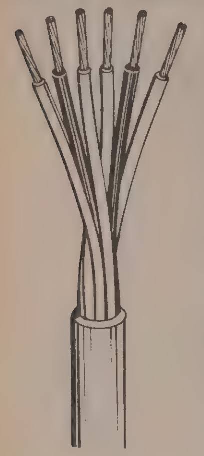
AUDIO AND COMMUNICATIONS CABLE

AUDIO & COMMUNICATION UNSHIELDED COMBINATION GAUGE CABLE PVC JACKET



Stock Color: Chrome gray jacket. **Construction:** Tinned copper conductors, color-coded PVC insulation, conductors cabled, PVC jacket overall. **Specifications:** −20°C to +80°C. Suggested working voltage: 20 and and 22 gauge — 200V, 16 and 18 gauge — 400V. **Entire cable passes VW-1 Vertical Flame Test. Applications:** Special cable for audio and communications use where RF shielding is not required. **Put-up:** 100′ and 500′ spools. (Other put-ups also available.)

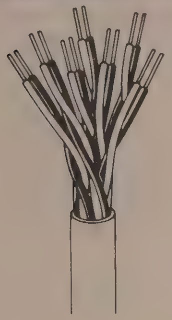
AUDIO AND COMMUNICATIONS CABLE

AUDIO CABLE UNSHIELDED PAIRED MULTI-CONDUCTOR PVC JACKET



Stock Color: Chrome gray jacket. **Construction:** Tinned copper conductors, color-coded PVC insulation, conductors paired with a short lay twist for conductor balance providing a circuit free from cross talk, pairs cabled, PVC jacket overall. **Specifications:** −20°C to +80°C. Suggested working voltage: See below. **Entire cable passes VW-1 Vertical Flame Test. Applications:** Heavy-duty intercom and audio cable for intercom systems, signal systems, annunciators, nurse's call systems, multiple speaker systems, control circuit cables. **Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available.)

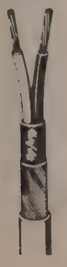
MICROPHONE CABLE

MICROPHONE CABLE TWO CONDUCTOR SPIRAL SHIELD FLEXLIFE® JACKET



Stock Color: Silver gray jacket. **Construction:** Tinned copper conductors, color-coded polyethylene insulation, cabled with fillers, mylar wrap, spiral tinned copper shield. High gloss Flexlife packet. (See page 2•2001. for description of Flexlife). **Specifications:** −20°C to +60°C. **Applications:** For use with low impedance microphones. Flexlife jacket provides extreme flexibility, high abrasion resistance and outstanding appearance. **Put-up:** 100′, 250′, 500′ and 1000′ spools. (Other put-ups also available.)

Catalog Number	Type	No. of Cond.	Cond. Size	Cond. Strand.	Nom. Insul. Thick. (Inches)	Nom. Jacket Thick. (Inches)	Nom. Cap.* PF/Ft.	Sug. Working Voltage	Nom. O.D. (Inches)

MICROPHONE CABLE

MICROPHONE CABLE TWO CONDUCTOR NOISE RESISTANT SPIRAL SHIELD FLEXLIFE® JACKET

Stock Color: Silver gray jacket. **Construction:** Tinned copper conductors, color-coded polyethylene insulation, cabled with fillers, .010″ of conductive PVC, spiral tinned copper shield, high gloss Flexlife jacket. (See page **2•2001** for description of Flexlife). **Specifications:** −20°C to +60°C. **Applications:** For use with low impedance microphones. Noise resistant. Withstands rough handling without shield breakdown. Will outlast conventional microphone cables. Flexlife jacket provides extreme flexibility, high abrasion resistance and outstanding appearance. **Put-up:** 100′, 250′, 500′ and 1000′ spools. (Other put-ups also available.)

MICROPHONE CABLE TWO CONDUCTOR BRAIDED SHIELD HEAVY-DUTY FLEXLIFE® JACKET

Stock Color: Red or black jacket. **Construction:** Tinned copper conductors, color-coded polyethylene insulation, cabled with filler, mylar wrap, braided tinned copper shield, high gloss Flexlife jacket. (See page **2•2001** for description of Flexlife.) **Specifications:** −20°C to +60°C. **Applications:** For low impedance microphones. Heavy duty studio type designed to withstand rough usage. Bright red jacket is a visual aid to safety. Flexlife jacket provides extreme flexibility, high abrasion resistance and outstanding appearance. **Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available.)

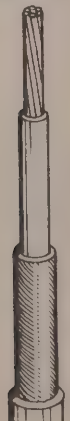
MICROPHONE CABLE ONE CONDUCTOR SPIRAL SHIELD FLEXLIFE® JACKET



Stock Color: Silver gray jacket. (Cat. No. C1359 available in black jacket.) **Construction:** Single conductor 3 strands tinned copper, 4 strands tinned copperweld, white foam polyethylene dielectric, spiral tinned copper shield, high gloss Flexlife jacket. (See page **2•2001** for description of Flexlife). **Specifications:** −20°C to +60°C. **Applications:** For use with high impedance microphones and hi-fi interconnecting cables. Flexfoam dielectric (foam polyethylene) provides as much as 35% lower capacitance than the best standard solid polyethylene dielectric microphone cables. Flexfoam cables are the most flexible plastic microphone cable available, with limpness almost equal to rubber and with better abrasion resistance. **Put-up:** 100′, 250′, 500′ and 1000′ spools. (Other put-ups also available.)

INSTRUMENTATION AND CONTROL CABLE

CONTROL CABLE MULTI-CONDUCTOR SHIELDED NEOPRENE OR RUBBER JACKET

Stock Color: Black jacket. **Construction:** Tinned copper conductors, color-coded rubber insulation, cabled, filled where required, clear mylar wrap, tinned copper braided shield, cotton wrap, neoprene jacket or rubber jacket. **Specifications:** −20°C to +60°C. Suggested working voltage 450V. **Applications:** Control circuits, video and audio interconnecting cables, broadcast and studio use. Precision engineered to prevent cross-talk and eliminate hum pick-up. Neoprene and rubber jackets are resistant to impact and abrasion and have extra limpness. For outside installations, neoprene is recommended being resistant to oil, ozone, moisture and sunlight. **Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available.)

INSTRUMENTATION AND CONTROL CABLE

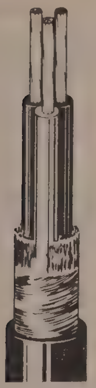
CONTROL CABLE MULTI-CONDUCTOR UNSHIELDED RUBBER JACKET



Stock Color: Black jacket. **Construction:** Tinned copper conductors color-coded rubber insulation, cabled, filled where required, mylar wrap, or cotton wrap, rubber jacket. **Specifications:** −20°C to +60°C. Suggested working voltage 350V. **Applications:** Control circuits, broadcast and studio use, traffic and fire alarm control, temperature control systems, other multiple control applications. Resistant to impact and abrasion. Extra limpness. **Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available.)

First color in stripe combination is body color. Second or third colors are stripes. Example: White/Black/Red. Other solid colors and striped combinations available to order.

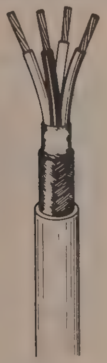
INSTRUMENTATION & CONTROL CABLE MULTI-CONDUCTOR SHIELDED PVC JACKET



Stock Color: Chrome gray jacket. **Construction:** Tinned copper conductors, color-coded MIL-W-16878 Type B, PVC insulation, cabled, mylar wrap, tinned copper braid shield 90% coverage, PVC jacket overall. **Specifications:** −55°C to +105°C. Suggested working voltage 600V. **Applications:** Interconnecting cables for electronic equipment, telemetry data, remote control of recording instruments. **Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available.)

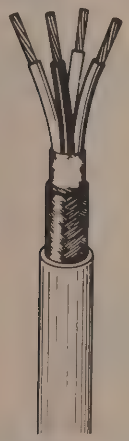
CONTROL CABLE MULTI-CONDUCTOR SHIELDED PVC JACKET



Stock Color: Chrome gray jacket. **Construction:** Tinned copper conductors, color-coded polyethylene insulation, cabled, filled where required, mylar wrap, tinned copper braid shield, PVC jacket overall. **Specifications:** −20°C to +60°C. Suggested working voltage 600V. **Jacket only passes VW-1 Vertical Flame Test. Applications:** Low capacity cable for control circuits, video and audio interconnecting cables, broadcast and studio use. Precision engineered to prevent cross-talk and eliminate hum pick-up. Low capacitance, light weight. **Put-up:** 100′, 500′ and 1000′ spools. (Other put-ups also available.)

UL POWER-LIMITED FIRE PROTECTIVE SIGNAL CIRCUIT CABLE

MULTIPLE CONDUCTOR

Stock Color: Red. **Construction:** Solid bare copper conductor, color-coded PVC insulation, conductor cabled, PVC jacket overall. **Specifications:** +105°C suggested working voltage 300V. **Entire cable passes VW-1 Flame Test. Applications:** These cables are for use in power limited circuits in accordance with NEC article 760 and as a power limited circuit cable in accordance with article 725 class 2 and class 3 circuits. These cables pass the UL 70,000 BTU flame and tray cable test collateral to IEEE 383 flame test and are suitable for tray cable installation. All cables are listed with the California State Fire Marshal. **Put-up:** 500′ and 1000′.

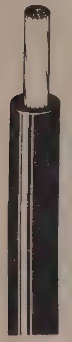
HOOK-UP AND LEAD WIRE

MIL-W-76B PVC TYPE MW UNCOVERED PVC UNSHIELDED



Stock Colors: See table below. **Construction:** Tinned copper (solid or extra flexible) conductor, color-coded **medium wall** PVC insulation. **Specifications:** −40°C to +80°C, 1000V. Resistant to acids, oil, alkalis, flame, moisture and fungus. **Applications:** Internal wiring of electronic and electrical equipment. **Put-Up:** 100′ and 1000′ spools. (Other put-ups also available.)

HOOK-UP AND LEAD WIRE

TEST LEAD UNSHIELDED RUBBER INSULATION

Stock Color: Black or red. (Other colors available on special order.) **Construction:** Extra flexible stranded tinned soft annealed copper conductor, color-coded rubber insulation. **Specifications:** −20°C to +60°C. All breakdown voltages and suggested working voltages are AC RMS values. **Applications:** Test lead wire for use in multimeters, analyzers, oscillators, and other applications requiring extra flexible insulated wire. **Put-up:** 250′, 500′ and 1000′ spools.

Catalog Number	No. of Cond.	Cond. Size	Cond. Strand.	Nom. Insul. Thick. (Inches)	Break-down Voltage*	Sug. Working Voltage	Nominal O.D. (Inches)

* For intermittent duty only.
† Manufactured per MIL-W-13169.

TEST LEAD UNSHIELDED FLEXLIFE® PVC INSULATION

Stock Colors	Ordering Suffix
1 Black	01
2 Red	03
3 Green	06

Stock Color: See table below. (Other colors available on special order.) **Construction:** Extra flexible stranded tinned soft annealed copper conductor, color-coded extra flexible, high gloss Flexlife® plastic insulation. For description of Flexlife®, see page **2**•2001. **Specifications:** −20°C to +60°C, 5000V. Insulation resistant to acids, oil, alkalis, flame, moisture and fungus. All breakdown voltages and suggested working voltages are AC RMS values. **Applications:** Test lead wire for use in multimeters, analyzers, oscillators, and other applications requiring extra flexible insulated wire. Flexlife plastic insulation is durable and has a high-gloss finish. **Put-up:** 250′ and 500′ spools.

CAROL

PORTABLE CORDAGE GENERAL WIRE AND CABLE

SO, SJO, CSJO AND SVO

Copper: Bare soft annealed. Class K & Class M stranding per ASTM-B-174. **Insulation of Inner Conductor:** Synthetic Rubber (SBR) per ICEA Pub. No. S-19-81 (Latest Edition); N.E.M.A. Publication No. WC-3 (Latest Edition); and UL Subject 62, Class 3. **Temperature Range:** 60°C (140°F) to −37°C (−35°F). **Color Code Conductors:** 2 conductor — black, white; 3 conductor — black, white, green; 4 conductor — black, white, green, red. **Foundation:** Conductors twisted together with fillers to make a round core: separator over core. **Jacket:** Black Neoprene 60°C (140°F) to −37°C (−35°F) per ICEA Pub. No. S-19-81 (Latest Edition); N.E.M.A. Pub. No. WC-3 (Latest Edition); ASTM D-752; and UL Subject 62, Class 15. **Jacket Marking:** All sizes surface printed* showing gauge, number of conductors, and type. **Use:** For heavy (SO) and light (SJO) service such as tools, power extensions, motor and welding leads, portable machinery, floor polishers and sanders, battery chargers, portable stage lights, garage portable lights, sound equipment, washing machines, refrigerators, sewing machines, and other electrical equipment. Type SVO — For vacuum cleaners, home food mixers, office equipment, and other light duty requirements. **Environment:** For use in areas where exposed to oil, ozone, grease, chemicals or solvents. **Put-up:** As shown — long length reels also available. **Water Resistant Types SJT & ST:** CEC also offers water-resistant Thermoplastic jacketed cords manufactured to UL standards and so listed. Consult factory for prices and delivery.

PORTABLE CORDAGE GENERAL WIRE AND CABLE

STO AND SJTO

Copper: Bare soft drawn annealed, Class K stranding per ASTM-B-174. **Insulation:** Polyvinyl chloride, resistant to oils, water, acids, alkalis and ozone, per UL Subject 62, Class 11. **Temperature Range:** 60°C (140°F) to −20°C (−4°F). **Color Code Conductors:** 2 conductor — black, white. 3 conductor — black, white, green. 4 conductor — black, white, green, red. **Foundation:** Conductors twisted together with fillers to make a round core: separator over core. **Jacket:** Gray or yellow non-marking 60°C (140°F) to −20°C (−4°F) polyvinyl chloride, resistant to oil, water, acid, alkali, ozone, and abrasion — jacket meets specifications per ASTM-D-1047, and UL Subject 62, Class 11. **Jacket Marking:** All sizes indent printed showing gauge, number of conductors, and type. Gauges 14-12-10 only also indent printed P-123-MSHA to indicate flame resistance in compliance with the requirements of the Mine Safety and Health Administration. **Use:** For Heavy (STO) and Light (SJTO) service such as tools, motors, floor polishers and sanders, power extensions, battery chargers, portable stage lights, garage portable lights, sound equipment, washing machines and refrigerators. Useful cord life is reduced when exposed to temperature extremes. Cord to be used in such environments is Neoprene SO. **Environment:** Resistant to oils, water, acids, alkalis and ozone. **Put-up:** As shown — long length reels also available. **Water Resistant Types SJT & ST:** CEC also offers water-resistant Thermoplastic jacketed cords manufactured to UL standards and so listed. Consult factory for prices and delivery.

PVC JACKETED UNSHIELDED CABLE

Construction

- Stranded tinned copper conductors
- Color coded polyvinylchloride insulation
- Conductors cabled
- Gray polyvinylchloride outer jacket

Characteristics

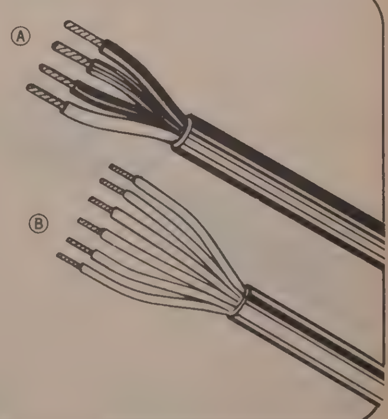
Temperature: —20 °to + 80 °C (UL + 80 °C)

Voltage Rating:

UL 2335	200 Volts	22AWG
UL 2095	300 Volts	20AWG
UL 2464	300 Volts	18AWG
UL 2463	600 Volts	16AWG
UL 2463	600 Volts	14AWG

Applications

- Control Systems & Networks
- Audio & Intercom
- Sound Systems
- Equipment Interconnect



(312) 445-8830 **Consolidated** electronic wire & cable

MULTI-CONDUCTOR COMMUNICATIONS CABLE

TRAY CABLES TYPE TC(CTB) (THWN/THHN/TFFN CONDUCTORS)

Construction

- Stranded bare copper conductors
- Color coded polyvinylchloride insulation with nylon jacket over each conductor
- Conductors cabled
- Fillers where necessary
- Overall polyester tape
- Black flame-retardant polyvinylchloride outer jacket

Characteristics

- Temperature Range: −20°C to +90°C
- Tray Cable Type CTB THHN THWN (TFFN)
- Working Voltage: 600 Volts
- UL Standard 83 (62)
- UL Standard 1277
- NEC Articles 310, 318, 340
- Resists abrasion, oil, chemicals and highly flame retardant

Applications

- Industrial Power
- Control Circuits

PVC JACKETED UNSHIELDED CABLE

Construction

- Solid or stranded tinned copper conductors
- Color coded polyvinylchloride insulation
- Conductors twisted into pairs
- Gray polyvinylchloride outer jacket

Characteristics

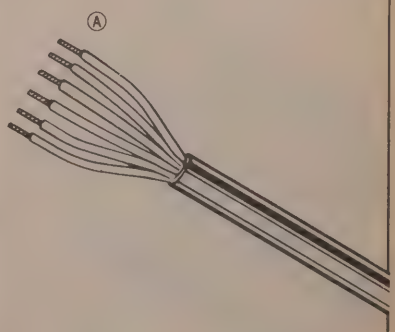
Temperature: —20 °to + 80 °C (UL +80 °C)

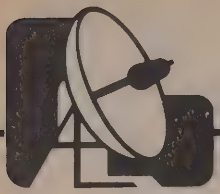
Voltage Rating:

UL 2508	300 Volts	22AWG
UL 2095	300 Volts	18AWG

Applications

- Control Systems
- Audio & Intercom Systems
- Sound Systems
- Equipment Interconnect





(312) 455-8830 **Consolidated** electronic wire & cable

MULTI-CONDUCTOR COMMUNICATIONS CABLE

Construction

- Solid or stranded tinned or bare copper conductors Color coded polyvinylchloride insulation
- Conductors twisted into pairs where applicable
- Gray polyvinylchloride outer jacket where applicable

Characteristics

- Temperature Range: −20°C to +80°C (UL +80°C)

Voltage Rating:

UL 1007	300V	UL 2508	300V
UL 2092	300V	UL 2463	600V
UL 2095	300V	UL 2464	300V
UL 2335	150V		

Applications

- Alarm Controls
- Intercom
- Audio
- Sound Systems

Capacitance per foot is between conductors.

SHIELDED CABLES

Construction

- Solid or stranded tinned copper conductors
- Color coded polyethylene (PE), polyvinylchloride (PVC), or rubber insulation
- Conductors cabled
- Shield Types:
  (A) Braided Tin Copper
  (B) Spiral Tin Copper Serve
  (C) Mylar Aluminum Foil Wrap and Tin Copper Drain
- Outer Jacket Types:
  (A) Gray PVC
  (B) Black Neoprene
  (C) Black Rubber

Characteristics

- Temperature Range: −20°C to +80°C (UL +80°C)

Voltage Rating:

UL 1107	400V	UL 2106	600V
UL 1150	600V	UL 2548	300V
UL 1546	400V	UL 2552	300V
UL 2092	300V	UL 2629	300V
UL 2095	300V		

Applications

- Audio
- Broadcast/Studio
- Instrumentation
- Sound

SHIELDED CABLES

Construction

- Stranded or solid tinned copper conductors
- Color coded polyethylene, polypropylene, polyvinylchloride, or rubber insulation
- Conductors cabled
- Shield Types:
  (A) Braided Tin Copper
  (B) Special Tin Copper
  (C) Mylar Aluminum Foil Shield Wrap and Tin Copper Drain
- Outer Jacket Types:
  (A) Gray PVC
  (B) Black Neoprene
  (C) Black Rubber

Characteristics

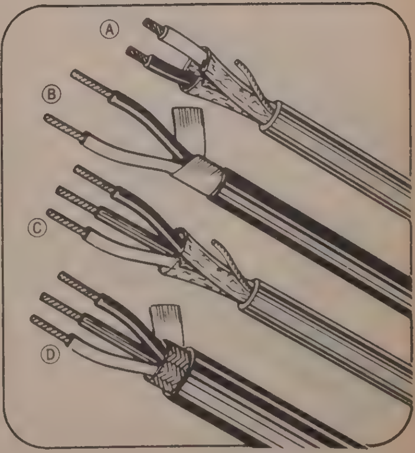
- Temperature Range: −20°C to +80°C (UL +80°C)

Voltage Rating:

UL 1107	400V	UL 2548	300V
UL 1150	600V	UL 2725	300V
UL 2324	300V		

Applications

- Audio
- Data Transmission
- Broadcast
- Sound



(312) 455-8830 **Consolidated** electronic wire & cable

MULTI-CONDUCTOR COMMUNICATIONS CABLE

SHIELDED CABLES

Construction

- Stranded tinned copper conductors
- Color coded polyethylene or rubber insulation
- Conductors cabled, fillers and wrap
- Braided tinned copper shield overall
- Outer Jacket Types:
  - (A) Gray or Black Polyvinylchloride (PVC) Jacket
  - (B) Black Neoprene Jacket
  - (C) Black Rubber Jacket

Characteristics

- Temperature Range: −20°C to +60°C
- Voltage Rating: 400 Volts to 600 Volts
- Polyvinylchloride: Low capacitance, low loss, light weight
- Rubber: Flexible and abrasion resistant
- Neoprene: Outdoor use, resistant to cold weather, oil, sun, ozone

Applications

- Broadcast
- Microphone
- Power supplies
- Sound

SHIELDED CABLES

Construction (5700 series)
- Stranded tinned copper conductors
- Color coded semi-rigid polyvinylchloride (PVC) insulation
- Conductors cabled
- Overall mylar/aluminum foil shield and stranded tinned copper drain wire
- Gray PVC outer jacket

Characteristics

Temperature Range:
–20° C to +80° C (UL +80° C)
- UL 2464 300 Volts
- CSA SR-PVC
- Meets RS 232C

Applications
- Computer
- Data

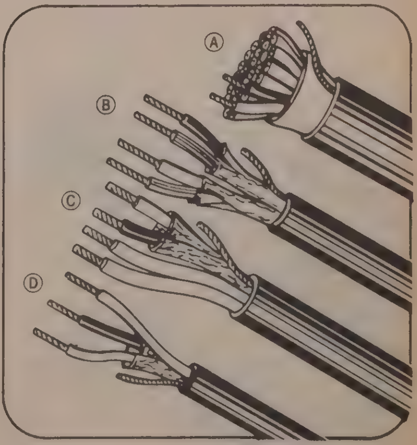
Construction (5500 & 5700 series)
- Stranded tinned copper conductors
- Color coded polyethylene (PE), polypropylene (polyp), or polylvinylchloride (PVC)
- Conductors cabled
- Shield: Mylar Aluminum Foil Shield Wrap and Tin Copper Drain
- Outer Jacket: Gray PVC Jacket

Characteristics
- **Temperature Range:**
  – 20 °C to + 80 °C (UL + 80 °C)

Voltage Rating:

UL 2548 300V UL 2552 300V
UL 2725 300V

Applications
- Audio
- Data Transmission
- Broadcast
- Sound



(312) 455-8830 **Consolidated** electronic wire & cable

MULTI-CONDUCTOR COMMUNICATIONS CABLE

SHIELDED CABLES

Construction (5524 and 4596)

- Standed tin copper conductors
- Color coded "Lo-Cap" foamed polypropylene insulation
- Conductors cables as twisted pairs
- Overall mylar aluminum foil shield, foil facing inward
- Stranded drain wire
- Black polyvinylchloride jacket

Characteristics

- Temperature: −20°C to +80°C
- UL 2772 300V
- Low dielectric constant
- Low distortion data handling
- Light weight

Applications

- Data
- Computer

Construction (5300 series)

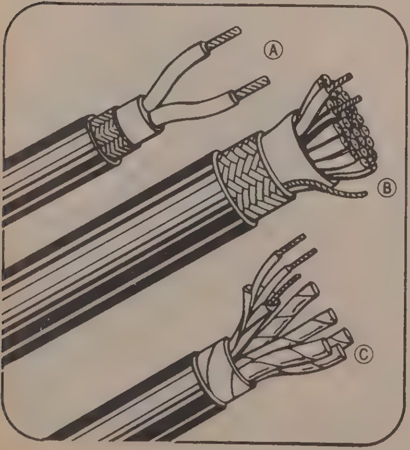
- Solid or stranded tc conductors
- Color coded "Lo-Cap" foamed polypropylene insulation
- Conductors cabled each pair mylar aluminum-foil shield with stranded tin copper drain
- Gray polyvinylchloride jacket

Characteristics

- Same as 5524 and 4596 above
- UL 2493 300V

Applications

- Data
- Computer



"low cap" overall shielded pair computer cable meets EIA RS-422B type requirements Ⓐ

IEEE488 general purpose interface bus cable catalog number 5525 Ⓑ

Construction

Consists of:

Six twisted pairs of 26 AWG (7/34) tinned copper with .010″ Polyvinylchloride (PVC) insulation, color band coded.

Ten single conductors of 26 AWG (7 x 34) tinned copper with .010″ Polyvinylchloride (PVC) insulation, color band coded.

One single conductor of 24 AWG (7/32) tinned copper with .010″ Polyvinylchloride (PVC) insulation, color band coded.

Cabled together with a 26 AWG (7/34) tinned copper drain wire and overall braided tinned copper shield with 90% minimum coverage.

Overall jacket is PVC with a .035″ nominal wall thickness.

Characteristics

Temperature rating: 80°C
Voltage rating: 300V
D.C. Resistance:
  24 AWG-.784 ohms/meter
  26 AWG-1.26 ohms/meter
Capacitance (nom.):

SHIELDED CABLES

Construction (5528)

- Stranded tinned copper conductors
- Color coded polypropylene insulation
- Conductors cabled into pairs, on common axis
- Mylar aluminum foil shield and tinned copper drain wire
- Gray polyvinylchloride jacket

Characteristics

- Temperature Range: −40° C to +105° C
- Suggested Working Voltage: 400 Volts
- Meets RS 232C

Construction (5700 series)

- Stranded tinned copper conductors
- Color coded semi-rigid polyvinylchloride insulation
- Conductors cabled and twisted into pairs where applicable
- Overall mylar aluminum foil shield and stranded tinned copper drain wire
- Gray polyvinylchloride jacket

Characteristics:

Temperature Range:
−20° C to +80° C (UL +80° C)

- UL 2464 300 Volts
- CSA SR-PVC
- Meets RS 232C

Applications

- Computer
- Instrumentation
- Data

MULTI-CONDUCTOR COMMUNICATIONS CABLE

SHIELDED CABLES

Construction (5900 Series)
- Solid tinned copper conductors
- Color coded polyvinylchloride insulation
- Twisted into pairs
- Overall mylar aluminum foil and stranded tin copper drain
- Gray polyvinylchloride outer jacket

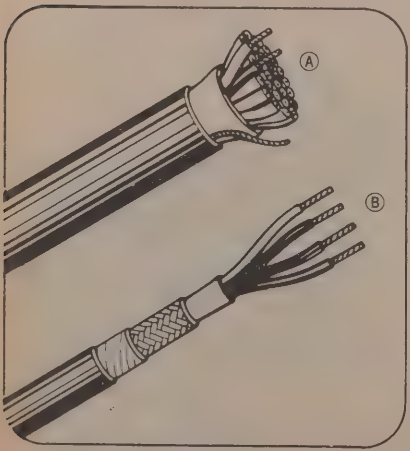
Characteristics
- Temperature Range: −20°C to +80°C (UL +80°C)
- UL 2464 300 Volts
- CSA SR-PVC

Applications
- Computer
- Instrumentation
- Data

Construction (5800 & 1700 Series)
- Stranded tinned copper conductors
- Color coded PVC insulation
- Conductors cabled, fillers and wrap
- Overall braided tinned copper shield
- Gray polyvinylchloride jacket

Characteristics
- Temperature Range: −20°C to +80°C (UL +80°C)
- UL 2343 300 Volts
- UL 2464 300 Volts
- UL 2725 300 Volts

Applications
- Computer
- Instrumentation
- Data



overall mylar aluminum foil shielded multi-paired cable

POWER LIMITED CIRCUIT CABLE

Construction

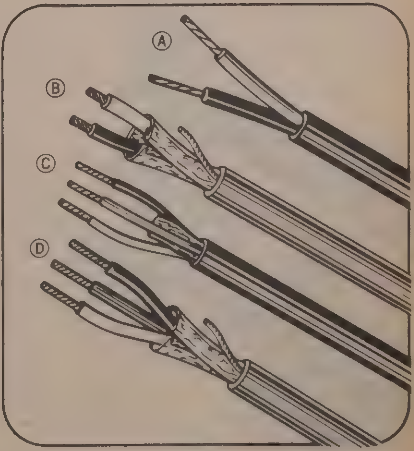
- Stranded tinned copper conductors
- Color coded polyvinylchloride insulation
- Overall mylar/aluminum foil foil shield and stranded tin copper drain wire, where applicable
- Gray polyvinylchloride outer jacket

Characteristics

- Temperature Range: −30°C to +105°C
- UL Subject 13 105°C, 300 Volts Article 725 NEC
- Appliance Wiring Material Style 2464
- Certified CSA-TR-64
- UL 70,000 BTU flame and Tray Cable Test IEEE 383
- UL Listed as Tray Cable Class 2 and 3 circuits

Applications

- Power Limited Circuit Cable



(312) 455-8830 **Consolidated** electronic wire & cable

MULTI-CONDUCTOR COMMUNICATIONS CABLE

POWER LIMITED CIRCUIT CABLE

Construction
- Stranded tinned copper conductors
- Color coded polyvinylchloride insulation, Red/Black number marked
- Conductors cabled and twisted into pairs
- Overall mylar aluminum foil shield with stranded tin copper drain or each pair isolated mylar/aluminum foil shield with stranded tin copper drain
- Gray polyvinylchloride outer jacket

Characteristics
- Temperature: −30°C to +105°C
- UL Subject 13 105°C, 300 Volts Article 725 NEC
- Appliance Wiring Material Style 2464
- Certified CSA-TR-64
- UL 70,000 BTU Flame and Tray Cable Test
- UL Listed as Tray Cable Class 2 and 3 circuits

Applications
- Power Limited Circuit Cable

UL subject 13 overall shielded multi-paired cable Ⓐ

†See color code chart on page 2•2075

Construction (5080-5093)

- Stranded tinned copper conductors
- Color coded poly and .005″ nylon insulation
- Overall mylar/aluminum foil shield and stranded tin copper drain wire, where applicable.
- Black PVC outer jacket

Characteristics

- Temperature:—30 °C to +90 °C
- UL Subject 1277 90°C 600 Volts
- Tray Cable Articles 318, 340, 500, and 501 NEC
- UL 70,000 BTU Flame and Tray Cable Test

Construction (8006-8450)

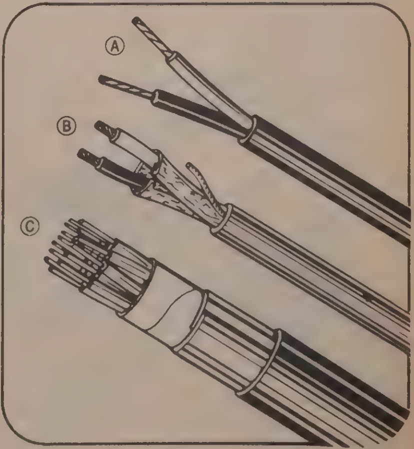
- Solid bare copper conductors
- Color coded high molecular weight polyethylene insulation, twisted into pairs
- Non-hygroscopic binder tape overall
- Overall .008″ aluminum shield
- Black polyethylene outer jacket

Characteristics

- Temperature:—60 °C to +80 °C
- Working Voltage: 300 Volts
- Resists acids, alkalis, moisture and fungus
- Capacitance 80 pF/mile

Applications

- Control
- Telemetering
- Supervisory



(312) 455-8830 **Consolidated** electronic wire & cable

MULTI-CONDUCTOR COMMUNICATIONS CABLE

TELEPHONE AND COMMUNICATIONS CABLE

Construction
- Solid bare copper conductors
- Color coded high molecular weight polyethylene insulation, twisted into pairs
- Non-hygroscopic binder tape
- Overall .008″ aluminum shield
- Black polyethylene outer jacket

Characteristics
- Temperature: −60° to +80°C
- Working Voltage: 300 Volts
- Resists acids, alkalis, moisture and fungus
- REA PE-22

Applications
- Telephone and aerial duct installations
- Telemetering

aerial and duct installation—meets REA-PE22

Construction
- Inner black polyetylene jacket
- Other construction details same as above

Characteristics
- Temperature: −60° to +80°C
- Working Voltage: 300 Volts
- Resists acids, alkalis, moisture and fungus
- Double jacket for direct burial
- REA PE-23

Applications
- Telephone Direct Burial Installation
- Telemetering

NOTE: Following REA Secifications available on request: PE-7-PE19-PE39-PE-54

direct burial installation—meets REA-PE23

Construction (Article 725)
- Solid or stranded bare copper conductors
- (FEP) Fluorinated ethylene propylene insulation
- Overall mylar aluminum foil shield and drain wire where applicable
- Documentation tape
- FEP outer jacket

Characteristics
- NEC Article 725 Class 2 150 Volts
- Temperature: – 70 °C to + 200 °c
- Air Plenum Cable-no conduit required

Applications
- Computer
- Instrumentation
- Control

Construction (Coax)
- Solid bare copper or copperweld conductors
- (FEP) Fluorinated ethylene propylene insulation, air or foam dielectric
- Braided bare copper or tinned copper shield
- FEP outer jacket

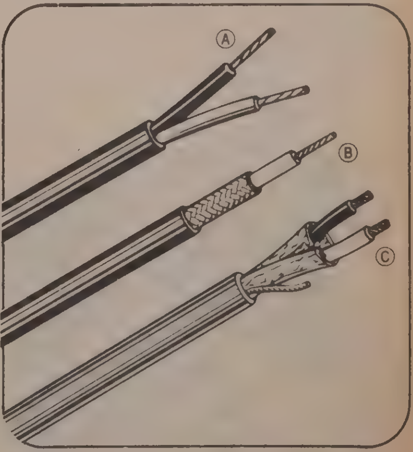
Characteristics
- Plenum Coaxial Cable-no conduit required
- UL Subject 13
- NEC Article 725-2(b)
- Temperature: – 70° to + 200 °C

Applications
- Data Processing Terminals
- Computer
- CCTV
- MATV

Construction (Article 760)
- Solid or stranded bare copper conductors
- (FEP) Fluorinated ethylene propylene insulation
- Overall mylar aluminum foil shield and drain wire where applicable
- Documentation tape
- FEP outer jacket

Characteristics
- NEC Article 760-4(b) 300 Volts
- Temperature: – 70° to + 200 °c
- Air Plenum Cable-no conduit required

Applications
- Fire and Burglar Alarms
- Fire/Smoke Detection Control
- Communication Systems



(312) 455-8830 **Consolidated** electronic wire & cable

COMPUTER CABLES

SHIELDED CABLES

Construction (5524 and 4596)

- Solid or stranded tinned copper conductors
- Color coded "Lo-Cap" foamed polypropylene insulation
- Conductors cabled into twisted pair
- Overall mylar/aluminum foil shield
- Stranded tin copper drain wire
- Black polyvinylchloride jacket

Characteristics

- Temperature: −20°C to +80°C
- UL 2772 300 Volts
- Low dielectric constant
- Low distortion data handling
- Light weight

Applications

- Data • Computer

Construction (5300 Series)

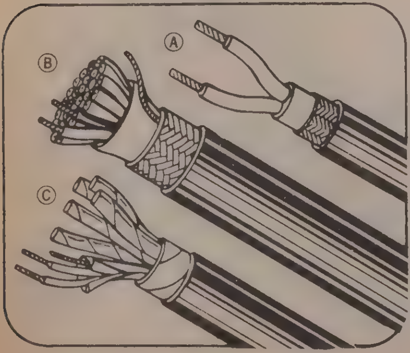
- Stranded tinned copper conductors
- Color coded "Lo-Cap" foamed polypropylene insulation
- Conductors cabled into twisted pairs
- Each pair isolated mylar/aluminum foil shield, aluminum facing inward
- Stranded tin copper drain wire each pair
- Gray polyvinylchloride jacket

Characteristics

- Temperature: −20°C to +80°C
- UL 2493 300V
- Low dielectric constant
- Low distortion data handling
- Light weight

Applications

- Data • Computer



"low cap" overall shielded pair computer cable meets EIA RS-422B type requirements Ⓐ

IEEE488 general purpose interface bus cable catalog number 5525 Ⓑ

Construction

Consists of:

Six twisted pairs of 26 AWG (7/34) tinned copper with .010" Polyvinylchloride (PVC) insulation, color band coded.

Ten single conductors of 26 AWG (7/34) tinned copper with .010" Polyvinylchloride (PVC) insulation, color band coded.

One single conductor of 24 AWG (7×34) tinned copper with .010" Polyvinylchloride (PVC) insulation, color band coded.

Cabled together with a 26 AWG (7/34) tinned copper drain wire and overall braided tinned copper shield with 90% minimum coverage.

Overall jacket is PVC with a 035" nominal wall thickness

Characteristics

Temperature rating: 80°C
Voltage rating: 300V
D.C. Resistance:
24 AWG-.784 ohms/meter
26 AWG-1.26 ohms/meter
Capacitance (nom.):

SHIELDED CABLES

Construction (5700 Series)

- Stranded tinned copper conductors
- Color coded semi-rigid polyvinylchloride insulation
- Conductors cabled
- Mylar/aluminum foil shield and tinned copper drain wire overall
- Gray polyvinylchloride jacket

Characteristics

- Temperature Range: −20° C to +80° C
- Suggested Working Voltage: 300 Volts
  UL 2464 CSA SR-PVC
- Meets RS 232C

Construction (5700 and 5900 Series)

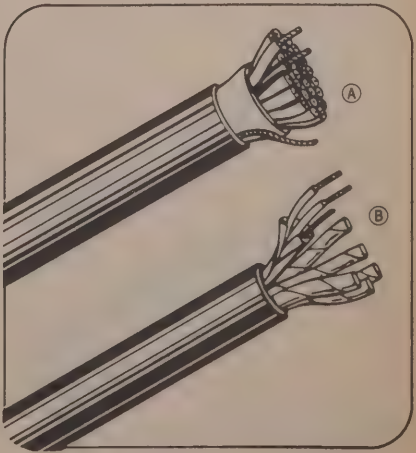
- Solid or stranded tinned copper conductors
- Color coded semi-rigid polyvinylchloride insulation
- Conductors cabled and twisted into pairs where applicable
- Overall mylar/aluminum foil shield and stranded tinned copper drain wire
- Gray polyvinylchloride jacket

Characteristics

Temperature Range: −20° C to +80° C (UL +80° C)
- UL 2464 300 Volts
- CSA SR-PVC
- Meets RS 232C

Applications

- Computer
- Instrumentation
- Data



(312) 455-8830 **Consolidated** electronic wire & cable

COMPUTER CABLES

SHIELDED CABLES

Construction (4400 series)
- Solid cw, stranded cw, or stranded copper conductors
- Solid PE, foam PE, or "FEP" teflon insulation
- Overall bare copper braid shield
- Non-contaminating black PVC or "FEP" teflon outer jacket

Characteristics
- Temperature Range: −20° to +80°C

Applications
- Computer
- Data Transmission

Construction (twinaxial)
- Stranded copper or bare copper conductors
- Color coded polyethylene insulation
- Shield Types:
  (A) Braided Tin Copper
  (B) Mylar Aluminum Foil Wrap and Tin Copper Drain
- Color coded PVC outer jacket

Characteristics
- Temperature Range: −20°C to +60°C (UL +60°C)
- UL 2092 UL 2582
- UL 2498 UL 2772
- No crosstalk
- Balanced line operation

Applications
- Data Transmission
- Broadcast

IIA — Non-contaminating low temperature polyvinylchloride jacket C — Bare copper braid shield

SHIELDED CABLES

Construction (5300 series)
- Stranded or solid tinned copper conductors
- Color coded polypropylene insulation
- Conductors twisted into pairs
- Each pair isolated mylar/aluminum foil shield, aluminum facing inward
- Stranded tin copper drain wire each pair
- Gray polyvinylchloride (PVC) outer jacket

Characteristics
- Temperature −40 °C to +105 °C

Voltage

UL 2493	300V	22AWG
UL 2725	300V	22AWG
UL 2493	350V	20AWG
UL 2493	400V	18AWG

- Shields are electrically "isolated" from each other

Applications
- Audio • Data
- Broadcast • Sound
- Instrumentation

Construction (4599)
- Solid bare copperweld (cw) conductors
- Solid polyethylene insulation
- Overall bare copper braid shield
- Conductors laid parallel
- Figure "8" construction black non-contaminating PVC jacket

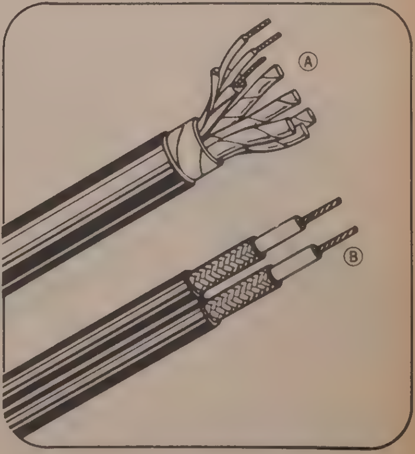
Characteristics
- Temperature −20 °C to +80 °C
- 75 Ohm Twin Coax

Applications
- Computer • Data
- Wang Word Processing Cable

Construction (4799)
- Solid bare cw conductors
- "FEP" Teflon insulation
- Overall bare copper braid shield
- Conductors laid parallel
- Figure "8" construction
- "FEP" Teflon or its equivalent outer jacket

Characteristics
- Temperature −40 °C to +200 °C
- 75 Ohm Twin Coax
- UL Listed—Subject 13
  NEC Article 725-2(b)

Applications
- Computer • Data
- Wang Word Processing Cable



(312) 455-8830 **Consolidated** electronic wire & cable

COMPUTER CABLES

SHIELDED CABLES

shielded computer and control cable

Construction
- Stranded tinned copper conductors
- Color coded polyvinylchloride insulation
- Conductors cabled, fillers and wrap
- Overall braided tinned copper shield
- Gray polyvinylchloride outer jacket

Characteristics
- Temperature Range: −20°C to +80°C (UL +80°C)
- UL 2343 300 Volts
- UL 2464 300 Volts
- UL 2725 300 Volts

Applications
- Computer
- Instrumentation
- Data

RG COAXIAL CABLE TRANSMISSION LINE

Construction

- Stranded or solid center conductors
- Shield types: Braided bare, silver or tin coated copper
- See first page of this section for additional construction and characteristic information

Applications

- RF Communications
- Data Transmission
- Video

Key to Abbreviations:

C — Bare Copper
S — Silver Copper
P — Polyethylene
CW — Copperweld
T — Teflon
TT — Teflon Tape
CT — Bare Coppertube
N — Nichrome
TC — Tin Copper
ASP — Air Spaced Polyethylene
SSP — Semi Solid Polyethylene
CCP — Conductive Coated Polyethylene
AST — Air Spaced Tetrafluorethylene
SCW — Silver Copperweld
SCB — Silver Plated Cadmium Bronze

MILITARY DESIGNATION	JACKET TYPE	TEMPERATURE LIMITS
TYPE I	Black Polyvinylchloride	−40°C to +80°C
TYPE II	Grey Polyvinylchloride	−25°C to +80°C
TYPE IIa	Black or Grey Polyvinylchloride	Under ¼''O.D −55°C to +90°C Over ¼ O.D −40°C to +90°C
TYPE IIIa	Black Polyethylene	−55°C to +80°C

COAXIAL AND BROADCAST CABLE

RG COAXIAL CABLE TRANSMISSION LINE

Construction
- Solid or stranded center conductors
- Shield types:
  bare copper braid
  silver plated copper braid
  single and double braids
- Teflon dielectrics

Applications
- RF Communications
- Data Transmission
- Video

Key to Abbreviations:
F-1—Solid Teflon
F-2—Taped Teflon
F-3—Air Spaced Teflon
V—High Temperature Lacquer Impregnated Fiberglass Braid with Teflon Between Shield and Jacket
VI—Polyester Fiber Impregnated with High Temperature Lacquer over Wrapped or Extruded Silicone Impregnated Fiberglass
IIA—Low Temperature Black Polyvinylchloride Non-Contaminating
FEP—Fluorinated Ethylene Propylene Copolymer, 200°C Teflon
TFE—Tetrafluoride Ethylene Propylene Copolymer, 250°C Teflon

Construction

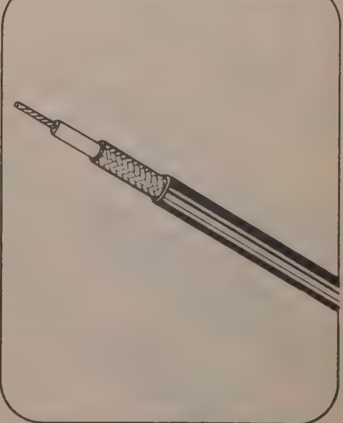
- Solid or stranded center conductors
- Shield types:
  bare copper braid
  silver plated copper braid
  single and double braids
- Teflon dielectrics

Applications

- RF Communications
- Data Transmission
- Video

Key to Abbreviations:

F-1—Solid Teflon
F-2—Taped Teflon
F-3—Air Spaced Teflon
V—High Temperature Lacquer Impregnated Fiberglass Braid with Teflon Between Shield and Jacket
VI—Polyester Fiber Impregnated with High Temperature Lacquer over Wrapped or Extruded Silicone Impregnated Fiberglass
IIA—Low Temperature Black Polyvinylchloride Non-Contaminating
FEP—Fluorinated Ethylene Propylene Copolymer, 200°C Teflon
TFE—Tetrafluoride Ethylene Propylene Copolymer, 250°C Teflon



COAXIAL AND BROADCAST CABLES

Construction (4400 Series)
- Solid CW, stranded CW, or stranded copper conductors
- Solid PE, foam PE, air or foam "FEP" teflon
- Overall bare copper braid shield
- Non-contaminating black PVC or "FEP" teflon outer jacket

Characteristics
- Temperature −20°C to +80°C

Applications
- Computer
- Data transmission

Construction (4599)
- Solid bare copperweld (cw) conductors
- Solid polyethylene insulation
- Overall bare copper braid shield
- Conductors laid parallel
- Figure "8" construction black non-contaminating PVC jacket

Characteristics
- Temperature −20°C to +80°C
- 75 Ohm Twin Coax

Applications
- Computer
- Data
- Wang Word Processing Cable

Construction (4799)
- Solid bare cw conductors
- FEP Teflon insulation
- Overall bare copper braid shield
- Conductors laid parallel
- Figure "8" construction
- "FEP Teflon or its equivalent outer jacket

Characteristics
- Temperature −40°C to +200°C
- 75 Ohm Twin Coax
- UL Listed—Subject 13 NEC Article 725-2(b)

Applications
- Computer
- Data
- Wang Word Processing Cable

Construction (twinaxial)
- Stranded copper or bare copper conductors
- Color coded polyethylene insulation
- Shield Types:
  (A) Braided Tin Copper
  (B) Mylar Aluminum Foil Wrap and Tin Copper Drain
- Color coded PVC outer jacket

Characteristics
- Temperature Range: −20°C to +60°C (UL +60°C)
- UL 2092 UL 2582
- No crosstalk
- UL 2498 UL 2772
- Balanced line operation

Applications
- Data Transmission
- Broadcast

* Semi Solid Dielectric; N—Nichrome; C—Copper; S—Silvered Copper; CS—Copperweld; T—Tinned Copper; F—Formvar

Construction

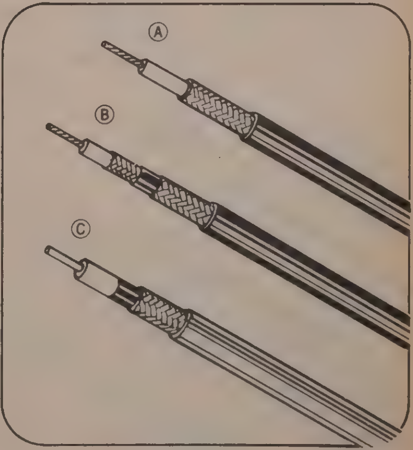
- Solid copper, solid copperweld, stranded bare and tin copper conductors
- Solid PE and foam DE insulation
- Overall inner and outer bare and tin copper braid shields where applicable
- Polyvinylchloride (PVC) outer jacket

Characteristics

- Temperature −20°C to +80°C

Applications

- Data Transmission
- Broadcast



(312) 455-8830 **Consolidated** electronic wire & cable

COAXIAL AND BROADCAST CABLES

CATV/MATV COAXIAL CABLES

Construction (siamese cables)

- Stranded tinned and bare copper conductors
- Cellular polyethylene and polyvinylchloride insulation
- Mylar aluminum foil shield with drain and copper braid shield
- "Siamese" cable construction
- Black polyvinylchloride jacket

Characteristics

- Temperature −20°C to +80°C
- Cable 100% sweep tested
- 75 Ohm impedance
- "Siamese" construction

Applications

- TV camera cable
- Broadcast
- CCTV cable

Construction (6/u)

- Solid bare copper or copperweld conductors
- Cellular polyethylene insulation
- Mylar aluminum foil with drains and/or aluminum braid
- Black polyvinylchloride outer jacket

Characteristics

- Temperature −20°C to +60°C
- Cable 100% sweep tested
- 75 Ohm impedance

Applications

- Broadcast
- MATV coaxial
- CCTV coaxial
- CATV drop cable
- TV/FM lead-in cable

SHIELDED CABLES

Construction

- Stranded or solid tinned copper conductors
- Color coded polypropylene or low cap insulation
- Conductors twisted into pairs
- Each pair isolated mylar/aluminum foil shield. aluminum facing inward
- Stranded tin copper drain wire each pair
- Gray polyvinylchloride (PVC) outer jacket

Characteristics

- Temperature Range: −40°C to +105°C

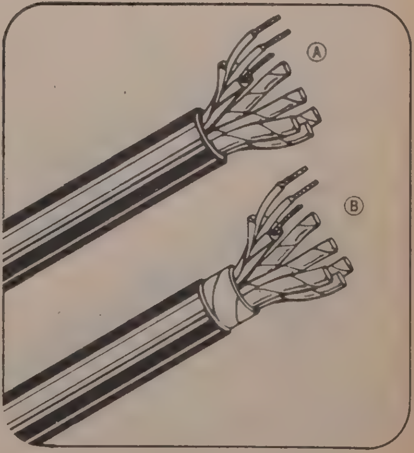
Voltage Rating:

UL 2493	300V	22AWG
UL 2725	300V	22AWG
UL 2493	350V	20AWG
UL 2493	400V	18AWG

- Shields are electrically "isolated" from each other

Applications

- Audio
- Broadcast
- Instrumentation
- Data
- Sound



(312) 455-8830 **Consolidated** electronic wire & cable

INSTRUMENTATION CABLES

SHIELDED CABLES

Construction (5528)
- Stranded tinned copper conductors
- Color coded polypropylene insulation
- Conductors cabled into pairs, on common axis
- Mylar/aluminum foil shield and tinned copper drain wire
- Gray polyvinylchloride jacket

Characteristics
- Temperature: −40° to +105°C
- Suggested Working Voltage: 400 Volts

Construction (5700 & 5900 Series)
- Stranded or solid tinned copper conductors
- Color coded semi-rigid polyvinylchloride insulation
- Conductors cabled and twisted into pairs where applicable
- Overall mylar/aluminum foil shield and stranded tinned copper drain wire
- Gray polyvinylchloride jacket

Characteristics

Temperature Range:
-20°C to +80°C (UL +80°C)
- UL 2464 300 Volts
- CSA SR-PVC
- Meets RS 232C

Applications
- Computer
- Instrumentation
- Data

†See color code chart on page 2•2075

Construction (5000 Series)

- Stranded tinned copper conductors
- Color coded polyvinylchloride and .005″ nylon insulation
- Conductors cabled
- Overall mylar/aluminum foil shield and stranded tin copper drain wire, where applicable
- Black polyvinylchloride jacket

Characteristics

- Temperature −30°C to +90°C
- UL Subject 1277 90°C 600 Volts
- UL 70,000 BTU Flame and Tray Cable Test

Construction (8000 Series)

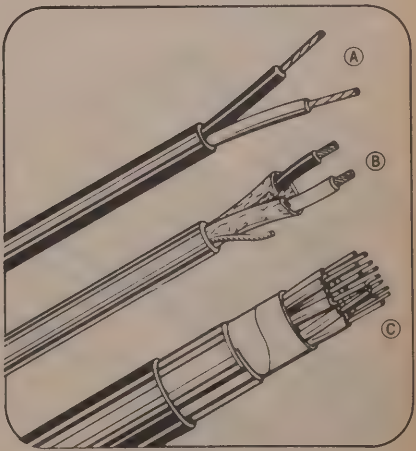
- Solid bare copper conductors
- Color coded high molecular weight polyethylene insulation, twisted into pairs
- Non-hygroscopic binder tape
- Overall .008″ aluminum shield
- Black polyethylene jacket

Characteristics

- Temperature −60°C to +80°C
- Working Voltage: 300 Volts
- Resists acids, alkalis, moisture and fungus

Applications

- Instrumentation control and power



(312) 455-8830 **Consolidated** electronic wire & cable

FIRE ALARM & TRAY CABLE

Construction (parallel)

- Solid bare copper conductors
- Red parallel construction flame retardant PVC insulation

Characteristics

- Fire Protective Signaling circuit cable — NEC Article 760
- UL subject 1424
- Voltage Rating: 300 Volts
- Temperature: −30° to +105°C
- VW-1 Vertical Flame Test
- Optional use Class 2/Class 3
- Circuits described in Article 725 NEC Code

Applications

- Power Limited Fire Protective Cable: NEC Article 760
- Power Limited Circuit Cable: NEC Article 725 Class 2 and 3

Construction (unshielded)

- Solid bare copper conductors
- Color coded flame retardant polyvinylchloride insulation
- Conductors cabled
- Red flame-retardant polyvinylchloride outer jacket

Characteristics

- Fire Protective signaling circuit cable — NEC Article 760
- UL Subject 1424
- Voltage Rating: 300 Volts
- Temperature: −30° to +105°C
- VW-1 Vertical Flame Test
- Optional use: Class 2/Class 3 Circuits (Article 725 NEC)

Applications

- Power Limited Fire Protective Cable: NEC Article 760
- Power Limited Circuit Cable: NEC Article 725 Class 2 and 3

Construction (shielded)

- Solid bare copper conductors
- Color coded flame-retardant polyvinylchloride insulation
- Conductors cabled
- Overall mylar/aluminum foil shield and tin copper drain wire
- Red flame retardant polyvinylchloride outer jacket

Characteristics

- Fire Protective signaling circuit cable — NEC Article 760
- UL Subject 1424
- Voltage Rating: 300 Volts
- Temperature: −30° to +105°C
- VW-1 Vertical Flame Test
- Optional use: Class 2/Class 3 Circuits (Article 725 NEC)

Applications

- Power Limited Fire Protection Cable: NEC Article 760
- Power Limited Circuit Cable: NEC Article 725 Class 2 and 3

Construction (Article 725)
- Stranded bare copper or tin copper conductors
- (FEP) Fluorinated ethylene propylene insulation
- Overall mylar aluminum foil shield and drain wire where applicable
- Documentation tape
- FEP outer jacket

Characteristics
- NEC Article 725 Class 2 150 Volts
- Temperature: −70°C to +200°c
- Air Plenum Cable — no conduit required

Applications
- Computer
- Instrumentation
- Control

Construction (Coax)
- Solid bare copper or copperweld conductors
- (FEP) Fluorinated ethylene propylene insulation
- Braided bare copper or tinned copper shield
- FEP outer jacket

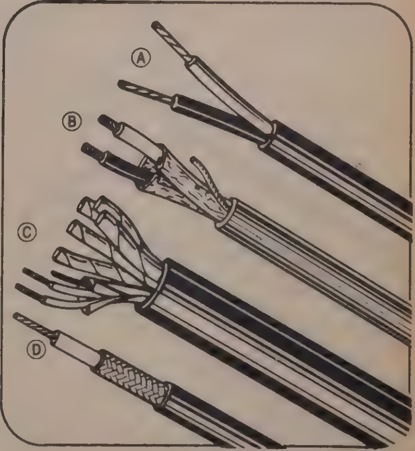
Characteristics
- Plenum Coaxial Cable — no conduit required
- UL Subject 13
- NEC Article 725-2(b)
- Temperature: −70° to +200°C

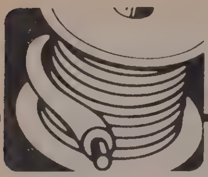
Applications
- Data Processing Terminals
- Computer
- CCTV
- MATV

Construction (Article 760)
- Solid copper conductors
- (FEP) Fluorinated ethylene propylene insulation, air or foam dielectric
- Overall mylar aluminum foil shield and drain wire where applicable
- Documentation tape
- FEP outer jacket

Characteristics
- NEC Article 760-4(b) 300 Volts
- Temperature: −70° to +200°c
- Air plenum cable — no conduit required

Applications
- Fire and Burglar Alarms
- Fire/Smoke Detection Control
- Communication Systems





(312) 455-8830 **Consolidated** electronic wire & cable

HOOK-UP WIRE

PVC INSULATED

Construction (80°C)

- Stranded or solid tinned copper conductors or stranded "Topcoat" conductor, which has copper conductors passed through tin bath bonding individual strands together
- Color coded PVC insulation
- Nominal insulation thickness .016"

Characteristics

- Temperature −40°C to +80°C
- Voltage Rating: 300 Volts
- UL Style 1007 300 Volts
  UL Style 1061 300 Volts
- Flame retardant VW-1
- CSA-TR-64-90°C-UL1007
- CSA-SR-PVC-UL1061

Construction (105°C)

- Stranded or solid tinned copper conductors or Stranded "Topcoat" conductor, which has copper conductors passed through tin bath bonding individual strands together
- Color coded PVC insulation
- Nominal insulation thickness .032"

Characteristics

- Temperature −30°C to +105°C
- Voltage Rating: 600 Volts
- UL Style 1015 600 Volts
- Flame-retardant VW-1
- CSA-TEW-105°C

irradiated PVC hook-up wire
Consolidated "IRR/PVC"

Consolidated IRR/PVC is a polyvinylchloride insulation which has been cross-linked by an irradiation process. The irradiation process results in an insulation far superior to ordinary PVC.

The irradiation process allows the IRR/PVC to become extremely heat resistant and burn through. The insulation is tougher than ordinary polyvinylchloride. Therefore, the abrasion resistance is increased greatly improving IRR-PVC reliability.

The following chart lists both military and UL standards for IRR/PVC manufactured wire.

Specifications	Max. Oper. Temp.	Maximum Voltage
MIL-W-16878/1 Type B	105°C	600 Volts RMS
U.L. AWM, CSA Style 1429, XLPV	80°C	150 Volts RMS 300 Volts peak
MIL-W-16878/2 Type C	105°C	1000 Volts RMS
U.L. AWM, CSA Style 1430, REW	105°C	300 Volts RMS 600 Volts peak

Construction
- Stranded tinned copper conductors
- Irradiated (IRR/PVC) polyvinylchloride insulation

Characteristics
- Temperature Range:
- MIL-W-16878D Type B and C −55°C to +105°C
- UL Style 1429 −55°C to +80°C, CSA XLPC
- UL Style 1430 −55°C to +105°C, CSA REW

Applications
- Appliances
- Business Machines
- Computer Wiring
- Control and Instrumentation

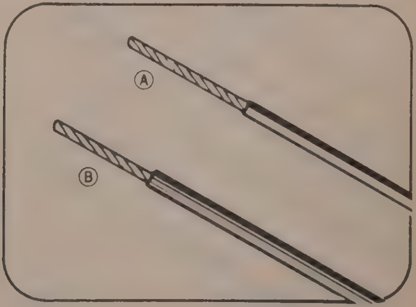
Cross-linked XLP polyethylene

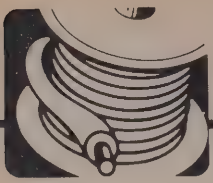
This insulation is chemically cross linked. This process increases the wire's resistance to solvents and moisture. Surges in temperature caused by overload or shorts will not cause damage to the insulation as quickly as if not cross-linked.

Construction
- Stranded tinned copper conductors
- Cross-linked (XLP) polyethylene insulation

Characteristics
- Temperature Range: −55°C to +125°C
- Working Voltage: 600 Volts
- UL 3173 600 Volts CSA - 1251
- UL 3171 600 Volts CSA - 1251

Applications
- Controls
- Motors
- Transformers





(312) 455-8830 **Consolidated** electronic wire & cable

HOOK-UP WIRE

Construction — Kynar
- Solid silver plated, OFHC copper conductor
- Color coded Kynar insulation

Characteristics
- Temperature Range: −40°C to +125°C
- UL 1422 +105°C
- Abrasion resistant
- UL 1426 +105°C
- Long flex-life

Applications
- Wire Wrap
- Computer Back Panels

Construction — LW
- Stranded tinned copper conductors
- Color coded polyvinylchloride insulation
- Nominal insulation thickness .010″

Characteristics
- Temperature Range: −40°C to +80°C
- Voltage Rating: 300 Volts

Construction — MW — PVC
- Stranded or solid tinned copper conductor
- Color coded polyvinylchloride insulation
- Nominal insulation thickness .016″

Characteristics
- Temperature Range: −40°C to +80°C
- Voltage Rating: 1000 Volts

Construction — HW
- Stranded tinned copper conductor
- Color coded heavy wall polyvinylchloride insulation

Characteristics
- Temperature Range: −40°C to +80°C
- Voltage Rating: 16AWG through 22AWG 2500 Volts
  6AWG through 14AWG 600 Volts

Construction — MW Nylon
- Stranded tinned copper conductor
- Color coded polyvinylchloride insulation
- Nominal insulation thickness .016″
- Clear nylon outer jacket

Characteristics
- Temperature Range: −40°C to +90°C
- Voltage Rating: 1000 Volts

Construction — LW — Nylon
- Stranded tinned copper conductor
- Clear nylon outer jacket
- Color coded .010″ wall polyvinylchloride insulation

Characteristics
- Temperature Range: −40°C to +90°C
- Voltage Rating: 300 Volts

Construction—MW · Shield · Nylon
- Stranded tinned copper conductors
- Color coded polyvinylchloride insulation
- Nominal insulation thickness .016″
- Tin copper braid shield
- Clear nylon outer jacket

Color Code:
0-Black 1-Brown

HOOK-UP WIRE

Construction — Type E
- Stranded silver-plated copper conductors
- Color-coded extruded "TFE" teflon insulation
- Nominal insulation thickness .010" 32AWG through 16AWG
- Nominal insulation thickness .012" 14AWG through 10AWG

Characteristics
- Temperature Rating: MIL-W-16878 Type "E" −60°C to +200°C
- UL Style 1213 +105°C
- Voltage Rating: MIL-W-16878 Type "E" 600 Volts

Construction — Type EE
- Stranded silver-plated copper conductors
- Color-coded extruded "TFE" teflon insulation
- Nominal insulation thickness .015" 32AWG through 18AWG
- Nominal insulation thickness .017" 16AWG through 10AWG

Characteristics
- Temperature Rating: MIL-W-16878 Type "EE" −60°C to +200°C
- UL Style 1180 +200°C
- Voltage Rating: MIL-W-16878 Type 'EE" 1000 Volts
- UL Style 1180 300 Volts

Construction—Fiberglass Braid
- Stranded silyer-plated copper conductor
- Color-coded Type "E" extruded .010" "TFE" teflon insulation
- Braided silver-plated copper shield, 90% minimum coverage
- Teflon impregnated fiberglass outer jacket

Characteristics
- Temperature Range: −65°C to +200°C
- Voltage Rating: 600 Volts

Construction—TFE Teflon Tape Jacket
- Stranded silver-plated copper conductor
- Color-coded Type "E" extruded .010" "TFE" teflon insulation
- Braided silver-plated copper shield, 90% minimum coverage
- Fused wrapped white Teflon tape outer jacket

Characteristics
- Temperature Range: −65°C to +200°C
- Voltage Rating: 600 Volts

Construction — SF
- Stranded tinned copper conductor
- Color-coded extruded silicone rubber insulation
- Nominal insulation thickness .031″
- Lacquered white glass yarn braid outer jacket, .009″ thick

Characteristics
- Temperature Range: +55°C to −200°C
- Voltage Rating: 600 Volts
- UL Style SF-2 600 Volts

Construction — SFF2
- Flexible stranded tinned copper conductor
- Color-coded extruded silicone rubber insulation
- Nominal insulation thickness .031″
- Lacquered white glass yarn braid outer jacket, .009″ thick

Characteristics
- Temperature Range: −55°C to +150°C
- Voltage Rating: 600 Volts
- UL Style SFF-2 600 Volts

Construction — TMGT
- Stranded nickel-clad copper conductor
- Fused .015″ thick teflon tape insulation
- Manning glass separator
- Teflon-impregnated fiberglass glass braid outer jacket, .005″ thick

Characteristics
- Temperature Range: −65°C to +250°C
- Voltage Rating: 600 Volts
- UL Style TMGT (TAGT) 600 Volts

Construction — MIL-W-25038
- Stranded nickel-clad copper conductor
- Inorganic glass-barrier tape
- Manning glass-barrier tape
- Extruded teflon insulation
- Teflon-impregnated fiberglass outer braid jacket, .005″ thick

Characteristics
- Temperature Rating: −65°V to +399°C
- Voltage Rating: 600 Volts
- MIL-W-25038 600 Volts

Construction — 5086/I
- Stranded tinned copper conductor
- White polyvinylchloride insulation
- Clear nylon outer jacket

Characteristics
- Temperature Range: −55°C to +105°C
- Voltage Rating: 1000 Volts
- MIL-W-5086 Type I

Construction — 5086/II

Type II
AN-22 through AN-12
- Stranded tinned copper conductor
- White poyvinylchloride insulation
- White glass yarn braid
- Clear nylon jacket overall

Type II
AN-10 through AN-00
- Stranded tinned copper conductor
- White polyvinylchloride insulation
- White glass yarn braid
- Flame retardent nylon lacquered glass, yarn braid overall

Characteristics
- Temperature Range: −55°C to +105°C
- Voltage Rating: 1000 Volts

Construction — 7078/II
- Stranded tinned copper conductor
- White polyvinylchloride insulation
- Clear nylon jacket
- Overall tinned copper braid shield, minimum braid coverage 90%
- Clear nylon outer jacket

Characteristics
- Temperature Range: −55°C to +105°C
- Voltage Rating: 600 Volts

ELECTRICAL

SO type neoprene jacketed control cable 600 volts

Construction (SO Series)

- Stranded bare copper conductors
- Color coded rubber insulation
- Cabled with fillers where necessary
- Overall wrap
- Black neoprene outer jacket

Characteristics

- Temperature Range: −20°C to +60°C
- Voltage Rating: 600 Volts

Applications

- Industrial Controls
- Remote Control Equipment and Motors

Construction (1700 Series)

- Stranded tinned copper cinductors
- Color coded rubber insulation
- Cabled with fillers and separator
- Black rubber jacket overall

Characteristics

- Temperature Range: −20°C to +60°C
- Voltage Rating: 300 Volts

Applications

- Industrial Controls
- Remote Control Equipment

TRAY CABLES TYPE TC(CTB) (THWN/THHN/TFFN CONDUCTORS)

Construction
- Stranded bare copper conductors
- Color coded polyvinylchloride insulation with nylon jacket over each conductor
- Conductors cabled
- Fillers where necessary
- Overall polyester tape
- Black flame-retardant polyvinylchloride outer jacket

Characteristics
- Temperature Range: −20°C to +90°C
- Tray Cable Type CTB THHN THWN (TFFN)
- Working Voltage: 600 Volts
- UL Standard 83 (62)
- UL Standard 1277
- NEC Articles 310, 318, 340
- Resists abrasion, oil, chemicals and highly flame retardant

Applications
- Industrial Power
- Control Circuits

electronic wire & cable

ELECTRICAL

CORD SETS

shielded cords

Construction

- Flexible tinned copper conductors
- PVC insulation
- Aluminum backed Mylar^T shield with drain wire
- Drain wire attached to the green (NAS) or the green/yellow (CEE) ground wire
- PVC jacket
- Molded male and/or female connector
- Free ends are prepared by removing (ROJ) Jacket 2″, stripping conductors .625″ and twisting

unshielded cords

Construction

- Flexible tinned copper conductors on thermoplastic (PVC) product, bare copper on rubber products
- Rubber or thermoplastic (PVC) jacket
- Molded male and/or female connector
- Free ends are prepared by removing jacket 2″, stripping conductors .625″ and twisting

extension cords

Construction

- Flexible bare tinned copper
- PVC insulation
- Heavy duty orange PVC jacket suitable for outdoor use
- OSHA and UL

cooling fan cords

Construction

- flexible parallel cord type SPT-1
- Soft molded angle connector which facilitates easy connection to most cooling fans
- Free end split 1½″, stripped ½″, and dip tinned

Construction (Conco Foam)
- Stranded bare copper and/or copperweld conductors
- Color coded foam PE Insulation
- Mylar aluminum foil shield and tin copper drain, where applicable
- Black PE outer jacket

Characteristics
- Temperature −20°C to +60°C
- 300 Ohm cable
- Resists moisture, salt, air, chemical fumes, and sunlight
- 82 channel bandwidth
- Very low loss
- Individual packaged product

Applications
- TV/FM lead-in cable
- Transmission

Construction (flat twin lead and flat rotor)
- Stranded bare copper conductors
- Flat constructed brown polyethylene insulation

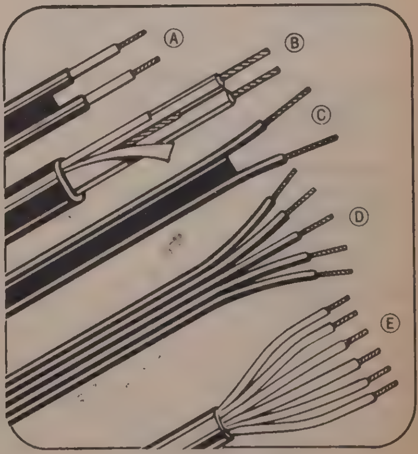
Characteristics
- Temperature −20°C to +60°C
- 300 Ohm cable

Applications
- TV/FM lead-in cable

Construction (rotor cable round)
- Stranded bare copper conductors
- Color coded PE Insulation
- Conductors cabled
- Gray polyvinylchloride jacket

Characteristics
- Temperature −20°C to +80°C
- Working Voltage: 200 Volts

Applications
- Antenna Rotor Control



(312) 455-8830 **Consolidated** electronic wire & cable

GENERAL PURPOSE WIRE AND CABLE

Construction (speaker cable)
- Stranded copper conductors, one bare, one tinned
- Conductors laid parallel, one conductor marked for polarity
- Color coded polyvinylchloride insulation
- Conductors separate easily

Characteristics
- Temperature: −20° to +80°C
- Working Voltage: 300 Volts

Applications
- Audio
- Speaker Systems
- Sound Systems

Construction (5160)
- PVC core
- Two (2) spiral wrapped tin copper conductors
- Gray Polyvinylchloride outer jacket

Characteristics
- Temperature: −20°C to +80°C
- Low impedance 8 ohm coax

Applications
- Low impedance speaker cable
- Electro-static speaker application

Construction (5587)
- Stranded tinned copper conductors
- Polyethylene primary dielectric
- Spiral wrapped tinned copper serve each conductor
- Gray polyvinylchloride jacket parallel construction

Characteristics
- Temperature: −20° to +80°C
- Working Voltage: 300 Volts

Applications
- Headset Cable
- Language Lab Cable

Construction (4077-4079)
- Stranded bare copper conductors
- Conductors laid parallel
- Color Coded Polyvinyichloride insulation

Characteristics
- Temperature: −20° to +80°C
- Working Voltage: 300 Volts
- UL SPT

Applications
- Lamps
- Stereo
- Appliances

Construction (4081-4083)
- Stranded tinned copper conductors
- Conductors laid parallel
- Black neoprene insulation

Characteristics
- Temperature: −30° to +90°C
- Voltage Rating: 300 Volts
- UL Type HPN

Applications
- Heater Cord
- Test and Ignition Cord

Construction (1000 Series)

- Stranded tinned copper conductors
- Color coded "EPR" rubber insulation

Characteristics

- Temperature Range: −30°C to +90°C

Applications

- Test Probes

Construction (4600 Series)

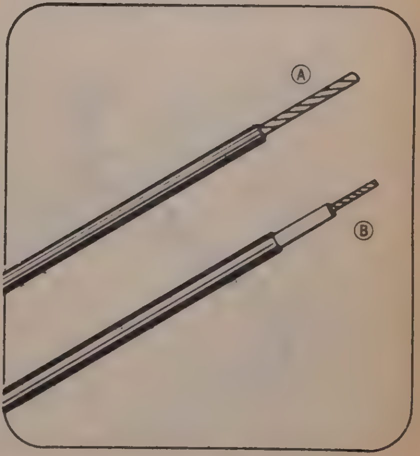
- Stranded tinned copper conductors
- Flame retardant polyethylene (Rulan) primary insulation
- Color coded polyvinylchloride outer jacket, where specified

Characteristics

- Temperature Range: −20°C to +80°C
- Working Voltage: 10,000 Volts through 40,000 Volts

Applications

- Testing High Voltage Equipment and Apparatus



(312) 445-8830 **Consolidated** electronic wire & cable

Construction
- Stranded bare copper or tinned copper conductors
- Color coded rubber insulation
- Neoprene outer jacket
- 4-foot retracted cords—25-foot extended lengths with 6-inch straight lead on one end
- 2-foot retracted cords—12-foot extended lengths with 6-inch straight lead on one end

Characteristics
- Temperature Range: −30°C to +70°C
- Voltage Rating: SVO 300 Volts
  SJO 300 Volts
  SO 600V olts

Applications
- Industrial Control
- Remote Control
- Test Probes

Construction (flat)

- Woven tinned copper in flat construction
- Each wire meets specifications at QQ — 343 Type S and ASTM-B-33
- 95% minimum shield coverage

Characteristics

- Rolled into flat form

Applications

- Shielding
- Ground Straps
- Bonding

Construction (tubular and oval)

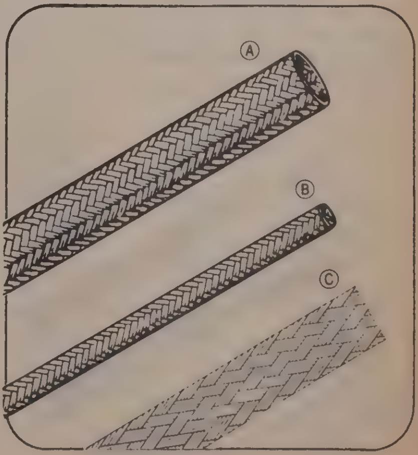
- Woven tinned copper in tubular or oval construction
- Each wire meets specifications of QQ-W-343 Type S and ASTM-B-33
- 95% minimum shield coverage

Characteristics

- Tubular, round or oval construction

Applications

- Shielding
- Ground Straps
- Bonding



(312) 455-8830 **Consolidated**
electronic wire & cable

GENERAL PURPOSE WIRE AND CABLE

AUTOMOTIVE WIRE AND CABLE

Construction (GPT)
- Stranded bare copper conductor
- Color coded polyvinylchloride insulation

Characteristics
- Temperature −20°C to +60°C
- SAE J 558a
- Low tension cable

Applications
- Automobiles • Trailers • Boats

Construction (4032)
- Stranded tinned copper conductor
- Red polyvinylchloride (PVC) jacket

Characteristics
- Temperature: −20°C to +80°C
- SAE J557
- High tension ignition cable

Applications
- Ignition Cable
- Spark Plug Cable

Construction (duplex/triplex)
- Stranded bare copper conductor
- Color-coded insulation
- Conductors laid parallel
- Gray PVC outer jacket

Characteristics
- Temperature: −20°C to +60°C
- SAE J558a
- Low Tension Duplex & Triplex

Applications
- Trailer Cable

Construction (1161)
- Stranded tinned copper conductor
- Brown PVC insulation
- Nominal insulation thickness .010″

Characteristics
- Temperature: −20°C to +80°C
- Voltage Rating: 300 Volts

Applications
- Antenna and Aerial Lead-in

chart 6

pair identification colors

This table shows the color code of a 25-pair cable. Cables with less than 25 pairs follow this sequence Cables with more than 25 pairs are layed up in groups. The basic group consists of 25 pairs color coded in the sequence noted here. The basic group is further divided into units where necessary. For example: a 50-pair cable consists of two basic 25-pair groups.

	Tip/Ring		Tip/Ring
1	White/Blue	14	Black/Brown
2	White/Orange	15	Black/Slate
3	White/Green	16	Yellow/Blue
4	White/Brown	17	YellowOrange
5	White/Slate	18	Yellow/Green
6	Red/Blue	19	Yellow/Brown
7	Red/Orange	20	Yellow/Slate
8	Red/Green	21	Violet/Blue
9	Red/Brown	22	Violet/Orange
10	Red/Slate	23	Violet/Green
11	Black/Blue	24	Violet/Brown
12	Black/Orange	25	Violet/Slate
13	Black/Green		

chart 6

group binder identification colors

This table shows the binder colors used to distinguish each 25-pair basic group in a multi-unit cable For example: in a 50-pair cable the units of the first 25-pair basic group will each have a blue-white binder The units of the second 25-pair basic group will each have an orange-white binder

	Color		Color
1	Blue-White	13	Green-Black
2	Orange-White	14	Brown-Black
3	Green-White	15	Slate-Black
4	Brown-White	16	Blue-Yellow
5	Slate-White	17	Orange-Yellow
6	Blue-Red	18	Green-Yellow
7	Orange-Red	19	Brown-Yellow
8	Green-Red	20	Slate-Yellow
9	Brown-Red	21	Blue-Violet
10	Slate- Red	22	Orange-Violet
11	Blue-Black	23	Green-Violet
12	Orange-Black	24	Brown-Violet

HOW TO READ COLOR CODE CHARTS

Locate the number of leads or pairs in the appropiate chart. Read color listings up from that point.

COONER WIRE

COONER WIRE COMPANY HAS BEEN IN THE SPECIALTY WIRE BUSINESS FOR OVER TWENTY YEARS. THESE PRODUCTS REPRESENT ONLY A SMALL PORTION OF OUR CAPABILITIES. CALL US WITH YOUR APPLICATION.

BRAIDED COPPER CABLES

Flat Constructions
Standard Braided Copper Cables

Manufactured of Bare or Tinned Copper Wire for bonds, grounds, leads, flexible connectors.

The suffix "T" stands for Tinned Copper Braids. If a Bare Copper Braid is desired, replace the "T" with a "B".

Tubular Constructions
Silver-Plated Copper Wire Shielding Braids

Manufactured to QQB-575A standards with the exception that 40 micro inches of Silver Plating has been substituted for the regular Tin Plating. This substitution is necessary when the shielding is to be subjected to temperatures exceeding 200°C, of if special corrosion resistance is required.

COONER WIRE

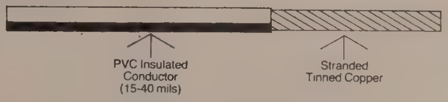
UL APPROVED GROUNDING CABLES

Round, Stranded Cables

Tinned Copper Conductor, PVC Insulation
UL Style 1662



Description
Extra-flexible, cabled tinned copper strands manufactured in accordance with Military Specification QQW-343. Insulation is high grade, clear polyvinylchloride (PVC). Temperature rating: +80°C. Voltage rating: 300 V.D C

Applications
Useful as a grounding cable in computers and computer systems. More compact, less costly, and easier to handle (the jacket slides smoothly to permit ease of termination) than most grounding systems.

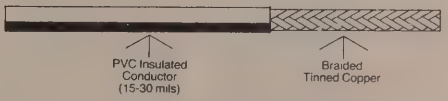
Flat, Braided Cables

Tinned Copper Conductor, PVC Insulation
UL Style 1680



Description
Tinned copper strands braided into a flat construction and insulated with polyvinylchloride (PVC). These constructions may be fabricated of bare copper, although tinned copper is generally preferred because of its resistance to corrosive elements Other insulating materials are available on request. Temperature rating: +105°C

Applications
Useful for grounding applications requiring flexible, insulated connections.

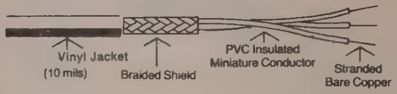
ULTRA FLEXIBLE MICROMINIATURE



DESCRIPTION:

Conductors are ultra flexible, bunched bare copper strands insulated with 5 mil walls of color coded 90°C Polyvinylchloride. Extra flexible braided shields, jackets or both can be applied over the cabled conductors.

APPLICATIONS:

Phonograph tone arms, miniature relays, biomedical instruments, computers and other specialized applications requiring 200 volt, 90°C ultra flexible microminiature multiconductor cables.

SHRINKABLE IRRADIATED POLYOLEFIN TUBING

This series is designed for maximum mechanical strength at stress or points of connection. It is strong, abrasion resistant and is supplied in expanded sizes. It insulates, jackets, splices, encapsulates, weatherproofs components, connectors, cables and irregular shaped objects. When exposed to heat (275°F) the tubing shrinks 50% in diameter, 5% longitudinal contraction. Controlled shrinkage to exact requirement takes place. SH275 meets or exceeds MIL-1-23053B/5 Class 1 and 2. SH290 meets or exceeds MIL-I-23053/6 available with UL approval. UL File No. E-51336. AMS 3636B, 3637A.

SPECIFICATIONS —

All Tests Made on Tubing in Recovered Dimension

Continuous Operating Temp: 135°C	Shrinkage Ratio: 2:1 (50%)
Longitudinal Change: 5% Max.	Dielectric Strength: 500 V/MIL Min.
Tensile Strength: 1500 PSI Min.	Dielectric Constant: 2.87 Max.
Ultimate Elongation: 200% Min.	Corrosive Resistance: Non-Corrosive
Special Gravity: 1.29 Max.	Resistance to Soldering Iron: Excellent
Low Temp. Flexibility (−54°C): No Cracking	Fuel, Oil, Solvent, Acid, Alkali, Hydraulic Fluid Resistance: Excellent

PACK ASSORTMENTS

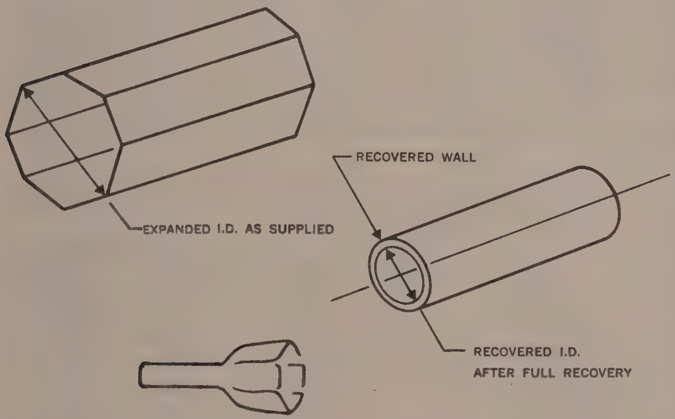
STOCK COLORS: Black, White, Red, Clear. Additional colors available. Although processed by hi-energy radiation the **Daflex SH275** and **SH290** shrinkable tubings **do not** at any time become radioactive or possess any residual radioactivity.

* Wall thickness will be less if recovery is restricted.
** 4' lengths.
† STOCK: Black 4' lengths. Colors avail.
†† Also stocked: 4', 1/2", 1", and 6" lengths.

NEW! 4:1 SHRINKABLE POLYOLEFIN TUBING



DAFLEX SH277 shrinkable irradiated polyolefin tubing recovers to 25% of its supplied size when full recovery is permitted. Material will shrink with the application of 120°C (250°F); is rated for continuous operation from −55°C to 135°C and will withstand up to 300°C (572°F) for short durations.

SH277 is flame retardant and meets or exceeds the specified properties of MIL-I-23053/5 Class 1 and 3. Its longitudinal shrinkage is a maximum of 10%. **DAFLEX SH277** can be hot stamped.

Typical applications are where tubing must fit over a large object such as the repair or replacement of cable jacketing.

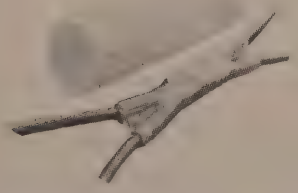
NEW! DAFLEX SHRINK/MELT IRRADIATED POLYOLEFIN TUBING (UL)



Daburn's dual wall polyolefin heat shrinkable tubing is designed to provide a tight moisture proof encapsulating seal. When 115°C is applied, the inner wall melts and flows, as the outer wall shrinks; forcing the melting wall to fill voids and interstices and to encapsulate what is covered. The result is a semi-rigid mass.

Daflex SM270 series is ideal for covering splices, cable junctions and as a shield for coarse surfaces. SM270 is flame retardant. It resists oil, hydraulic fluids, acids and alkalis.

It meets or exceeds MIL-I-23053/4, is UL approved VW-1 for 105°C.

STANDARD COLOR: Black. Clear (not flame retardant) available to order.

STANDARD LENGTH: 100', 1000', in 4' lengths, additional lengths to order.

Dielectric Constant, Max.: 3.1

DABURN

DUAL-WALL TEFLON* ENCAPSULATING SHRINKABLE TUBING

NEW DAFLON SM450 is a new dual wall shrink and melt Teflon tubing which gives a tight, moisture-proof seal. It is made from two types of Teflon. The outer wall is TFE Teflon and the inner lining is FEP Teflon. When heated to 400°F the FEP melts and at 621°F the TFE shrinks tightly. The FEP is squeezed into a solid or near solid mechanical encapsulation. DAFLON SM450 tubing protects against most environmental hazards involving pull, vibration, moisture, chemicals, etc. It may be used over wires, terminals, splices, connectors and as a strain relief and end cap. VW-1.

Operating Temperature: 450°F.

STANDARD PACKAGE: 100′ in 1 to 3 ft. lengths. Special lengths available to order. ** Will fully close off.

DAFLON SHRINK SH-400 (FEP)

Made with Modified TEFLON‡ FEP will shrink over inserted objects upon exposure to moderate heat. Heretofore, many joints, parts, components, devices could not be protected because of hi temperature required for shrinkage. FEP TEFLON‡, which has a continuous service temperature of 400°F, will shrink at 300°F. Supplied in natural (transparent) color. Complete shrinkage at 350°F. Now, many heat sensitive products can use the permanent protection of TEFLON.* Will not burn or support flame, long lengths available. Will not split or melt. Extruded. Meets MIL-I-23053/11. VW-1.

DAFLON 4:1 SHRINKABLE PTFE TUBING

DAFLON SH421 Shrinkable Teflon Tubing recovers to approximately 25% of its expanded size when heated to the gel point (621°F). Thus it is now possible to use shrinkable Teflon tubing, with its excellent chemical and physical properties, over objects which require more than the standard 2:1 shrinkdown ratio (see SH621).

NOTE: Tubing should be allowed to recover **at least 50%.** Conforms to MIL-I-23053/12 and AMS-3584. **Operating Temp.:** −85°F to +500°C. VW-1.

DABURN

TUBULAR BRAID PER MIL SPEC QQ-B-575

Tinned copper shielded braid mf'd completely round per Mil Spec QQ-B-575: Maintains its round configuration. Shielding coverage is 95% or more. Used in military applications where maximum shielding is required against electrostatic interference. Useful against mechanical abrasion and stresses for cables — as grounding cable.

STANDARD SPOOL PUT-UP: 50 Ft., 100 Ft., 250 Ft. Larger Spools Available — Advise.

* Values based on copper in free air at 65°F and intended as a guide only.

† These sizes are mfg. to standards of QQ-B-575 although they are not listed in the specification.

Additional constructions and variations made to order. Also available in **silver plated copper**, bare copper, stainless steel, and nickel plated copper.

TINNED COPPER SHIELDING — FLAT BRAID

Soft annealed tinned copper woven braid, rolled flat at time of manufacture. It is extremely flexible. Used as battery grounding, bonding strap for aircraft, vehicles, marine equipment. Eliminates ignition interference and moving parts. Slides over wire and cables.

NEW! CONTROLLED IMPEDANCE FLAT RIBBON CABLE

UL STYLE 2651 — 105°C — 300 VOLTS — VW-1

DESCRIPTION: Each conductor is 28 AWG, 7 strand of 36 AWG T.C. with .010″ nominal wall of extruded PVC insulation overall. Conductors are to provide .050″ ±.002″, center to center conductor spacing allowing for nominal impedance of 105 Ohms (measured ground-signal-ground). Cables are listed under UL style 2651 and meet UL VW-1 flame test. Conductors separate cleanly and one has a red stripe for polarity. Because of controlled center to center spacing, cables may be mass terminated with insulation displacement connectors designed for .050″ spacing of conductors. Crosstalk is also controllable.

MODULAR PLUG CABLES

Each Daburn modular cord is #28 AWG 7/36 soft tinned copper, color coded, and an overall PVC jacket, modular plugs at each end. Shielded constructions use an overall aluminum/polyester shield and drain wire. Standard constructions use flat cable. Round cable is available to order.

Daburn modular cords are suitable for data equipment, interface, keyboards, audio, telephone handsets, security & alarm applications.

They resist oils, grease, acids, fumes and are abrasion resistant. They will not mar other surfaces with which they come in contact.

Note: "Half-modular" cords — lugs on one end and keyed plugs are available to order.

DABURN

RETRACTILE POWER & COMMUNICATION CORDS—Ⓤ & CSA

Long Lasting Service—useful wherever cords much change length or position. Extend to approximately five times its retracted length. Returns to its original shape or length when released. Eliminates tangling, twisting or knots. Cords are UL and CSA approved.

POWER CORDS

RETRACTED LENGTHS: 1, 2, 3 & 4 FT. EXTENDED LENGTHS: 5, 10, 15 & 20 FT.

UL LISTED—NEOPRENE JACKETED CORD

Operating Temperature: −20°C to +60°C

HI-VOLT CORONA RESISTANT TEFLON* CABLE©

Voltage Rating at Sea Level—
Voltage Rating at 80,000 feet, approximately ⅓ lower—
Minimum life expectancy: 10,000 hours

* DUPONT

SMALL SIZE: You do not need bulky, thick, insulation jacketing as used with silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878. Insulation used conforms to and surpasses MIL-SPEC-W-16878.

AVOID CORONA PROBLEMS: Corona Resistant Teflon construction is specifically designed to retard and prevent corona penetration.

Temperature variations from −60°C to +250°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

DESCRIPTION: Single Conductor, Stranded Silver Plated Copper, Corona Resistant Teflon* Insulation.

TEMPERATURE RATING: −90°C to +250°C.

VOLTAGE RATING: Based on insulation thickness.

AVAILABLE COLORS: White, Black, Red, Green, Yellow, Lt. Blue, Brown, Orange, Gray, Violet. (Also available in tracer colors)

PUT-UP: 250′, 500′, 1000′

PLASTIC KINKLESS TEST LEAD WIRE

Soft formulation vinyl maximum flexibility. Temperature stability from −80°C to +115°C. Exceed requirements for MIL-I-3930A Type JP (PVC). Suitable for test leads, etc. Resistant to gasoline and oil. Excellent abrasion resistance.

DESCRIPTION: One conductor tinned copper stranded, special formulation vinyl insulation — smooth surface.

OPERATING TEMPERATURE: −80°C to +105°C, 5000V rating.

COLORS: Black, Red, Yellow, Green, White, Blue.

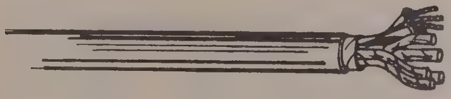
STANDARD PUT-UP: 500 Ft., 1000 Ft.

NOTE: #1922 is designed for IBM System 34-5250 (Cable #736221).
#1923 is designed for Wang System (Cable #420-0057).

COMPUTER CABLE MULTIPAIR FOIL SHIELD TO UL STYLE 2464



DESCRIPTION: Each conductor is #24 AWG 7/32 tinned copper, color coded, .009″ wall of semi-rigid PVC (UL Style 1061, CSA Type S-R PVC). Conductors are twisted in pairs. Overall aluminum/polyester foil shield and 7 strand tinned copper drain wire. Gray PVC jacket. To UL style 2464.

Construction is suitable for computer, communication and control applications.

Cable resists acids, alkalis, oil, solvents, moisture and fungus.

TEMPERATURE RANGE: −20°C to +80°C

VOLTAGE RATING: 300V

FLAMMABILITY: Passes UL VW-1

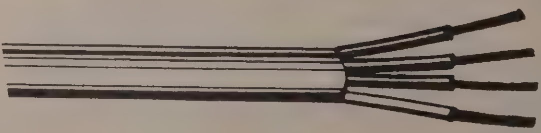
"QUAD" STATION WIRE

4 Conductor #22 AWG solid B.C. color coded with beige PVC jacket overall, nom. O.D. .145″.

Suitable for telephone, speaker, intercom, remote control applications.



CAT. NO.: 3020/4SW

COLOR CODE: Red, Green, Yellow, Black.

JACKET: Beige (standard); Gray, White, Brown available to order.

STANDARD PUT-UP: 100 Ft., 500 Ft., 1000 Ft.

MIL-W-16878 INSTRUMENTATION — SHIELDED • UNSHIELDED

DESCRIPTION: One or more conductors, each conductor silver plated concentrically stranded copper wire. Type E Extruded TFE .010″ insulation. When shielded, braided silver plated copper shield over conductor(s), 90% shield coverage. When covered, either a TEFLON* impregnated fiberglass braid or a .010″ TEFLON* fused, double tape jacket overall. Fungus, solvent, moisture, flame, acid, alkali and oil resistant. Multiconductors are twisted.

TEMP. RATING: −65°C to +200°C. FOR 250°C USE N.P. CONDUCTOR.

VOLT. RATING: 600V.

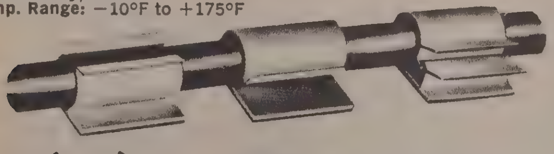
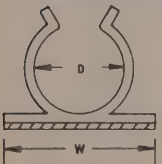
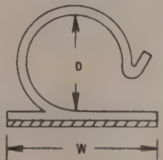
Temp. Range: −10°F to +175°F

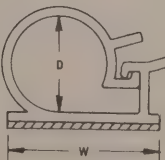




CAT. NO. 660



CAT. NO. 670



CAT. NO. 680 (LOCKING)

For fast secure mounting on smooth surfaces. No need to screw, nail or staple in place. Fastens in a flash — just peel off the protective backing and press in place on a clean, dry surface. For best results allow a few seconds for adhesive to set before applying load.

These plastic clips are insulating, strong and elastic. They have many uses, such as keeping telephone wires off the floor, holding wire, cable, tubing rods, etc. in position.

INSULATED PHONE TIP

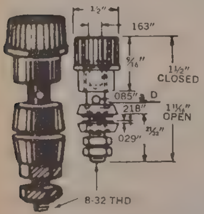
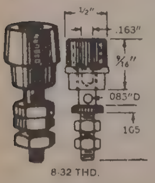
Fits any standard phone jack. Brass, nickle plated body. Solderless connection for wire which fits thru body of tip and secured under knurled nut. Shock-resistant plastic handle.

DABURN No.		Std. Pkg.
19-09	Senior	50



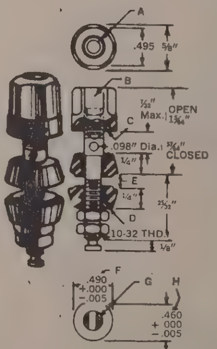


STANDARD DUTY BINDING POST

Molded nylon captive head. Brass, nickle plated stud and nuts. Rated at 15 amps. AC, capacitance 3.0 PF. Mounts in ¼" round hole in panels up to ⅛" thick.

COLORS: Red, Black (specify).

DABURN No.		Std. Pkg.
18-78	All insulated type	100
18-79	Grounded type	100



BINDING POSTS — MULTI-PURPOSE **Wrap Around**

Molded nylon body. Accepts tip plug, spade lug, banana plug, wire alligator clip and direct solder connection. Has molded-in brass inserts in head and washer. Rated at 30 amps. AC Capacitance 5. OMMFD. Banana plug receptacle .161" I.D. head non-removable from stud and washer completely insulates post from panel. For panels 1/16" to ¼" thick; drill ½" hole for mounting washers. Wire hole is at right angle to flat on insulated washer.

COLORS: Red, Black (specify).

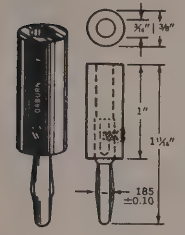
DABURN

PLUGS & JACKS

SOLDERLESS

INSULATED BANANA PLUG



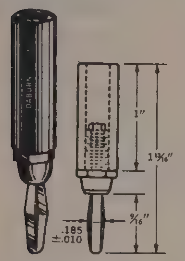
Mates with any standard banana jack. Side set screw secures wire without soldering. Plug is brass, nickel plated. Plastic handle.

COLORS: Red, Black, Yellow, Green, Blue (specify).

Spring	
DABURN No.	**Std. Pkg.**
19-46 Phosphor Bronze N.P.	50
19-46A Beryllium Copper N.P.	50

SOLDERLESS

INSULATED BANANA PLUG



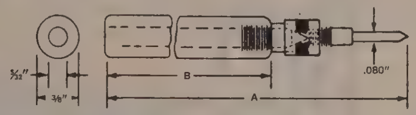
Mates with any standard banana jack. Plug is Hex Brass, nickel plated. Wire may be soldered to body or passed thru hex brass stud, flared and secured by screwing into body. Shock resistant plastic handle. **Colors:** Red, Black, Yellow, Green, Blue (specify)-

Spring	
DABURN No.	**Std. Pkg.**
19-04 Phosphor Bronze N.P.	50
19-04B Beryllium Copper S.P.	50

SOLDERLESS TEST PROD

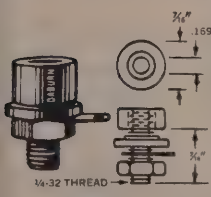
Body is brass, nickle plated with molded plastic handle. Solderless connection for wire fits thru handle and plug body and wraps under knurled nut.

COLORS: Red, Black (specify).



DABURN No.	Handle (B)	Overall Length (A)	Std. Pkg.
19-10	4"	5 3⁄16"	50
19-43	5"	6½"	50

INSULATED BANANA JACK

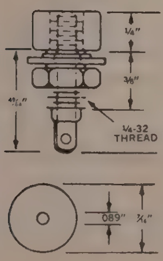


Body is brass nickel plated, mounts in 5⁄16" hole in panels up to 3⁄8" thick. Comes thru with hex nut, tinned copper lug and fibre washer. Takes all standard banana plugs. Molded plastic head.

COLORS: Red, Black, Yellow, Green, Blue (specify).

DABURN No.	Description	Std. Pkg.
19-06	Insulated Jack	50

INSULATED PHONE TIP JACK



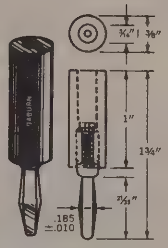
Fits all standard phone tips. Brass nickel plated body. Phosphor bronze spring provides positive contact. Comes thru complete with hex nut and fibre washer. Molded plastic head.

COLORS: Red, Black, Yellow, Green, Blue (specify).

DABURN No.		Std. Pkg.
19-07	Insulated Phone Tip Jack	50

SOLDERLESS

INSULATED BANANA PLUG



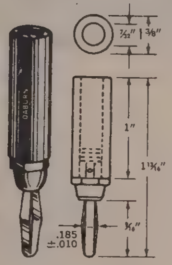
Mates with any standard banana jack. Plug is brass, nickel plated. Wire may be soldered to body or secured by solderless means, (as with our #19-04). Handle is flush fitting, shock resistant. Plastic.

COLORS: Red, Black, Yellow, Green, Blue (specify).

Spring	
DABURN No.	**Std. Pkg.**
19-65 Phosphor Bronze N.P.	50
19-65B Beryllium Copper S.P.	50

SOLDERLESS

INSULATED BANANA PLUG

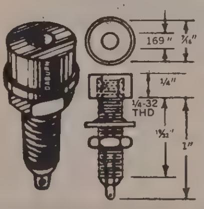


Mates with any standard banana jack. Wire may be soldered or passed through side hole and dressed around brass, nickle plated body to be secured by flush fitting shock resistant plastic handle.

COLORS: Red, Black, Yellow, Green, Blue (specify).

Spring	
DABURN No.	**Std. Pkg.**
19-63 Phosphor Bronze N.P.	50

INSULATED JACK COMBINATION

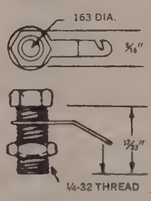


Will take senior phone tips or standard banana plugs. Body is brass, nickel plated. Mounts in 5⁄16" hole in panels up to ½" thick. Springs are phosphor bronze. Comes thru with hex nut and fiber washer.

COLORS: Red, Black, Yellow, Green, Blue (specify).

DABURN No.	Description	Std. Pkg.
19-33	Insulated Combination Jack	50

BANANA JACK



Hexed brass nickel plated hex nut and tinned copper lug. Has recessed head. Mounts in ¼" hole in panels up to 5⁄16" thick. Fits all standard banana plugs.

RATED: 15 amps AC

DABURN No.		Std. Pkg.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

DATAK FLEXY•MARKER™ for wire

A MAJOR ADVANCE in Marking Wire. The ULTRA-THIN FLEXY-MARKER

GENERAL SPECIFICATIONS

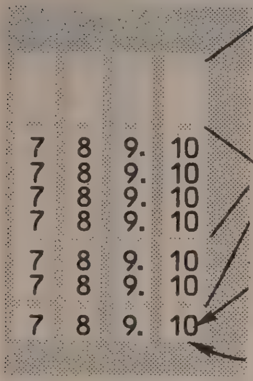
DIMENSIONS (Printed Markers): .25"W (nom.) x 1.125"L. Max. wire dia. for full wrap = 0.35". Min. wire dia. for legible marking = 0.040". See table for write-on marker dimensions.

BASE FILM: Soft, conformable .003" vinyl film.

MARKING INK: Black thermosetting. Fused into base film for permanency.

ADHESIVE: Modified acrylic. Excellent adhesion to metals and most wire insulations, including all vinyls. For reliable results on Teflon make a full wrap with overlap. Surfaces must be oil-free before application.

PRINTED MARKERS



TAB has no adhesive. Flick with a fingernail, apply marker and pull off in one easy motion.

MARKER FILM is dead-soft. Conforms perfectly even if wire is flexed.

3 PERFORATIONS are graduated in strength. You can pull off marker sections in order as you apply. Save balance for reuse.

LEGENDS are baked in. Won't fade, dissolve or wear off.

ADHESIVE bonds securely, even to vinyls. Markers won't loosen or fall off in time.

HOW SUPPLIED

FLEXY-MARKER™ wire markers are supplied in sets of 24 identical 3¼ x 5⅝ inch sheets bound into a handy pocket pad. A set has 1056 two figure markers, 768 three figure markers or 624 four figure markers per set. Each can be separated into 3 smaller markers.

COLOR ASSORTMENT. Twelve EIA and NEMA standard colors are available in an assortment called FCOLORS.

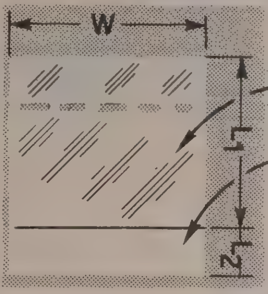
SEQUENTIAL NUMBERS AND ELECTRICAL TERMS. A number assortment from 1 to 104 (F1S104) and an assortment of miscellaneous electrical designations ((FBUS) are available.

TEMPERATURE RANGE: −55°C (−67°F) to 130°C (266°F). Marker will withstand brief excursions to a 150°C ambient but yellowing will occur after several hundred hours.

RESISTANCE TO PETROLEUM PRODUCTS: Unaffected by immersion in most lubricating and hydraulic oils.

NOTE: Your conditions may vary from our test parameters. Test this product under your conditions to determine its ultimate suitability.

WRITE-ON MARKERS



CLEAR FILM wraps around and protects write-on surface.

WRITE-ON SURFACE will accept pencil, pen or typewriter. Markings may be corrected immediately after typing or writing but become indelible after several hours.

HOW SUPPLIED

WRITE-ON WIRE MARKERS supplied in sets of 6 identical 8½" x 9¾" sheets suitable for typewriter or platen-feed printers. Markers are spaced in 1/6" multiples for easy typing. The write-on area is treated to absorb inks slowly so that corrections can be made if done at once. The write-on portion is protected by a clear vinyl overwrap when the marker is wrapped around a wire. Available in the following sizes:

CAT NO	W	L1	L2	Max. Wire Dia.	Markers/ Set
FWR1	0.50	0.5	0.1875	0.156 Inch	630

DEARBORN WIRE AND CABLE CO.

Sound, Computer and Instrumentation Cable

MULTI-CONDUCTOR OVERALL ALUMYLAR™ SHIELDED CABLE

ALUMYLAR™ SHIELD 100% COVERAGE

Color Code: Consult Factory for color charts 2 and 4.

Stock Put Ups:
100 ft.; 500 ft.; 1,000 ft.; bulk.

*Capacitance between conductors.

+Capacitance between one conductor and other conductor connected to shield.

Description —
- **Conductors:** Stranded tinned copper.
- **Insulation:** Color-coded polyvinylchloride.
- **Construction:** Conductors cabled with overall shield.
- **Shield:** Alumylar™ overall shield with #24 awg. stranded tinned copper drain wire.
- **Jacket:** Chrome polyvinylchloride.

Characteristics —
- **Temperature Range:** -20°C to +80°C.
- **Voltage Rating:** 300 Volts.
- **Resistant to:** Acids, alkalis, oil, moisture, solvents and fungus.

Features and Applications —
- Alumylar™ shield with drain wire offers ease of termination and high reliability.
- For sound, broadcast and instrumentation cable applications.

Approvals —
- Recognized under the components program of Underwriters' Laboratories, Inc.
- UL Style 2464.
- Passes VW-1 Vertical Flame Test.
- CSA S-R PVC approval.
- OSHA Acceptable. • Surface Printed.

DEARBORN WIRE AND CABLE CO.

MIL-W-16878D Teflon* Wire and Cable

Hookup Wire

TYPE E, 600 VOLT

Single conductor, stranded or solid silver plated copper, extruded TFE Teflon insulation. **Voltage rating:** 600 volts. **Temperature rating:** −65°C to +200°C.

TYPE EE, 1000 VOLT

Same as Type E, except for insulation thickness and voltage rating of 1000 volts.

TYPE E, 600 VOLT

Shielded Cables

- **TEFLON TAPE WRAP JACKET OVER SHIELD**
  Sintered wrapped white Teflon tape jacketed overall.
- **FEP EXTRUDED JACKET OVER SHIELD**
  Tough abrasion resistant extruded white FEP Teflon jacket overall.

Each conductor stranded silver plated copper, Type E extruded TFE Teflon .010″ color coded insulation. Braided silver plated copper shield, 90% coverage. **Voltage rating:** 600 volts. **Temperature rating:** −65°C to +200°C. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.

*Dupont T.M.

STYLE 1007, U.L. HOOK-UP WIRE

Voltage rating: 300 Volts. **Temperature rating:** −10°C to +80°C. 1/64″ Polyvinylchloride insulation over stranded tinned copper.

STYLE 1061, U.L. SEMI-RIGID BUSINESS MACHINE WIRE

Voltage rating: 300 Volts. **Temperature rating:** −10°C to +80°C. .009″ Polyvinylchloride insulation over solid or stranded tinned copper.

"TEW" FLAME RETARDANT, FR-1 STYLES 1015, 1028, 1283, 1284 600 VOLT, 105°C

The polyvinylchloride insulation used on this series has the necessary additives that enable the wire to pass the Vertical Flame Test as prescribed by the Underwriter Laboratories for this UL style. All this wire is imprinted with the symbol FR-1 indicating it is covered by the above specifications. See page 5 for high voltage Flame Resistant wire.

Thermoplastic Insulated Hookup Wire

U.L. AND C.S.A. LISTED

X-L POLYETHYLENE, U.L. STYLE 3173, 125°C — 600 VOLT

The Polyethylene insulation used on this series of lead wire is chemically cross-linked, which increases the moisture resistance, solvent resistance and aging characteristics. When momentary high temperatures caused by overloads or shorts occur, the insulation does not deform as quickly as if not cross-linked. Typical applications include small motors, control panels, dry transformers, etc. **Recommended maximum baking cycles:** 300°F for 24 hrs. — 325°F for 12 hrs. — 350°F for 8 hours.

DEARBORN WIRE AND CABLE CO.

Corona Resistant High Voltage Wire

200°C SILICONE HIGH TEMP, HIGH VOLTAGE WIRE

CONDUCTORS: All conductors are tinned copper, flexible stranding. Also available on special order with: silver plated copper conductors, nickel plated copper conductors and pure nickel conductors. Pure nickel increases rating to 260°C (500°F). **INSULATION:** High temperature, high voltage silicone rubber for easy stripping. High dielectric strength, flame retardant.

* UL STYLE NO. 3239 SILICONE RUBBER INSULATION 150°C, 10 KVDC THROUGH 40 KVDC

Note: All cables can be quoted with solid conductors or with extra flexible (rope lay) stranding in bare copper or tinned copper upon request.

Kynar Insulated Hookup Wire for Wire Wrap Applications

Especially suited for computer, business machine usage and other areas where space is limited. (For automatic point to point application.)

SPECIFICATIONS: The conductor is OFHC (Oxygen Free High Conductivity) Annealed Copper, Silver Plated.
The insulation is Kynar*, a Vinylidene Fluoride Plastic with unique characteristics.

TEST PROD LEAD WIRE

One conductor, tinned soft annealed copper, extra flexible stranding, covered with separator, and a color coded rubber insulation. Offers extreme flexibility and limpness to facilitate testing. Used as test leads for all types of electronic and electrical test equipment. Use the No. 18 gauge for heavy duty work such as television and therapeutic equipment testing.

Data and Audio Cable

INDIVIDUALLY SHIELDED MULTIPLE PAIRS

Stranded tinned copper conductors, (see table), insulated with high density color-coded *.010" Polyethylene, conductors twisted into pairs. Along with a †22 gauge stranded tinned copper drain wire, each pair is shielded with a Mylar supported aluminum foil shield. Covered with a Grey PVC jacket overall.

FOIL SHIELDED, PLASTIC JACKETED, MULTI-CONDUCTOR CABLE

Stranded tinned copper conductors, insulated with .015" thick (.025" on No. 16, .032" on No. 14) color coded Polyethylene insulation. Conductors are cabled, along with a 22 ga. (No. 20 drain on 18, No. 18 on 16, and No. 16 on 14) tinned copper stranded drain wire laid parallel, and are shielded with aluminum foil. Mylar backed shield. Gray PVC jacket overall.

PIONEERS IN IRRADIATED WIRE

JUDD WIRE is a diversified wire and cable company offering hook-up wire, multiconductor cable and many specialized products for the electronics industry. Products are available for applications in the temperature range of -55°C to 200°C.

In addition to conventional products JUDD WIRE has pioneered and specializes in the manufacture of irradiation cross linked wire and cable product lines.

JUDD WIRE's design engineers work daily on providing solutions to wire and cable problems. Our customer count on JUDD WIRE to meet their requirements for engineering, manufacturing, testing, and packaging everything from the smallest hook-up wire to complex, state of the art multiconductor cables.

Decades of experience and thousands of design efforts back the commitment of JUDD WIRE to engineer solutions for today and tomorrow's wire and cable needs.

JUDD WIRE APPLICATION GUIDE

- Airframe Wire
- Anticapillary Wire
- Apparatus Wire
- Audio Cable
- Braid Shielded Cable
- Cathodic Protection Cable
- Coaxial Cable
- Communication Cable
- Computer Cable
- Control Cable
- CSA Approved Wire & Cable
- Customized Cable
- Flame Retardant Wire & Cable
- Flat Cable, Bonded
- Flat Cable, Woven
- Foil Shielded Cable
- High Temperature Wire
- High Voltage Wire
- Hook-up Wire
- Instrumentation Cable
- Irradiated Wire & Cable
- Kynar Back Panel Wire
- Low Capacitance Cable
- Medical Cable
- Microphone Cable
- Miniature Cable
- Military Specified Wire & Cable
- Motor Lead Wire
- Multiconductor Cable
- Parallel Cable
- Paired Cable
- Radiation Resistant Wire & Cable
- Ribbon Cable
- RG Coaxial Cable

- SIS Wire
- Spiral Shielded Cable
- Tefzel Wire
- Telephone Cable
- Test Lead Wire
- Thermocouple Extension Cable
- Tinsel Wire
- Transformer Lead Wire
- Twin Lead Wire
- UL Approved Wire & Cable

PCA THE UNIVERSAL HOOK-UP WIRE

PCA is JUDD WIRE's tradename or an acronym for Polychloroalkene, which is an exclusive irradiation cross-linked polyvinylchloride insulation.

In order to process PVC by electron beam, it is necessary to improve the formulation of the plastic insulation to withstand the high energy electrons that bombard the wire insulation. Electron beam irradiation of the special PCA formula results in a superior thermoset that improves the inherent desirable characteristics of PVC.

Compare the product advantages of PCA with conventional non-irradiated PVC and learn why billions of feet are sold annually to a variety of industries which prefer the superior characteristics and cost savings of JUDD WIRE's PCA hook-up wire.

FLEXRAD 125® HIGH TEMPERATURE HOOK-UP WIRE

FLEXRAD 125 is a flexible irradiation cross-linked polyethylene wire with a high temperature rating of 125°C. This proven high temperature hook-up wire with a flame retardant rating of VW-1 (FR-1), offers excellent abrasion and solder resistance and an unusual ability to withstand exposure to many chemicals and solvents.

FLEXRAD 125 has a variety of uses in many industries. Its high temperature and flame retardant ratings recommend it as a replacement for many other UL and CSA approved wires. It is also approved for military applications under Specification Mil-W-16878, Revision E, slash sheets 14, 15 and 16.

Electrical and electronic component and equipment manufacturers now have an alternative to solve the problems encountered while using conventional PVC. The problems of a limited temperature range, solder iron shrinkback, creeping insulation during automated cut and strip operations, and poor abrasion resistance can now be eliminated by utilizing FLEXRAD 125.

Silver plated copper wire conductors must be used in order to withstand the high heat encountered when processing many fluorocarbon constructions. Fluctuations in the precious metals market over the past several years have caused many users of fluorocarbon insulated wires to review their use of these expensive constructions and seek comparable alternatives that provide similar quality.

FLEXRAD 125, processed with tinned copper conductors, provides an ideal alternative to fluorocarbon insulations for most applications where the maximum operating temperature does not exceed 125°C.

Production problems associated with fluorocarbon insulations, such as poor cold flow, low adhesion, poor cut through resistance, short lengths, limited flexibility, and poor potability, will be alleviated by specifying FLEXRAD 125.

CUSTOM CABLE DESIGN

JUDD WIRE can custom design, or manufacture to your specification, a broad spectrum of special cables. Cables are available without shielding, or with conventional braids, spiral braids, aluminum foils, or conductive plastics. JUDD WIRE's cable jacketing facilities extrude irradiation cross-linked compounds as well as vinyls, nylons, polyethylenes, polyurethanes, and 150°C fluorocarbons. JUDD WIRE is a completely integrated wire and cable manufacturing facility combining technology with superior customer service.

PCA cables offer all the advantages of JUDD WIRE's exclusive irradiation cross-linked polychloro alkene insulation in a multi-conductor package

Manufacturers of computers, data processing equipment, communication systems, and test equipment can use the superior characteristics and cost saving benefits of PCA cables.

RS-232C CABLES BUILT FOR A LIFE TIME OF WEAR & TEAR!

The drawing shows how our CS or CDS series cables are built to last a lifetime. Optimum shielding is achieved by use of a conductive-Mylar-foil or copper braid and a metal cover for the wires under the hood.

In addition, these cables are built to take years of abuse by encapsulating and fusing all twenty-five wires and the connector pins together resulting in an indestructible integral component. We know that almost all cable defects stem from breaks or shorts in the cable end, but this is now totally eliminated — forever!

All data cable comply with EIA RS232C standards and have 25 conductors solder connected through to both **D-Sub Connectors.** CS & CDS series cable assemblies are designed to meet or exceed the new FCC requirements for maximum RFI/EMI protection under Docket 20780.

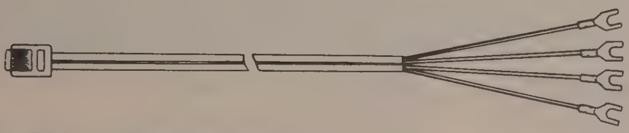
MODULAR TELEPHONE CORDS

Mura offers a complete combination of modular telephone cord colors, terminations and designs. We also welcome the opportunity to work with you on modifications in developing cord assemblies to your specification.

All products are manufactured to FCC requirements under the license of Western Electric. Modern manufacturing automation and technique assures a high quality and uniformly made product. Each production lot undergoes a MIL-STD-105D single sample inspection at General inspection level II, AQL 1.0% for performance and 1.25% for appearance.

If you are looking for a professional supplier with consistency, economy and reliability, call us.



TCO Modular Line Cord

FACILITIES/SERVICES

CUSTOM ENAMELING

In our custom enameling facilities we enamel most metals and shapes from .072" to .0004" diameter. Insulations are available in special colors, builds and bondable overcoats. Our short run production capabilities provide an alternative to large factory minimums and long deliveries.

DRAWING AND ANNEALING

The addition of drawing and annealing equipment rounds out our custom manufacturing facilities. These new capabilities allow us to fabricate most metals from .064" through .0004" diameter in the quantity you require.

WIRE SHAPING

MWS operates facilities for producing flat, square and rectangular wire. Flat ribbon sizes range from .007" to .075". Shaped wires are available in most metals, bare or enameled.

WIRE SPOOLING

In-house spooling facilities handle every size wire from heavy square and rectangular to ultrafine. This enables you to buy the quantity of wire you need on the spool size you want.

TESTING LABORATORY

Expanded test facility provides complete chemical, physical and electrical test data for applicable military, federal, commercial and customer standards. We can provide you with fast and accurate answers to your technical questions.

CUSTOM PACKAGING

MWS has designed custom molded, individual foam shipping containers for our 2½", 3", 5" and 6" spools. These containers eliminate damage in shipping, and later prevent breakage in storage and production line handling.

In Los Angeles Area: (818) 991-8553.

Our goal is to have the wire you need, when you need it. That's why MWS stocks the largest inventory of specialty wires in the country. Over 12,000 types and sizes.

If we don't have the wire you need in stock, we'll custom manufacture it. Our short run capabilities provide an alternative to large factory minimums and long deliveries.

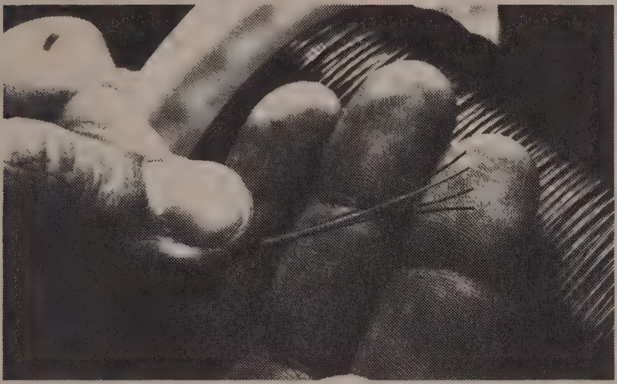
®Multifilar is a registered trademark of MWS Wire Industries.

MULTIFILAR® MAGNET WIRE



Whenever two or more magnet wires travel together, MULTIFILAR magnet wire is worth a closer look. This parallel-bonded, color-coded magnet wire offers many benefits for both small and large users.

Engineers should specify it when they're concerned with space, weight and reliability. Where consistent capacitance and impedance characteristics are needed, MULTIFILAR magnet wire outperforms windings where two separate magnet wires are used.

Production users benefit from increased layer winding speeds, reduced labor and handling. Color-coding assists in conductor identification and reduces termination errors.

MULTIFILAR magnet wires are custom produced by MWS. We guarantee flat, parallel construction in an array of sizes 16 AWG and finer, with up to 20 conductors in some sizes.

Both round and flat constructions are available. Color-coded conductors are available in most insulations with up to 10 different colors in some sizes. Conductor separation is also guaranteed with certain bonding mediums.

For an even closer look, send for a free sample, specifications and ordering information. Production minimums are as low as 500 feet.

GENERAL PRODUCT INFORMATION

Code No.	INSULATIONS	Thermal Rating	NEMA MW1000	MILW583 Class/Type
1	**Polyurethane***	105°C	MW2C	CL-105 T thru T-4
2	**Poly-Nylon***	130°C	MW28C	CL-130 B thru B-4
4	**Modified Polyester**	180°C	MW30C	CL-180 H thru H-4
5	**Armored Polyester**	200°C	MW35C	CL-200 K thru K-4
6	**Solderable Polyester***	180°C	MW26C	CL-155
7	**Formvar**	105°C	MW15C	CL-105 T thru T-4
8	**Pyre M.L.†**	220°C	MW16C	CL-220 M thru M-4

* Solderable Insulations †Trademark of DuPont

Code No.	Bonding Films (operating temp.)	Solvents for Conductor Separation
1	**Polyvinyl Butyral** (105°C)	Alcohol Isopropyl or Denatured
2	**Polyamide (Nylon)** (105°C)	None
3	**Epoxy** (130°C)	Acetone

BOND THICKNESS STANDARDS		
AWG Size	Thickness	Tolerances
16-20	.0007"	±.0002"
21-28	.0005"	±.0002"
29-32	.0004"	±.0001"
33-36	.0003"	±.0001"
37-41	.0002"	±.0001"
42-finer	.0001"	+.0001" -.0

NOTE: The above referenced insulations, bonding films, and bond thickness are standard. Other insulations, films and thicknesses are available upon request. CONDUCTOR SEPARATION: Bonding films can be softened and removed by immersion in appropriate solvents. Some mechanical action (i.e. wiping wires following immersion in solvent) may be required to affect conductor separation.

PART NUMBER ORDERING SYSTEM

Make your own 8 digit part number by following the guidelines outlined below.

EXAMPLE **B-2 3 8 1 1 1 1**

B	2	3 8	1	1	1	1
Product letter for all multifilar magnet wire	Number of conductors. Use ( ) for more than 9 conductors	AWG gauge sizes	Insulation thickness 1= single 2=heavy 3=triple 4=quadruple	Insulation type "See above chart for correct code number"	Color coded conductors 0=none required 1=red/green 2=green/clear 3=red/green/clear *9=special — call for color code	Bonding film "See above chart for correct code number"

EXAMPLE = 2 Conductors—38AWG Single Polyurethane—Red/Green—Butyral Bond
* Denotes Change

If you have any questions regarding how to specify a correct part number for the **multifilar** wire you need, don't hesitate to call us. Our salesmen or engineering staff will be happy to assist you.

THE SOLUTION

What are you looking for in a cable? Reliability? Flexibility? Miniaturization? Reducing interconnection costs? If you have a cable or cable assembly problem, we can solve it.

We're electronic cable specialists. National Electric Cable designs, tests, produces and improves cables, connectors and complete cable assemblies for specific applications. Our experience has taught us that advanced cable technology not only influences system design but frequently determines whether a system is functionally and economically viable and reliable.

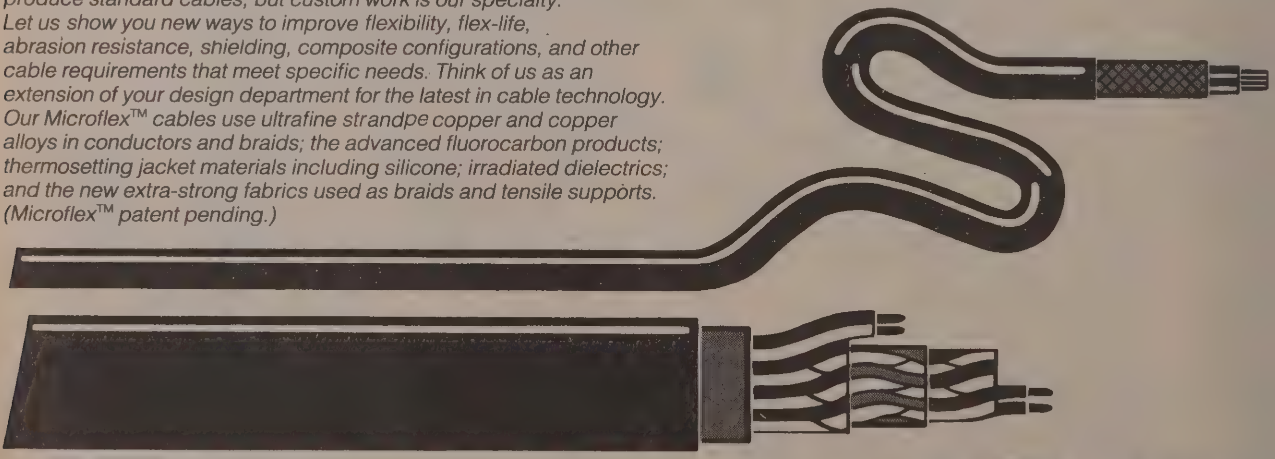
Our engineers can help solve difficult interconnect problems with existing products, or help create special products to fit your needs.

Electronic Cables

As experienced manufacturers of cables, we know that all your designs cannot be met by the standard cables available. We can produce standard cables, but custom work is our specialty.

Let us show you new ways to improve flexibility, flex-life, abrasion resistance, shielding, composite configurations, and other cable requirements that meet specific needs. Think of us as an extension of your design department for the latest in cable technology.

Our Microflex™ cables use ultrafine strandpe copper and copper alloys in conductors and braids; the advanced fluorocarbon products; thermosetting jacket materials including silicone; irradiated dielectrics; and the new extra-strong fabrics used as braids and tensile supports. (Microflex™ patent pending.)

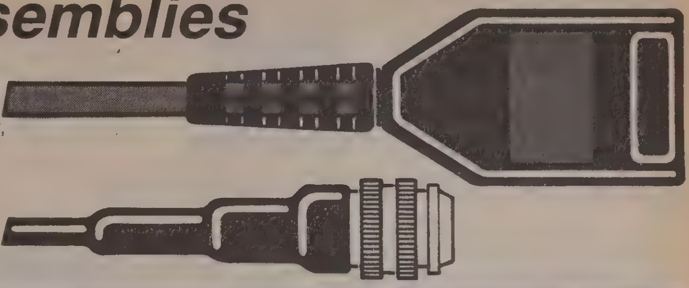


NATIONAL ELECTRIC CABLE

A NATIONAL APPLIED SCIENCE COMPANY

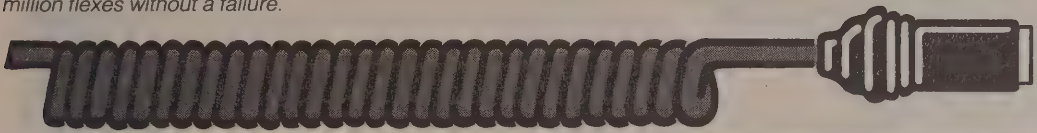
Electronic Cable Assemblies

We design and produce exceptionally high quality cable assemblies for high tech products ranging from flight simulators to medical diagnostic machines. Assemblies involving molded connectors, stringent military standards, microminiature soldering, special Reflex™ strain/flex relief systems, and other processes requiring advanced interconnection knowledge are typical of the ongoing projects of National Electric Cable. Tell us your needs and we'll build you a prototype.



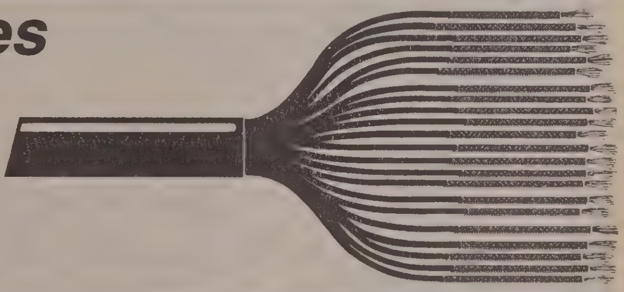
Coiled Cord Assemblies

Helix™ coiled cords from National Electric Cable are produced in standard or made-to-order lengths. Connectors range from D-subminiature and AMP^{R} MODU to DIN with molded backshells. Helix™ cable assemblies are designed to perform through one million flexes without a failure.



Micro-miniature Coaxes

Ultrasmall cables designed for maximum flex-life and flexibility are the specialty of National Electric Cable's design department and manufacturing facilities. Micro primaries are insulated with Teflon^{R} Coaxes (28-34 AWG) are of Tex-L 88® low-density Teflon, foamed Teflon, full-density Teflon and irradiated cross-linked foamed polyolefin (50-125ohm) with braid, tape or spiral shields. All of our Microflex™ cable assemblies are precisely terminated.



Standard Cable Assemblies

We have assembled more than a million feet of RS-232C cables. Choice of connectors for RS-232C assemblies include black plastic (for economy), metalized plastic and all-metal (for 100% shielding), and molded (for durability and aesthetics). Our double shielded IEEE-488 assures protection from RFI/EMI. Molded backshell and Reflex™ strain-flex relief protects termination and extends life of assembly. All cables can conform with Class A of the FCC regulations against RF interference in data processing equipment. Guaranteed reliability, fast delivery and competitive pricing on standard or made-to-order lengths.

As a manufacturer of wire and cable products . . . with warehouses on both East and West coasts, National Wire & Cable is ready to fill your immediate needs. Choose from our standard lines of wire or cable . . . OR let us design and custom manufacture exactly what you require for your application.

Our wire inventory is now over 160 million feet, and our 500 different standard multi-conductor cables total in excess of 1.3 million feet!

When you call National Wire, you'll find we are especially well equipped to handle your large as well as minimal requirements. If our "standard" items won't meet your application, we have the wire inventory, the machinery, the expertise to come up with exactly what you need. 105,000 square feet of manufacturing area and our expert engineering staff are at your disposal!!! All cable components are produced within our own facility in order to assure complete quality control.

Review the following catalog pages. If you need some assistance with your specific requirement, call our factory direct, or call our representative nearest you. See Manufacturers and Sales Office Directory Yellow Pages.

U/L Listed Wire

CSA Listed Wire

- Wires listed by the Underwriter's Laboratories, Inc. for operation in an air or an oil environment. U.L. File #E35793.
- Wires listed by the Canadian Standards Association for radio or electronic uses. CSA File #LR-20482 & LR-32511.

U/L Style 1061

Appliance wiring material available as FR-1 rated 80-degree C Service. .009" semi-rigid vinyl insulation U/L rated: 300-volt service. Meets Mil-W-16878D Type B, and CSA S-R PVC. Also available with solid conductors.

Miniature Signal & Control Cables Single Conductors (NX Series)

(NX1922SJ shown)

IN STOCK

MIL-SPEC U.L. LISTED COMPUTER GRADE STYLE 2343

For light duty, gray jacketed version of these cables in the U.L. Style 2464, see NQ Series on following pages.

National Wire & Cable Corporation manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010″ wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type B. Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. LISTED STYLE 2343 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.)

U.L. and C.S.A. certification furnished only when requested.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 5000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 45. to 70. pf/ft. at 1. kc, depending on gauge and position.
Insulation Leakage:	200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.
Sheath Leakage:	10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.
Temperature Range:	Suitable for continuous use from −40°C. to +105°C. (U.L. Service limited to +80°C.)
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6. cable diameters from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.

MULTICONDUCTOR STOCK CABLED SINGLES

Cond: 22, 24 are 7 strand; 20 AWG is 19 strand

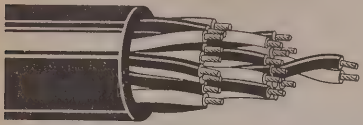
Miniature Signal & Control Cables Twisted Pairs (NXP Series)



(NXP1924J shown)

National Wire & Cable Corporation manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010" wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type B. Insulated for 600 volts working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per table below.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. LISTED STYLE 2343 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.)

U.L. and C.S.A. certification furnished only when requested.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Denotes U.L. Style 2344.

IN STOCK MIL-SPEC

U.L. LISTED COMPUTER GRADE STYLE 2343 & 2344
For light duty, gray jacketed version of these cables in the U.L. Style 2464, see NQ Series on following pages.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 5000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 45. to 70. pf/ft. at 1. kc, depending on gauge and position.
Insulation Leakage:	200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.
Sheath Leakage:	10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.
Temperature Range:	Suitable for continuous use from −40°C. to +105°C. (U.L. Service limited to +80°C.)
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6. cable diameters from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.

Impedance: (24. AWG pairs) **Balanced: 87. ohms ±5%**
Unbalanced: 52. ohms ±5%

Heavy Duty Signal & Control Cables Single Conductors (NW Series)

IN STOCK

MIL-SPEC U.L. LISTED — STYLE 2343 & 2344

(NW1918SJ shown)

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cable. Conductors are stranded tinned copper with 1/64″ wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type C.* Insulated for 1000 volts working voltage. Color coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape serve over cable bundle. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078, and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C vinyl meeting MIL-I-631 Class F. All materials are self-extinguishing and fungus resistant. All cables are U. L. LISTED STYLE 2343; rated 80°C. (Higher temp. ratings apply to any non-U.L. service.) U.L. certification furnished only when requested.

Standard Putups: 100, 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

For applications in extreme environments, consult factory for alternative sheath materials.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 8000 volts AC RMS, 60 cps.
U.L. Voltage Rating:	300 volts RMS AC (appliance use). 600 volts RMS AC (electronic use).
Military Voltage Rating:	1000 volts RMS.
Capacitance:	Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on gauge and position.
Insulation Leakage Res.:	200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Usable Temp. Range:	Suitable for continuous use from +105°C to −55°C.
Cold Bending Capability:	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C. For continuous flexing applications consult factory.

* Insulated wires also meet U.L. style 1007 and CSA type TR-64.
† Denotes U.L. Style 2344.

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

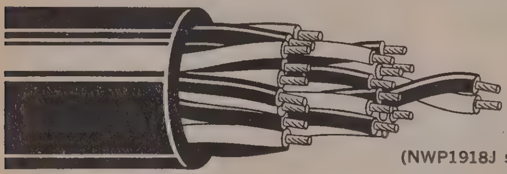
Heavy Duty Signal & Control Cables Twisted Pairs (NWP Series)



(NWP1918J shown)

IN STOCK MIL-SPEC

U.L. LISTED

Identical to National's NW-Series Cables except offered as twisted pairs.

National Wire & Cable Corporation manufactures a complete line of multiple pair control cables. Conductors are of tinned copper strand with 1/64″ vinyl primary insulation for use up to 105° C per MIL-W-16878D Type C. Insulated for **1000** volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per table below.

All pairs are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black vinyl plastic per MIL-I-631; or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene at added cost and only available for non-U.L. applications).

SHIELDED CABLES

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 8,000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance wire to wire for a pair ranges from 27. to 40. mmfd/ft. Capacitance from both wires tied together measured to all else in common ranges from 35. to 60. mmfd/ft. dependent on gauge and position. Overall shield has negligible effect on W-W capacitance.
Insulation Leakage Res.:	200. megohms / 1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms / 1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Usable Temp. Range:	Suitable for continuous use from +105°C to −55°C.
Cold Bending Capability:	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C. For continuous flexing applications consult factory.

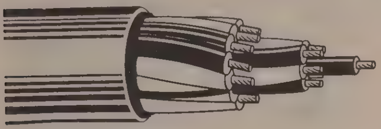
Miniature Signal & Control Cables Single Conductors (NQ Series)

EXTRA FLEXIBLE — GRAY PVC JACKET



(NQ1928J shown)

GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield. Stocked with braided shields.

Conductors are stranded tinned copper with .010″ wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U. L. listed style 1061.* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. Coded pairs use the same sequence as type NXP and NWP.

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 3 of our master catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. listed style 2464.**

Military certification furnished only when requested.

All materials are flame retardant and fungus resistant.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Wire also meets MIL-W-16878 type B, rated 600 volts, +105°C.

MIL-SPEC & U.L. LISTED STYLE 2464

TECHNICAL DATA (all cables)

Insulation breakdown voltage:	Greater than 3000 volts AC RMS, 60cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position.
Insulation Leakage:	200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable.
Sheath Leakage:	10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground.
Temperature Range:	U.L. rating: +80°C per U.L. style 2464. Military: Continuous use from −40°C to +105°C.
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°. For continuous flexing applications consult the factory.
Foil Shielded Cables:	The nominal overall diameter of foil shielded cables will be .006″ greater than the non-shielded cables of the same conductor count and wire size.
Characteristic Impedance: (NQP Paired Cables)	Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types.

MULTI-CONDUCTOR STOCK CABLED SINGLES

Conductor sizes 28, 26, 24, 22 are 7 strand. All others 19 strand.

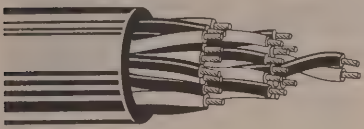
Miniature Signal & Control Cables Twisted Pairs (NQP Series)

EXTRA FLEXIBLE — GRAY PVC JACKET



(NQP1928J shown)

MIL-SPEC & U.L. LISTED **STYLE 2464**

GRAY PVC JACKET

National Wire & Cable Corporation manufactures a complete line of highly flexible micro-miniature low-voltage instrument control cable. These are available as cabled pairs or singles, with optional overall shield of either foil with drain or a braided shield. Stocked with braided shields.

Conductors are stranded tinned copper with .010″ wall of tough extruded polyvinyl chloride primary insulation, rated for 300 volt use at +80°C under U. L. listed style 1061.* All are color coded using ten standard colors plus white with stripes per MIL-STD-681. Coded pairs use the same sequence as type NXP and NWP.

Conductors are planetary cabled and helically laid for optimum flexibility, with a barrier under braids. Shielded cables have a tinned copper braid of 90% coverage per MIL-C-7078, with braid angles below 40° for easy pushback; or have a 100% coverage foil shield in intimate contact with a drain wire for easy termination. See Section 3 of our master catalog for relative shield effectiveness.

Outer jacket is highly flexible abrasion-resistant gray polyvinyl chloride thermoplastic, meeting the requirements of U.L. listed style 2464.**

Military certification furnished only when requested.

All materials are flame retardant and fungus resistant.

Standard Putups: 500 and 1000 ft. No-deposit reels. For shorter quantities or specific lengths, consult factory.

* Wire also meets MIL-W-16878 type B, rated 600 volts, +105°C.

** Jacket material is military rated for +105°C; meets MIL-I-631, Class F.

TECHNICAL DATA (all cables)

Insulation breakdown voltage:	Greater than 3000 volts AC RMS, 60cps.
Capacitance:	Nominal capacitance from a wire to all else in a cable ranges from 25 to 45 pf/ft at 1kc, depending on gauge and position.
Insulation Leakage:	200 megohms/1000 feet minimum @ 500VDC from conductor to all else in cable.
Sheath Leakage:	10 megohms/1000 feet minimum @ 500VDC from shield or conductor group through sheath to ground.
Temperature Range:	U.L. rating: +80°C per U.L. style 2464. Military: Continuous use from –40°C to +105°C.
Bending Characteristics:	All cables are suitable for flexing to a circle diameter of 6 cable diameters from +105°C to –20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at –40°. For continuous flexing applications consult the factory.
Foil Shielded Cables:	The nominal overall diameter of foil shielded cables will be .006″ greater than the non-shielded cables of the same conductor count and wire size.
Characteristic Impedance: (NQP Paired Cables)	Ranges from 150 ohms to 45 ohms, dependent on wire size (AWG), geometry and drive method. Consult our technical staff for data on specific cable types.

LOW VOLTAGE COMPUTER CABLE

THE D-200 SERIES CABLES ARE MULTIPLE-PAIR FLEXIBLE CABLES DESIGNED FOR TRANSMISSION OF DIGITAL PULSE SIGNALS BETWEEN A COMPUTER AND ITS PERIPHERAL EQUIPMENT.

DESIGN FEATURES OF THE D-200 SERIES DIGITAL DATA CABLE

Unlike conventional flexible cable construction, the primary features offered by the D-200 series data cable are the high and accurately controlled characteristic impedance of every pair, regardless of its position in the cable and special geometry chosen to reduce crosstalk.

ADVANTAGES

1. Less crosstalk and noise from mismatched loads, due to proper matching.
2. Uniform light loading on drivers allows direct I.C. drive, accurate prediction of current demands from power supply, and driver power dissipation.
3. Proper load match reduces re-flection and inversion noise where driver end is not matched to line. (Typical of TTL.)
4. Special geometry and pair construction provides exceptionally close capacitance balance between pair wires, reducing differential crosstalk.

USAGE

We recommend use of balanced drive and differential-input line receivers for lowest crosstalk and best pulse reproduction, utilizing the 110 ohm balanced impedance of the pairs. With such a system, TTL speeds have been used on D-200 cable at 1 mc data rates over 1000 ft.

Where the system is single-ended drive and receive, all pairs exhibit the 78 ohm impedance. Since these line receivers cannot discriminate between noise and the desired signal, crosstalk limits the cable distance over which transmission is reliable. Typical runs for DTL having 50 ns risetimes are 200 ft. Where risetimes can be slowed to longer than 100 ns, run lengths are practical to 500 ft. Without differential line reception, runs over 500 ft are not recommended for D-200 cable due to external noise aspects.

The D-210 series cable are recommended for high noise or long-run application. (Utilizing individual shields.)

Although use of balanced drive and differential line reception will avoid most noise problems, there are some installations where the expected external noise is unknown but assumed to be very great. Here, the use of data cables having individually-shielded pairs may be considered as conservative engineering practice. The assurance of a lower received noise may justify the increased size, cost and rise-time.

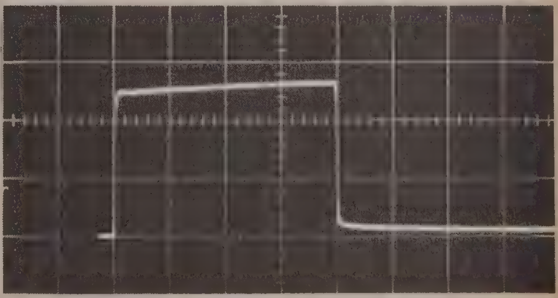
For these high noise-long run applications, Dynatronic Cable Engineering Corp has developed the D-210 series data cables. Electrical performance is essentially the same as the D-200 series cables, which use only an overall shield. △ An overall tinned-copper shield braid may be specified on either series by the suffix -RF on the part number. Standard D-200 shield is aluminum-mylar foil.

For runs of 1000-5000 ft. or where extra-fast output pulse risetime is required, we offer the D-220 series cable: a larger version of the D-200 series having improved transmission properties with sufficient mechanical strength for long pulls in conduit. Consult factory for technical data.

PULSE TRANSMISSION LOSS in D-series data cables causes a moderate amplitude loss, with definite rounding of the leading and trailing edges from 50% to 90% amplitude. The photos below (for a 1.25 megabit clock rate) show typical waveforms. The D-220 and D-222 series cables offer even lower losses than the D-200 or D-210 cables for long-run or fast-clocked applications.

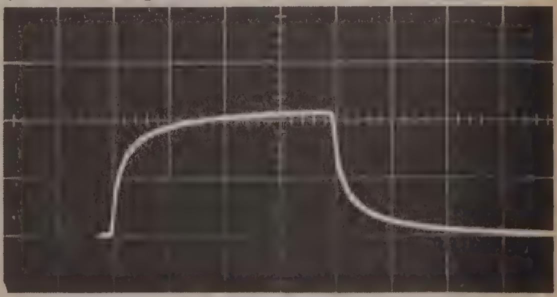
Contact our factory engineering staff for detailed pulse-shape versus distance information, or for special applications.

INPUT PULSE



Horizontal: 200. ns/cm
Vertical : 2. volts/cm

OUTPUT PULSE at 500.FT.



Horizontal: 200. ns/cm
Vertical : 2. volts/cm

We invite your telephone inquiries for technical information on data cables. Contact Mr. Frank Mortley or Mr. Kerr Hanson in our Engineering Dept.

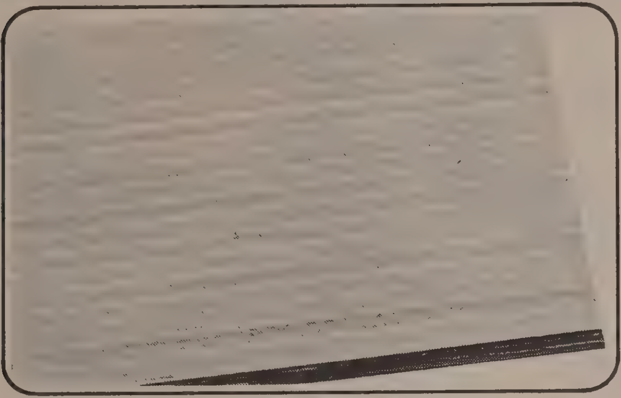
We invite your telephone inquiries for technical information on data cables. Contact Mr. Frank Motley or Mr. Ken Hanson in our Engineering Dept.

NATIONAL WIRE AND CABLE CORPORATION

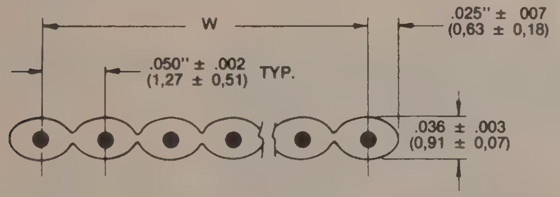
LAMINATED FLAT CABLES

Dept. EM, 136 San Fernando Rd., Los Angeles, Calif. 90031
Phone (213) 225-5611, TWX: 910-321-4155, Fed. Stock Code H4-04569

GREY PVC LAMINATE
(NFG Series) UL Listed Style 2651



National Wire & Cable Corporation offers a wide variety of laminated flat cables, utilizing grey PVC insulation laminated around uninsulated stranded tinned copper conductors. The conductors are on .050" centers which make the cables compatible with most insulation displacement connectors (IDC). The cables are marked with one red edge to indicate conductor number one, and the laminate is applied in a manner to allow for simple conductor separation. Packaged in 100 foot lengths. Other lengths available on special request.



TECHNICAL DATA

Conductors:	28 AWG 7 x 36 Stranded Tinned Copper
Insulation:	Grey PVC
Cond. Spacing:	.050 ± .002
Cable Thickness:	.036 ± .003
Voltage Rating:	300V
Temp. Rating:	105 C
Impedance:	105 ohms Nom
Capacitance:	14 pf/ft Nom
Propagation Delay:	1.4 ns/ft Nom

COLOR-CODED, CLEAR LAMINATE
(NFC Series) UL Listed Style 2697

National Wire & Cable Corporation offers a wide variety of flat cables, utilizing clear PVC insulation, laminated over preinsulated, stranded tinned copper conductors manufactured to UL Style 1061. The conductors are on .050" centers which make the cables compatible with most insulation displacement connectors (IDC). The preinsulated wires are color-coded for easy identification, and the clear laminate is applied in a manner to allow for simple conductor separation. Packaged in 100 foot lengths. Other lengths available on special request.

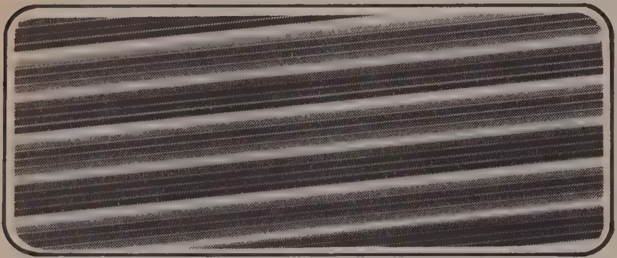
BONDED AND WOVEN FLAT CABLES



National Wire and Cable Corporation offers a wide selection of bonded flat cables by bonding together preinsulated, stranded tinned copper conductors. This cable series is listed as Cable Style 2697, and can utilize any stranded PVC style of insulated wires. Stocked with UL1061 conductors, from 16–30 AWG. Other component styles available on special request. Color-coded BROWN through BLACK as shown below. Available in any number of conductors, providing total width does not exceed 4 inches. Packaged in 100 foot lengths.

BONDED FLAT CABLES

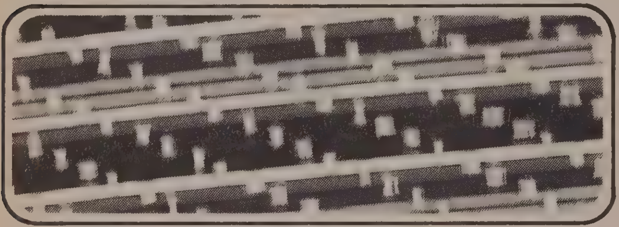
No. of Conductors
Series Identification

NOTE: Certain gauges are available only in one specific stranding. Consult sales department when placing order.



National Wire and Cable Corporation offers a wide selection of woven flat cables by weaving together preinsulated, stranded tinned copper conductors. The weave is a twill type utilizing nylon, which allows conductors to move under flexing, creating a highly flexible cable. Stocked with UL1061 conductors from 16–30 AWG. Other component styles available on special request. Color-coded BROWN through BLACK as shown below. Available in any number of conductors providing total width does not exceed 3 inches. Packaged in 100 foot lengths.

Coiled Instrumentation Cables for Custom Applications

Our new, automated coiling department is ready to design, and manufacture coiled instrumentation cables for your specific requirements. These cables are available in any number of conductors, and in gauge sizes 18 through 30 AWG. They are designed for high reliability, ultra-flexible long-life applications, as encountered in computer interconnects, bio-medical electronics, and optimum retractability, and general control cable use. Call our technical staff to discuss your custom application!

Heli-Tube®

Spirally Cut Expandable Plastic Cable Harness

Exceptional Features and uses include . . .

- **BUNDLES WIRES, CABLES, or HOSES FIRMLY BUT ALLOWS FLEXIBILITY**
- **RESISTS ABRASION & INSULATES**
- **DAMPENS VIBRATION**

This Heli-Tube is recognized under the Component Program of Underwriter's Laboratories, Inc.

Standard Materials	Max. Oper. Temp.	Min. Oper. Temp.	Abrasion Resistance Lower Better mg loss per M cycles	Effect of Solvents	Effect of Acids	Effect of Alkalies	Flammability	Mil Spec. & Approvals
CLEAR POLYETHYLENE Low cost material . . . ideal for general applications. Not affected by ordinary solvents and extremely resistant to abrasion.	215°F 101°C	-105°F -76°C	22	None below 122°F 50°C	None	None	Flammable	Fed. Spec. LP390 MIL I 631D MIL P 26692
BLACK POLYETHYLENE Ultraviolet-resistant for outdoor use. This has the same qualities as Clear Polyethylene and, in addition, contains an ultraviolet absorber which permits it to be used in direct sunlight for long periods of time.	215°F 101°	-105°F -76°C	20	None below 122°F 50°C	None	None	Flammable	Fed. Spec. LP390 MIL I 631 D MIL P 26692
FIRE-RESISTANT POLYETHYLENE SELF EXTINGUISHING, yet has lower cost than Nylon or Teflon. Made of duPont White Rulan. (Also available in Black).	200°F 93°C	-1°F -19°C	27	None below 122°F 50°C	None	None	UL 94V-0	
NYLON Natural - Offers combination of light weight, temperature range, and high abrasion resistance. Self-extinguishing. Recommended for use in enclosed environments where possibility of fire exists. Even at temperatures beyond its operating range, or on exposure to flame, Nylon does not give off any toxic or irritating by-products. Nylon is six times as strong as Polyethylene.	250°F 121°C	-121°F -85°C	6-8	None	Satisfactory except for strong acids	None	UL 94V-2	MIL M-20693A Type I MIL M 22096 LP 410A
BLACK NYLON Has the same characteristics as Nylon Natural, but, in addition, has an ultraviolet absorber which permits use in direct sunlight. This Nylon is heat stabilized.	250°F 121°C	-121°F -85°	6-8	None	Satisfactory except for strong acids	None	UL 94V-2	MIL M-20693A Type II MIL M 22096 LP 410A
TEFLON Natural (TFE) - Has the widest temperature range. Can be used from -450°F to 500°F. Chemically inert. Non-flammable.	500°F 260°C	-450°F -85°C	7	None	None	None	Non-Flammable	MIL M-20693 AMS 3651B AMS 3653 AMS 3654 AMS 3655

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

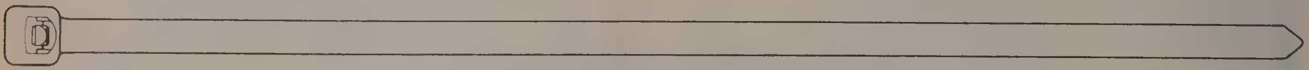
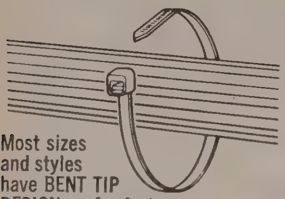
PANDUIT® wiring products

- Engineered with quality features designed to increase productivity and reduce your total installed cost:
  - — Low threading force
  - — No sharp edges
  - — Finger grip tip
  - — Bent tip

  Plus consistent quality assured by tests conducted by military and independent testing labs.
- Complete line of cable ties, clamps, push mount and marker ties. Meet all applicable Military Specifications. Recognized by U.L.
- All nylon, one-piece construction — up to 250 lbs. minimum loop tensile strength.
- Standard color natural nylon.

CABLE TIES





Most sizes and styles have BENT TIP DESIGN — for faster installation

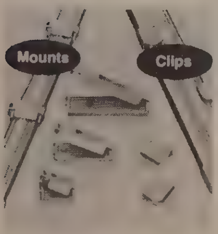
MOUNTING ACCESSORIES (used without cable ties)



Mounts
Clips

FLAT CABLE MOUNTS & CLIPS

• Convenient, One-Piece • Releasable • Adhesive Backed

FLAT CABLE MOUNTS

- Three sizes to secure 1″, 2″ and 3″ wide flat cable
- Variable stacking height up to 11/64″
- Fast installation; releasable and reusable for easy revisions
- Screw mounting type also available

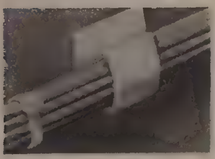
FLAT CABLE CLIPS

- Securely retain any flat cable up to 11/64″ stack height; one size for any width
- Integral serrations grip cable, prevent slipping
- Easy mounting; ready access to cable for revisions

CLINCHER™ ADJUSTABLE RELEASABLE CLAMP

This clamp provides a way of securing bundles from .19″ up to .69″ diameter. Available with adhesive backing or screw applied with one #6 screw.

ARC.68-A-14 Adhesive Backed
ARC.68-S6-14 Screw Applied



ADHESIVE BACKED CORD CLIPS

Three sizes to hold cords, tubing or wire bundles up to .62″ dia. Are easily snapped into or out of the clips.

ACC19-A Up to .19″ dia.
ACC38-A Up to .38″ dia.
ACC62-A Up to .62″ dia.

ADHESIVE BACKED "J" CLIPS

These low profile "J" Clips retain cords, wires, or tubing and are available in five sizes. The design allows easy insertion yet holds with high retention force.

CABLE TIE INSTALLATION TOOLS

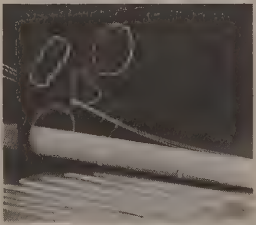
Panduit's complete line of cable tie installation tools allows you to choose the proper tool to meet all your cabling requirements — no matter what your application.

All the tools are lightweight, easy to operate and provide flush cut-off every time. Because they are fast and efficient, they speed cable tie installation and lower your total installed cost.

PANDUIT®

GROMMET EDGING

Eliminates abrasion of wire insulation passing through holes cut in metal panels.



Meets Mil. Std. MS-21266 • 100% Nylon

PANDUIT® wiring products

PANDUCT®

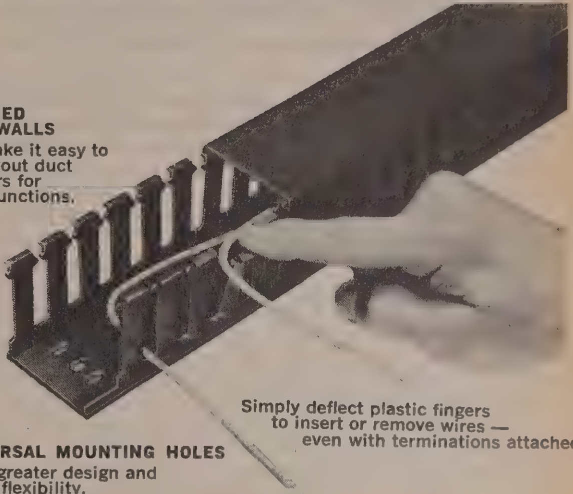
PLASTIC WIRING DUCT—TYPE "E"

- Reduce your total installed costs with patented snap-in slot design:
  - —Holds breakout wires captive while providing complete accessibility for adding or removing wires — even with terminations attached.
  - —Result: your total cost is reduced during initial installation, wire tracing, trouble shooting and circuit revisions.
- Non-slip cover prevents vibration slippage, yet easy to install or remove.
- Standard color: Light gray. White and dark gray available. Standard length: 6 ft.
- Complete variety of accessories available for installation.
- Also available:
  - Type "S" Solid Wall Duct
  - Type "D" Round Hole Duct
  - Type "NE" & "NS" Chlorine-Free, High-Temperature Duct

All "E", "S", and "D" Duct are available with optional adhesive backing.

Applicable sizes are recognized under Components Program of Underwriters' Laboratories, Inc.

MEETS J.I.C. REQUIREMENTS



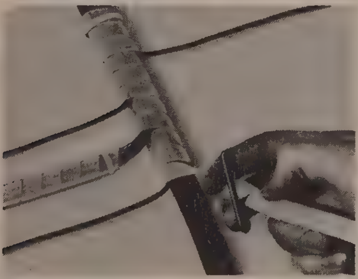
SCORED SIDEWALLS
— make it easy to breakout duct fingers for "T" junctions.

Simply deflect plastic fingers to insert or remove wires — even with terminations attached.

UNIVERSAL MOUNTING HOLES
— for greater design and layout flexibility.

Nominal Duct Size W x H	Nominal Duct Size W x H	Nominal Duct Size W x H
.5 x .5	1 x 2	2 x 4
.5 x .62	1 x 3	2.5 x 3
.5 x 1	1 x 4	3 x 1
.5 x 1.25	1.5 x 1	3 x 1.25
.5 x 1.75	1.5 x 1.5	3 x 2
.5 x 2	1.5 x 2	3 x 3
.75 x .75	1.5 x 3	3 x 4
.75 x 1	1.5 x 4	3 x 5
.75 x 1.5	2 x 1	4 x 1.5
.75 x 2	2 x 1.5	4 x 2
1 x 1	2 x 2	4 x 3
1 x 1.25	2 x 2.5	4 x 4
1 x 1.5	2 x 3	4 x 5

PANDUIT® SPIRAL WRAPPING



- Versatile. Wires can enter or leave at any point. Follows path of wires easily.
- Reusable.
- Available in five standard materials: Polyethylene (Natural, Weather-Resistant & Flame Retardant), Nylon and TEFLON*.
- Available in five sizes for bundle diameters up to 5″.
- Easily installed with tool supplied in each package.

* Registered Trademark of E. I. Dupont De Nemours & Co.

INTERNATIONAL

1. Detachable cordsets:

Detachable cordsets offer flexibility for both the equipment manufacturer and user.

The manufacturer can meet most international cord requirements with just one product model that is equipped with an IEC 320/CEE-22 connector. (For more information on IEC 320 connectors, please ask for the PCC primary power connector data sheet.) Then a cordset with the mating IEC 320 connector and the appropriate international plug can be specified at the time the product is shipped to the end user. The table below describes seven standard PCC cordsets.

International cordsets have some limitations. First, current ratings are limited to 6 amps by European agencies. The limitation is derived from restrictions placed on the IEC 320 connector. Equipment which draws more than 6 amps at 220 VAC should be equipped with permanently installed power cords described below. (For applications up to 10 amps, some countries allow the use of a new replaceable connector which is patterned after the IEC 320 unit but which is polarized to prevent insertion of the 6 amp models. For more information, ask about our cordsets for "Hot" applications and the "W" series of connectors.)

Secondly, addition of the connector adds to the cost of the power cord. Typically, the IEC 320 connector which is molded to the cord adds 50-75 cents to the cord cost. A panel mounting IEC 320 receptacle is about 50 cents. Both prices assume purchases in the 100-piece range. Clearly, a trade-off between added cost and manufacturing flexibility has to be made.

TABLE 1

86537000	Black (Note 3)	"	"	6A	UL recognized; CSA certified
86536000	Black (Note 3)	"	"	6A	DEMKO

Note 1: Approved by VDE, OVE, KEMA, CEBEC, NEMKO, SEMKO, FEI, UTE.
Note 2: Agency approvals not usually required for cordsets in Italy.
Note 3: Conductors are color-coded blue, brown, green/yellow.
Note 4: Approved by ASTA, BSI, BASEC.

2. Unterminated IEC 320/CEE-22 cords:

With some products, export volume does not justify stocking different cordsets for even major foreign markets. In other situations, sales volume in Germany and the U.K. may be large enough to justify unique cordsets, whereas export volume to Switzerland, Denmark, Australia, and Israel, for example, are not sufficient.

In both of these cases, the equipment manufacturer can specify the model 2500 unterminated IEC 320/CEE-22 cord for use in low-volume markets. Cordsets described in the previous section would be specified for high-volume markets.

The disadvantage to this approach is, of course, that your customer or sales people must attach a suitable power plug to the cord. The decision on this issue will depend on the cost of stocking an additional cordset vs. the size of the affected market segment and the cost of field termination. (Call us for our brochure on international plugs and sockets.)

TABLE 2

86525000 Universal

Part Number	Color	Length	Conductor Size	Current Rating	Approval(s)
86525000	Black	2.5 meters (98.4 inches)	0.75 mm²	6A	VDE, OVE, KEMA, CEBEC, NEMKO SEMKO, FEI, EANSW, SEV, UTE

Note: Free end on model 86525000 is stripped 50/5 mm.

Strain Reliefs

Power supply cords all require some type of mechanical mounting device which positively secures them to an enclosure or piece of equipment. PCC strain reliefs provide an effective cable grip with or without an integral bend relief. Furthermore, the strain relief comes with a neoprene compression gland which prevents moisture intrusion along the cord when used with round cordage and when the cord and strain relief have been selected and assembled properly. UL recognized and CSA certified.

WITHOUT BEND RELIEF

PCC Part No.	Cordage O.D. Range
85810010	.187-.312 in. 4.7-7.9 mm
85810020	.231-.394 in. 5.9-10.0 mm
85810030	.270-.480 in 6.9-12.2 mm

WITH BEND RELIEF

Cords and Cordsets

3. International power supply cords:

Permanently installed power supply cords are specified when the equipment requires more than 6 amps at 220-240 VAC. Generally, for applications in which the current requirement is 6-10 amps, 1.0 mm² conductors are specified. For applications rated at 10-16 amps, 1.5 mm² conductors should be specified. For comparison purposes, 16 AWG is 1.23 mm² and 14 AWG is 1.95 mm². (Note: the limit for portable equipment in Switzerland is 10 amps; in the U.K., 13 amps. In most other European countries, the limit is 16 amps. In equipment that draws greater amounts of current, the equipment must be permanently connected to the power system.)

Power supply cords may also be used to reduce component costs, especially in very high-volume production. This is particularly true in Class II (two wire, ungrounded) appliances. The model 86532000 cord described below is intended for these applications.

The power supply cords illustrated below are supplied with standard cut and strip terminations (50/5 mm) on the free end. Panel Components will customize these cords to meet your requirements.

Note 4:	This cord complies with French requirements and is pending approval at UTE.
Note 5:	Cut blunt.

4. Other alternatives cordage and shielded cords:

Cordage: When neither a molded power supply cord or cordset is suitable, international cordage with appropriately sized conductors may be the best alternative. This cordage is tested and certified by VDE to HAR (HD-21) standards.

TABLE 4

CABLE **Universal**

Part No.	Cond. (mm²)	Max. Curr.	O.D.	Jacket Color	Jacket Mater.	HD-21 Number	AWG Equiv.

Shielded cords and cordsets: Emission of conducted radio frequency interference is now subject to rigid controls in most industrialized countries. Since the power supply cord itself can act as an effective antenna at some frequencies, some designers specify shielded power cords in place of or in combination with RFI power line filters. VDE approval only on 86527000, 86528000, 86529000 and 86530000. UL recognition and CSA certification on 86534000.

TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

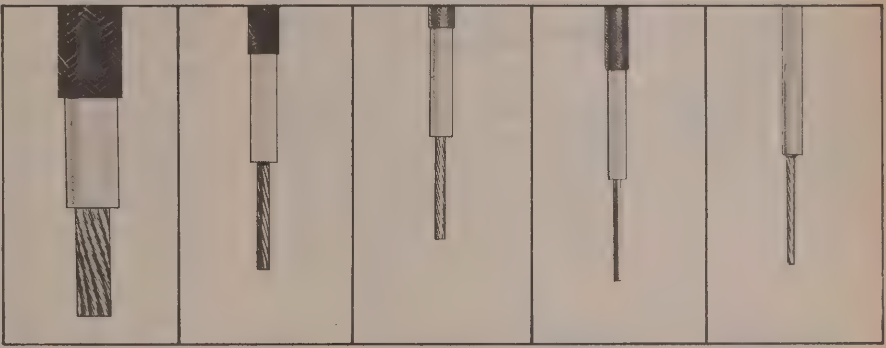
YIG yttrium iron garnet

ROWE KNOWS WIRE AND CABLE

High Temperature silicone rubber wire and cable.

Rowe's silicone rubber insulation offers better performance and longer life than natural rubber or thermoplastic insulation. For example, our high temperature wire and cable is: heat stable to 200°C and flexible to −90°C, unaffected by severe thermal cycling, ultraviolet radiation, ozone or corona, resistant to ageing, moisture and chemicals, highly flame retardant and tough enough for unbraided lead wire.

Choose from a variety of UL listed styles or ask us to design one that meets your special requirements.



Power cable for 600 volts +.

Appliance & fixture wire for 300 volts +.

Apparatus & motor lead wire for 600 volts +.

Lighting wire for 600 volt transmission with solid tinned copper conductor, silicone rubber insulation and fiberglass braided covering.

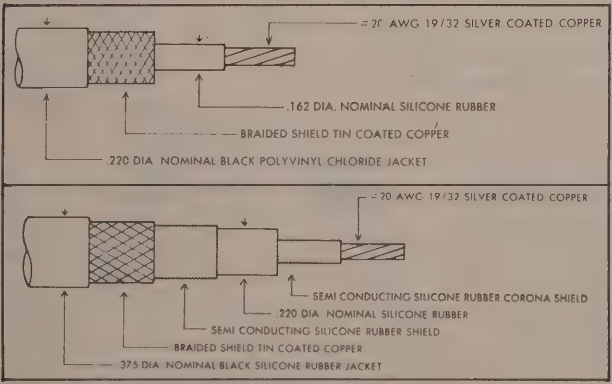
High Temp NB especially suited for motor lead wire. No braided covering necessary. Tinned copper, stranded or solid tinned copper conductor. Silicone rubber insulation in 10 colors.

All the above wire and cable feature tinned copper, stranded conductors, silicone rubber insulation, with fiberglass braided covering.

Hi-V cable, wire, and interconnections.

Well suited for a variety of industrial and military applications including accelerators, radar, x-ray, ECM and others. Hi-V combines semi-conducting, corona-suppressing layers with thermosetting materials for noise-free, corona-free cable and wire. It is available in single conductor, coaxial and triaxial configurations.

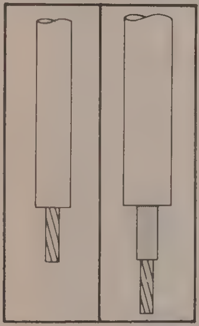
COAXIAL.



#20 AWG 19/32 SILVER COATED COPPER
.162 DIA. NOMINAL SILICONE RUBBER
BRAIDED SHIELD TIN COATED COPPER
.220 DIA NOMINAL BLACK POLYVINYL CHLORIDE JACKET
#20 AWG 19/32 SILVER COATED COPPER
SEMI CONDUCTING SILICONE RUBBER CORONA SHIELD
.220 DIA NOMINAL SILICONE RUBBER
SEMI CONDUCTING SILICONE RUBBER SHIELD
BRAIDED SHIELD TIN COATED COPPER
.375 DIA NOMINAL BLACK SILICONE RUBBER JACKET

Features: 5-100KV minimum voltage ratings, 8-22 AWG corona-free and ozone resistant, 80°C to 200°C operating temperature range. Excellent for high pulse applications and for use with Rowe high voltage miniature coaxial connector series, G series connectors, Hi-pulse 40KV series and Rowe R75 connector series. All exhibit good corona-free RFI-EMI capabilities and have excellent flexibility properties.

SINGLE CONDUCTOR, UNSHIELDED.



Features: 5-60 KVDC minimum voltage ratings, 10-20 AWG corona-free, ozone-resistant material, 200°C operating temperature, excellent flexibility at high and low temperatures.

DATA CABLE

COMPUTER CABLES

WHY USE A SHIELDED CABLE?

Although RS 232 and 449 standards do not call specifically for shielding, it is advisable to use shielded cable to insure signal integrity, thus minimizing possible interference conditions from outside sources.

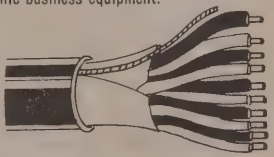
UNSHIELDED MULTICONDUCTOR

EXTENDED DISTANCE DATA CABLE

OVERALL FOIL SHIELD

APPLICATION: For RS 232C or 449 Applications. Used for runs over 50 ft. Low capacitance eliminates need for costly modems or line drivers.

UL Style: As internal wiring or external interconnection in Class 2 Circuits of electronic equipment such as computers and electronic business equipment.



Conductors: Stranded tinned copper

Insulation: Polyethylene

Construction: Paired

Shield: 2 mil aluminum polyester foil

Jacket: Chrome vinyl

Drain: 24 AWG stranded tinned copper

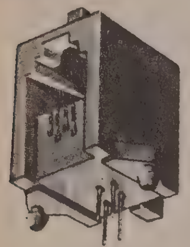
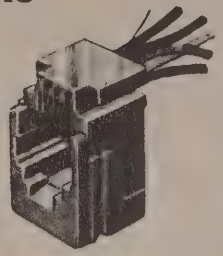
MODULAR TELEPHONE COUPLERS, PLUGS, ADAPTORS, JACKS, CORDS & CABLE ASSEMBLIES

The products illustrated and listed are only a small representation of the full range of items available.

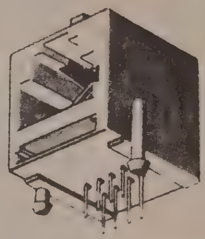
MODULAR JACKS



616 Type



623P4,6



641 Type

A full line of modular jacks with PC terminals or wire leads are available for OEM applications. Shogyo products are manufactured to the highest industry standards and conform to specifications of the leading OEMs.

CABLE & CORD ASSEMBLIES, COILED OR STRAIGHT — LINE, EXTENSION & HANDSET

Modular to Modular Line Cord — Modular line cord with modular plugs on each end.

Modular Plug with Spade Ended Cord — Modular line cord with modular plug on one end, four color-coded lugs on other end.

Modular Single Jack Extension Cord — Modular extension cord with modular plug on one end and modular single jack on the other end.

Modular Duplex Jack Extension Cord — Modular extension cord with modular plug on one end and a modular duplex jack on the other end.

Coiled Handset Cord — Modular plugs on both ends, fits all standard modular telephones.

ADAPTORS, COUPLERS, RETROFIT PLUGS

Modular Adaptor — Converts standard 4-prong jack to new modular jack.

Modular Duplex Adaptor — Converts single modular jack into dual modular jack.

Modular Duplex Adaptor 4 & 8 Wires — Permits quick connection of one telephone and one automatic dialing device to the same line without changing the existing installation.

Modular Inline Coupler — Allows two modular cords having modular plugs to be connected together to lengthen the line cord.

Modular Retrofit Plug — Adapts standard x-wire spade lug connections to modular plug.

Modular Triplex Adaptor — Serves as dual extension adapter. Permits the use of one telephone and one answering device or dialer in the same line.

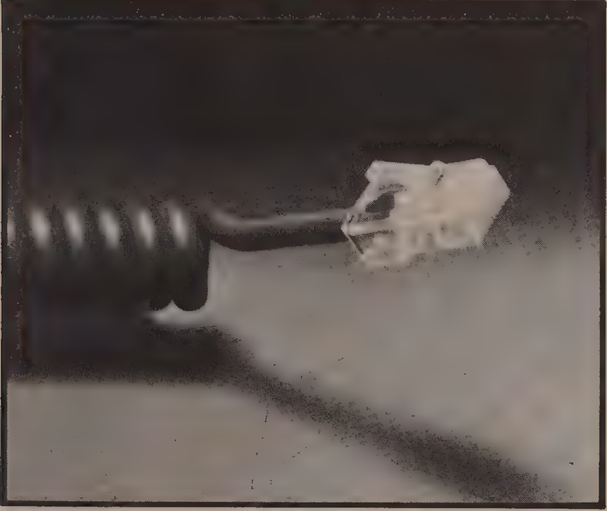
MODCOM-C® SHIELDED CORD SETS

VIRGINIA PLASTICS

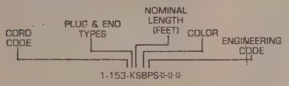
P.O. BOX 4577
ROANOKE, VIRGINIA 24015-0577
PHONE 703-985-3811
TWX 710-870-0440



ORDERING PROCEDURE FOR CORD SETS

(1) SPECIFY CORD TYPE AND END TERMINATIONS.
(2) CALLOUT LENGTH AND OUTER JACK COLOR.
(3) SPECIFY STRAIN RELIEFS REQUIRED IF ANY.
(4) STATE CONDUCTOR TYPE AND SPECIFY WIRING SEQUENCE FROM TERMINATION TO TERMINATION.

TO ORDER STANDARD CORDS:
AN 8 FOOT FOUR CONDUCTOR CABLE WITH AN EIGHT POSITION KEYED PLUG ON ONE END AND A SIX POSITION LINE PLUG ON THE OTHER END IN SATIN COCOA BROWN.



CORD CODE
PLUG & END TYPES
NOMINAL LENGTH (FEET)
COLOR
ENGINEERING CODE
1-153-KS8PS***

TO ORDER COILED CORDS:
THE SECOND DIGIT OF THE STYLE CODE INDICATES A COILED CORD. IF IT IS A 5, CALL OUT OVER ALL LENGTHS OF BOTH PIGTAILS.
